11.1.6. Subcontractor/Teaming Partner Consent Letter for the Release of Past Performance Information to the prime Contractor.

11.2. Organizational Structure Change History, if applicable

Many companies have acquired, been acquired by, or otherwise merged with other companies, and/or reorganized their divisions, business groups, subsidiary companies, etc. In many cases, these changes have taken place during the

performance of relevant, present or past efforts, or between conclusion of recent past efforts and this source selection. As a result, it is sometimes difficult to determine what past performance is relevant to this acquisition. To facilitate this relevancy determination, include in this quote file a “roadmap” describing all such changes in the organization of the Prime Contractor and its team members. As part of this explanation, show how these changes impact the relevance of any efforts you identify for past performance evaluation/performance relevancy. Since the NAFI intends to consider present and past performance information provided by other sources as well as that provided by the Contractor (s), the “roadmap” should be both specifically applicable to the efforts identified and general enough to apply to efforts on which the NAFI receives information from other sources.

11.3. Past Performance Information (PPI)

- 11.3.1. Contractor (as well as subcontractors/teaming partner(s) if used) will provide PPI narratives on at least three (3) recent and relevant projects of similar magnitude and scope as the Air Force Services Center (AFSVC) requirements performed within the last five (5) years. Relevancy is more important than quantity of PPI. The NAFI will not consider performance on a contractor submission that occurred more than five (5) years prior to the date of this solicitation. The page limit for the narrative will not exceed six (6) pages per reference. The narrative will include: 1) Customer contact information (i.e. Name, Email, Phone Number, and Mailing Address); 2) A complete description of the scope of the services provided to the customer; 3) The magnitude of the customer requirement; 4) Cost saving initiative initiated during implementation or performance period of the contract; 5) Timeliness and challenges associated with the implementation and lessons learned; and 6) Solutions or adjustments made in response to the challenges in cost experienced. Refer to Contractor Past Performance Information (PPI) and Subcontractor Teaming Partner PPI as guides (documents will be provided).
- 11.3.2. Contractors will explain what aspects of the projects are deemed relevant to the proposed effort. Contractors will describe the rationale supporting the assertion of relevance of the submitted requirement to this acquisition. Contractor will clearly link the past performance to the aspects of the Contractor’s proposed efforts.
- 11.3.3. Contractors will include information regarding efforts accomplished to resolve problems encountered on prior projects as well as past efforts to identify and manage requirement risk. The Contractor is required to demonstrate clear management actions employed in overcoming problems and the effects of those actions in terms of improvements

achieved or problems rectified. For example, submission of quality performance indicators or other management indicators could show how the Contractor has overcome problems.

11.3.4. Subcontractor Consent: PPI pertaining to a subcontractor cannot be disclosed to the Prime Contractor without the subcontractor's consent. Provide with submission a letter from all subcontractors that will perform at least **10% of the total work or major or critical aspects of the requirement**, consenting to the release of their past performance information to the Prime Contractor. Refer to Subcontractor Teaming Partner Consent Letter (to be provided) as a guide.

11.3.5. If the contractor submits past performance information for a subcontractor's effort, **three (3)** similar requirements will be submitted for the Prime Contractor and **three (3)** for the subcontractor.

11.3.6. The NAFI will send Past Performance Questionnaires to the references identified on the PPI for both the Prime & the subcontractor/teaming partner. Please ensure all information is included in PPI to allow for questionnaires to be sent.

12. ACCEPTANCE OF QUOTES

The NAFI reserves the right to consider acceptable only those quotes submitted in accordance with the requirements set forth or referenced in this solicitation, that demonstrate an understanding of the issues involved and the scope of the project. All other quotes will be considered deficient and considered non-responsive. Non-responsive submissions will not be considered for evaluation or award.

13. INCURRED COSTS

The NAFI will not be liable for any costs incurred by the Contractors in submitting quotes or oral presentations in response to this solicitation.

14. ORAL REPRESENTATIONS

14.1. This written contract includes the entire agreement between the parties. The NAFI will not be bound by an oral or written representation not included in the written contract or a change of amendments thereto.

14.2. The NAFI will not be bound by any terms on the contractor's forms or letters unless such terms are specifically agreed to and incorporated into the
