

**Single Source Justification (Simplified Acquisition)**

**Section A: General Contract Information**

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: AFLCMC/HNCK

Project/Program Name: Technical Applications Program (TAP)

Purchase Request / Local ID Number: F3KTK76021AW01

Estimated Contract Cost (including Options): [REDACTED]

**Section B: Description of the Supplies/Services Required**

The Air Force has a requirement to purchase Compressor Skids to mount the Max Air Compressor. These components are manufactured/configured by Duchesne Inc (Max Air) and used on the [REDACTED]

The [REDACTED] Max Air is the only manufacture of these Skids.

| Item | Vendor       | Item             | Qty | Part Number        |
|------|--------------|------------------|-----|--------------------|
| 1    | Duchesne Inc | Compressor Skids | 10  | MA90-SPEC-AF-FRAME |

**Section C: Justification for Soliciting from a Single Source or Brand Name**

Duchesne, Inc. (also referred to as Duchesne/Max Air) is the only source capable of providing the required compressor skids without causing unacceptable delays and substantial duplication of cost that would not be recovered through competition. This determination is based on the following factors:

- Unique Design and Data Rights: The part required, MA90-SPEC-AF-FRAME, is a custom-designed component. It was jointly developed by the WC-135 SPO, L3, C-17 SPO, CCSD, L3 Greenville, and Max-Air to meet the government's unique needs. The USAF does not possess the proprietary technical data, drawings, or specifications required to have this part reproduced by another manufacturer.

- Exclusive Manufacturing: This specific compressor skid is manufactured and sold exclusively by Duchesne/Max Air. It is not used by any other entity.

- Stringent and Completed Airworthiness Certification: [REDACTED]  
[REDACTED] Military Handbook MIL-HDBK-516C, Military Standard MIL-STD-882E, AFI 62-601, DoDI 5030.61, and RTCA/DO-160G.

- Official Configuration Control Board Approval: This is the only compressor skid designed specifically to fulfill our mission requirements and, critically, it is the only [REDACTED]. Any alternative would have to undergo the same lengthy and complex concurrence process.

- Prohibitive Cost and Schedule Duplication: Market research confirms that no other manufacturer can provide a comparable skid without incurring significant costs, potentially exceeding \$100,000, for the rigorous testing and full aerospace certification process. This additional expense, combined with the immense complexity and time required to gain CCB approval, makes any alternative option impractical, inefficient, and a direct risk to mission timelines.

**Single Source Justification (Simplified Acquisition)**

**Section D: Efforts to Obtain Competition**

Efforts to obtain competition for this requirement have been thoroughly explored and have conclusively demonstrated that no other source can satisfy the government's need. The [REDACTED] [REDACTED] he existing skid was jointly developed by Max-Air and the USAF specifically to meet these unique physical constraints, and Duchesne, Inc. remains its sole manufacturer. Crucially, the USAF does not possess the proprietary technical specifications or data rights required to have a comparable skid manufactured by an alternative source. As a result, the MaxAir/Duchesne Inc. skid is the only product proven to [REDACTED] and the only one approved by the [REDACTED]. Therefore, competition for this requirement is not feasible.

**Section E: Steps to Preclude Future Single Source or Brand Name Awards**

A sole-source environment for this specific component is unavoidable for the foreseeable future. The existing skid was custom-developed with a single partner to fit a unique physical and performance envelope, and years of engineering research have failed to identify any other part that meets these strict requirements. Because no other vendor manufactures a skid that will function in this system and the government does not own the proprietary design, any future sustainment needs for this component will require procurement from the original manufacturer.

See RFO 12.102 Restricting competition instead of FAR 13.106-1.

**Section F: Contracting Officer's Determination**

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.

| Date      | Typed Name and Rank/Grade of Contracting Officer | Signature of Contracting Officer |
|-----------|--------------------------------------------------|----------------------------------|
| 11 Mar 26 | REBECCA NATAL                                    |                                  |
