SPECIFICATIONS

Elsevier's Knovel Platform for the Naval Research Laboratory's Ruth H. Hooker Research Library

I. BACKGROUND INFORMATION

The Ruth H. Hooker Research Library in Washington DC is part of the Naval Research Laboratory (NRL), the U. S. Navy's corporate laboratory. The Ruth H. Hooker Library acquires and preserves scientific and technical literature, across multiple scientific and engineering disciplines, from publishers, professional societies and research institutes around the world. The Library's Information Resources and Services Unit builds the NRL modern scientific technical literature collection, including electronic subscriptions to journals, books, standards, proceedings, reports and other research materials.

II. OBJECTIVES

NRL, Code 1050 requires brand name acquisition of access to licensed information content on the Elsevier's Knovel platform. Access to Elsevier's Knovel platform content allows NRL scientists, and engineers to obtain information essential to the support of NRL's R&D missions.

III. SERVICES

Elsevier's Knovel platform shall provide all products in accordance with the price quote.
