Transplant Post-Discharge Lodging for NCI Research Participants

Questions received:

1) How many people need housing? – the number of patients varies, average 4-5 patients in each apartment (with a caregiver) per year. There are currently 3 apartments dedicated to NCI which house 12-15 patients annually.

2) Is the preference 1-bedroom apartments or studios? - Mixed need based on patient/caregiver/dependents. The current set up includes all of the above, in addition to at least one two-bedroom apartment.

3) Is there an incumbent? If so, what is their name and the contract number? Is the Statement of Work the same size and scope? #75N91025P00243

4) Is the government only interested in working directly with apartment owners or management? - No. Location must be within the NIH shuttle bus to ensure transportation availability from/to the medical center - The apartment location must be less than 1 mile from the NIH Clinical Center on the NIH shuttle route

(Can a third-party company like ours, which provides corporate furnished housing/lodging, also bid on this contract?) -This is a restricted competition

5) How soon after the deadline for submission will the contract be awarded? 1 Week

6) Does everyone have to be in the same apartment complex? – Distance is key and must be within a mile radius and the NIH shuttle approved route
