

SOURCES SOUGHT

This is a Sources Sought Notice (SSN) for the purpose of conducting market research. Proposals are NOT being requested, nor accepted at this time. Responses are being requested from both large and small businesses.

Purpose: The purpose of this notice is to gain knowledge regarding the type of interested businesses and their qualifications. The National Park Service (NPS) will use information obtained through this notice to develop an acquisition strategy.

The Government anticipates conducting a competitive acquisition for this requirement. The amount of interest or lack thereof will determine the possibility of a small business or other socio-economical small business set-aside for the solicitation. Analysis of the quality of responses to this source sought announcement will be considered in the market research being conducted, and in the making of any small business set-aside determination for this requirement.

Additional Information: No proposal package, solicitation, specification or drawings are available with this notice.

North American Industry Classification System (NAICS) code: NAICS code 238160 Roofing Contractors

Small Business Size Standard: \$19 million

Project Description: Rehab Edison Laboratory Roof Systems on Historic Lab Buildings #5 and #6, Thomas Edison National Historical Park, West Orange NJ. 07052.

This roof rehabilitation project will address the removal and replacement of EPDM membrane roofing and underlayment on two historic buildings at the Edison Laboratory complex to mitigate water infiltration issues. The roofs on Building 5 (Main Lab Bldg.) and Building 6 (Power House Boiler Bldg.) were last replaced in the 1980s and have exceeded their expected lifecycle. Roof system components will be replaced on both buildings to include over 15,000 SF of EPDM, over 900 LF of fascia and flashing, over 1300 LF of gutters and downspouts, among other system components. It's currently anticipated that nearly 3000 SF of deteriorated wood roof decking may need to be replaced due to ongoing water infiltration.

Magnitude: The construction magnitude is between \$1,000,000 and \$5,000,000.
