

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: AFTC/PZZF

Project/Program Name: SAE (Society of Automotive Engineers)

Purchase Request / Local ID Number: F1S0AW / ACQ-26-A11

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

Society of Automotive Engineers (SAE) will be the main on-line mission oriented resource provided to Edwards flight test community by the AFTC Technical Research Library. The digital library is SAE International's online home to more than 200,000 industry-leading technical papers, standards, reports, books, magazines, and other content.

Request sole source acquisition of annual SAE with three option years as follows:

1. Basic June 2 2026 - June 1 2027 - [REDACTED]
2. Option Year 1 - [REDACTED]
3. Option Year 2 - [REDACTED]
4. Option Year 3 - [REDACTED]

Section C: Justification for Soliciting from a Single Source or Brand Name

SAE is the only publisher and authorized distributor of the technical papers, specialized standards, and specifications that our engineers must use. No other online library can legally or practically provide equivalent access to this proprietary content. SAE develops and maintains thousands of aerospace technical standards. Our Air Force aerospace testing systems are designed around these proprietary standards and updated technical data, licensing, or specialized training that no other vendor can legally provide. In addition, SAE verifies that new components meet industry-wide safety benchmarks that the Air Force has a critical, urgent need to maintain or upgrade, a system already built on SAE standards.

Section D: Efforts to Obtain Competition

Market research efforts were performed by browsing through several Internet websites, Federal Supply Schedules, and by attending several conferences. However, at this time, because the SAE library is proprietary to SAE they are the only known source that can satisfy the Government's requirement, and is the only source known that can guarantee fulfillment of the required subscriptions.

PZZ conducted internet searches and searched mandatory sources such as FPI-Unicor (www.unicor.gov), AbilityOne program (www.abilityone.gov) and GSA Advantage with no results for aerospace engineering library subscriptions. No company was found to have the equivalent scope of information on aerospace engineering available in a digital library.

A presolicitation notices will be posted on www.sam.gov to identify vendors that could potentially fulfill the requirement in the future.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

Government will continue to conduct market research in order to identify new entrants into the online technical library industry.

Single Source Justification (Simplified Acquisition)

Specifically, future market research will be used to find other sources that offer the same Aerospace Standards and Aerospace engineering information provided within the SAE Digital Library.

Market research techniques such as internet searches, contacting known suppliers, exploring GSA Advantage, and other fact-finding techniques shall be utilized to overcome existing barriers to competition.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
