Next PALT Session Information

- ACC-Orlando will host a hybrid PALT Update Session on 4 November 2025.
- To attend, individuals must register in advance via the notification located on the SAM.gov website.
- Registration for the 4 November 2025 PACC-ORL PALT opens on 12 September 2025.
- You may submit questions in advance using a link provided in SAM.gov.
- The link for registration and submitting questions will close on 26 October 2025.
- **We require a specific & complete question identifying the program name, do not simply list a program acronym or name.** This facilitates ACC-ORL providing focused and accurate answers. We will first address the questions we received in advance, then open the floor for questions.

- Hatalon Corporation
- Dignitas Technologies, LLC
- Theissen Training

Not-to-Exceed Ceiling Amount for all Orders awarded under the LTRaC MAC 2: \$344,119,306

MAC Ordering Period: 27 November 2024 - 26 November 2032

Live Fire Targets Product Line Management FY 25 - 26 Delivery Orders

Delivery Order 3 FASIT/BATL Product-Line Management

- Manage the Gov's BATL and RF Tech Data Package
- Technical Manuals and NET Docs and help desk
- Obsolescence management of the BATL systems and Thermal cams.
- ~ \$4M / FY (~\$20M total) – 1 year base award and 4 option years

Delivery Order 4 BATL RF Tech Data Package Production

- Government provided TDP for RF solution
- Produce and install the RF systems for all wireless ranges planned under MAC 1
- ~ \$TBD / FY

Delivery Order 5 Battlefield effects Systems (BES) Production

- Remove & replace all IT equipment in control tower and AAR building
- FY25 4 Ranges
- FY26 1 Ranges
- ~ \$6M - \$9M / FY (~\$15M total)

FY 27- FY 30 Future Delivery Orders

Family of Maintenance Trainers (FMT) Product Line (PL)

- FMT PL will utilize a Government owned architecture and a common software and hardware baseline (Common Core) to provide fault diagnosis, troubleshooting, repair removal and replacement maintenance task training for multiple military platforms.
- FMT PL is comprised of the Common Core, Diagnostic Troubleshooting Trainers (DTTs), Part Task Trainers (PTTs), and Hands On Trainers (HOTs).
- FMT PL provides efficient, effective, and agile processes to accomplish production, tech refresh, cybersecurity, fielding, obsolescence management, concurrency, upgrades, and disposal of legacy and obsolete hardware.
- FMT PL eliminates duplication across development and sustainment efforts, establish a common software and hardware baseline across the product line, and promote maximum reuse of existing systems/subsystems.

ACQUISITION STRATEGY

Base award with competition for each delivery order limited to vendors in the established vendor pool.

COL NATASHIA L. COLEMAN

PROJECT MANAGER

CYBER, TEST, AND TRAINING

Persistent Cyber Training Environment (PCTE) Cyber Innovation Challenge (CIC) #5

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**

Driving Requirements

- The PCTE platform needs to evolve by leveraging emerging technologies to assist in performing human-centric tasks, with minimal human intervention, considering all aspects of the platform. Applications of these technologies should streamline routine tasks, reducing processing time and increasing productivity. Additionally, it should enhance current capabilities and provide new insights about platform performance.
- Because of this, the PCTE program is seeking to improve the current training platform and introduce Artificial Intelligence and Machine Learning (AI/ML) solutions.

Vision

- Provide a highly advanced PCTE platform that enhances the user experience while minimizing the need for direct human involvement. By incorporating human-centric tasks, the platform could leverage advanced technologies such as advanced user emulation, automated help desk functions, user document creation, and resource utilization prediction to create a seamless experience. This will lead to a more efficient, user-friendly platform that enhances productivity, while reducing the workload on human operators.

ACQUISITION STRATEGY

- PdM CRT in support of the PCTE is pursuing CIC #5 for FY26 award
- We are seeking to enhance and address PCTE training platform needs through a continued multi-vendor best-of-breed integrated capability
- Capability gaps are currently being assessed by USCYBERCOM and the program office

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

- Current contract does not exist. Future contract will be an OTA with industry
- Initial RFS will solicit white paper solutions for Artificial Intelligence (AI) and Machine Learning (ML) concepts, with assessment events commencing in 1QFY26.

PERIOD OF PERFORMANCE

- Begins in FY26. 1 year base; 4 option years
- Potential follow-on production OTA for future capability releases
- First RFS released 18 AUG 25 / posted on sam.gov / closes 26 SEP 25

FUNDING

- Research, Development, Test & Evaluation.

Test Enterprise Network Modernization (TENM)

Objective

- Encompasses the requirements and acquisition approach for the networking efforts of the following projects:
 - Test Network Modernization (TNM)
 - ATEC Fiber Modernization (AFM)
 - Future Wireless Network (FWN)

Driving Requirements

- TNM applies enterprise solutions to replace, modernize, and protect existing ATEC test network equipment to meet evolving cyber-security and increased bandwidth requirements.
- AFM provides 6 developmental test centers and 5 operational test locations with a revitalized fiber network infrastructure to complement the TNM project by providing greater data throughput, increased reliability and redundancy.
- FWN will complement the AFM project by leveraging existing and developmental wireless capabilities to the maximum extent possible to offer greater test coverage areas.

ACQUISITION STRATEGY

- Enterprise approach to modernize network infrastructure across ATEC Developmental Test Centers and Operational Test locations.
- Competition: Team is currently conducting Market Research through Requests for Information (RFIs). Industry days / One-on-ones will be provided.

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

- This is a new contract through General Services Administration (GSA) Assisted Acquisition Services (AAS); Alliant 2 anticipated.

PERIOD OF PERFORMANCE

- 1 year base; 4 option years.

FUNDING

- Dollar value will vary based on site.
- Research, Development, Test & Evaluation.

Charlie Division Push Items & Answers to Submitted Questions

Mr. John Gillette Project Manager Synthetic Environment

1. Revitalize the nation's pride in her Army.
2. Reinvigorate our industrial base and revolutionize our procurement processes.
3. Train as we fight.

Continuous Transformation

Deliver Warfighting Capabilities

- Deliver the Next Generation Constructive Capability to provide a cloud-based Corps-level capability to support Warfighter 27-1 in 1QFY27
- Build Synthetic Training Environment Software (STE SW) and NGC in close coordination with Next Generation Command and Control (NGC2) to capitalize on Artificial Intelligence (AI) driven decision making tools prevalent in today's staffs
- Merge the rapid development capabilities of Games for Training with STE SW to accelerate training on newly developed capabilities and on countering emerging threats

Optimize Force Structure

- Configure PM SE organization to deliver the Synthetic Training Environment (STE); streamline processes to work across product boundaries to connect Live-Virtual-Constructive training
- Capitalize on Army Enterprise Cloud Management Agency (ECMA) Cloud Architecture to reduce manpower footprint required to plan and execute LVC training
- Institutionalize embedding the Requirements Development, Capabilities Development, and Materiel Development Triad with the Users to enable rapid capability evolution and delivery.

Eliminate Waste & Obsolete Programs

- Work closely with CAC-T, the Centers of Excellence, and the users to accredit RVCT-A and RVCT-G to enable the divestiture of AVCATT and CCTT
- JLCCTC divestiture triggered by NGC achievement of Minimum Viable Product development and delivery; Limit JLCCTC 8.1.1 fielding to align with NGC onboarding / deployment

One Semi-Automated Forces (OneSAF)

Constructive simulation that models platforms, systems, and U.S. Army doctrine at the Brigade and Below levels.

- Government Off-the-Shelf software
- Uses official U.S. Army data for unit composition
- Physics-based, entity modeling with validated data
- OneSAF supports the six Modeling and Simulation Communities, including 200+ users (CONUS and OCONUS), and Foreign Military Sales expansion with its annual software releases.
- Cloud-enabled software (accessible remotely anywhere/anytime)
- Bi-directional stimulation/simulation of Mission Command (MC) systems
- Enhanced cyber effects on MC messages
- Enhanced Chemical, Biological, Radiological, Nuclear (CBRN) modeling
- Runs on multiple hardware platforms (mobile/tablet/PC/Server/Virtual)

What are our Programmatic Priorities?

- Shift from program-centric funding to capability-based funding to ensure rapid technology adaptation.
- Explore right to repair provisions in new and existing contracts.
- Expand the use of Other Transaction Authority (OTA) agreements to enable faster prototyping and fielding of critical technologies; Multi-award agreements

What are our Technological Priorities?

- Artificial Intelligence / Machine Learning (Decision Making, Behavior, After Action Review)
- Data centricity and platform (Operational/Live Data and OEM data to create digital models)
- Digital Twin Worlds
- Cloud Investments
- Embedded Training (in conjunction with NGC2, SBMC, M1E3, XM30, FLRAA)
