

**NAVSUP FLEET LOGISTICS CENTERS (FLC) COMMERCIAL ONLY ONE SOURCE/BRAND
NAME JUSTIFICATION (NTE SAT) IN ACCORDANCE WITH FAR 12.102(a)**

Purchase Request Number: TBD

Required Delivery Date/POP: 30 Sep 2026

Estimated Cost (Including Options): 

Description of Supply/Service

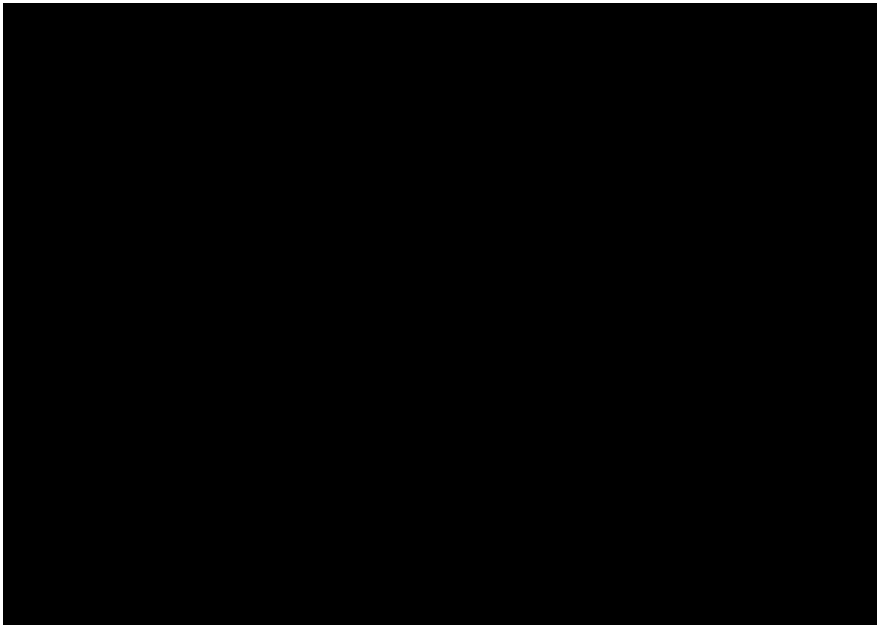

The following are Parts to rebuild central seawater cooling pumps.

Part No 5363A, Impeller, QTY 1

Part No: 5363B, Casing Rings, QTY 2

Competition Will be Restricted to the Following Source

Name of Manufacture Sims Pump and Valve Co., Inc.

**NAVSUP FLEET LOGISTICS CENTERS (FLC) COMMERCIAL ONLY ONE SOURCE/BRAND
NAME JUSTIFICATION (NTE SAT) IN ACCORDANCE WITH FAR 12.102(a)**

Basis For Decision That Only One Source Is Available

The Central Seawater Cooling Centrifugal Pumps are designated as Critical Safety Items supporting the operation of the Main Propulsion Diesel Engines aboard AKE-class vessels. These pumps are essential to maintaining proper engine cooling and overall vessel safety. Failure or malfunction of these components could result in significant equipment damage, mission degradation, or personnel safety hazards.

The required replacement parts must be exact, direct replacements to ensure compatibility with the currently installed pump assemblies. This includes identical form, fit, and function to avoid any disruption to system integrity or performance. Any deviation from the original design specifications introduces unacceptable risk, including potential system failure or injury to personnel.

Sims Pump Valve Co. (CAGE 78314) is the Original Equipment Manufacturer (OEM) of the installed pumps and retains proprietary design specifications, materials, and manufacturing tolerances necessary to produce compliant components. Sims Pump Valve Co. does not maintain authorized distributors; therefore, procurement must be made directly from the OEM.

The parts required under Allowance Parts List (APL) X231912ANFU have been validated for use specifically within the installed systems. Only Sims Pump Valve Co. possesses the technical authority and engineering data necessary to certify that replacement components meet all required operational and safety standards.

Military Sealift Command (MSC) does not possess the detailed technical data package, manufacturing drawings, or performance validation criteria required to independently evaluate or qualify alternate or non-OEM components. Furthermore, no engineering analysis or testing has been conducted to determine the impact of substituting non-OEM parts in these critical systems.

Given the criticality of the equipment, the absence of technical data, and the potential risks associated with non-conforming parts, procurement from any source other than the OEM is not feasible.

**I CERTIFY THAT STATEMENTS AND INFORMATION PROVIDED ABOVE, ARE
COMPLETE AND CORRECT TO THE BEST OF MY KNOWLEDGE AND DO NOT CONTAIN
CLASSIFIED INFORMATION. I CERTIFY THAT THE REQUESTED MATERIAL OR SERVICES
REPRESENT THE MINIMUM REQUIREMENT OF THE GOVERNMENT. I UNDERSTAND
THAT THE PROCESSING OF THIS SOLE SOURCE OR BRAND NAME JUSTIFICATION
PRECLUDES COMPETITION TO THE MAXIMUM EXTENT PRACTICABLE**
