

**Statement of Work (SOW)**  
for  
**B7000 and B8401 Commercial Internet Services**  
**Vandenberg Space Force Base (VSFB)**  
20 February 2025

1. SCOPE: The purpose of this Statement of Work (SOW) is to provide Commercial Internet Services (CIS) for building 7000 and 8401 users at Vandenberg Space Force Base. For CIS this includes the installation and maintenance of network switches, and any other equipment needed for continuous service.

1.1 Background: To meet mission requirements, S4S and the 18 SDS require an unfiltered network access point to access resources provided by commercial partners that are otherwise inaccessible through DoD networks due to their imposed safeguards. CIS allows administrators to download patches for locally managed network switches and software and gives space operators access to resources maintained by commercial entities in support of Space Domain Awareness.

1.2 Objective: This SOW is to provide an efficient method for building 7000 and 8401 admins and operators to acquire CIS workstations to build upon and maintain critical mission systems in support of SDA.

2. Commercial Internet Services (CIS)

2.1 The contractor should provide the following:

- Provide commercial internet service/connection at buildings 7000 and 8401
- Provide 1 Gb of commercial internet services at each site
- Provide IPv4 Block - /29 at each site

2.2 Government shall provide network transport (e.g. fiber, CAT-6) from the contractor demarcation point to any end user location within the facility.

2.3 Government shall provide and maintain the required access layer network switches, wireless access points and workstation hardware.

2.4 The contractor shall coordinate with the government program manager to schedule CIS service cutovers and maintenance.

2.5 The government shall provide an escort for the contractor to access facilities.

2.6 2.5.10 The contractor shall perform all work using industry standards, to include ANSI/TIA/EIA 568-B Commercial Building Telecommunications Cabling Standard; UFC 3-

580-01 Telecommunications Interior Infrastructure Planning and Design, with Change 1; as well as NEC, MIL-HDBKS, STDS, Unified Facility Guide Specifications (UFGS), Unified Facilities Criteria (UFC), Caltrans Standard Specifications and Caltrans Standard Drawings.

### 3. BILLING AND PAYMENTS:

3.1 Service invoices/billing statements shall be prepared by the contractor and sent to S4S S4/6 agency monthly via letter mail or email. Invoices will be submitted using Wide Area Workflow (WAWF).
