

REQUEST FOR INFORMATION
Multispectral Camouflage Overgarment
Product Manager Combat Service Support Equipment (PM CSSE)
Program Manager Combat Support System (PM CSS)

General Information

Document Type	Request for Information (RFI)
Request for Information Number	M67854-26-I-5407
Posted Date	Wednesday, March 11, 2026
Response Date	Wednesday, April 22, 2026
NAICS Code	314999 – All weather Miscellaneous Textile Product Mills
PSC or FSC Classification Code	1080 - Camouflage and Deception Equipment

Description

This Sources Sought announcement is to assist the United States Marine Corps (USMC), Marine Corps Systems Command (MCSC), Program Manager Combat Support Systems (PM CSS), Product Manager Combat Service Support Equipment (PdM CSSE) to identify potential vendors capable of developing a Multispectral Camouflage Overgarment (MCO) to meet USMC requirements. The MCO is intended to provide individual signature management for Marines by mitigating detection across the visual (VIS), near infrared (NIR), and short-wave infrared (SWIR) spectrums as well as suppress thermal signatures in the mid-wave infrared (MWIR) and long wave infrared (LWIR) to reduce the likelihood of detection by thermal sensors. MCO will serve as the individual signature management solution for all Marines in training and on deployment. The system is not intended for routine garrison wear.

Below are key requirements:

Function

- The overgarment shall provide multispectral concealment by reducing probability of detection across the Visible (VIS), Near-Infrared (NIR), Short-Wave Infrared (SWIR) spectrum and suppress thermal signatures in the Mid-Wave Infrared (MWIR) and Long-Wave Infrared (LWIR) ranges.

Spectrum	Threshold (Ground)	Objective (Ground)	Threshold (Aerial)	Objective (Aerial)
Visual (400-700nm, day only)	600m from ground sensor to Marine	50m from ground sensor to Marine	1000m from aerial sensor to Marine	10m from aerial sensor to Marine
NIR (700-900nm, night only)	600m from ground sensor to Marine	50m from ground sensor to Marine	1000m from aerial sensor to Marine	10m from aerial sensor to Marine
SWIR (900-2500nm)	2000m from ground sensor to Marine	50m from ground sensor to Marine	1000m from aerial sensor to Marine	10m from aerial sensor to Marine

MWIR (3-5μm, day and night)	2000m from ground sensor to Marine	600m from ground sensor to Marine	5000m from aerial sensor to Marine	2000m from aerial sensor to Marine
LWIR (8-14μm, day and night), Temperature	600m from ground sensor to Marine	50m from ground sensor to Marine	1000m from aerial sensor to Marine	10m from aerial sensor to Marine

- The overgarment shall provide a minimum of 90 (T), 365 (O) days of operational use, in the intended environments/conditions, while still meeting the thresholds, and a shelf life of at least 3 years, (T) greater than 5 years (O) with no degradation of performance, mold, fungus growth, or separation.
- The overgarment shall maintain full functionality and performance standards undergoing 25 laundering cycles (T) and up to 50 laundering cycles (O) using standard, non-specialized detergents.
- The overgarment, shall be fully capable in variable high humidity in a basic climate (78F to 95F, 74% to 100% Relative Humidity (RH) and hot humid climate (88F to 105F, 59% to 88% RH) conditions (T), and in temperatures ranging from -40 to 140 degrees Fahrenheit to include polar, humid temperature, dry and maritime environments (O).
- The overgarment shall be compatible with fielded Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) protection clothing and equipment (T=O)

Form

- The overgarment shall be a single-piece, generously-sized draped design constructed to provide full-body coverage, including individual gear and equipment. It shall be donned and doffed over existing uniforms and gear within 15 seconds (T=O). Multiple overgarments shall be physically linkable to expand coverage.
- The overgarment shall weigh $\leq$ to 3.5 pounds (T); $\leq$ 2.0 pounds (O).

Fit

- The overgarment shall fit the 2d percentile female and the 98th percentile male Marine with their Individual Approach March Load and standard combat equipment. (T=O)

Deliverables

Upon completion of the limited user evaluation, a fielding decision will be made for the initial delivery orders to reach the initial operation capability (IOC) of 13,000 in Fiscal Year (FY) 27. Full operation capability (FOC) of 61,222 is expected to be achieved by FY 30 based on current production capacity. The MCO will transition to a sustained program of record in FY 31. Final quantities and timelines are subject to validation and funding availability.

Delivery Date

The Government anticipates 25 weeks/5 months lead time for this item.

Government Furnished Property (Equipment/Materials/Information/Computer Utilization)

Responses

Interested parties may identify their interest and capability by sending responses regarding this requirement to Marine Corps Systems Command via e-mail to Ms. Ebony King at ebony.king@usmc.mil no later than Wednesday, April 22, 2026 by 5:00 p.m. EST. The U.S. Government will not pay for any information or administrative cost incurred in response to this Notice. All costs associated with responding to this Notice will be solely at the expense of the interested party.

(1) Section 1 of the white paper shall provide administrative information. Administrative information shall include at a minimum:

- Name, mailing address, overnight delivery address (if different from mailing address), phone number, fax number, and email of designated point of contact (POC).
- Business website
- Business type and number of employees (large business, small business, small-disadvantaged business, 8(a)-certified small-disadvantaged business, HUBZone small business, woman-owned small business, very small business, veteran-owned small business, service-disabled veteran-owned small business).
- SAM.gov Unique Entity ID (UEI) and Contractor and Government Entity (CAGE) Code (if your company has these).
- Recommended contracting strategy (Commercial, Noncommercial, Firm Fixed price, Cost).
- The facility security clearance of the vendor or the ability to acquire one (if available but not required).
- Do you have a viable Federal Supply Schedule that can support this procurement? If so, provide your GSA Schedule information to include the category of products provided.
- Do you have a current contract with other DoD Activities? If so, provide associated information.

Section 1 of the white paper shall be limited to one page.

(2) Section 2 of the white paper shall provide information on the products and services each vendor can offer with respect to the Multispectral Camouflage Overgarment. Responders shall address the following in their RFI response:

- See Function, Form and Fit section of the RFI.

Questions

Any questions for clarification may be emailed to Ebony King at ebony.king@usmc.mil no later than Thursday, April 2, 2026, by 5:00 p.m. EST. Verbal questions will NOT be accepted. Questions shall NOT contain proprietary or classified information. An unattributed list of questions and answers will be published at the same web location of this Sources Sought Announcement.

THIS IS A REQUEST FOR INFORMATION ONLY. This RFI has been issued solely for information and planning purposes in accordance with Federal Acquisition Regulation (FAR) Clause 52.215-3. It does not constitute an Invitation for Bid (IFB), a Request for Proposal (RFP), a Request for Quotation (RFQ), or an indication that the Government will contract for any of the items and/or services contained in this notice. This RFI does not commit the Government to contract for any supply or service whatsoever. Further, the Marine Corps is not seeking proposals at this time and will not accept unsolicited proposals. Responders are advised that the U.S. Government will not pay for any information or administrative costs incurred in response to this RFI; all costs associated with responding to this RFI will be solely at the interested party's expense. Responses may not include classified material. Not responding to this RFI does not preclude participation in any future solicitation if one is issued. If a solicitation is released, it will be synopsized on the SAM.Gov (<https://sam.gov/>) website. It is the responsibility of the potential offerors to monitor SAM.gov for additional information pertaining to this requirement.
