

U.S. Department of the Interior
Contract Consolidation Determination and Findings

1.	Purchase Request Number: TBD
2.	Solicitation Numbers: 140D0426R0052; 140D0426R0055
3.	Contracting activity/agency: National Institute of Health (NIH), National Cancer Institute (NCI), Center for Biomedical Informatics and Information Technology (CBIIT)
4.	Project Names: Clinical Trials Reporting Program – Cloud Scientific Engineering (CTRP-CSE); Clinical Trials Reporting Office – Support Services (CTRO-SS)
5.	Description of supplies or services required to meet agency needs. The Acquisition Services Directorate (AQD) anticipates issuing two Time-and-Materials (T&M) Task Orders against the internal AQD-issued Biomedical Information Technology, Software Development, and Informatics Support (BITSDIS) Indefinite Delivery-Indefinite Quantity (IDIQ) to provide a variety of biomedical informatics support services for the NCI CBIIT's Clinical Trials Reporting Program (CTRP). This Determination and Findings (D&F) is executed in support of both Task Order 140D0426R0052 – CTRP-CSE and Task Order 140D0426R0055 – CTRO-SS. Currently AQD administers three separate Task Orders to meet NCI's requirements. The NCI CBIIT has determined the services performed under the three previous Task Orders must be consolidated into two new acquisitions titled CTRP-CSE and CTRO-SS. It was determined that consolidating the three task orders into two represents the most effective and efficient acquisition approach. This decision is based on the need to eliminate duplicative efforts, reduce administrative burden and associated costs and address inconsistencies across the current Task Orders. By streamlining the requirements into two acquisitions, the Government will achieve improved operational efficiency, enhanced coordination of services, and more consistent performance outcomes. This consolidation approach also enables clearer accountability, better resource alignment, and simplified contract administration. Additionally, consolidation is expected to generate cost savings through the reduction of redundant tasks, decreasing the level of effort, and improved economies of scale, ultimately supporting more cost-effective delivery of mission requirements. This consolidation would not have any national or regional contract implications, as all services will continue to be performed at NCI facilities in Bethesda/Rockville, MD. This consolidation will also have no effect on small business (SB) participation, as none of the predecessor Task Orders were set aside for SB, and none of the BITSDIS IDIQ contract holders are SB vendors. The previous acquisition info is as follows: • Clinical Trials Reporting Program – Technical Support • <i>Contract Number:</i> 47QTCA20D003A / 140D0420F0417 • <i>Contracting Office:</i> AQD Division 2 Branch 2

- *Contractor Name:* Essex Management LLC.
- *Total Contract Value:* \$25,923,073.01
- *Contract Type:* Time-and-Materials
- *Contract Term:* 07/28/2020 – 09/27/2026
- *NAICS:* 541511 - Custom Computer Programming Services
- *PSC:* D399 - IT and Telecom - Other It and Telecommunications
- *Method of Procurement:* General Services Administration (GSA) Multiple Award Schedule (MAS) 54151HEAL
- *Competition:* Multiple Award Fair Opportunity
- *Small Business Program Utilized:* No set-aside used

- **Clinical Trials Reporting Office**

- *Contract Number:* 140D0421D0007 / 140D0421F0590
- *Contracting Office:* AQD Division 2 Branch 2
- *Contractor Name:* Essex Management LLC
- *Total Contract Value:* \$20,648,663.08
- *Contract Type:* Time-and-Materials
- *Contract Term:* 09/01/2021 – 08/31/2026
- *NAICS:* 541690 – Other Scientific and Technical Consulting Services
- *PSC:* DA01 - Business Application/Application Development Support Services (Labor)
- *Method of Procurement:* BITS DIS IDIQ
- *Competition:* Multiple Award Fair Opportunity
- *Small Business Program Utilized:* No set-aside used

- **Clinical Trials Reporting Program – Software Development**

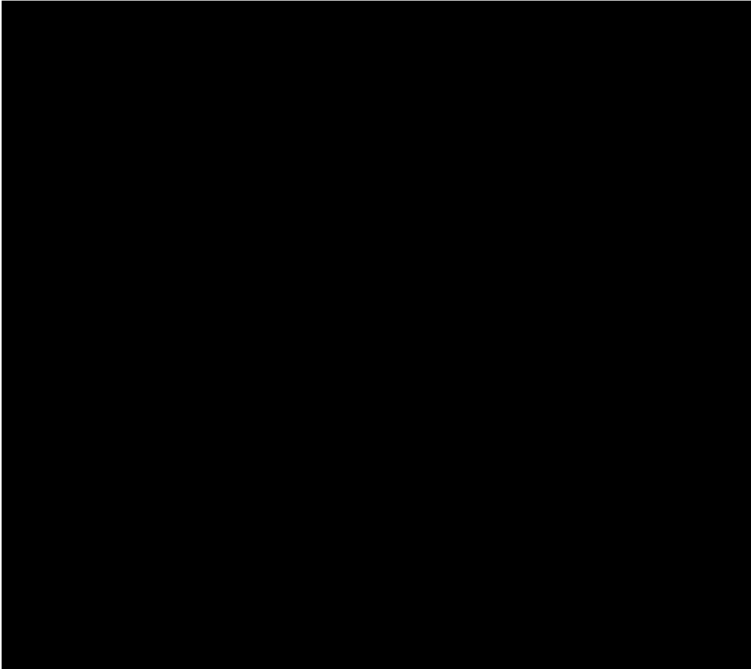

- *Contract Number:* 140D0421D0005 / 140D0421F0591
- *Contracting Office:* AQD Division 2 Branch 2
- *Contractor Name:* Booz Allen Hamilton
- *Total Contract Value:* \$28,955,765.45
- *Contract Type:* Time-and-Materials
- *Contract Term:* 08/17/2021 – 08/16/2026
- *NAICS:* 541690, Other Scientific and Technical Consulting Services
- *PSC:* DA01, Business Application/Application Development Support Services (Labor)
- *Method of Procurement:* BITS DIS IDIQ
- *Competition:* Multiple Award Fair Opportunity
- *Small Business Program Utilized:* No set-aside used

The new acquisition info is as follows:

- **Clinical Trials Reporting Program – Cloud Scientific Engineering (CSE)**

- *Contract Number:* TBD
- *Contracting Office:* AQD Division 2 Branch 2

	• <i>Contractor Name:</i> TBD • <i>Estimated Contract Value:</i> [REDACTED] • <i>Contract Type:</i> Time-and-Materials • <i>Contract Term:</i> 08/17/2026 – 08/16/2031 • <i>NAICS:</i> 541690, Other Scientific and Technical Consulting Services • <i>PSC:</i> DA01, Business Application/Application Development Support Services (Labor) • <i>Method of Procurement:</i> BITSDIS IDIQ • <i>Competition:</i> Multiple Award Fair Opportunity • <i>Small Business Program Utilized:</i> No set-aside used • Clinical Trials Reporting Office – Support Services (CTRO-SS) • <i>Contract Number:</i> TBD • <i>Contracting Office:</i> AQD Division 2 Branch 2 • <i>Contractor Name:</i> TBD • <i>Estimated Contract Value:</i> [REDACTED] • <i>Contract Type:</i> Time-and-Materials • <i>Contract Term:</i> 08/17/2026 – 08/16/2031 • <i>NAICS:</i> 541690, Other Scientific and Technical Consulting Services • <i>PSC:</i> DA01, Business Application/Application Development Support Services (Labor) • <i>Method of Procurement:</i> BITSDIS IDIQ • <i>Competition:</i> Multiple Award Fair Opportunity • <i>Small Business Program Utilized:</i> No set-aside used
6.	Market Research In accordance with <u>FAR 7.107-2</u>, I have reviewed this requirement and associated market research and determined that consolidation of the referenced contract requirements is both necessary and justified. This acquisition will be a competitive Request for Task Order Proposal (RFTOP) competed amongst qualified BITSDIS IDIQ Contract holders in accordance with Federal Acquisition Regulation (FAR) subpart 16.5, Indefinite-Delivery Contracts. The objective of the BITSDIS IDIQ acquisition is to acquire contracted professional biomedical information technology, software development, and informatics support that will assist NIH in planning, developing, documenting, implementing, updating, and supporting biomedical research. Market research was initially conducted and signed at the IDIQ level in December 2020, with interim reviews completed in October 2022, April 2024, and October 2025. The most recent interim market research report, signed in October 2025, reaffirms that the BITSDIS IDIQ is the most appropriate vehicle for these requirements, as it was specifically established for these types of biomedical information technology services. No existing Governmentwide contract or Blanket Purchase Agreement (BPA) is better suited for this type of acquisition.

	Market research was conducted to determine whether marketplace had changed since the initial market research was completed in December 2020. In October 2022, April 2024, and October 2025, the Contracting Officer (CO) reviewed available contract opportunities in the System for Award Management (SAM) and performed an analysis of the Contractor Performance Assessment Reporting System (CPARS) records for the relevant North American Industry Classification System (NAICS) code. Market research indicates that the BITSIDS IDIQ is the most appropriate vehicle for this requirement as the IDIQ was specifically established for commercial biomedical information technology services and is in accordance with Revolutionary FAR Overhaul (RFO) 8.104(b), Use of existing contracts. Market research indicates that there are still only a select group of vendors, all of which are Other Than Small (OTS) businesses, who excel in the fields specified, of which many of them competed in the original competition. As a result, the CO determined that there has been no significant change in the marketplace since the IDIQ was originally competed. Since there has been no significant change to the nature of the work being procured via this IDIQ, there is no reason to believe that the time and effort involved with re-soliciting this work via an alternate vehicle would result in a higher level of quality or a significantly different vendor pool. As a result, the CO re-affirms the BITSIDS IDIQ is the most appropriate acquisition vehicle. Additional market research conducted in March 2026 for the CTRP-CSE and CTRO-SS Task Orders further support this conclusion. Whether the three original Task Orders are re-competed individually or consolidated into two new Task Orders, all orders would still be competed amongst the three BITSIDS IDIQ contract holders, as consolidation will not affect the competitive field.
7.	Any alternative contracting approaches and rationale for rejection: Consolidating these requirements provides a substantial cost benefit to the Government. The cost savings of the consolidation are highlighted below: 

	As depicted above, consolidating the services in these contracts results in a substantial cost savings of [REDACTED]. The alternative approach to the consolidation is to continue issuing three separate Task Orders. This approach is not recommended because it would not fully eliminate duplicative efforts across the Task Orders or assist with standardizing the processes. By reducing redundant labor, minimizing contract management overhead, and leveraging economies of scale, NCI can reallocate this cost savings toward high-priority scientific, research, and data initiatives meeting its mission objectives. This improved cost efficiency supports enhanced investment in critical areas such as biomedical research, informatics capabilities, and advanced data analytics ultimately accelerating progress in cancer research and patient outcomes. Additionally, the consolidation will allow NCI program and acquisition staff to focus more on mission delivery rather than contract oversight, increasing overall organizational effectiveness and value to the public.
8.	Any negative impact by the acquisition strategy on contracting with small business concerns has been identified: There are no negative impacts to this acquisition strategy on small business concerns. All three predecessor Task Orders were competed full-and-open, and all three BITSIDS IDIQ vendors are OTS businesses.
9.	Considerations, Facts, and Reasoning Supporting the Determination: Based on market research, these services are best suited for award against the BITSIDS IDIQ. There are no small businesses vendors within the BITSIDS IDIQ; however, subcontracting plans are in place at the IDIQ level to support small business utilization.
10.	Summary: Consolidation of the work into two requirements is justified and provides substantial benefits to the Government, as documented above. This consolidation will deliver meaningful cost savings, improve administrative efficiency, and provide programmatic benefits for the Government. Based on market research and considering that these services have historically been performed by OTS businesses, the consolidation will not negatively impact the small business community. Given the benefits and supporting rationale, the Contracting Officer respectfully requests approval of this Determination & Findings (D&F) supporting consolidation of the above-referenced FY26 requirements.

Approvals

All supporting data provided, and the contents of this justification are complete and accurate to the best of my knowledge and belief.
