9.3. POC Clarification: Government Technical Point of Contact is the primary point of contact in charge of reporting equipment status and receipt inspection.

QUALITY ASSURANCE SURVEILLANCE PLAN

Purpose: To ensure that the Government has an effective and systematic method of surveillance for the services in the SOW. The QASP will be used primarily as a tool to verify that the contractor is performing all services and delivery/installation of replacement parts required by the SOW in a timely, accurate and complete fashion.

Performance Measurement: Performance will be measured in accordance with the following table:

Services

Primary Performance Objectives	Performance Standard/AQL	Performance Assessment Method
Services provided such that repaired equipment functions as intended	100% compliance	Contractor shall provide assessment report to GSO
Contractor maintain close liaison and good communication with Government	Any problems or questions encountered by either party are addressed within 24 hours (1 business day)	Proved GSO with written report of discrepancies
Final condition report of assessment	100% compliance	Provide GSO final assessment condition report
Contractor Compliance with FAR Clause 52.222-50, Combat Trafficking In Persons	100% Compliance and immediate notification of any violation	Inspection of contractor's policy by Government Representative

"The contractor shall report ALL contractor labor hours (including subcontractor labor hours) required for performance of services provided under this contract for the Fiber Blower Machine Rental via a secure data collection site. The contractor is required to completely fill in all required data fields using the following web address <https://doncmra.nmci.navy.mil>.

Reporting inputs will be for the labor executed during the period of performance during each Governmental fiscal year (FY), which runs October 1 through September 30. While inputs may be reported any time during the FY, all data shall be reported no later than Oct 31 of each calendar year, beginning with 2014. Contractors may direct questions to the help desk at:
<http://www/ecmra.mil>.

AQL = Acceptable Quality Level

If performance is within acceptable levels, it will be considered to be satisfactory. If not, overall performance may be considered unsatisfactory.
