

STATEMENT OF WORK

TITLE OF PROJECT: USCG MSRTW Pier-Side and Underway Training Vessels - FY26 Q2/Q3

1. General Information

The U.S. Coast Guard Maritime Security Response Team West (MSRTW) is seeking a contractor to provide passenger ferry vessels for day and night pier side and underway training exercises. These vessels will serve as operational platforms for tactical and mission-readiness training essential to MSRTW operations. The vessels must be located in San Diego California.

2. Scope of Work

The contractor shall provide ferry vessels that meet the specified operational requirements and facilitate training in the following areas:

- Close-quarter combat tactics utilizing marking cartridge weapon systems.
- Use of Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) personal protective equipment (PPE) and training aides.
- Maritime CBRNE threat response.
- Marshalling procedures for personnel and equipment.
- Canine detection team operations.
- Tactical communications, including encrypted and real-time coordination systems.
- Precision fire exercises within designated safe zones.
- Boat maneuvering for high-speed and tactical navigation.
- Boat insertion and extraction training.
- Helicopter insertion and extraction training on designated deck areas.

3. Vessel and Facility Requirements

3.1 Vessel Requirements

The contractor shall provide passenger ferry vessels that meet the following specifications:

- U.S.-flagged vessels compliant with federal maritime regulations.
- Vessel length: Between 150 and 250 feet.
- Passenger capacity: Between 500 and 1,200.
- Open deck space: Minimum of 12 feet by 12 feet for helicopter operations.
- Freeboard:
 - 15 to 30 feet freeboard for small boat hook and climb operations.
 - Minimum 5 feet of unobstructed flat freeboard for personnel boarding.
- At least one vessel must be capable of transiting at least 10 nautical miles offshore from Point Loma, CA.
- Stable and reinforced deck areas for high-intensity tactical training.
- Multiple embarkation points for rapid personnel deployment.
- Onboard power sources capable of sustaining extended operations.

- Emergency response and damage control systems.
- Enclosed bridge with modern navigation and communication systems.

3.2 Internal Space Requirements

- Multiple large internal spaces suitable for:
 - Classroom-style instruction with tables and chairs.
 - Tactical and operational briefings.
 - Staging and gear preparation.
- Various internal areas including:
 - Secure storage for equipment.
 - Adequate restroom facilities for extended training periods.
 - Stairwells and hallways for movement and clearance drills.
- Dedicated areas for:
 - Bridge operations.
 - Engine and machinery compartments.
 - Passenger seating that can be reconfigured for training.
 - First-aid and medical response stations.

3.3 Facility and Security Requirements

- Vessels shall be moored at a secured pier facility within San Diego County with restricted public access during training events.
- The contractor shall provide secured parking and storage space for government vehicles and training equipment at the pier facility.

3.4 Operational & Crew Requirements

- Vessels must be capable of operating underway in the South Bay of San Diego and at least 10 nautical miles offshore Point Loma, California.
- Equipped with VHF broadcasting communications equipment.
- Crew must have experience supporting military and law enforcement training exercises.
- Crew must be trained in damage control, emergency evacuations, and first aid.
- Ability to conduct night operations and low-visibility navigation.

4. Performance Period

The vendor must be able to provide pier-side and underway passenger ferry vessels in accordance with the dates and times outlined below.

4.2 Underway Dates:

- 17 March 2026: 1630-2200; 500 passenger capacity ferry vessel operating 10 Nautical Miles offshore Point Loma, CA

- 19 March 2026: 1630-2200; 500 passenger capacity ferry vessel operating 10 Nautical Miles offshore Point Loma, CA
- 24 March 2026: 1630-2200; 500 passenger capacity ferry vessel operating 10 Nautical Miles offshore Point Loma, CA
- 25 March 2026: 1630-2200; 500 passenger capacity ferry vessel operating 10 Nautical Miles offshore Point Loma, CA
- 09 April 2026: 1830-2330; 500 passenger capacity ferry vessel operating 10 Nautical Miles offshore Point Loma, CA

4.3 Pier Side

- 07 April 2026: 0800-1600; 500 passenger capacity ferry vessel pier side, San Diego, CA

5. Submission Requirements

Interested contractors must submit a proposal demonstrating compliance with the specifications outlined in this Statement of Work. Proposals should include:

- Detailed vessel specifications.
- Documentation of past performance supporting similar military or law enforcement training operations.
- Security measures ensuring restricted access during training events.
- Crew qualifications and training certifications.

6. Evaluation Criteria

Proposals will be evaluated based on:

- Compliance with vessel and facility requirements.
- Experience and qualifications of contractor personnel.
- Security measures to protect sensitive training operations.
- Cost-effectiveness and overall value to the government.

The U.S. Coast Guard reserves the right to conduct site inspections and request additional documentation to verify compliance with the contract requirements.
