

Statement of Work for Fuel Oily Wastewater Removal

- 1.0. Scope** The contractor shall, except as outlined in this Statement of Work, provide any equipment and personnel necessary in the removal, transportation, and disposal of fuel oily wastewater from the Defense Logistics Agency capitalized fuel tanks attached to the main fuel storage tanks at Langley Air Force Base. All operations will meet requirements IAW DAFI 23-201 Chapter 8.2 Fuels Environmental and Safety Responsibilities.
- 2.0. Objectives.** The contractor shall remove fuel oily waste from three 1,000-gallon Convault tanks located in the Fuel Storage yard within 24 hours of service request time.
- 3.0. Tasks.** The contractor shall provide an operator and vehicle equipped with a vacuum or suction pump and hoses to remove a combined max capacity of 3,000 gallons of fuel oily wastewater from 3 separate tanks (Tank #s 707.9, 707.10, and 707.11). The oily water waste must be removed through a 4-inch diameter hatch located on top of the tanks. Normal parking configuration for fuel oily water removal requires no less than 20 feet of hose.
- 4.0. Spill Response.** The contractor will be briefed on Joint Base Langley-Eustis spill response procedures at the pre-performance conference. The contractor is responsible for reporting and promptly cleanup all spills in a manner consistent with current environmental regulations, in the event that it is necessary to utilize government material, equipment or personnel to clean up a contractor caused spill, the contractor shall be required to reimburse the government for all associated costs.
- 5.0. Security Requirements.** The contractor shall comply with all requirements and procedures IAW DAFFARS 5352.242-9000, Contractor Access to Air Force Installations. All documentation shall be submitted prior to the performance.
- 6.0. Place of Performance.** Place of work performance will be the main fuels storage yard located behind building 708; 51 Ward Rd, Hampton. VA 23665.
- 7.0. General Information:** The contractor shall perform the services required under this contract during the normal base operating hours (0730-1630 Monday through Friday). The contractor shall be able to accomplish the tasks outline in this Statement of Work within 24 hours service request and must call the Fuels Service Center (757-764-4105) 30 minutes prior to arrival. The contractor shall always have a Fuel Management Flight member escort while performing any services within the Fuel Storage yard.
