

General Services Administration

## NOTICE OF SOURCES SOUGHT

**SYNOPSIS:** General Service Administration (GSA) has found it necessary to remove and replace all vinyl siding, inspect sheathing, install breathable wall vapor barrier, install new lap style siding and trim. Scrape and prep canopy all columns, and old window sashes in brick area, paint entire building. During the 2025 refresh project it was found that water has slowly been seeping into the facility.

The contractor is expected to perform all tasks included in the statement of work and in compliance with the latest 2026 PBS Core Building Standards. A supervisor must be onsite at all times while work is being performed. The GSA Project Team and CQM will monitor construction closely to ensure that all the tasks in the statement of work are accomplished.

The Contractor will be performing their work in an active Federal Building. The Contractor will need to perform work during normal hours unless it is disruptive to building occupants. If that is the case, then the contractor should be prepared to work after normal business hours.

**LOCATION:** Orient Land Port of Entry (LPOE) Building (ME0751BT), 632 Boundary Road, Orient, Maine 04471

**PERIOD OF PERFORMAMANCE:** Performance will begin one (10) business day after the Contracting Officer issues the Notice to Proceed (NTP). The contractor's period of performance for obtaining security clearances and doing submittals is 60 days from date of NTP. The contractor's period of performance for construction is estimated to be 240 days after the notice to proceed.

**AWARD METHOD:** The contract will be a Firm-fixed Price contract for GC services. This procurement will be conducted as a negotiated procurement in accordance with FAR Part 15.

Formal source selection procedures will not be utilized. The award will be made on the basis of Lowest Price Technically Acceptable (LPTA).
