

SPACE SYSTEMS COMMAND
SYSTEM DELTA 80
SMALL LAUNCH AND TARGETS DIVISION
TARGETS ACQUISITION
GENERIC COMMERCIAL SOLUTIONS OPENING

1. INTRODUCTION

1.1. The United States Space Force (USSF) System Delta 80 Small Launch and Targets Division (SYD 80/AMX), also known as the Rocket Systems Launch Program (RSLP), is issuing this Commercial Solutions Opening (CSO) in accordance with DFARS 212.70 Defense Commercial Solutions Opening. Under the CSO, SYD 80/AMX may competitively award proposals received in response to a general solicitation to acquire innovative commercial products, technologies, or services based on a review of solutions by scientific, technological, or other subject matter expert peers within SYD 80/AMX. If the solution meets the requirements of the regulation, the solution is treated as commercial whereby the Contracting Officer will utilize commercial procedures to develop and execute the resultant award.

1.2. Under this CSO, all products, technologies, and services shall be treated as commercial items; products, technologies and services do not have to be “commercially available” to be submitted in response to this solicitation. If the solution meets the requirements of the regulation, the solution is treated as commercial whereby the Contracting Officer will utilize commercial procedures to develop and execute the resultant award.

1.3. This Generic CSO is soliciting interest from potential launch service contractors to support upcoming target launch missions.

1.4. The Government’s plan is to release this Generic CSO to solicit industry interest and get POC information for each interested party. The Government will then release a Draft Detailed CSO and host an industry day with those that responded indicating interest. Based upon Government consideration of industry feedback, the Detailed CSO will be updated and a final version issued to begin the acquisition process.

2. INSTRUCTIONS

2.1. Interested launch service providers that believe they can provide a launch service solution that addresses the Area of Interest should contact the Contracting Officer below by 8 May 2026. Responses are limited to 1 page, size 11 font with 1” margins. All replies to this Generic CSO must reference RSLP Targets. Submit only unclassified and non-proprietary information if possible. If proprietary information is deemed essential, all proprietary information should be clearly marked and associated with restrictions on Government use identified. Note: Both Government and Contractor personnel will be utilized for CSO response review. If proprietary information is deemed essential, Non-Disclosure Agreements will be executed. Any information submitted by respondents to this synopsis is strictly voluntary. The Government will not pay for any information that is submitted by respondents to this Generic CSO.

2.2. A more detailed CSO will be provided via DOD SAFE to respondents who meet the US Commercial Provider requirements. Please make sure to include name, phone number and email address of person able to receive the information.

2.3. US Commercial Provider Requirements

- Provide documentation and statement attesting to how the offeror meets the requirements of a US Commercial Provider IAW Commercial Space Act of 1998, Title II Public Law 105-303.
- Provide Cage Code to verify active SAM registration.

3. AREA OF INTEREST

3.1. RSLP is seeking innovative approaches to provide launch services that better guarantee successful and repeatable target launches. RSLP is particularly interested in ideas that maximize Launch Availability while meeting a launch rate of 2-3 times per week.

Launch Availability: Probability that the launch vehicle will successfully launch on the day of launch, which includes the production capability to provide target LVs to meet the desired/required launch dates and rate.
