

Sole Source Justification

JUSTIFICATION FOR SOLE SOURCE (Simplified Acquisitions - MPT to ≤\$250K)

Document number: _____

The supplies or services described herein are being solicited on a sole source basis and competition is precluded for reasons indicated below. There are no substitutes available for the supplies or services.

Check One:

☐ Service:

Contractor:	
Contractor Address:	
Contractor POC:	
Phone #:	
Email:	
Cage Code/DUNS:	

☒ Supply:

Restricted to the following source. If a sole source manufacturer distributes via dealers, ALSO provide dealer information.)

Original Manufacturer Name:	Flag Center
Manufacturer:	
Manufacturer POC:	
Manufacturer Phone #:	
Manufacturer Address:	4550 Summer Avenue
Dealer/Rep:	
Dealer/Rep Address Phone No.	
Email:	

Description of the supplies or services required, the estimated price/cost, and required delivery date.

- Description of Supplies/Services: The Government requires the custom manufacturing and delivery of two (2) oversized (130 ft x 216 ft) aviation-grade United States flags (50-star). These flags must be engineered using specialized, high-strength, tear-resistant fabric specifically rated for aerial-tow operations. They will be towed by a U.S. Marine Corps MH-53 helicopter at speeds exceeding 60 knots and must withstand the associated dynamic loads without structural failure. The requirement includes remote technical engineering consultation for the duration of the Marine Corps In-Flight Review (IFR) and the provision of all necessary aviation-grade rigging and attachment hardware.*

Sole Source Justification

- **Estimated Price/Cost:** The estimated cost is [REDACTED] per flag, for a total estimated procurement cost of [REDACTED]
- **Required Delivery Date:** Delivery is required within a 45-day production lead time from the date of contract award (ASAP). This timeline is mandatory to ensure the Marine Corps Test and Evaluation squadron has sufficient time to complete flight characteristic testing and rigging certifications prior to the scheduled July 4, 2026, International Aerial Review (IAR).

In conclusion, the requested supplies or services represent the minimum requirements of the government.

Describe in detail why only this source can furnish the requirements to the exclusion of other sources. (what specific characteristics of the supplies or services limit the availability to a sole source (e.g., unique features, function of the item, etc.)?)

Justification for Sole Source: Unique Characteristics and Capabilities

*The requested supplies and services are highly specialized and can only be furnished by Flag Center to the exclusion of all other sources due to the unprecedented engineering requirements, aviation safety constraints, and critical timeline associated with this **zero-fail national event**. The specific characteristics that limit this procurement to a single source include:*

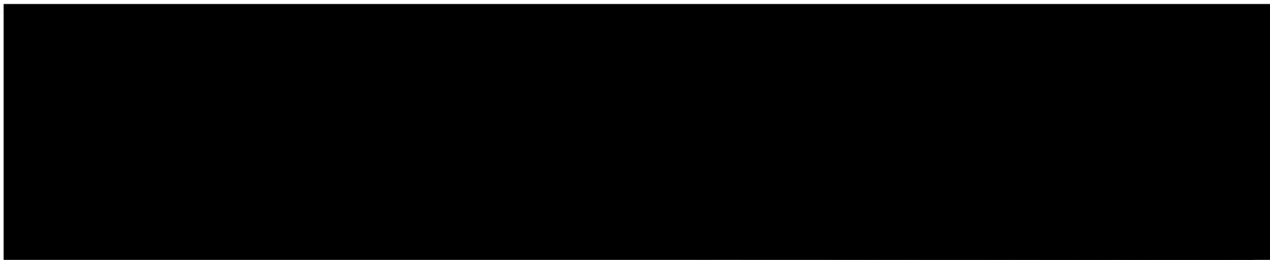

- **Extreme Aerodynamic Engineering & Material Science:** This is not a standard textile manufacturing requirement; it is an aviation engineering challenge. The flags are massive—each measuring 130 feet by 216 feet (over 28,000 square feet). Towing a surface area of this magnitude behind an MH-53 helicopter at speeds exceeding 60 knots generates immense drag and extreme dynamic stress. Flag Center is the only identified source possessing the proprietary manufacturing techniques and specialized aviation-grade, high-tensile fabric required to construct a flag that can withstand these extreme aerodynamic loads without catastrophic shredding, while strictly maintaining the critical weight limit of under 400 lbs per flag.
- **Aviation Safety & Specialized Rigging Compatibility:** A structural failure of the flag or its rigging during an aerial tow over New York City poses an unacceptable risk of entanglement with the MH-53 rotors, threatening loss of aircraft and crew, or presenting a severe hazard to the public below. Flag Center is uniquely qualified to engineer the specialized reinforced headers, heavy-duty load-bearing attachment points, and custom rigging hardware required by the Marine Corps Test and Evaluation squadron for a safe and successful In-Flight Review (IFR).
- **Unprecedented Scale and Inflexible 45-Day Lead Time:** Producing two aviation-grade flags of this size requires massive, specialized physical manufacturing space and heavy-duty sewing infrastructure that standard flag or sail manufacturers do not possess. Furthermore, the July 4, 2026, International Aerial Review (IAR) 250 is a fixed, unmovable national milestone. Flag Center is the only manufacturer that currently has the specialized tooling, immediate material stockpiles, and proven production capacity

Sole Source Justification

to meet the mandatory 45-day expedited lead time necessary to allow the Marine Corps sufficient time for mandatory flight testing. Awarding to an unproven source would result in unacceptable delays and direct mission failure.

Document number:

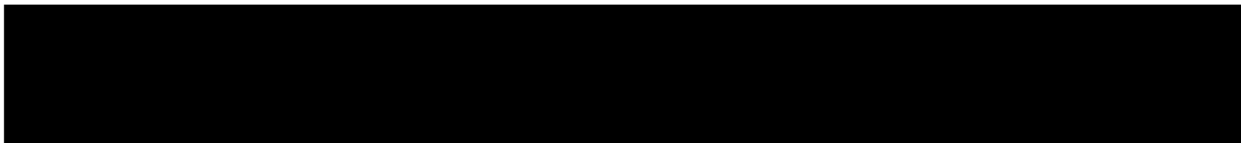

I CERTIFY THAT THE INFORMATION PROVIDED ABOVE IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE. I UNDERSTAND THAT THE PROCESSING OF THIS SOLE SOURCE JUSTIFICATION PRECLUDES THE USE OF FULL AND OPEN COMPETITION.

Activity

Title

I HEREBY DETERMINE THAT THE CIRCUMSTANCES OF THE CONTRACT ACTION DEEM ONLY ONE SOURCE REASONABLY AVAILABLE IN ACCORDANCE WITH FAR 13.106-1(b)(1)(i).
