Continuation of Description

Miscellaneous text in this section has been modified to:

SHORT TITLE: International Aerial Review (IAR) 250 - Commemorative Aviation-Grade U.S. Flag

I. INTRODUCTION

The Department of the Navy requires a custom-manufactured, aviation-grade United States Flag to set the tone for the opening of the International Aerial Review (IAR) in commemoration of the Nation's 250th birthday. This flag will be the largest known flag to fly over New York City. The flag will be engineered to be towed by a U.S. Marine Corps MH-53 helicopter and will be tested to withstand the extreme dynamic loads and drag associated with rotary-wing flight operations.

II. DESCRIPTION OF REQUIRED SUPPLIES/SERVICES

a. Delivery & Manufacturing:

The contractor will complete the custom manufacturing and delivery of two (2) oversized, aviation-grade U.S. Flag. The contractor will coordinate with the designated Technical Point of Contact (POC) for delivery to the Marine Corps Test and Evaluation facility.

b. Material / Equipment Specifications:

- **Design:** Standard 50-Star United States Flag.
- **Dimensions:** 130 feet by 216 feet.
- **Material (Aviation-Grade):** The contractor will construct the flag using high-strength, tear-resistant, aviation-grade fabric capable of sustaining continuous flight at speeds exceeding 60 knots without fraying, tearing, or structural failure.
- **Weight & Packaging Assessment:** Prior to shipment, the contractor will provide a final certified weight of the manufactured flag (estimated at 400 lbs or less). The vendor will secure the flag in a container or palletized system suitable for forklift handling and long-term storage.
- **Rigging & Hardware (Preferred/Optional):** Ideally, the vendor will provide all necessary aviation-grade rigging hardware (e.g., reinforced header, heavy-duty grommets/D-rings, cabling, and bottom ballast /weighting systems) required to securely attach the flag to an MH-53 cargo hook system.

c. Vendor Technical Support:

The manufactured flag will undergo a rigorous In-Flight Review (IFR) conducted by a Marine Corps Test and Evaluation squadron. While on-site vendor support is not required, the contractor will make technical representatives available for remote consultation (via phone/email) to answer engineering or rigging questions throughout the testing phase.

III. TRANSPORT, PICK-UP, AND DELIVERY

The contractor will deliver all materials to the designated Marine Corps Test location.

- **Delivery Address:**

H-53K Test Team

47765 Ranch Road

Hangar 101, Room 111

Patuxent River MD 20670

DODAAC/UIC: N76065

- **Service Performance Days:** Monday - Friday
- **Preferred Time:** NLT 12:00 PM

The contractor will utilize transport vehicles equipped to protect the item from environmental damage or contamination during transit.

IV. PERIOD OF PERFORMANCE

The contractor will deliver the completed flag within a maximum 45-day production lead time. This expedited timeline ensures the Marine Corps Test and Evaluation squadron will have ample time to fit the In-Flight Review (IFR) into their flight schedule and will complete all necessary flight characteristic and rigging tests well in advance of July 4, 2026.

Delivery Date by 19 June 2026.

V. QUALITY OF SERVICES/REQUIRED STANDARD OF WORKMANSHIP

The contractor will ensure that all manufacturing and stitching conform to the highest standards in the aviation and heavy-textile industry. The product will be specifically engineered for high-wind, aerial-tow applications to ensure the safety of the aircrew and the aircraft.

VI. INSPECTION AND ACCEPTANCE

The designated Technical POC will conduct an initial inspection and acceptance of the material at the time of delivery. Final acceptance will be established only after the flag successfully passes the Marine Corps Test and Evaluation squadron's In-Flight Review (IFR).

VII. INVOICING AND PAYMENT

Payment will be processed in accordance with the terms of the contract upon completion of delivery and acceptance.

WAWF Invoicing Procedure:

1. Assistance: Contact a Wide Area Work Flow (WAWF) Point of Contact (POC) listed below for assistance.
2. Notification: The contractor will notify a WAWF POC immediately after submitting the invoice and uploading the necessary documents.

VIII. TECHNICAL / ADMINISTRATIVE CONTACTS

a. Administrative POC:

Name: CDR Frank "Siri" Bonner

Email: frankie.l.bonner.mil@us.navy.mil

b. Supply POC:

Name: LCDR Richard Diggs

Title/Department: Supply Officer

Email: [Email TBD]

c. Technical POC:

Name: Mr. Gregory Windell

Title/Department: USMC Test and Evaluation

Email: (240) 434-1579

d. Technical POC:

Name: Mr. Nathanael Exume

Title/Department: USMC Test and Evaluation
