

The National Park Service, Northeast Region, New England Major Acquisition Buying Office, intends to issue a Request for Proposal (RFP) for a construction requirement at George Washington Birthplace National Memorial in Colonial Beach, Virginia. The Scope of work consists of upgrading the existing HVAC system in the Memorial House Museum (MHM) at George Washington Birthplace National Monument (GEWA). The project will replace four (4) water source heat pump units, one (1) fan coil unit and one (1) backup LPG boiler. The contractor will install a new single-phase cooling tower package unit that will provide the water source heat pumps cooling capability. The new cooling tower will be placed on a new concrete pad behind the Memorial Area public restroom building. The cooling tower water loops will be trenched from the cooling tower to the basement of the MHM. New air-returns will be installed in each room on the first floor will be ducted to the water source heat pumps in the basement. The contractor will be responsible for system startup, testing, and customer training upon completion of installation. Contractor is responsible for registering all new HVAC equipment and components for manufacture warranty.

SOLICITATION NUMBER: 140P4326R0013.
