

REQUEST FOR INFORMATION (RFI)

Air Data Processor (ADP) 6610-01-432-8459FX

The Government is conducting market research to identify potential sources that possess the repair data, expertise, capabilities, and experience to meet qualification requirements for repair of the F-15 Air Data Processor, NSN: 6610-01-432-8459FX, P/N: 2118952-5. The level of security clearance in this requirement has not been determined. The Repair Method Code (RMC) /Repair Method Suffix Code (RMC/RMSC) for these items is R3/C; where RMC/R3 is repair, for the second or subsequent time, directly from the actual manufacturer and RMSC/C signifies that this part requires engineering source approval by the design control activity in order to maintain the quality of the part by the approved source. The approved source retains repair knowledge, or technical data, that is not readily available to the Government. The data or knowledge is essential to maintaining the quality of the part. The Government does not own or have access to the data for these items. The ADP monitors the flow of air pressure and adjusts the ramps as necessary. The ADP was developed to improve the accuracy and reliability for the Air Data Computer and Electronic Air Inlet Controller (EAIC) and functions by providing more accurate sensors and allowing expanded and selectable Source Error Corrections (SEC). The Government did not provision for a competitive acquisition package including the full repair technical data or acquisition of any test equipment that would be required to perform organic repairs. The ADP is a military-unique item that must be manufactured to the Honeywell drawing specification, PS68-870192 Rev B, Drawing 2118952 Rev C. The drawing specification, PS68-870192 Rev B, Drawing 2118952 Rev C, contains extremely stringent design requirements and must meet exact form, fit, function and interface requirements for effective F-15 mission accomplishment. Therefore, a commercial item will not satisfy the unique requirements of this acquisition.

Contractor shall furnish all material, support equipment, tools, test equipment, and services. The contractor is responsible for providing, maintaining, and calibrating all test equipment required for repair. Contractor furnished material or parts used for replacement shall equal or exceed the quality of the original material or parts.

The known source for this requirement is

Honeywell International
21333 N 19th Ave.
Phoenix, AZ 85027-2764
Cage 5Y043
Type: Large Business

Contractors/Institutions responding to this market research are placed on notice that participation in this survey may not ensure participation in future solicitations or contract awards. The government will not reimburse participants for any expenses associated with their participation in this survey.

FAR 52.215-3 REQUEST FOR INFORMATION OR SOLICITATION FOR PLANNING PURPOSES (OCT 1997)

(a) The Government does not intend to award a contract on the basis of this solicitation or to otherwise pay for the information solicited except as an allowable cost under other contracts are provided in subsection [31.205-18](#), Bid and proposal costs, of the Federal Acquisition Regulation.

(b) Although “proposal” and “offeror” are used in this Request for Information, your response will be

treated as information only. It shall not be used as a proposal.

(c) This solicitation is issued for the purpose of conducting market research to identify potential sources that possess manufacturing data, expertise, capabilities, and experience to meet the requirements for qualification and production of the Parts Kit, Electronic.

INSTRUCTIONS:

- 1. The document(s) below contain a description of the ADP requirement and a Contractor Capability Survey. The Survey allows Contractors to provide their company’s capability.
- 2. If, after reviewing these documents, you desire to participate in the market research, you should provide documentation that supports your company’s capability in meeting these requirements. Failure to provide documentation may result in the government being unable to adequately assess your capabilities. If you lack sufficient experience in a particular area, please provide details explaining how you would overcome the lack of experience/capabilities in order to perform that portion of the requirement (i.e., teaming, subcontracting, etc.)
 - a. Identify any areas of work that your organization believes should be broken out exclusively for Small Business.
- 3. Both large and small businesses are encouraged to participate in this Market Research. Joint ventures or teaming arrangements are encouraged.
- 4. Questions relative to this market survey should be addressed to the PM.

**Air Data Processor (ADP)

PURPOSE/DESCRIPTION

The Government is conducting market research to identify potential sources that possess the expertise, capabilities, and experience to meet qualification requirements to repair the ADP. The main function of the ADP is to monitor the flow of air pressure and adjusts the engine inlet ramps. If the right-side ADP fails, the left-side takes over operation of both sets of ramps.

NOUN	NSN	P/N
Air Data Processor (ADP)	6610-01-432-8459FX	2118952-5

This requirement is for repair services. Our repair services strategy is a five-year requirements contract (basic year plus (4) one year ordering periods) and will continue into fiscal year, FY32. The projected quantities will be 60 ea per ordering period. The Government’s needs for repair services are required in order to support current quarterly demand rates to support field level demand only. This item is not being replaced at Programmed Depot Maintenance. F-15 Aircraft must be supported until approximately 2045.

CONTRACTOR CAPABILITY SURVEY
Air Data Processor (ADP)

Part I. Business Information

Please provide the following business information for your company/institution and for any teaming or joint venture partners:

- Company/Institute Name:
- Address:
- Point of Contact:
- CAGE Code:
- Phone Number:
- E-mail Address:
- Web Page URL:
- Size of business pursuant to North American Industry Classification System (NAICS) Code:
[811210.](#)

Based on the above NAICS Code, state whether your company is:

- Small Business (Yes / No)
- Woman Owned Small Business (Yes / No)
- Small Disadvantaged Business (Yes / No)
- 8(a) Certified (Yes / No)
- HUBZone Certified (Yes / No)
- Veteran Owned Small Business (Yes / No)
- Service Disabled Veteran Small Business (Yes / No)
- Central Contractor Registration (CCR). (Yes / No)
- A statement as to whether your company is domestically or foreign owned (if foreign, please indicate the country of ownership).

Responses must be received no later than close of business **Thursday, 26 March 2026**. Please E-mail responses and questions to Madison Norris, madison.norris@us.af.mil, with copy to Joseph Jones, joseph.jones.81@us.af.mil.

Part II. Capability Survey Questions

A. General Capability Questions:

1. Describe briefly the capabilities of your facility and nature of the goods and/or services you provide. Include a description of your staff composition and management structure.
2. Describe your company's past experience on previous projects similar in complexity to this requirement. Include contract numbers, a brief description of the work performed, period of performance, agency/organization supported, and individual point of contact (Contracting Officer or Program Manager).
3. Describe your company's experience in repairing the Part Number/NSN listed above that make up the F-15 Air Data Processor (ADP).
4. Describe your company's capabilities and experience in generating technical data, engineering drawings and manuals. Identify what software programs are utilized to generate these data products and what formats are available for delivered items.
5. What is your company's current maximum capacity per month for this particular type of requirement? Provide information on any facility reserves you may possess to increase capacity in the event of an immediate need do to critical operational mission requirements.
6. What quality assurance processes and test qualification practices does your company employ? Provide a description of your quality program (ISO 9001, AS9100, etc.).
 - a. Provide a detailed quality plan implementing AS9100 (or equivalent).

B. Repair Questions:

1. Describe your capabilities and experience in repairing existing systems/equipment (hardware and software) to solve maintenance and support problems in the depot environment.
2. Describe your capabilities and experience in developing/modifying repair or maintenance procedures. Include associated upgrade of technical orders and preparation of new technical orders.
 - a. State the types of diagnostic and troubleshooting tools utilized for efforts such as this.

3. Demonstrate your ability and experience in repair of the same or similar components, which are currently in use on commercial or military helicopters by providing the following information on the same or similar items:
 - a) Contract Number
 - b) Procuring Agency
 - c) Contract Value
 - d) Number of assets shipped
4. Provide your commercial manual(s) or Acceptance Test Procedures (ATP) and your rights to these manuals and or ATP used in the depot level repair and functional check of these or similar assets for Government Engineer review.
5. Describe your capabilities and experience in test, evaluation, repair or maintenance procedures.
6. Describe your configuration management processes and how you identify and resolve parts obsolescence and diminishing manufacturing sources problems?
7. Discuss your process for addressing any fit, form, and or function issues that may arise out of this effort.
8. Describe your process for maintaining inventory records and reporting on hand/work-in-process balances and repair status to your customer.
9. Include a detailed listing of facilities and equipment, including quantities, required to satisfy the requirements of this effort.
 - a. Provide an outline of the proposed process, including inspections.
 - i. State the type of test procedures are anticipated for this effort.
 - ii. State the type of inspection processes anticipated for this effort.
 1. NDI/T.
 2. Destructive testing/inspection.
10. How will your organization address the absence of drawings, specifications, technical data, test procedures, etc.
11. If the item cannot be repaired in total, state what your organization can repair.
12. State any technology insertion ideas for the item that would be suitable for this effort.
13. Discuss any reverse engineering or item replacement opportunities that may be present.

C. Commerciality Questions:

1. Is there established catalog or market prices for our requirement?

2. If you offer this product and/or service to both U.S. Government and commercial sources, is the same workforce used for both the U.S. Government and general public?
3. Is our requirement offered to both under similar terms and conditions? Briefly describe any differences.
4. Describe your standard warranty and return process for goods and services furnished to the government for items similar in nature to this requirement.
