5. Reasons for Authority Cited:

- a. This is a brand name specific requirement as Silicon Expert is a web-based, subscription, predictive tool that meets the following specifications:
- Ability to import bill of material information
 - Identify critical components using search features
 - Provide form, fit, and function alternates for any part
 - Counterfeit risk information
 - Access device datasheets directly from the application
 - Provide aftermarket sources and inventory
 - Single part of BOM device availability and out-year projections
 - Access Product Discontinuance Notices
- b.

6. Publicizing Contract Actions: For FAR Part 13 actions, the public display and synopsis requirements of FAR 5.101 and FAR 5.203

 - ☐ FAR 8.405-6(b)(3)(C)
 - ☐ FAR 16.505(a)(4)(iii)(C)

7. Market Research:

The Silicon Expert tool is the only predictive tool found to provide counterfeit risk information on electronic components. It also is the only tool found to have the extensive database of historic part datasheets which are imperative in statusing historic parts. Silicon Expert also has a very high recognition rate for the Army part library. Market research was conducted by [REDACTED] from January 2026 – March 2026. [REDACTED] searched GSA schedules and performed Google searches for other vendors. [REDACTED] also evaluated internal Government tools and discussed the Datalynq tool with Sourceability personnel. [REDACTED] also stays abreast of current obsolescence tools/procedures through her monthly involvement in the AFC Strategic Obsolescence Working Group and AMC Obsolescence Best Practices IPT and no other tools have been found to provide the needed attributes. Other products reviewed include Total Parts Plus and QStar, both of which do not have the counterfeit risk information nor the extensive historic datasheet library that we get with Silicon Expert.
