

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Section B: Description of the Supplies/Services Required

The Materials and Manufacturing Directorate (AFRL / RXOC) currently has a requirement for maintenance support for existing Eaton 9390 Uninterruptible Power Supply (UPS) equipment. This purchase will provide 1 year of maintenance support. Eaton is the sole source provider for this proprietary hardware and service support for the existing infrastructure equipment.

In order to avoid unnecessary delays in fulfilling the Government's requirements, the requested maintenance support from Eaton is the only provider that will satisfy the Government's requirements at this time. This action will be:

Contract Type: a new, firm-fixed priced order

Section C: Justification for Soliciting from a Single Source or Brand Name

The Materials and Manufacturing Directorate requires maintenance support for the Eaton 9390 UPS system. This support provides maintenance to hardware and software utilized by the currently installed Eaton 9390 UPS system. This system is critical to the computing infrastructure architecture to maintain usability in the event of a power anomaly.

Single Source Justification (Simplified Acquisition)

Accordingly, Eaton is the only firm capable of providing the supplies / services described above without the U.S. Air Force experiencing substantial duplication of cost and unacceptable delay that could not be recouped through competition.

Section D: Efforts to Obtain Competition

Previous and continuing market research on available commercial hardware / software has determined that no other vendor can provide the required capability to the government. Previous acquisitions were reviewed, and research was conducted via internet search. Additionally, no other source is available to provide the required hardware and software maintenance support.

Eaton is the only authorized provider of service support with Eaton's developed proprietary service software for 3-phase UPS products. Eaton does not train, certify or support independent third-party service providers to deliver or service its UPS and power quality products.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

AFRL / RXOC is constantly monitoring the marketplace for other less expensive, technically superior, or more readily available products able to meet the government's needs. AFRL / RXOC will continue to attend trade shows and conferences, review publications and communicate with other users in order to promote competition when future acquisitions are required. As AFRL / RXOC identifies new requirements, AFRL / RXOC will make every effort to compete new purchases.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
