

**Performance Work Statement (PWS)
(Includes associated Performance Requirements Summary (PRS))**

**PWS
PERFORMANCE WORK STATEMENT**

US Army Aviation Center of Excellence (USAACE), Fort Rucker, Alabama
Aviation Future Capability Directorate (A-FCD) support for Modernization Activities
19 February 2026

**Part 1
General Information**

1. General: This is a non-personal service(s) contract under which the personnel rendering the service(s) are not subject, either by the contract's terms or by the manner of its administration, to the supervision and control usually prevailing in relationships between the Government and its employees. The non-personal services contract provides professional support services for T2COM subordinate units located at United States Army Aviation Center of Excellence (USAACE), Fort Rucker, Alabama. This effort enables T2COM subordinate units in the conduct of their specific Doctrine, Organization, Training, Materiel, Leader Development, Personnel, Facilities and Policy (DOTmLPF-P) integration and synchronization efforts addressed in respective directives from Headquarters Army Transformation and Training Command (T2COM), Commanding General Aviation Center of Excellence (ACOE) Commanding General Futures and Concepts Center (FCC), and Headquarters Department of the Army (HQDA) for the enduring force modernization efforts and supporting the fielding of emerging capabilities from the T2COM.

1.1 Description of Services/Introduction: This is a non-personal service(s) contract to provide all personnel, equipment, supplies, transportation, materials, supervision, and other items and non-personal services necessary to perform support services for the A-FCD and assigned T2COM Units located at Fort Rucker, Alabama. The Contractor shall provide analytical support to Aviation A-FCD Directors, Training and Lessons Learned Managers (TLLM) these recommendations on decisions may drive materiel development and future Army policy. Those recommendations, on whether to procure a particular item that may be commercially available or pursue developing an item that will provide a future capability for the Army, drives budgeting and procurement decisions. These same analysts are often required to assess and comment on how a particular capability will impact U.S. Army DOTMLPF-P. Each of these subjects reflect current Army policies and the Contractors are expected to comment on how a proposed capability will impact those same policies. When Contractors make assessments and offer recommendations, following the conduct of an experiment, that information delivered to the Government may be used to develop policy to deliver the Army of 2030, and design the Army of 2040. The primary skill that is being procured is critical thinking

and specialized knowledge with military-specific capabilities. This contract-support is not intended as general administrative functions, though the Contractor may be expected to perform both administrative and analytical functions. The services being procured are functions equivalent to those performed by former-Government employees, whose skills and experience, military education level, and specialized knowledge uniquely qualify them to perform capability development functions. The Contractor shall perform to the standards in this task order. The Government retains approval and acceptance authority for any analysis, feasibility studies, and strategies developed under this contract as well as decision authority for course of action selection, approval, and implementation. In addition, the Government is responsible for approving all work products the Contractor provides in connection with this PWS. The work products become Government property when approved. The Contractor shall provide the necessary subject matter expertise, have the ability to perform the tasks required for the integration and synchronization of the DOTmLPF-P domains for Army UAS, Army Aviation Manned Reconnaissance/Attack aircraft, Army Aviation Manned Utility/Cargo rotary/vertical lift aircraft, Aviation weapons and munitions, and Army Aviation portfolio subsystem Training Aids, Devices, Simulators, and Simulations (TADSS), Systems Integration and Management Support and Army Aviation Survivability Equipment (ASE) utilizing the Department of Defense (DoD) Joint Capability Integration and Development System (JCIDS) requirements development processes and documentation, Army Regulation 71 – 9 Warfighting Capabilities Determination Dated 29 June 2021, T2COM Regulation (TR) 71-20, dated 28 June 2013, and TR 71-12 dated 3 October 2012 and applicable emerging T2COM regulations.

1.2 Background: This effort includes development of operational methodologies that support the Warfighter Functions and capture the capabilities/requirements into requirements documentation (materiel and non-materiel) as well as materiel development work statements to reduce acquisition time, costs and technical risks. The Contractor shall have the operational and Army Aviation system subject matter expertise for manned Reconnaissance/Attack aircraft, Army Aviation manned Utility/Cargo rotary/vertical lift aircraft UAS, Army aviation weapons and munitions, and subsystems, Army Aviation manned Reconnaissance and Attack, Utility, Cargo, and Fixed Wing Aircraft, and associated TADSS which they shall use to provide input and recommendations to the supported Directors of TLLM, A-FCD, and CEAD. During the base year, the Government will require Contract Man-year Equivalent (CME) for Army UAS, Army Aviation manned Reconnaissance/Attack, Army Aviation manned Utility / Cargo Aviation Platforms, Army Aviation Weapons and munitions, Launched Effects, and associated Aviation portfolio TADSS, DOTmLPF-P Integrator and Aviation Survivability Equipment. Historically, this level of effort has required seventeen (17) CMEs. Contractors shall possess broad understanding of all Army aviation systems to enable A-FCD and TLLM to meet mission requirements as necessary.

1.3 Scope: The Contractor shall provide non-personal service(s). The services provided for in this contract focus on Aviation capability development and analytic areas to include Army unmanned aircraft systems (UAS), Army Aviation manned Reconnaissance and Attack aircraft, Army Aviation manned Utility and Cargo rotary/vertical lift aircraft, Future Aviation Tactical Ecosystem (FATE), Launched Effects, and Army Aviation weapons and munitions requirements development. This includes associated Army Aviation Aircraft and subsystem TADSS. Includes support for DOTmLPF-P efforts with Headquarters Department of the Army,

T2COM, T2COM Commands, and other Army Branch Centers of Excellence FCDs. Services include enduring Aviation portfolio modernization strategies and fielding of current and future aviation systems. The Government shall not exercise any supervision or control over the Contractors performing the services herein. While the Contractor shall make recommendations on results of analysis and collaboration, a Government official will make all final decisions.

1.4 Objectives: The Contractor shall conduct analysis of Aviation organizations in support of formation-based assessments, simulation activities, and annual capabilities needs assessments. The Contractor shall tailor methodology and conduct analysis to best examine Aviation tasks, conditions, standards, and gaps across select Aviation formations. The Contractor shall write/support the revision or re-writing of a substantial number of JCIDS, supporting, and new emerging requirements documents. The contract shall review each of the manned/unmanned platform programs currently in effect requirements documents and analyze to determine validity of the current capability in respect to Large Scale Combat Operations and the ability of the systems to operate in a Large Scale Combat operational environment.

1.5 General Information:

1.5.1 Quality Control Plan (QCP): The Contractor shall develop and maintain a QCP to ensure services are performed in accordance with (IAW) this PWS. The Contractor shall develop and implement procedures to identify, prevent, and ensure non-recurrence of defective services. The Contractor's QCP is the means by which it assures that the work provided complies with the requirements of the contract.

The Contractor's Proposed QCP shall be submitted to the Contracting Officer (KO) through the Contracting Officer's Representative (COR) for review within 30 days after contract award. A comprehensive written QCP shall be submitted to the Contracting Officer (KO) and Contracting Officer's Representative (COR) within 5 working days when changes are made thereafter. After acceptance of the quality control plan, the Contractor shall receive the KO's acceptance in writing of any proposed change to his QC system.

The Government will review and either notify the Contractor in writing of acceptance of the plan or return their comments to the Contractor within 30 days. If the Government has provided comments, the Contractor shall then have 14 days to submit a Final QCP. After receipt of the Final QCP, the Contractor may receive the Contracting Officer's acceptance in writing. Any proposed changes to the accepted QCP are required to be resubmitted for acceptance by the Contracting Officer no later than 30 days prior to the anticipated change and before implementation by the Contractor. The timeline noted above will apply for review and acceptance for proposed changes. At a minimum, the QCP must include and answer the following to be acceptable:

(a) A chart showing the organizational structure and lines of authority, the names, qualifications, duties, responsibilities, and classification of each member of the Contractor's Quality Control Team;

(b) How the Contractor will monitor work to ensure performance complies with all deliverables (etc. timelines, deadlines, and goals);

(c) How the Contractor will monitor work to ensure performance complies with all specifications and requirements of the contract, including the contract's clauses;

(d) How the Contractor will monitor and ensure staff qualifications remain current and valid including Department of Defense (DoD) Contractor Personnel Office (DOCPER) processes/approvals throughout contract performance;

(e) How the Contractor will ensure all keys issued will remain controlled items (Paragraph 1.7 Key Control);

(f) How the Contractor will inventory and track maintenance of all Government Provided Equipment / Materials;

(g) How the Contractor will identify, investigate, and correct any non-conforming performance and prevent similar deficiencies in the future; and

(h) How the Contractor will file and save all Quality Control related documents for the life of the contract plus 5 years.

1.5.1.1 The Contractor shall inform the COR of issues or potential issues that might affect the performance within 2 working days of identifying those issues. Verbal reports shall be followed up by written reports within 14 working days.

1.5.2 Quality Assurance: The Government will evaluate the Contractor's performance under this contract in accordance with the Government quality assurance procedures. These procedures primarily focus on what the Government must do to ensure that the Contractor has performed in accordance with the performance standards. They define how the performance standards will be applied, the frequency of surveillance, and the acceptable quality levels (performance thresholds).

1.5.3 Recognized Holidays: The following provides information on recognized holidays for the purpose of the PWS. If submittal of any documentation (e.g. deliverables, submittals, etc.) deadlines fall on a holiday, the closest work day prior to the holiday will apply as the deadline for submittal.

1.5.3.1 U.S. Holidays: Work shall not be performed on U.S. federally recognized holidays occurring during the normal workweek unless otherwise directed by the Contracting Officer. When a U.S. holiday occurs on a Saturday or a Sunday, the holiday is observed on the preceding Friday or following Monday, respectively.

New Year's Day January 1st
Presidents Day 3rd Monday in February
Juneteenth June 19th
Labor Day 1st Monday in September

M. L. King Memorial Day 3rd Monday in Jan
Memorial Day last Monday in May
Independence Day July 4th
Columbus Day 2nd Monday in October

Veteran's Day November 11th
Christmas Day December 25th

Thanksgiving Day 4th Thursday in November

1.5.4 Operating Hours: The Government facility office hours, facility operating hours, and the Contractor support hour requirements are the same. The Contractor is responsible for conducting business, between the Government Facility hours of 0730-1630 Monday thru Friday except Federal holidays or when the Government facility is closed due to local or national emergencies, administrative closings, or similar Government directed facility closings. For other than firm fixed price contracts, the Contractor shall not be reimbursed when the Government facility is closed for the above reasons. The Contractor must at all times maintain an adequate workforce for the uninterrupted performance of all tasks defined within this PWS when the Government facility is not closed for the above reasons. The Contractor shall maintain an adequate workforce at all times, for the uninterrupted performance of all tasks defined within this PWS when the Government facility is not closed for the above reasons. When hiring personnel, the Contractor shall keep in mind that the stability and continuity of the workforce is essential. In the event of a Contractor employee position vacancy exceeding thirty (30) days the Contractor shall invoice the Government at a rate reflecting the reduced labor level of effort until such time as the Contractor identifies a replacement Contract employee (acceptable to the Government in accordance with the qualifications set forth in this PWS), hires the individual, and the employee is on-site supporting the contract work effort. Contractor personnel work schedules may be flexed to meet manpower requirements for weekend and extended duty periods during unit visits, training and exercises. Any time the Contractor is not in the office due to appointments, leave, or other reasons, the Contractor shall make the appropriate entry on the applicable Directorate calendar to ensure the Government lead is aware. Emergencies and unexpected absences will be addressed on a case-by-case basis. Government personnel will not approve or disapprove Contractor absences, leave, or time off. The Contractor shall schedule personnel to preclude the need for overtime to the maximum extent possible. Working from remote locations is not restricted but will be implemented only at the direction and discretion of the Government and only for limited periods of time. When feasible or required by the Government due to unforeseen circumstances (pandemic, natural disaster, etc.), Ad-Hoc, and upon approval by the COR, work may be performed at remote locations to include teleworking. This will result in no additional expense to the Government. The Government is not authorizing the use of off-site rates to accomplish alternate duty location work and will not be responsible for any associated costs.

1.5.5 Training Holidays: There are no training holidays. The Government may have minimal manning days for Active Duty Soldiers. During these periods the Contractor will either be present for duty or on leave.

1.5.6 Place of Performance: The work to be performed under this task order shall be performed primarily at Buildings 4505, 4506, and 5000 (or alternate building locations within the T2COM footprint as required) Fort Rucker, Alabama 36362, other locations as mission requires.

1.5.7 Monthly Reports: The Contractor shall provide Monthly Reports detailing Contractor's progress, status, pending and approved travel, and personnel space management report to the COR.

1.5.8 Written Reports: The Contractor shall provide Trip Reports and written narratives. The Contractor shall prepare minutes and EXSUMs following Working Groups, meetings, telephone conversations of substance (telecoms), visits or other significant program or capability events.

1.5.9 Work Groups/Meetings: The Contractor shall facilitate and conduct Stakeholder Meetings; Workgroups, and Teleconferences. This includes preparing workshop products and documentation.

1.6 Security Requirements: The following information is provided on security related matters.

1.6.1 Security Program: Contractor personnel performing work under this contract must have a Secret Clearance for most positions, (Top Secret-SCI is required for the Fixed Wing, Cyber/EW, one UAS, and one of the Integrator/Operations positions) at time of the proposal submission, and must maintain the level of security required for the life of the contract. The security requirements are IAW with the DoD Contract Security Classification Specification (DD Form 254), which is currently accessible at the following link:
<http://www.dtic.mil/whs/directives/forms/eforms/dd0254.pdf>

1.6.2 Personnel Security Clearance Requirements: Contractor personnel performing work under this contract must have a Secret Clearance for most positions, (Top Secret-SCI is required for the Fixed Wing, Cyber/EW positions) level in the Defense Information System for Security (DISS) at time of the proposal submission, and must maintain the level of security required for the life of the contract. The security requirements are IAW the DoD Contract Security Classification Specification DD Form 254 at time of the proposal submission and must maintain the level of security required for the life of the contract. The Contractor must be able to access North Atlantic Treaty Organization (NATO) classified documents. If required, the Contractor must be able to access Secret Compartmentalized Information (SCI). The security requirements are in accordance with the attached DD254. The Contractor shall ensure that Contractor employees and Subcontractor employees performing services under this contract comply with FAR 52.204-2 Security Requirements when the employee has access to information classified "Confidential," "Secret," or "Top Secret." The Contractor shall ensure the employee complies with the DoD Security Agreement (DD Form 441), and the NISPOM rule at 32 Code of Federal Regulation (CFR) Part 117, effective 24 Feb 2021. The NISPOM is the National Industrial Security Program Operating Manual to which Contractors must implement and comply.

The security requirements are in accordance with the attached DD Form 254. All Contractor employees IAW AR 380-5 Para 8-3, will be given an initial security orientation whether cleared for access to classified information or not. They can receive INFOSEC training by going to ATIS (learn.atis.army.mil). The Contractor can complete training after work starting. The

Contractor employees shall also receive basic Computer Security Awareness Training provided on-line at <https://securityawareness.usalearning.gov/awarenessrefresher/index.html>.

1.6.3 Installation Access: Access to U.S. installations, buildings and controlled areas is limited to personnel who meet security criteria and are authorized. Failure to submit required information/data and obtain required documentation or clearances will be grounds for denying access to U.S. installations, buildings and controlled areas. Pursuant to Fort Rucker Regulation 190-2 (2 March 2020), Installation Access Control: Per DODI 8520.02, the DOD CAC is the standard ID card for Contractors under this task order. The DOD CAC will be the principal access control card which enables access to buildings, facilities, installations, and some limited controlled spaces. The Contractor shall ensure that any Subcontractors used in performance of this contract complies with these requirements and that all employees, of both the Contractor and any Subcontractor utilized by the Contractor, are made aware of and comply with these requirements.

The Contractor shall be aware of and comply with the requirements associated with Installation Access Control. The Government is not liable for any costs associated with performance delays due solely to a firm's failure to comply with Installation Access Control System (IACS) processing requirements.

The Contractor shall return installation passes to the issuing IACS office when the contract is completed or when a Contractor employee no longer requires access.

1.6.3.1 Installation Pass Log: Not required.

1.6.3.2 Individual Termination or Expiration of Employment: The Contractor shall collect the installation access passes the same day employment of an individual has expired or has been terminated and shall return them to the issuing office within 2 business days.

1.6.3.3 Contract Termination or Cancellation: Upon termination or cancellation of this contract, the Contractor shall collect all outstanding installation access passes and return them to the issuing office within 2 days.

1.6.3.4 Common Access Cards (CAC) and CAC Log: The Contractor shall provide the following information: Last, First and Middle Names, Government issued personal identifier (e.g. Social Security Number, Federal Identification Number, or Tax Identification Number), date of birth, primary email address (this email address will be used to contact the individual) and any other necessary information required to obtain a CAC or installation access card, to the COR or trusted agent within 5 days after award. The Contractor shall ensure safeguarding of Personally Identifiable Information (PII) and comply with requirements under 1.23.5.

The Contractor shall not be required to provide a CAC log.

1.6.4 Background Checks: Contractor and all associated Subcontractor employees shall provide all information required for background checks to meet installation access requirements to be accomplished by installation Provost Marshal Office, Director of Emergency

Services or Security Office. Contractor workforce must comply with all personal identity verification requirements (FAR clause 52.204-9, Personal Identity Verification of Contractor Personnel) as directed by DOD, HQDA and/or local policy. In addition to the changes otherwise authorized by the changes clause of this task order, should the Force Protection Condition (FPCON) at any individual facility or installation change, the Government may require changes in Contractor security matters or processes. Security Manager, Trusted Agent or COR: The FCD Security Manager, Contract Trusted Agent or the COR will confirm all background investigations on prospective Contractors requiring CAC and/or network access. Contractors must ensure an owning relationship is established in the Defense Information System for Security (DISS), or its successor system for each individual performing duty in support of this performance work statement/task order.

1.6.5 Physical Security: The Contractor shall safeguard all Government equipment, information, and property provided for Contractor use. At the close of each work period, Government facilities, equipment, and materials shall be secured IAW the Army Physical Security Program (AR 190-13.”)

1.6.6 Operations Security (OPSEC) Requirements: Contractor personnel shall adhere to facility security policies and restrictions. The Contractor shall immediately report suspicious activities to security personnel. In accordance with AR 530-1 all personnel will complete Level I Operations Security (OPSEC) training which is composed of both initial and continual awareness training (annually). All newly assigned personnel, within the first 30 days of arrival in the organization, must receive initial training to include a briefing on the organizations critical information. The Contractor shall have an end state of initial and continual awareness training is that each individual should have the requisite knowledge to safeguard critical information. Level I OPSEC training is available at the following website:
<https://www.cdse.edu/Training/eLearning/GS130/> (Duration: 45 minutes).

1.7 Key Control: The Contractor shall establish and implement methods of making sure all keys issued to the Contractor by the Government are not lost or misplaced and are not used by unauthorized persons. NOTE: All references to keys include key cards. No keys issued to the Contractor by the Government shall be duplicated. The Contractor shall develop procedures covering key control that shall be included in the Contractor’s Quality Control Plan. Such procedures shall include turn-in of any issued keys by personnel who no longer require access to locked areas. The Contractor shall immediately report any incidents of lost or duplicate keys to the Contracting Officer. In the event keys, other than master keys, are lost or duplicated, the Contractor shall, upon direction of the Contracting Officer, re-key or replace the affected lock or locks; however, the Government, at its option, may replace the affected lock or locks or perform re-keying. When the replacement of locks or re-keying is performed by the Government, the total cost of re-keying or the replacement of the lock or locks shall be deducted from payment due to the Contractor. In the event a master key is lost or duplicated, all locks and keys for that system shall be replaced by the Government and the total cost deducted from the payment due to the Contractor. The Contractor shall prohibit the use of Government issued keys by any persons other than the Contractor’s employees. The Contractor shall prohibit the opening of locked areas by Contractor employees to permit entrance of persons other than Contractor employees engaged in the performance of assigned

work in those areas, or personnel authorized entrance by the Contracting Officer. The Contractor shall establish and implement methods of ensuring that all lock combinations are not revealed to unauthorized persons. The Contractor shall ensure that lock combinations are changed when personnel having access to the combinations no longer have a need to know such combinations. These procedures shall be included in the Quality Control Plan.

1.8 Post Award Conference/Periodic Progress Meetings: The Contractor shall attend any post award conference convened by the Contracting Activity or Contract Administration Office in accordance with FAR Subpart 42.5. The Contracting Officer, COR, and other Government personnel, as appropriate, may meet periodically with the Contractor to review the Contractor's performance. At these meetings the Contracting Officer will apprise the Contractor of how the Government views the Contractor's performance and the Contractor shall apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be at no additional cost to the Government.

1.8.1 The Contractor shall attend, participate in, and furnish input to scheduled and unscheduled meetings, conferences, and briefings that relate to the functions and services herein as required by the Government to provide effective communication and impart necessary information. The Contract Manager or designated representative shall attend meetings as requested by the Government. Meeting attendees shall at times include Contractor managerial, supervisory, and other personnel knowledgeable of the subject matter. Meetings may start or end outside of regular duty hours.

1.9 Contracting Officer's Representative (COR): Refer to Part 2 of this PWS for the definition of a COR. As determined by the Contracting Officer, a COR will be appointed and identified by letter of designation, a copy of which will be provided to the Contractor by the Contracting Officer. The designation letter states the responsibilities and limitations of the COR, especially with regard to changes in cost or price, estimates, or changes in delivery dates. The COR is not authorized to change any of the terms and conditions of the resulting order. The COR monitors all technical aspects of the contract and assists in contract administration. The COR is not authorized to obligate the Government. If the work is not written in the contract, the COR is not authorized to request new work. The COR is authorized to perform the following functions: assure that the Contractor performs the technical requirements of the contract, perform inspections necessary in connection with contract performance, maintain written and oral communications with the Contractor concerning technical aspects of the contract, issue written interpretations of technical requirements, including Government drawings, designs, specifications, monitor Contractor's performance and notifies both the Contracting Officer and Contractor of any deficiencies, coordinate availability of Government property, and coordinate site entry of Contractor personnel.

1.10 Key Personnel: The follow personnel are considered key personnel by the Government: The on-site Contractor Lead. The Contractor shall provide a designated on-site lead in addition to a Contract Manager who shall be responsible for the performance of the work. The name of these personnel and an alternate who shall act for the Contractor when the manager is absent shall be designated in writing to the Contracting Officer. The contract manager or alternate shall have full authority to act for the Contractor on all contract matters relating to daily

operation of this contract. The Contract Manager or alternate shall be available between 8:00 a.m. to 4:30p.m., Monday thru Friday except Federal holidays or when the Government facility is closed for administrative reasons. The Contract Manager or Alternate Contract Manager shall be available IAW paragraph 1.5.4. Qualifications for all key personnel are listed below:

Contractor Personnel General Qualifications. Personnel general qualifications are Contractor personnel qualifications that are evaluated in a source selection process and are essential to successful contract performance. When personnel are used as an evaluation factor in best value procurement, an offer can be rejected if it does not have a firm commitment from the persons that are listed in the proposal. The Contractor shall use personnel as identified in its proposal during the performance of this contract and will request Contracting Officer approval prior to any changes. Requests for approval of any changes shall be in writing with a detailed explanation of the circumstances necessitating the change. The request must contain a complete resume for the new personnel and any other pertinent information, such as degrees, certifications, and work history. New personnel must have qualifications that are equal to or higher than those being replaced. The Contracting Officer or COR will evaluate the request and notify the Contractor whether the requested change is acceptable to the Government. Army Capability Manager Directorates operate in a complex DoD combat development and acquisition processes which require highly specialized process knowledge as well as Army Aviation skill sets typical of mid to senior grade rated Army Aviation Soldiers. Experiential combat insights these personnel may have learned during recent combat operations are crucial in developing the right requirement and improving these requirements with the Aviation Warfighter and supported Warfighters. All Contractors shall have been previously rated Army Aviators, Army UAS Operators, or Army aviation maintenance specialists and have a complete working knowledge/understanding of Army Aviation operations and employment, the JCIDS Process, CONOPS Development, CBA Process, and a thorough understanding of the Army and Joint Concepts, especially the Army Concept Framework. This knowledge of Army Aviation operations and employment is important because the Contractor may be required to support other capability development efforts in the Directorate based on the Directorate priority of effort. The Contractor should have 12 or more years of Army Aviation experience or education equivalent experience combined with sound operational experience in project analysis and military decision-making process in a tactical and operational environment. All positions require the understanding and use of the United States Army's seven-step process for military decision-making in both tactical and garrison environments and how that applies to company and battalion size organizations for planning, training and execution. All positions require knowledge of DOD and Army Aviation transformation, and require persons to have successfully completed the DAU training which includes the following courses or their predecessors: JCIDS RQM 1010, Requirements Management RQM 1101, Capabilities Based Assessment RQM 2500, Developing Performance Attributes RQM 2520, Market Research CON 0040, and Analysis of Alternatives RQM 1510 in order to understand the JCIDS process and meet A-FCD capability requirement qualifications reporting requirements with 30 days of hire. The courses can be accessed at the following link: <https://icatalog.dau.edu/onlinecatalog/tabnavlas.aspx>. Contractors must process in-depth knowledge and bandwidth of Army Aviation system in order to assist in other areas within the A-FCD other than their focal area as needed for A-FCD to meet mission requirements.

a. Senior Aviation Military Analyst (X1): (Aviation Maintenance and Maintenance Facilities Expertise) Aviation Maintenance Technician with at least fifteen (15) years of aviation maintenance experience specializing in the management of personnel, supply, equipment, and facility assets to maintain and repair Army rotary, fixed wing, or unmanned aircraft systems. Senior or Master Aviation Badge required. A functional knowledge of airframe specific maintenance, phase flow management, budgeting, and logistics which include a basic knowledge of the integrated logistical analysis program (ILAP) required. Experience managing personnel, supplies, equipment, and facility assets to maintain and repair Army rotary, fixed wing or unmanned aerial systems required. At least 5 years' experience staffing updates to the Aviation Maintenance Facility Design Standard (CC21110). Experience with how the Aviation Maintenance Hangar Complex supports the maintenance, repair, and sustainment of manned and unmanned aircraft and associated equipment as well as the planning and conduct of flight operations, aircrew and maintainer training, and the deployment and redeployment of aviation units required. Knowledge of the Fixed-Wing TDA Facility Standard (CC21110) / Tactical Unmanned Air Vehicle TOE Facility Standard (CC21115) required. Experience with the Facility Investment Plan (FIP) executive level brief on Programed and Funded Aviation Facilities in the Future Years Defense Program (FYDP) required. Must have comprehensive knowledge on possible maintenance, logistics and facility impacts to current identified gaps in Aviation Support Equipment. Experience providing possible course of actions that support modernizing the airfields, integrating FLRAA institutional training, while maintaining current institutional training requirements of the Enduring Fleet required. Experience with the Facility Investment Plan (FIP), executive level briefs on Programed and Funded Aviation Facilities in the Future Years Defense Program (FYDP), and coordination with Corp of Engineers, HQDA G44, HQDA G8 and IMCOM required.

b. Aviation Military Analyst (X1) (Cargo Helicopter Expertise)

Rated Army Aviator or Rated Aircrew member with at least twelve (12) years of Aviation flight/combat cargo helicopter operations experience is required. Experience as an Instructor Pilot (IP) or Flight Engineer in Army Aviation cargo helicopter formations required. Experience in the current Army tactical cargo aircraft fielded to Army aviation units required. Must process the military or civilian equivalent staff and leader development courses competency similar to Senior Leaders Course (SLC), Master Leaders Course (MLC), CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Army Aviator or Senior or Master Aircrew badge is required. At least five (3) years' experience working in combat/capabilities developments is required. Senior or Master rated Army Aviator or Senior or Master Aircrew with experience in flight standardization of Army cargo organizations ranging from 35 personnel to 600 personnel required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies with experience in developing capabilities and evaluating technologies. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation utility aircraft is required. Direct leadership of a team that authored a Joint Requirements Oversight Council (JROC) approved JCIDS document. Participation as a direct team member in the Army Aviation Operations CBA. Cargo aviation operational experience in combat operations. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and

other written products as required within the scope of the task order. Products must be written at the graduate level with a maximum of three revisions request from the Senior Military Analysis prior to presenting to the Government. SECRET clearance required.

c. Senior Aviation Military Analyst (X1): (Fixed Wing Subject Matter Expertise)

Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Army Fixed Wing experience is required. Dual Military Intelligence/Aviation Branch qualified. Senior or Master rated Aviator is required. Must process the military or civilian equivalent staff development courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Experience as a Standardization Instructor Pilot (SIP) or Instructor Pilot (IP) in Army Aviation fixed wing formations. Experience in the current Army fixed wing aircraft fielded to Army aviation units required. Must process the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Prior tactical operational staff experience with Army Aviation fixed wing formations responsible for planning, training, and mission execution in organizations of 59 plus to 170 plus personnel. At least five (5) years' experience working in combat/capabilities developments is required. Prior tactical operational management experience of a 400 plus organization. Experience as a Maintenance Test Pilot or Examiner in Army Aviation fixed wing aircraft. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies with experience in developing capabilities and evaluating technologies. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation fixed wing aircraft is required. Direct leadership of a team that authored a Joint Requirements Oversight Council (JROC) approved JCIDS document. Participation as a direct team member in the Army Aviation Operations CBA. Fixed Wing aviation operational experience worldwide. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. Top Secret/Sensitive Compartmented Information (TS/SCI) clearance required and JWICS access within 90 days of hire.

d. Senior Aviation Military Analyst (X1): (Reconnaissance and Attack Expertise).

Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP) in Army attack and reconnaissance aircraft utilized by tactical Army Aviation organizations since 2010 desired. Military or civilian equivalent training on how the Army Runs. Must possess the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Aviator is required. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation Reconnaissance and Attack capabilities in order to quickly identify operational gaps that need to be closed. Senior or Master rated Aviator required. Staff experience planning attack, reconnaissance and assault missions in an organization similar to an Army tactical organization consisting of 24 AH-64 helicopters or 30 UH-60 helicopters desired. Prior tactical operational management experience of a organization of 400 plus personnel is preferred. Minimum of 5 years' experience working in capability management /combat developments is

required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Primary author of a Joint Requirements Oversight Council (JROC) approved JCIDS document is preferred. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for attack or reconnaissance aircraft is preferred. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. Access to special access programs (SAP) is required. SECRET clearance required.

e. Senior Aviation Military Analyst (X1): (Attack, Recon, Weapons and munitions)

Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP) in Army attack and reconnaissance aircraft utilized by tactical Army Aviation organizations since 2010 desired. Military or civilian equivalent training on how the Army Runs. Must possess the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Aviator is required. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation Reconnaissance and Attack capabilities in order to quickly identify operational gaps that need to be closed. Senior or Master rated Aviator required. Extensive technical experience in the handling and employment of current Army Aviation weapons, munitions, and launchers (to include Hydra 70 rockets and HELLFIRE missiles) is required. Staff experience planning attack, reconnaissance and assault missions with aviation weapons planning requirements in an organization similar to a Army Aviation tactical attack, reconnaissance, and air assault organizations. Prior tactical operational management experience of a organization of 400 plus personnel. Minimum of 5 years' experience working in capability management /combat developments is required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Primary author of a Joint Requirements Oversight Council (JROC) approved JCIDS document is preferred. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for attack or reconnaissance aircraft is preferred. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. SECRET clearance required.

f. Aviation Military Analyst (X1) (Attack/Recon, Future Aviation Tactical Ecosystem (FATE) Expertise). Rated Army Aviator with at least twelve (12) years of Army Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP), Instructor Pilot (IP), Maintenance Examiner (ME), or Maintenance Test Pilot (MTP) in Army manned attack and reconnaissance aircraft is desired. Senior or Master rated Army Aviator with experience in flight standardization of attack and reconnaissance organizations

ranging from 35 personnel to 600 personnel required. Prior tactical operational staff experience with Army Aviation attack, reconnaissance, or assault planning, training, and execution in organizations of 400 plus to 2863 plus personnel is preferred. Minimum of 3 years' experience working in capability management / combat developments is required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Future Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Contributing author of a Joint Requirements Oversight Council (JROC) approved JCIDS document is desired. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for attack or reconnaissance aircraft is preferred. Products must be written at the graduate level with a maximum of three revisions prior to presenting to the government. SECRET clearance required.

g. Aviation Military Analyst (X2): (Unmanned Aircraft System Group 1-3 Expertise)

Small Unmanned Aircraft System Expertise and Autonomy. 5+ years First Person View quadcopter/drone experience (building, flying, programming, etc.) required. Additional fixed wing, LOS, and BVLOS experience preferred. Experience utilizing Betaflight, iNAV, Ardupilot (and/or any clones) to program, fly, and troubleshoot semi-autonomous and autonomous systems required. Experience in C, C++ in the context of Command Line Interfaces (CLI) in flight controller programming required. Computer Aided Design (CAD) and additive/subtractive manufacturing background (i.e. 3D printing or CNC) preferred. Knowledge of sUAS power systems, design considerations, component selection and limiting factors, challenges/risks, and ability to work closely and effectively with technical contributors required. Background speaking to stakeholders, both individuals and groups, ranging from technical individual contributors to senior level executives required. Documented ability to translate technical concepts into digestible formats based on audience knowledge level required. Ability to autonomously develop and execute plans based on broad/ambiguous requirements while keeping stakeholders informed of status changes required. Military experience with tactical UAS (Group 3) or smaller (not Raven/Puma) or equivalent non-standard or sUAS experience in another field i.e. First Responders, Commercial Delivery, Forestry, Inspections, etc required. Stakeholder-facing technical program management, preferably in the defense, national security, or aerospace domains preferred. Experience in rolling out organizational process changes preferred. Strong technical and analytical skills with ability to use data and metrics to back up assumptions, recommendations and drive decisions required. Excellent written and verbal communication skills required. Knowledgeable on DOTMLPF and associated capabilities and requirements creation process required. Bachelor's degree and/or equivalent experience required. Ability to travel 50% of the time required. FAA Part 107 certification required. FCC Technician Amateur Radio License required. Project Management Professional preferred (depending on Military project background, this is important to show critical thinking in a team environment where they are a critical piece of a larger puzzle, also provides a solid base for industry stakeholder engagement, management, and mutual understanding). Active Secret Clearance required and eligible for TS/SCI preferred

h. Aviation Military Analyst (X1): (Unmanned Aircraft System Group 4 Expertise)

Must have twelve (12) years minimum Army Aviation tactical experience. Must be a former rated Senior Army aviator and/or Senior Army UAS operator or maintainer. DOTmLPF-P Solutions Assessment, UAS Cost-Benefits Analysis, UAS Modeling, Simulation, and

Experimentation, and UAS Concept of Operations experience is desired. Must have a combination of experience adding up to at least five (5) years of either conducting Army UAS capabilities development within a Requirements Management office as described in the Joint Capabilities Integration Development System (e.g. A-CDD or CDD) or operational experience in tactical Army aviation formations executing Army UAS operations where they managed flight operations, flight or maintenance scheduling, and mission execution. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Products must be written at the graduate level with a maximum of three revisions prior to presenting to the Government. SECRET clearance required.

i. Senior Aviation Military Analyst (X1): (Launched Effects (LE), Weapons and munitions) Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP) in Army attack and reconnaissance aircraft utilized by tactical Army Aviation organizations since 2010 desired. Military or civilian equivalent training on how the Army Runs. Must possess the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Aviator is required. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation Reconnaissance and Attack capabilities in order to quickly identify operational gaps that need to be closed. Senior or Master rated Aviator required. Extensive technical experience in the handling and employment of current Army Aviation Launched Effects, weapons, munitions, and launchers (to include Hydra 70 rockets and HELLFIRE missiles) is required. Staff experience planning attack, reconnaissance and assault missions with aviation weapons planning requirements in an organization similar to a Army Aviation tactical attack, reconnaissance, and air assault organizations. Prior tactical operational management experience of a organization of 400 plus personnel. Minimum of 5 years' experience working in capability management /combat developments is required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Primary author of a Joint Requirements Oversight Council (JROC) approved JCIDS document is preferred. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for attack or reconnaissance aircraft is preferred. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. SECRET clearance required.

1.10.1 Optional Key Personnel may be implemented/sequenced into the task order as the need arises. The following optional personnel may be required during task order performance:

a. Senior Aviation Military Analyst (X1): (Attack, Recon, Weapons and munitions)

Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP) in Army attack and reconnaissance aircraft utilized by tactical Army Aviation organizations since 2010 desired. Military or civilian equivalent training on how the Army Runs. Must possess the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Aviator is required. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation Reconnaissance and Attack capabilities in order to quickly identify operational gaps that need to be closed. Senior or Master rated Aviator required. Extensive technical experience in the handling and employment of current Army Aviation weapons, munitions, and launchers (to include Hydra 70 rockets and HELLFIRE missiles) is required. Staff experience planning attack, reconnaissance and assault missions with aviation weapons planning requirements in an organization similar to a Army Aviation tactical attack, reconnaissance, and air assault organizations. Prior tactical operational management experience of a organization of 400 plus personnel. Minimum of 5 years' experience working in capability management /combat developments is required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Primary author of a Joint Requirements Oversight Council (JROC) approved JCIDS document is preferred. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for attack or reconnaissance aircraft is preferred. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. SECRET clearance required.

b. Senior Aviation Military Analyst (X1): (Concepts, Integration, Synchronization Officer Expertise) Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Senior or Master Rated Aviator required. In-depth understanding of integrated scheduling process required to assist ACM Directors to synchronize their respective modernization plans across the Army Aviation Enterprise and aligned with the Army Modernization Strategy. Excellent communication and organizational skills are required. Complete understanding of Army Aviation Force design and understanding impacts to changes to aviation formation (equipment and/or personnel) is required. Five years minimum experience working in capability management / combat developments is required. Experience in planning and synchronization of data input from multiple sources into a strategic messaging at a very large corporation level similar to Army Senior Leaders assigned to the Department of the Army. Experience in planning, executing and facilitating Working Groups and Integrated Product Teams (IPTs). Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Experience authoring a Joint Requirements Oversight Council (JROC) approved JCIDS document is required. Participation and understanding the procedures and processes, as a direct team member, in an Army Aviation Enterprise Synchronization Model workgroup supporting Army Aviation integration and synchronization of modernization efforts and funding strategy planning and execution for Army Aviation aircraft. Understand and advise ACM/CEAD

Directors on the Planning, Programming, Budgeting and Execution phases that effects Army Aviation programs that each ACM supports. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. TS/SCI Clearance required. One Position must show application for TS/SCI clearance NLT 90 days of hire if the Contractor does not already have a TS clearance.

c. Aviation Military Analyst (X2): (Unmanned Aircraft System Group 4 Expertise)

Must have twelve (12) years minimum Army Aviation tactical experience. Must be a former rated Senior Army aviator and/or Senior Army UAS operator or maintainer. DOTmLPF-P Solutions Assessment, UAS Cost-Benefits Analysis, UAS Modeling, Simulation, and Experimentation, and UAS Concept of Operations experience is desired. Must have a combination of experience adding up to at least five (5) years of either conducting Army UAS capabilities development within a Requirements Management office as described in the Joint Capabilities Integration Development System (e.g. AA-FCD or A-FCD) or operational experience in tactical Army aviation formations executing Army UAS operations where they managed flight operations, flight or maintenance scheduling, and mission execution. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Products must be written at the graduate level with a maximum of three revisions prior to presenting to the Government. SECRET clearance required.

d. Senior Aviation Military Analyst (X1): (Electromagnetic Warfare (EW) and Cyber Expertise) Rated Army Aviator or EW Warrant Officer with at least fifteen (15) years of combat operations experience is required. Experience in training and implementation of electromagnetic and cyber protection measures for Army Aviation aircraft fitted with Aviation Survivability equipment (ASE). Process in-depth knowledge of training, implementing and analyzing electromagnetic and cyber threat to Army Aviation platforms required. Experience as tactical operations officer (TACOPS), special electronic mission aircraft (SEMA), or electronic warfare officer preferred. Five years' experience working in capability management/combat developments is required. Experience in planning, executing and facilitating Working Groups and Integrated Product Teams (IPTs). Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Experience authoring a Joint Requirements Oversight Council (JROC) approved JCIDS document is desired. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for supporting ISR fixed wing aircraft or threat EW systems. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. Top Secret/Sensitive Compartmented Information (TS/SCI) clearance and JWICS access required within 90 days of hire.

e. Senior Aviation Military Analyst (X1): (Utility Helicopter Subject Matter Expertise)

Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP) or Instructor Pilot (IP) in Army Aviation utility helicopter formations. Experience in the current Army tactical utility aircraft fielded to Army aviation units required. Must process the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Army Aviator is required. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation utility aircraft. Prior tactical operational staff experience with Army Aviation attack, reconnaissance, or assault planning, training, and execution in organizations of 400 plus to 2863 plus personnel is preferred. At least five (5) years' experience working in combat/capabilities developments is required. Prior tactical operational management experience of a 400 plus organization is preferred. Experience as a Maintenance Test Pilot or Examiner in Army Aviation utility aircraft is desired. Experience in planning, executing and facilitating Joint Working Groups is desired. Experience as a Team Lead conducting Aviation studies with experience in developing capabilities and evaluating technologies is desired. Direct leadership of a team that authored a Joint Requirements Oversight Council (JROC) approved JCIDS document is desired. Participation as a direct team member in the Army Aviation Operations CBA is preferred. Basic understanding of the Army's light utility fleet and its limitations is required. Utility aviation operational experience in combat operations is desired. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. SECRET clearance required.

f. Aviation Military Analyst (X1): (Reconnaissance and Attack Expertise).

Rated Army Aviator with at least fifteen (15) years of Aviation flight/combat operations experience is required. Experience as a Standardization Instructor Pilot (SIP) in Army attack and reconnaissance aircraft utilized by tactical Army Aviation organizations since 2010 desired. Military or civilian equivalent training on how the Army Runs. Must possess the military or civilian equivalent staff courses similar to CGSC/ILE or Warrant Officer Senior Staff Course. Senior or Master rated Aviator is required. Understands and capable of providing detailed analysis or sub analysis to team members on the tactical operational employment of Army Aviation Reconnaissance and Attack capabilities in order to quickly identify operational gaps that need to be closed. Senior or Master rated Aviator required. Staff experience planning attack, reconnaissance and assault missions in an organization similar to an Army tactical organization consisting of 24 AH-64 helicopters or 30 UH-60 helicopters desired. Prior tactical operational management experience of a organization of 400 plus personnel is preferred. Minimum of 5 years' experience working in capability management /combat developments is required. Experience in planning, executing and facilitating Joint Working Groups. Experience as a Team Lead conducting Aviation studies and/or operational test events with experience in developing capabilities and evaluating technologies. Primary author of a Joint Requirements Oversight Council (JROC) approved JCIDS document is preferred. Participation as a direct team member in an Army Aviation Capability Based Assessment (CBA) for attack or

reconnaissance aircraft is preferred. Must be capable of independent work based on broad senior level guidance to produce completed white papers, concept papers, requirements documents, operational views, and other written products as required within the scope of the task order. Must be able to review and edit products to ensure they are written at the graduate level prior to delivery to the Government with only minor edits required by the Government. SECRET clearance required.

1.11 Identification of Contractor Employees: All Contractor personnel attending meetings, answering Government telephones, and working in other situations where their Contractor status is not obvious to third parties must identify themselves, to include proper marking of signature blocks in correspondence, to avoid creating an impression in the minds of members of the public that they are Government officials. The Contractor shall ensure that all documents or reports, produced by Contractors are suitably marked as Contractor products or that Contractor participation is appropriately disclosed. Badges will be issued under Mission Partner Identity, Credential, and Access Management (MP ICAM) Mission Partner Affiliation Sponsor (MPAS). Contractors shall follow MP ICAM instructions for initiating and obtaining a CAC.. For identification and security purposes, Contractor employees shall wear stated badges at all times when performing work under this task order. Contractor may choose to identify their personnel using reasonable means outlined in paragraph 1.12 to reduce confusion when working in a Government facility.

1.12 Contractor Workspace: (staging site, on-site office, desk or work area, etc.) shall contain a sign signifying the space is occupied by Contractor employee(s) to ensure that Government employees and the public know that they are not Government employees. The proposed sign shall be submitted to the Contracting Officer via the COR for review and acceptance 10 calendar days after contract award. Workspace sign location shall be coordinated with the COR. Contractor employees shall identify themselves by name and company affiliation when answering the telephone, presenting briefings, conducting or attending meetings, and seminars. All Contractor correspondence (written, facsimile, and email display) shall include their company name.

1.12.1 Contractor Identification Badges: Contractor personnel shall be easily identifiable through the display of Contractor Identification badges. Badges will be issued under Mission Partner Identity, Credential, and Access Management (MP ICAM) Mission Partner Affiliation Sponsor (MPAS). Contractors shall follow MP ICAM instructions for initiating and obtaining a CAC. For identification and security purposes, Contractor employees shall wear stated badges at all times when performing work under this task order. Contractor may choose to identify their personnel using reasonable means outlined in paragraph 1.12 to reduce confusion when working in a Government facility.

1.13 Contractor Travel: Travel will be required in performance of this PWS. The expected locations and frequency of travel are yet to be determined. Contractor may be required to travel CONUS and/or OCONUS during the performance of this contract to attend meetings, conferences, industry demonstrations, field demonstrations of new technologies, Warfighter engagements, and T2COM CAPSTONE Events. Prior to any travel, the Contractor shall obtain

written approval from the Contracting Officer's Representative (COR). Contractor will be authorized travel expenses consistent with the substantive provisions of the Joint Travel Regulation (JTR) and the limitation of funds specified in this contract. Optional Tasks may if implemented, will require Contractor travel similar to the base task positions. If the Contractor chooses to have an administrative travel system for its employees, those overhead costs will not be billed to the Government. The Government will only be billed for the actual travel expenses of the employee's travel, not company administrative "pass thru" or "baked in" costs. Trip reports are required for all travel and shall be submitted IAW most recent A-FCD SOP. The Contractor may be authorized travel expenses at rates no higher than the substantive provisions of the Joint Travel Regulation (JTR), IAW FAR Part 31.205-46, and the limitation of funds specified in this contract. All travel requires Government approval and authorization.

1.14 Other Direct Costs (ODCs): N/A

1.15 Data Rights: The Government has unlimited rights to all documents and materials produced under this contract. All documents and materials, to include the source codes of software, produced under this contract shall be Government owned and are the property of the Government with all rights and privileges of ownership and copyright belonging exclusively to the Government. These documents and materials may not be used or sold by the Contractor without written permission from the Contracting Officer. All materials supplied to the Government shall be the sole property of the Government and may not be used for any other purpose. This right does not abrogate any other Government rights.

1.16 Non-Disclosure Requirements: Performance under this contract may require the Contractor to access data and information proprietary to a Government agency, another Government Contractor, or of such nature that its dissemination or use other than as specified in this work statement would be adverse to the interests of the Government or others. The Contractor and Contractor personnel, shall not divulge or release data or information developed, or obtained under performance of this PWS, except to authorized Government personnel or upon written approval of the Contracting Officer. The Contractor shall not use, disclose, or reproduce proprietary data, which bears a restrictive legend, other than as specified in this PWS. All documentation showing individual names or other personal information shall be controlled and protected under the provisions of the Privacy Act of 1974, Public Law 93-579, 5 United States Code (U.S.C.) Section 552a.

1.17 Protection of Government and Contract Information: Per Public Use Notice of Limitations stated by Defense imagery Management operations Center and contained at www.dimoc.mil/resources/limitations/, the Contractor shall not cite any information (e.g., contract information, pictures, locations, etc.) obtained through this contract on any hard copy or digital marketing tools to include its company website.

1.18 Non-Disclosure Statements: The Contractor shall provide signed non-disclosure agreements (when applicable) to the Government no later than 14 days prior to commencement of work under the contract. Disclosure of information by Contractor personnel may result in removal of Contractor personnel from performance under this contract.

1.19 Organizational Conflict of Interest (OCI): Contractor and Subcontractor personnel performing work under this contract may receive, have access to or participate in the development of proprietary or source selection information (e.g., cost or pricing information, budget information or analyses, specifications or work statements, etc.) or perform evaluation services which may create a current or subsequent OCI as defined in FAR Subpart 9.5. The Contractor shall notify the Contracting Officer immediately whenever it becomes aware that such access or participation may result in any actual or potential OCI and shall promptly submit a plan to the Contracting Officer to avoid or mitigate any such. The Contractor's OCI Mitigation Plan will be determined to be acceptable solely at the discretion of the Contracting Officer. In the event the Contracting Officer unilaterally determines that any such OCI cannot be satisfactorily avoided or mitigated, the Contracting Officer may affect other remedies as he or she deems necessary, including prohibiting the Contractor from participation in subsequent contracted requirements which may be affected by the OCI.

1.20 Phase In /Phase Out Period: To minimize decreases in productivity and to prevent possible negative impacts on additional services, the Contractor shall have personnel on board, during the 14 days phase in/ phase out periods. During the phase in period, the Contractor shall become familiar with performance requirements in order to commence full performance of services on the contract start date.

1.21 Safety: The following provides information pertaining to Safety and Accident Prevention:

1.21.1 Safety Laws and Regulations: The Contractor shall comply with FAR 52.236-13, Accident Prevention (November 1991), the references contained therein (e.g. *U.S. Army Corps of Engineers Safety and Health Requirements Manual (EM 385-1-1)*).

1.21.1.1 In addition to other requirements for accident prevention specified in this contract, the Contractor shall comply with all Federal and State requirements governing safety and health protection on construction sites and other applicable occupational safety codes. Conform to the safety requirements contained in the contract for all activities related to the accomplishment of the work and take additional immediate precautions as the Contracting Officer may reasonably require for safety and mishap prevention purposes. Record and report promptly (within one hour) to the Contracting Officer (KO) or Contracting Officer Representative (COR), all available facts relating to each instance of damage to Government property or injury to either Contractor or Government personnel.

1.21.1.2 The Contractor shall complete and provide safety notifications required and will provide documented proof to the Contracting Officer via the COR, no later than 5 days that such notifications were made.

1.21.1.3 Include a clause in all subcontracts to require Subcontractors to comply with the safety provisions of this contract and cooperation and assistance in accident reporting and investigation as applicable.

1.22 Environmental Compliance: The following provides information on Environmental Compliance.

1.22.1 Environmental Compliance Plan and Program: The Contractor shall comply with pertinent provisions of the Occupational Safety and Health (OSH) Act, and state, local safety laws and abide by applicable Army regulations, publications, manuals, and local policies and procedures.

1.23 Required Training: The following provides information on training requirements.

1.23.1 Anti-Terrorism (AT) Level I Training: All Contractor employees, including Subcontractor employees, who are employed under the contract, shall complete AT Level I Training within 30 Days after contract start date or effective date of incorporation of this requirement into the contract, whichever applies, or 30 days after employment of new personnel. Contractor personnel travelling overseas shall complete area of responsibility (AOR) specific AT awareness training for U.S. based Contractor employees and associated Subcontractor employees. The Contractor shall submit certificates of completion (Deliverable 5.7.7) for each affected Contractor employee and Subcontractor employee to the COR (or to the Contracting Officer, if a COR is not assigned) within 14 days after completion of this training by all employees and Subcontractor personnel. AT Level I awareness training is available at <https://ikodirect.jten.mil>. Contractor personnel shall complete refresher training (Deliverable 5.7.7) every twelve (12) months except AOR specific AT Level I training which shall be completed as required by local AT policies.

If training cannot be conducted on the website, the Contractor shall coordinate with the COR who will contact the local AT Officer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the AT Officer. Verification of the training shall be provided to the COR within 14 days after completion of the training.

1.23.2 OPSEC Training: All Contractor employees, including Subcontractors, shall complete Level I OPSEC training within 30 days of employment under this contract. Verification of the training shall be provided to the COR within 5 business days after completion of the training. OPSEC Level I training is available at <http://www.cdse.edu/catalog/elearning/GS130.html>. Contractor personnel must complete refresher training every 12 months. Verification of the training shall be provided to the COR within 5 business days after completion of the training.

If training cannot be conducted on the website, the Contractor shall coordinate with the COR, who will contact the local OPSEC Officer at their assigned location for classroom training. Contractor personnel completing training in the classroom will receive a certificate or the training attendance roster signed by the OPSEC Officer. Verification of the training shall be provided to the COR within 5 business days after completion of the training.

1.23.3 iWATCH Training: The Contractor and all associated Subcontractors shall brief all employees on the local iWATCH program (training standards provided by the requiring activity ATO). This locally developed training will be used to inform employees of the types of behavior to watch for and instruct employees to report suspicious activity to the COR. This training shall be completed within 30 calendar days after the contract is awarded and within 30 calendar

days after new employees commence contract performance, with the results reported to the COR within 35 calendar days after the contract is awarded and within 30 calendar days after new employees commence contract performance. Verification of the training shall be provided to the COR within 5 business days after completion of the training. Training slides can be found on the Army OneSource website: <https://www.swf.usace.army.mil/Missions/Antiterrorism-Community-Awareness/>

1.23.4 Information Assurance (IA) Training

1.23.4.1 All Contractor employees, including Subcontractors, requiring access to Government information systems shall complete the DoD IA Cyber Awareness Training within prior to commencement of work or effective date of incorporation of this requirement into the contract, whichever applies, or prior to new personnel getting network access. Verification of the training shall be provided to the COR within 5 business days after completion of the training.

<https://cs.signal.army.mil/UserMngmt/UserPortal.asp>

1.23.4.2 All Contractor employees, including Subcontractors, working information technology (IT)/IA functions shall comply with DoD and Army training requirements per Information Assurance Training Certification and Workforce Management DoD Directive (DoDD) 8570.01, Information Assurance Workforce Improvement Program DoD 8570.01-M, and Information Assurance AR 25-2 within thirty (30) calendar days of employment. Training is available at

<https://learn.atis.army.mil/moodle/mod/scorm/view.php?id=17848>

1.23.4.3 All Contractor employees, including Subcontractors, performing services under this contract with access to a Government information system must be registered in the Army Enterprise System Management Platform (AESMP), (requires CAC to access. Verification of registration shall be provided to the COR within 5 business days after registration. Contractor personnel must complete refresher training every twelve (12) months. Verification of the training shall be provided to the COR within 5 calendar days after completion of the training.

1.23.5 Personally Identifiable Information (PII): Contractor employees, including Subcontractors, performing services under this contract with access to PII and Government information shall complete "Identifying and Safeguarding PII" within 30 calendar days of employment. Contractor personnel shall complete refresher training every twelve (12) months from initial completion. The Contractor shall provide the COR a copy of the training certificates for its employees no later than five (5) days after completion. Training is available at

https://jkodirect.jten.mil/Atlas2/page/coi/externalCourseAccess.jsf?v=1742499223253&course_prefix=J6S&course_number=N-US416.

PART 2 DEFINITIONS & ACRONYMS

2. Definitions and Acronyms

2.1 Definitions: Although not inclusive of every term used within this PWS, the following provides a list of definitions used throughout this PWS and commonly used in the acquisition field.

Contracting Officer – means a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings on behalf of the Government. Note: The only individual who can legally bind the Government.

Contracting Officer's Representative (COR) – As defined in DFARS 202.101, means an individual designated and authorized in writing by the Contracting Officer to perform specific technical or administrative functions. DoD Instruction (DoDI) 5000.72, Part II Definitions states the following when defining a COR: “Defined in subpart 202.101 of Reference (f). Any individual delegated responsibilities pursuant to subpart 1.602-2 of Reference (e), regardless of local terminology, must be certified in accordance with this instruction. For example, local terminology can be COR, Contracting Officer’s technical representative, technical point of contact, technical representative, alternate COR, administrative COR, assistant COR, line item manager, task order manager, quality assurance personnel, quality assurance evaluator, or COR management.” In addition, Army Regulation 70-13, Chapter 2, paragraph 2-2g, states, in part, the following when providing other surveillance support personnel to assist the COR when needed, “...These other surveillance support personnel may serve as on-site representatives of the COR in performance of actual contract surveillance if they meet all COR requirements and have been appointed by the Contracting Officer as alternate CORs.”

Contractor – means a supplier or vendor awarded a contract to provide specific supplies or service to the Government. The term used in this contract refers to the prime.

Day – means, unless otherwise specified, a calendar day.

Defective Service – means a service output that does not meet the standard of performance associated with the Performance Work Statement.

Deliverable – means anything that can be physically delivered, but may include non-manufactured things such as meeting minutes or reports.

Government-furnished Property – As reflected in FAR 52.245-1, Government-furnished Property “means property in the possession of, or directly acquired by, the Government and subsequently furnished to the Contractor for performance of a contract. Government-furnished property includes, but is not limited to, spares and property furnished for repair, maintenance, overhaul, or modification. Government-furnished property also includes Contractor-acquired

property if the Contractor-acquired property is a deliverable under a cost contract when accepted by the Government for continued use under the contract.

Government Property – means all property owned or leased by the Government. Government property includes both Government-furnished and Contractor-acquired property. Government property includes material, equipment, special tooling, special test equipment, and real property. Government property does not include intellectual property and software.

High Level Objective (HLO) – means a key overarching result-based objective for a project necessary to achieve the project's vision. HLOs are similar to Level 2 in a Work Breakdown Structure. Each HLO may contain several statements to flesh out the areas necessary to meet the objective.

Physical Security – means that part of security concerned with physical measures designed to safeguard personnel; to prevent unauthorized access to equipment, installations, material, and documents; and to safeguard against espionage, sabotage, damage, and theft.

Quality Assurance – (or Government contract quality assurance) means the various functions, including, inspection, performed by the Government to determine whether a Contractor has fulfilled the contract obligations pertaining to quality and quantity.

Quality Control – means all necessary measures taken by the Contractor to assure that the quality of an end product or service shall meet contract requirements.

Statement – means the specific results-based activities required to satisfy HLOs. A statement contains a result, the context of the statement, and the required action(s). Statements focus on “what” is to be accomplished; however they are not prescriptive in describing “how” the outcome is to be achieved. Each HLO may have several statements to flesh out the areas necessary to meet the objective. Statements are similar to Level 3 in a Work Breakdown Structure.

Subcontractor – means one that enters into a contract with a prime Contractor. The Government does not have privity of contract with the Subcontractor.

Training Aids, Devices, Simulators and Simulations (TADSS)- TADSS is a general term that includes training instrumentation; tactical engagement simulation (TES); battle simulations; targetry; training-unique ammunition; dummy, drill, and inert munitions; casualty assessment systems; training aids; and other training support devices. They incorporate training enablers which support training in the live, virtual/gaming, constructive (LV/GC) environments, regardless of training site, or event, for example. combat training centers (CTCs), home stations, institutions.

Work Day – The number of hours per day the Contractor provides services in accordance with the contract.

2.2 Acronyms: Although not inclusive of every term used within this PWS, or that may be included in an acquisition, the following provides a list of acronyms commonly used in the acquisition field.

ACOE	Aviation Center of Excellence
AOR	Area of Responsibility
AR	Army Regulation
ASE	Aviation Survivability Equipment
AT	Anti-terrorism
AESMP	Army Enterprise System Management Platform
CAC	Common Access Card
CCE	Contracting Center of Excellence
CEAD	Concepts, Experimentation, and Analysis Directorate
CME	Contractor Man-year Equivalent
CONUS	Continental United States (excludes Alaska and Hawaii)
COR	Contracting Officer's Representative
DA	Department of the Army
DAC	Department of the Army Civilian
DD254	Department of Defense Contract Security Requirement List
DoD	Department of Defense
DOTmLPF-P	Doctrine, Organization, Training, Materiel, Leader Development, Personnel, Facilities and Policy
EXSUM	Executive Summary
FAR	Federal Acquisition Regulation
FCC	Futures and Concepts Center
GFP	Government Furnished Property
HLO	High Level Objective
IAC	Installation Access Control
ID	Identification
IT	Information Technology
JCIDS	Joint Capability Integration and Development System
JTR	Joint Travel Regulation
JWICS	Joint Worldwide Intelligence Communications System
KO	Contracting Officer
MILPER	Military Personnel
OCI	Organizational Conflict of Interest
ODC	Other Direct Costs
OPSEC	Operations Security
PA	Property Administrator
PII	Personally Identifiable Information
PIPO	Phase In/Phase Out
POC	Point of Contact
PRS	Performance Requirements Summary
PWS	Performance Work Statement
QA	Quality Assurance

QC	Quality Control
QCP	Quality Control Program
RA	Requiring Activity
TADSS	Training Aids, Devices, Simulators, and Simulations
TO	Task Order
TE	Technical Exhibit
T2COM	Transformation and Training Command
UAS	Unmanned Aircraft Systems
USAACE	United States Army Aviation Center of Excellence

PART 3

GOVERNMENT PROPERTY (GP) AND SERVICES

3. Government Property and Services

3.1 Services: The Government will provide Contractor personnel with the services provided to Government employees to include information systems support, ID Card (CAC), office cleaning services at Government facilities, and telecommunication support services.

3.2 Facilities: The Government will provide Contractor personnel located on the Fort Rucker site with Government furnished office furniture and computers, similar to that provided to Government employees, including Government provided email and network services. The Contractor personnel on Fort Rucker will also be authorized official telephone service including access to the Defense Switched Network (DSN), Unclassified but Sensitive Internet Protocol Router Network (NIPRNET), and the Secret Internet Protocol Router Network (SIPRNET) as required.

3.3 Utilities: The Government will provide all utilities in the facility for the Contractor's use in performance of tasks outlined in this PWS. The Contractor shall instruct employees in utilities conservation practices. The Contractor shall be responsible for operating under conditions that preclude the waste of utilities, which include turning off the water faucets or valves, electrical accessories (e.g. persona fans, coffee pots) and lighting when not in use or at the end of the day.

3.4 Equipment: The Government will provide Government furnished office furniture and computers, telecommunications equipment, access to printers, copiers, and fax equipment.

3.5 Materials: The Government will provide office production materials required to produce briefings, copies, and papers.

3.6 Training: The Government will provide the following training: AT Level 1 Awareness, OPSEC, iWATCH, Information Assurance (IA)/Information Technology (IT) training, Threat Awareness Reporting Program (TARP) Sexual Harassment, Assault, Response, Prevention (SHARP) training.

3.7 Common Access Cards (CAC): The Government will provide Common Access Cards (CAC) via the Trusted Associate Sponsorship System (TASS)

PART 4
CONTRACTOR FURNISHED ITEMS AND SERVICES

4. Contractor Furnished Property and Services

4.1 General:

4.2 Secret Facility Clearance: The Contractor shall possess and maintain a Top Secret/Sensitive Compartmented Information (TS-SCI) facility clearance from the Defense Security Service IAW DoD 5220.22-M, National Industrial Security Program Operating Manual (NISPOM) and AR 380-49, Industrial Security Program. The Contractor's employees, performing work in support of this contract shall have been granted a Secret or TS-SCI from the Defense Industrial Security Clearance Office. The Facility Security Clearance must match the highest security clearance required for personnel. The DoD Contract Security Classification Specification (DD 254) is provided as an attachment in the basic contract.

4.3 Background Checks: The Contractor shall provide Background Checks in accordance with this PWS and as required by the Government.

PART 5

SPECIFIC TASKS

5.1 Basic Services: The Contractor shall provide services for professional support services for A-FCD located at United States Army Aviation Center of Excellence (USAACE), Fort Rucker, Alabama. This effort enables the A-FCD to fulfill its mission to support integration and synchronization of Army Aviation modernization efforts for the enduring force, future force, and prepare the force to field emerging capabilities.

5.2 Tasks: Tasks consist of the following:

5.2.1 Conducts Requirements Analysis To Develop and Document Required Aviation Capabilities.

5.2.1.1 The Contractor shall conduct requirements analysis and capability assessments to accurately document military requirements in the Joint Capabilities Integration Development System (JCIDS), Joint/Urgent Operational Needs Statements (JUONS), and other rapid but nonstandard methodologies for identifying needed capabilities and documenting the necessary Army requirements to deliver the needed capability. Analysis will be conducted and documented in accordance the Army Capabilities Based Assessment (CBA) process outlined in Army Regulation 71 – 9 Warfighting Capabilities Determination Dated 29 July 2021 and T2COM Regulation 71-20 dated June 28, 2013. For all analytics and deliverables detailed in this PWS, the Contractor may make recommendations, but a Government official will make all decisions and acceptance of deliverables.

5.2.1.2 The Contractor shall conduct life cycle DOTmLPF-P mission, gap and capability analysis to identify the ideal military capabilities through the conduct of CBA and Cost Benefit Analysis (C-BA), Analysis of Alternatives (AoA) and other appropriate studies and experimentation per the latest Joint Capability Integration Development Systems (JCIDS) publications and supplemental guidelines published on the Futures Concept Center's SharePoint site. While the Contractor may make recommendations, but a Government official will make all decisions and acceptance of deliverables.

5.2.1.3 The Contractor shall provide assessments of operational employment, communication systems utilized, and associated platform/system software to support development and design of DoDAF architecture required under Chairman of the Joint Chief of Staff Instruction (CJCSI 6212.01E) dated 15 December 2008. The Contractor shall develop and build operational and system architectures to meet JCIDS requirements.

5.2.1.4 The Contractor shall prepare analysis and studies supporting resource prioritization recommendations required in various resourcing venues like the Program Objective Memorandum (POM) Build, Force Design Updates (FDU), Total Army Analysis (TAA), Weapon Systems Reviews (WSR), Programs of Instruction (POI), and other similar resource identification and prioritization venues to enable decision making using products provided by the Army Futures Command Futures Concept Center and Aviation Capability Development

Directorate and Aviation Center Organization, Personnel, and Force Development Directorate. The Contractor shall provide analysis and studies recommendation using spreadsheet, PowerPoint, Word and /or email.

5.2.1.5 The Contractor shall perform analysis, facilitate coordination, and provide technical inputs in the continued upgrading, deployment, and acceptance, operational test and evaluation of TADSS with associated Aviation systems required for institutional and operational training of the force. The Contractor shall plan, facilitate coordination, recommend, and/or provide technical liaison between Aviation Capability Development and Integration Directorate (AVDID) and supported installations or locations (i.e., Fort Eustis, Ft. Cavazos, Fort Campbell, Fort Stewart, Korea, Germany, etc.) for integration of Aviation System TADSS into unit operations.

5.2.1.6 The Contractor shall provide support to current and future manned and unmanned aviation platforms and weapon / munition systems, potential system upgrades and improvements, protection and preventive measures to reduce operational impact to Aviation Systems against potential threat systems current and future, advanced weapon concepts, technical documentation, technical performance, systems engineering, systems integration, advanced technology demonstrations, weapon system guidance and control, interfaces, cost-trade studies, multi-mode seeker technology, warhead and fuse technology, propulsion technology, and integration with current and evolving launch platforms, to include all airframes and ground/naval systems and integration with command-and-control systems of the digitized force. The Contractor shall perform analysis, facilitate coordination, and provide technical inputs to system and subsystem operational test and evaluation, initial deployment and acceptance, and follow-on evaluation events for all Aviation System and subsystem.

5.2.1.7 The Contractor shall perform system integration and synchronization/operations support for DOTMLPF-P efforts with Headquarters Department of the Army, T2COM Commands, and other FCC counterparts at Centers of Excellence A-FCD on enduring Aviation portfolio modernization strategies and fielding of current and future aviation systems. The Contractor will assess future force synchronization charts developed by Army Future Force agencies and synchronize Army Aviation ensuring force modernization efforts to synchronize the modernization effort. Products will include information papers, PowerPoint Briefs, and/or Decision Papers dependent on project.

5.2.1.8 The Contractor shall perform capability management and integration of Aviation Survivability Equipment on the enduring fleet of Army aircraft and associated Electromagnetic and Cyber impacts against Army Aviation systems. The Contractor shall provide support to current and future manned and unmanned aviation platforms and weapon / munition systems providing potential system vulnerabilities and operational assessment to electromagnetic and cyber threats. Provide analysis on emerging concepts, technical documentation, technical performance, systems engineering, systems integration, advanced technology demonstrations, cost-trade studies, and aviation survivability equipment technology to determine feasibility of capability acceleration for the enduring force capability using PowerPoint, Information Papers and/or meeting executive summaries.

5.2.2 Executes Synchronization and Coordination For Fielding, Integration, Training And Sustainment.

5.2.2.1 The Contractor shall analyze, assess and provide recommended adjustments to the current DOTmLPF-P requirements related to Army UAS, Army aviation weapons and munitions, Electromagnetic and Cyber effect on Army Aviation, manned Army Aviation Reconnaissance and Attack, Utility, Cargo, and Fixed Wing Aircraft. Recommendations may include non-materiel and/or materiel solutions to support the Warfighter using PowerPoint Presentations, Information Papers and/or Decision Papers, and/or email.

5.2.3 Provide Analysis, Coordination and Mission Command to Communicate Issues And Solutions.

5.2.3.1 The Contractor shall communicate ideas, analysis and concept development of suitable, feasible, executable courses of action to enable prioritization of efforts through PowerPoint Presentations, Information Papers and/or Decision Papers, and email.

5.2.3.2 The Contractor shall identify capability issues, operational testing and evaluation, fielding, and integration problems for resolution development and provide the Government the issue and proposed plan to solve the issues though email or verbally initially, then follow up with PowerPoint Briefing, Information and/or Decision Paper.

5.2.3.3 The Contractor shall facilitate and conduct stakeholder meetings,workgroups, and teleconferences and assist in the development of communication products (memos,briefings, information papers) using local, Department of the Army, and DoD policy standards.

5.2.4 Performs Systems Engineering.

5.2.4.1 The Contractor shall provide subject matter expertise for analysis and technical recommendations during development, validation and verification of the enduring Aviation portfolio: UAS, aviation weapons and munitions, Electromagnetic and Cyber solutions, Aviation System TADSS, manned Reconnaissance and Attack rotary aircraft, manned Utility rotary aircraft manned Cargo rotary aircraft, Fixed Wing Aircraft, system and subsystem technical manuals, and training and simulation strategies in support of Aviation systems and subsystems.

5.2.4.2 The Contractor shall provide support to T2COM future system development with the assessments of Science & Technology and Payloads in support of programs and Information Technology as related to their programs to identify recommended technologies to implement on the enduring force. Tasks support aviation weapons and munitions, Electromagnetic and Cyber, and manned and unmanned Reconnaissance and Attack, Utility, Cargo, and Fixed Wing Aircraft programs. These assessments shall be conducted using the Technology Assessment and Transition Management (TATM) process. The Contractor shall perform system interface with U.S. Army Training and Doctrine Command (T2COM), Program Executive Offices (PEOs), other Army Commands, Department of the Army, other Services,

and the Office of the Secretary of Defense (OSD), Contractors, academia, and Other Government Agencies (OGA). A Top Secret Clearance is desired to execute this task.

5.2.4.3 The Contractor shall provide expertise in requirements management using the customer's requirements management software tools and add-ons as appropriate including the use of DoD's Architecture Registry System (DARS). The Contractor shall provide systems analysis and technical recommendations for the purpose of resolving conflicts identified during requirements analysis, decomposing functional requirements and allocating performance requirements during functional analysis, evaluating the effectiveness of alternative design solutions and selecting the best design solution during synthesis, assessing system effectiveness, and managing risk factors throughout the systems engineering effort.

5.2.4.4 The Contractor shall provide operational, system, and software support for the development and design of DoDAF architecture required under Joint Chief of Staff Instruction (CJCSI 6212.01E) dated 15 December 2008. The Contractor shall develop and build operational and system architectures to meet draft and approved JCIDS requirements.

5.2.4.5 The Contractor shall support system demonstrations and tests when coordinated by the PMOs. This includes Army UAS, Army aviation weapons and munitions, Electromagnetic and Cyber effects on Army Aircraft, and manned Army Aviation Reconnaissance, Attack, Utility, Cargo, and Fixed Wing Aircraft programs. The Contractor shall facilitate and conduct stakeholder meetings, workgroups, and Teleconferences, assist in the collection and analyses of system (flight) performance data and operational interoperability requirements with other system components that make up the mission command system for the purposes of assessing conformity to the systems requirements document, where appropriate. The Contractor shall develop, recommend and staff the appropriate changes to the systems requirements documentation as systems mature using PowerPoint Briefings, Information and/or Decision Papers.

5.2.5 Performs Planning, Prioritization, Management, Integration, and Administration.

5.2.5.1 The Contractor shall perform planning and operational management as required by the organization for a wide range of efforts critical to the operation of the organization. The Contractor coordinate, manage, integrate, and draft appropriate responses across the Directorate. Prepare plans, identifies and coordinates requirements, or participates in integrated product teams (IPTs).

5.2.5.2 The Contractor shall perform complex administrative and technical services that directly affect the organization as a whole or represent a major segment of a program critical to the organization's ability to manage its mission. Develops and articulates the A-FCDs operational requirements, prioritizes those requirements and orchestrates support for those requirements. Proposes resolutions when analysis exposes possible issues.

5.2.5.3 The Contractor shall ensure final deliverables are representative of the facts, organizational philosophy, and accurately respond to the issues. Translates strategic concepts

and vision into operational objectives and tasks to posture the directorate for success in executing future operations requirements and activities.

5.2.5.4 The Contractor shall act as initial Directorate point of contact (POC) for all Government requests for information. Maintains a working repository database of information pertaining to directorate operations and workload in order to support prompt analyses.

5.3 Service Contract Reporting

5.3.1 System for Award Management (SAM) Service Contract Report (SCR): The Contractor shall report ALL Contractor labor hours (including Subcontractor labor hours) required for performance of services provided under this contract for the U.S. Army Aviation Center of Excellence via a secure data collection site. The Contractor is required to completely fill in all required data fields through the following web address: www.sam.gov. Reporting inputs will be for the labor executed during the period of performance during each Government FY, which runs from October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than October 31 of each calendar year. Contractors may direct questions to the help desk by clicking “View Assistance for SAM.gov” which is located at the top of the SAM.gov website. From there, you can select “Contact Our Service Desk” which will allow you to contact SAM.gov directly. If contract period of performance ends prior to September 30, the Contractor has 30 calendar days from end date of the contract to complete the SAM SCR requirement.

Steps for Submitting a Service Contract Report (SCR)

1. Go to www.sam.gov and log in.
2. Select Entity Registrations and then select Service Contract Reporting.
3. SAM displays your entities which have service contracts and meet the reporting criteria. Select View by entity to see the service contracts for each entity.
4. Next, select Add for the service contract against which you want to create a Service Contract Report. Each service contract which meets the FAR Subpart 4.1703 reporting thresholds is displayed.
5. You will be taken to the Complete Service Contract Report page. SAM displays the contract details and allows you to report. You are required to enter the following information:
 - **Total Amount Invoiced:** Total dollar amount invoiced for services performed during the previous Government fiscal year under the contract (this amount should include the prime and any subcontract amount).
 - **Prime Contractor Hours Expended:** Prime Contractor direct labor hours expended on the services performed during the previous Government fiscal year. The amount you enter is automatically divided by 2,080 hours to calculate a Full Time Employee (FTE) equivalent, displayed under the Prime Contractor Hours Expended as Prime Contractor FTEs.
6. Report any required Tier 1 Subcontractor information by selecting the Add Tier 1 Subcontract Information button.

7. When you are ready to submit the report, select Submit. This saves your report and returns you to the Select Service Contract page where you can create other SCRs or edit an existing SCR.

Steps for Editing a Submitted Report

1. Follow steps 1-4 above. Any previously submitted SCR will have a View/Edit button instead of an Add button.
2. Select View/Edit. You will be able to view the current SCR, edit available fields, and resubmit the record. You can also delete previously entered information altogether.

STD: All information provided by the Contractor shall be accurate, complete, and not exceed suspense dates noted in corresponding paragraph above.

AQL: 100% Compliant

PART 6

APPLICABLE PUBLICATIONS

6. Applicable Publications (Current Editions): The following publications, manuals, regulations, etc. are mentioned in this PWS and are listed below.

- 6.1.1 Department Of Defense Contract Security Classification Specification (DD Form 254)
- 6.1.2 Department of Defense Security Agreement (DD Form 441)
- 6.1.3 National Industrial Security Program Operating Manual (DoD 5220.22-M)
- 6.1.4 Army Regulation 350 –1 Army Training and Leader Development

- 6.1.5 The Army Physical Security Program (AR 190-13)
- 6.1.6 Contractor Identification (AE Reg 27-715)
- 6.1.7 U.S. Army Corps of Engineers Safety and Health Requirements Manual (EM 385-1-1)
- 6.1.8 Information Assurance Workforce Improvement Program (DoD 8570-M)
- 6.1.9 Information Assurance Training Certification and Workforce Management Directive (DoDD 8570.01)
- 6.1.10 Information Assurance (AR 25-2)
- 6.1.11 Electromagnetic Compatibility Directive (2004/108/EC)
- 6.1.12 Policies and Procedures for Property Accountability (AR 735-5)
- 6.1.13 7.1.13 Department of Defense (DoD) Joint Capability Integration and Development System (JCIDS) requirements development processes and documentation
- 6.1.14 Army Regulation 71 – 9 Warfighting Capabilities Determination Dated 29 July 2021
- 6.1.15 T2COM Regulation (TR) 71-20 dated 28 June 2013
- 6.1.16 TR 71-12 dated 3 October 2012
- 6.1.17 Applicable emerging Army or T2COM regulations.
