

SSC PRODUCT STATEMENT OF WORK, SCOPE, AND CONFIRMATION OF PRODUCT NEED (With AI Language)

1. Description/Requirement.

The purpose of this acquisition is to procure specialized Audio-Visual (AV) hardware to upgrade the digital audio infrastructure at SSC Logtown. The current system is transitioning to a Dante-based (Digital Audio Network Through Ethernet) environment to improve signal routing, reduce latency, and ensure interoperability with existing agency broadcast standard.

In the case of product non-performance, the SSC/NSSC ITAM [REDACTED] should be notified immediately to liaise with the current Provider and/or the Original Equipment Manufacturer (OEM).

2. Characteristics and Scope

- The Contractor shall provide the specific hardware components listed in Section 3.0 (Technical Specifications / Requirements). All hardware must be new (not refurbished or 'previously-sold-and-returned') and must be compatible with existing Yamaha digital mixing architecture currently in place at the facility.
- Any problems encountered will be referred, first, to the end-user's immediate superior. [REDACTED]
- Whether the end-user works remotely on onsite, continual attention to the safeguarding of personal/private information is paramount.
- If necessary, escalation of the reported concern/product-defect will be made to the appropriate levels of NSSC management.

3. Technical Specifications / Requirements

The Contractor shall deliver the following brand-name specific items (or approved technical equivalents as determined by the Technical Officer): Please reference Sales Quote [REDACTED]

4. Delivery Requirements:

Location / Timeline / Shipping Method:

- NASA Shared Services Center
Building 1111
Location: Mail Room
Jerry Hlass Road
Stennis Space Center, MS 39529
- Delivery Timeline: All items shall be delivered within 10 calendar days of contract award.
- Shipping Method: Inside delivery is required. FOB Destination

5. INSPECTION AND ACCEPTANCE:

The Government Technical Point of Contact (TPOC) will inspect the hardware upon delivery to ensure:

- All items match the manufacturer part numbers specified.
- There is no physical damage to the equipment.
- Firmware compatibility with existing Dante Controller software.

6. Artificial Intelligence (AI) Aspects:

- **Use of Artificial Intelligence (AI) During Contract Performance (SEP 2025)** which requires contractors to disclose the use of AI technologies at any time during the fulfillment of the contract. This requirement statement must be included in all contracts (including orders); and
- **Artificial Intelligence (AI) Acquisitions (SEP 2025)** which provides additional contractor requirements when the contract is acquiring covered AI systems or services as defined by OMB memo M-25-22. This requirement statement must be included in all contracts (including orders) when acquiring covered AI systems or services. Covered AI systems or services and exceptions are listed below as defined OMB memo M-25-22).

7. Warranty:

The Contractor shall provide the standard manufacturer's warranty for all components. The Contractor shall facilitate any warranty claims or DOA (Dead on Arrival) replacements for a period of no less than 90 days from the date of acceptance.

8. Points of Contact:

The Contractor shall provide the standard manufacturer's warranty for all components. The Contractor shall facilitate any warranty claims or DOA (Dead on Arrival) replacements for a period of no less than 90 days from the date of acceptance.

9. POINT OF CONTACT (POC)

Technical Point of Contact:

Name: Joshua Miltier

Email: joshua.miltier@nasa.gov

Phone: 228.363.5044

Contracting Officer (NSSC): Shari Trigg (or assigned SAT Specialist)
