

STATEMENT OF WORK (SOW)

Objective and Purpose

NASA's Office of the Chief Information Officer (OCIO) is seeking to procure scalable training to address increased demand for mission-relevant leadership development and practical artificial intelligence (AI) capability building across its workforce. Contractor will provide private, virtual instructor-led training (VILT) sessions for the Duke CE Advanced Leadership for Government workshop series and Applied AI for Government IT Professionals.

Scope of Work

The Contractor shall provide private, virtual instructor-led delivery of seven (7) courses (each delivered as a dedicated cohort session) for twenty-five (25) Government participants per session. Delivery will be conducted live via Zoom (or Zoom for Government when required) and will include digital course materials, instructor-led facilitation, and contractor logistics/program support.

The Duke CE Advanced Leadership for Government workshops will be delivered in the following sequence: 9000 first, then 9001, 9002, 9003, 9004, and 9005 last. Specific delivery dates/times will be mutually agreed between the Government COR and the Contractor within the Period of Performance.

Key Deliverables

1. Delivery of seven (7) private VILT course sessions as described in Section 2.
2. Digital student materials for each course (as provided in the standard courseware for the offering).
3. Attendance roster for each session (participant names and attendance confirmation).
4. Post-course feedback collection (standard Contractor evaluation survey) and summary report upon request.
5. Completion documentation/certificates for participants who meet course completion requirements (as applicable to each course).

Project Timeline

The project shall commence within 30 days following contract award, with all deliverables completed within twelve months, although preferably prior to the end of the calendar year (8 months), schedule permitting. Interim deliverables, per class, should be submitted according to the mutually agreed class schedule.

Performance Objectives and Success Metrics

The contractor must achieve the following performance objectives:

- High engagement metrics such as participant certificate attainment and feedback scores.
- Demonstrated improvement in Leadership and AI competencies among participants.

Government Furnished Information (GFI) and Coordination Expectations

NASA will provide access to relevant content. Delivery dates and daily class times will be coordinated and confirmed in writing (email is acceptable). Any schedule changes will be mutually agreed by the parties in writing and handled under the standard Government Terms and Conditions.

Special Considerations

None
