19 MARCH 2026

OIB Industry Day Questions

AGENDA

ORDER:	INFORMATION:	BRIEFER:	PAGE:
01	TOPIC: Opening Comments (0800-0820)	Ms. Liz Miranda and COL Bohannon	03
02	TOPIC: EUL Overview (0820-0835)	Ms. Sarah Stewart	05
03	TOPIC: P3 Overview (0835-0850)	Mr. Bill Dunkin	06
04	TOPIC: Site-by-site GOGO Overview (0850-0930)	Mr. Bill Dunkin	13
Break 0930-0945			
05	TOPIC: GOCO Update (0945-1020) • MATOC Update • ARMS Overview • IAAAP Overview	COL Cuthbertson	24
06	TOPIC: Pyrophoric Flares Production (1020-1030)	COL Vinson Morris & Mr. Joeseeph Pelino	40
07	TOPIC: Mortar and Artillery Munition; Development and Production; Opportunities Execution (1030-1130)	Mr. Matthew Glaser, MAJ Walerko, LTC Rafael Acevedo, LTC Ian Welch, and Mr. Al Klobchar	44
08	TOPIC: Assured Munitions Initiative (1130-1200)	Mr. Gene Conner	67
09	TOPIC: Market Intelligence (1200-1215)	Mr. Greg Matson	74
10	TOPIC: Closing Remarks (1215-1230)	Ms. Lynda Armer	82

Opening Comments

Ms. Liz Miranda

Executive Deputy to the Commanding
General, Army Materiel Command (AMC)

Opening Comments

COL Jason Bohannon

Capability Program Executive Ammunition
& Energetics

Enhanced Use Lease Program

Ms. Sarah Stewart

Assistant for Stationing

Assistant Secretary of the Army

Installations, Energy, and Environment

ASA (IE&E)

Purpose: To lease underutilized but not excess federal property to private or public entities for development

Key Features:

- Can be tailored for development that complements installation needs
- Long-term leases
- Lessee authorized and responsible for financing, permitting, developing, constructing, owning, maintaining, operating, and decommissioning
- Subject to Federal, State, and local environmental, zoning, historic preservation laws, etc.
- Exclusive possession and use given to lessee (excluding emergencies or specified lease terms)
- Army retains land ownership
- Does not create a “partnership”; separate procurement contract or agreements required (e.g., Army procuring lessee-manufactured goods or lessee use of installation utilities)
- Cannot guarantee any Army revenue to lessee
- Generates revenue for the Army from underutilized real property
- At least fair market value required as consideration (i.e., rent)
- Consideration can be in-kind, cash or combination
- Supports local economies and fosters civil-military collaboration
- Competitive solicitation process
- Minimum timeline from congressional notice to award is ~2 months if timed properly

Example: Land at an installation is leased to a private developer for a manufacturing facility or data center

Public-Private Partnerships (P3)

What is a Partnership?

- Contractual agreement between any government-owned and government-operated facility (GOGO) and private industry to perform work, provide services and/or utilize the GOGO's facilities and equipment.
- Partnerships enable a more collaborative relationship in which parties from both public and private sectors are able to leverage and maximize the use of resources for more timely delivery to the warfighter.
- Partnerships are governed by United States Codes / Statutes and are not FAR-based contracts
- However, a FAR-based contract is likely the Prime Contract Awarded, for which the Industry is seeking a government to perform sub-contracting

Industry Benefits:

- 24/7 Controlled Access Security
- Easy Interstate and highway access
- Affordable and powerful utilities
- Access to highly skilled personnel and U.S. Army Centers of Industrial and Technical Excellence (CITE) advanced-technology equipment
- Leverage ISO-certified facilities and Lean/Six Sigma processes
- Onsite emergency Services
- Lowered Investment Cost
- Quickly executable <60 days upon agreement of terms
- Potential use of hard-to-receive hazardous waste permits
- Onsite rail access (at most facilities)
- No Encroachment (permanent buffers)
- Flexible zoning policy
- Increase surge capabilities and/or capacity
- Minimize process flow
- No real estate taxes
- Decrease capital investment cost
- Leverage long-term use agreements

JMC Partnership Opportunities with Industry

Public-Private Partnership (P3)

GOGOs

Statutes:

1. 10 USC 7543
2. 10 USC 7544
3. 10 USC 2474 (CITE)
4. 22 USC 4892

Types of P3

1. GOGO Services/Labor

PM/Gov't Agency
(Prime Contract)

Contractor

GOGO

Sale of government articles or services to industry. JMC P3 is predominately Services/Labor partnerships.

2. Existing GOGO Facility Usage

PM/Gov't Agency
(Prime Contract)

Contractor

GOGO

Industry utilizes facilities on an Army installation, using their own equipment and/or installation equipment, to produce goods & services for government or commercial customers.

3. Workshare

PM/Gov't Agency
(Prime Contract)

Contractor

GOGO

Work sharing combination of private industry and Army installation employees and facilities to produce or repair systems, equipment, and components.

ARMS

GOCOs

Statute: 10 USC 7551–7555

Program Description:

- The Armament Retooling and Manufacturing Support (ARMS) program allows businesses to take advantage of Government incentives to use diverse industrial facilities including infrastructure, utilities, buildings and equipment at very flexible and reasonable rental terms
- Congressionally established in 1993 (ARMS Act of 1992) and Codified in 2000 to encourage use of underutilized GOCO facilities by commercial firms
- Appropriated funds to repair, refurbish and upgrade facilities for commercial use - JPEO responsible for program management & funding

Public-Private Partnerships (P3) Examples

- Work-sharing/Teaming: The Army installation and a private company combine employees and facilities to produce or repair systems.
- Facilities or Equipment Usage/Leasing: A private company leases Army facilities and/or equipment to produce goods for government or commercial customers.
- Purchasing of Articles or Services: A private company purchases goods or services directly from an Army installation.
- Direct Sales: Similar to purchasing, this involves a direct transaction for articles or services.

*Partnerships are a “**Win-Win**” for both the U.S Army and private industry. For the Army, it sustains critical skills, lowers costs, and accelerates innovation. For industry, it provides access to unique facilities and a skilled workforce, reducing risk and capital investment.*

Centers For Industrial Technical Excellence (CITE)

- **A CITE is a designation granted by the Secretary of the Army and identifies unique capabilities and core competencies of an installation.**
- **JMC CITE-designated installations include:**
 - **Letterkenny Munitions Center**
 - CITE for Army Tactical Missile Systems, Guided Multiple Launch Rock Systems and Low Cost Reduced Range Practice Rockets Missile Maintenance (2016) Encompasses MFOM (Family of Munitions)
 - **Pine Bluff Arsenal**
 - CITE for Chemical and Biological Defense Equipment
 - CITE for Smoke Ammunition
 - CITE for Textile Manufacturing
 - **Tooele Army Depot**
 - CITE for Ammunition Peculiar Equipment (APE)

Way Forward

- Meet with our Installations 1-on-1s this afternoon
- Discover opportunities for partnerships
- Schedule site visits / tours at our Installations
- For more information contact:

miles of rail infrastructure

2.3M sq ft

storage space

DEFINING FEATURES

Missile Storage and Maintenance

ANMC conducts receipt, storage, surveillance, inventory, and issue of various missile systems for the DoD utilizing a full ammo surveillance workshop. ANMC specializes in a variety of missile systems.

Missile Demilitarization

ANMC operates the Multiple Launch Rocket System (MLRS) Recycling Demilitarization facility. This facility is a state-of-the-art robotic missile demilitarization site designed to safely destroy obsolete or unsafe munitions. A variety of demilitarization options are also onsite to destroy excess munitions and energetics.

CAPABILITY HIGHLIGHTS

Missiles

Storage, receipt, issue, inspection, testing, maintenance, and demilitarization

Armor Renovation

Reactive armor tile maintenance and painting

Munitions Handling

Storage, receipt, issue, inspection, maintenance, and demilitarization

Outload

Facility, surge, and strategic outload

THE ANMC ADVANTAGE

- ISO 9001:2015 Quality Certification
- ISO 14001:2019 Environmental Certification
- ISO 45001:2018 Occupational Health & Safety Certification
- Fully cited by the DoD Explosives Safety Board (DDESB)
- High-capacity trucking and rail network
- Access to advanced technology equipment
- Munitions surveillance workshop
- Missile demilitarization
- Near the I-20 and I-65 corridors and approximately 50 miles from Birmingham International Airport
- Secure 24/7 controlled access

available infrastructure ideal for production operations

800,000 sq ft

of available highly secure munitions storage

119,000 sq ft

of turnkey maintenance / production facilities

749 acres

of developable greenspace w/access to water, gas & electric utilities

DEFINING FEATURES

Unparalleled Security

BGAD delivers elite security by integrating autonomous AI surveillance with a multi-drone and camera network, supported by 24/7 expert guards and multi-tiered series of perimeter fencing and sensors.

Logistics Expertise

BGAD serves as the premier munitions distribution operation, leveraging its state-of-the-art Consolidated Shipping Center. This high-capacity logistics hub is powered by an exceptionally skilled workforce, whose expertise ensures reliable support for global military operations. The depot's robust infrastructure includes internal railroad tracks connected to the CSX network and first-class trucking partnerships with immediate access to major interstate corridors, enabling the rapid and secure transport of any materials.

EMERGING CAPABILITIES

SkyFoundry Innovation Hub

Future state-of-the-art UAS testing and prototyping hub paired with a strategic consortium of industry leaders and academia partners.

Energetics Center of Excellence Production Campus

Advanced manufacturing facility designed to produce critical chemicals essential for modern munitions.

Flexible Automated Modernized Production Line

Modern system utilizing robotic integration and modular assembly to rapidly switch between different ammunition types.

Container Manufacturing

Automated facility producing 20' and 40' shipping containers with major repair capabilities, eliminating the dependency on foreign manufacturers.

THE BGAD ADVANTAGE

- Industrial fabrication equipment, paint facilities and skilled personnel
- Modular production line layout designed for rapid workload transitions
- Near I-64 and I-75 corridors and approximately 40 miles from Blue Grass Airport
- High-capacity trucking and rail network
- Inspection, minor repair and maintenance for metal shipping containers
- Self-sustaining water source and wastewater treatment facility
- Open Burn / Open Detonation Permit with a 40 lb. static detonation chamber
- 902 Igloos & 12 Above Ground Magazines
- ISO 9001:2015 Quality Certification

machine shop with CNC and advanced machining capabilities

1,800

ammunition storage magazines

80 acre

explosive detonation facility

40 acre

ammunition demilitarization area

6M sq ft

storage space

DEFINING FEATURES

Pyrotechnics Expertise

CAAA produces and renovates a wide variety of pyrotechnic devices, such as signal, smoke, illuminating projectiles, aircraft countermeasure flares, marine location markers, and infrared flares. CAAA also conducts demilitarization of pyrotechnics with facilities to support red/white phosphorous recycling and Yellow D conversion to picric acid.

Metal Machining Center

CAAA maintains a state-of-the-art 72,000 sq ft machine shop equipped with computer numerical control (CNC) machines for tough alloys and metals. Advanced cleaning and finishing capabilities include chemical cleaning, ultrasonic, plating titration, atomic absorption, powder coating, and statistical process control. Components of artillery, mortar, pyrotechnics, and metal parts are also produced at CAAA.

CAPABILITY HIGHLIGHTS

Munitions Production

Artillery, mortar, pyrotechnics, and metal part component manufacturing

Metal Fabrication

Fabrication of munitions components and universal load retaining bars

Shipping Container Maintenance

Inspection, repair, and maintenance for metal shipping containers

Munitions Handling

Storage, receipt, issue, inspection, maintenance, and demilitarization

THE CAAA ADVANTAGE

- ISO 9001:2015 Compliant
- State-of-the-art painting shop
- Machine shop fabrication
- Centralized receiving facility
- Chemical laboratory
- Fabrication of universal load retaining bars
- Near I-64 and I-69 corridors and approximately 80 miles from Indianapolis Airport
- Secure 24/7 controlled access

2M sq ft

storage space

DEFINING FEATURES

Missile Maintenance

As the Center for Industrial Technical Excellence (CITE) for ground launched Army missile systems, LEMC performs maintenance, receipt, issue, inspection, storage, and test and repair for precision guided weapons systems. LEMC also serves as the premier maintenance location for U.S. Air Force and U.S. Navy to maintain air-to-air and air-to-ground missiles. JMC has designated LEMC as the Depot Source of Repair for Precision Strike Missiles (PrSM).

Non-Destructive Testing

LEMC's skilled workforce utilizes advanced non-destructive testing techniques such as ultrasound, magnetic particle, digital imaging, and real-time x-ray to safely surveil and maintain missiles and other munitions. The skilled workforce has developed significant expertise in applying these techniques to support maintenance activities.

CAPABILITY HIGHLIGHTS

Missile Maintenance

Storage, receipt, issue, inspection, mobile worldwide maintenance, and demilitarization

Rocket Motor Demilitarization

Confined burn system to dispose of ammonium perchlorate rocket motors

Non-Destructive Testing

Extensive use of non-destructive techniques to surveil munitions

Shipping Container Maintenance

Inspection, repair, and maintenance for metal shipping containers

THE LEMC ADVANTAGE

- AS 9100/9110D Aerospace Quality Certification
- ISO 14001:2015 Environmental Certification
- Unique missile maintenance facilities
- Center of Industrial and Technical Excellence (CITE) for missile maintenance
- Produce reduced range practice rockets
- High-capacity trucking and rail network
- Close proximity to a number of air and sea ports
- Near I-76 and I-81 corridors and approximately 65 miles from Harrisburg International Airport
- Secure 24/7 controlled access

1.28M lb

net explosive weight limit per year from static firing pads

6.8M lb

net explosive weight limit per year for demilitarization

8.8M sq ft

storage space

DEFINING FEATURES

Commercial Work

MCAAP has a long and successful track record of performing commercial work and houses the largest number of public-private partnerships of any JMC government operated installation. Past and present partners include General Dynamics, Raytheon, BAE Systems AB, Textron, Lockheed Martin, Boeing, Sandia National Lab, and Hawker Beechcraft.

Explosives Production & Maintenance

MCAAP performs mixing operations for both cast-cure and melt-pour explosives as well as LAP operations for bombs ranging from 500 to 30,000 pounds for the U.S. Navy and U.S. Air Force. The installation also renovates and maintains missiles, bombs, rockets, and other projectiles with advanced chemical and explosives laboratories and radiographic facilities.

CAPABILITY HIGHLIGHTS

Large Explosives Production

Mixing operations and LAP for bombs, projectiles, and warheads

Missile Maintenance

Renovate, modify, and maintain missiles

Rail Maintenance

Mobile team provides rail maintenance to JMC and DoD facilities

Munitions Handling

Storage, receipt, issue, inspection, maintenance, and demilitarization

THE MCAAP ADVANTAGE

- ISO 9001:2015 Quality Certification
- ISO 14001:2015 Environmental Certification
- High-capacity trucking and rail network
- Mobile rail maintenance capability
- Mobile Ammunition Renovation, Inspection, and Demilitarization Team (MARID)
- 3 linear accelerator x-ray systems with digital imaging
- Near I-35 and I-40 corridors and approximately 105 miles from Tulsa International Airport
- Secure 24/7 controlled access

DEFINING FEATURES

Chemical & Biological Defense

PBA was designated as the Center of Industrial and Technical Excellence (CITE) for Chemical and Biological Defense Equipment by the Secretary of the Army in 2006. PBA specializes in multipart systems integration and fielding, decontamination manufacturing, collective protection filter production, and hardened military equipment maintenance.

Smoke Ammunition

PBA received its second CITE designation in 2017 for the manufacture of smoke-based ammunition. Specialized munitions for obscurant, illuminating, and incendiary devices are produced at PBA. PBA is the only facility in the northern hemisphere that loads white phosphorous munitions.

CAPABILITY HIGHLIGHTS

Munitions Production

Pyrotechnical mixing and pressing, load assemble and pack, and phosphorous operations

Advanced Textile Manufacturing

Production of low density, complex textiles and garments

Chemical & Biological Defense

Systems integration, decontamination manufacturing, collective filter production

Performance Verification & Testing

First article, production lot, and surveillance testing

4

major outload spurs

DEFINING FEATURES

Ammunition Peculiar Equipment

TEAD is designated as the Center of Industrial and Technical Excellence (CITE) for Ammunition Peculiar Equipment (APE). The depot designs, engineers, and manufactures equipment used in the maintenance and demilitarization of munitions, including robotic and remotely controlled ammunition handling equipment.

Munitions Maintenance

TEAD performs maintenance, receipt, issue, inspection, storage, and test and repair for DoD loitering munitions. The skilled artisan workforce has developed significant expertise to support all maintenance activities for an array of loitering and unmanned munitions.

CAPABILITY HIGHLIGHTS

Equipment Fabrication

Design and manufacture equipment used in maintenance and destruction of munitions

Performance Testing

Testing of munitions and explosives

Shipping Container Maintenance

Inspection, repair, and maintenance for metal shipping containers

Munitions Handling

Storage, receipt, issue, inspection, maintenance, and demilitarization

THE TEAD ADVANTAGE

- High-capacity trucking and rail network
- ISO 9001:2015 Quality Certification
- ISO 14001:2015 Environmental Certification
- ISO 45001:2018 Safety Certification
- High-capacity trucking and rail network
- Less-than-truckload facility
- On-site renewable energy generation
- Large capacity open detonation
- Alternatives to open burn/open detonation munitions disposal
- Near I-15 and I-80 corridors and within 40 miles of Salt Lake City Airport
- Secure 24/7 controlled access

GOCO MATOC

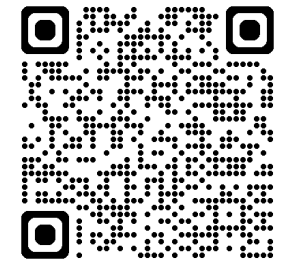

Design/Build MATOC

Multiple Award Task Order Contract (MATOC)

- Executed through the Army Contracting Command-Rock Island;
- Projects are overseen by Project Lead Joint Services (PL JS) and DEVCOM; focused on ammunition production processes at Army Government Owned, Contractor Operated (GOCO) Ammunition Plants
- PL JS will continue using the Operating Contractor and the USACE based on the project's complexity, cost and schedule
- Indefinite Quantity (IDIQs) awarded to all qualifying contractors
 - 5-year base award valued at \$5 Billion
- Individual Task Orders will be solicited among MATOC holders to support Design/Build and Construction services.
 - No Design (A&E) only Task Orders
 - Equipment and/or Construction included
 - Task orders may be primarily Construction with minimal design
 - Each Task order is end to end project

Final Solicitation/RFP: 06 April – 05 May
Contract Award: 25 July

Draft RFP Location:

Production Base Budgets FY25-FY29

GOCO Ammunition Production Base Budgets FY26-FY31

FY28	\$ 1,377.1M
FY29	\$ 1,395.9M
FY30	\$ 1,554.5M
FY31	\$ 1,390.7M

Future Projects range from \$5M – \$850M; majority range from \$30M – \$100M

GOCO AAP Locations

ARMS

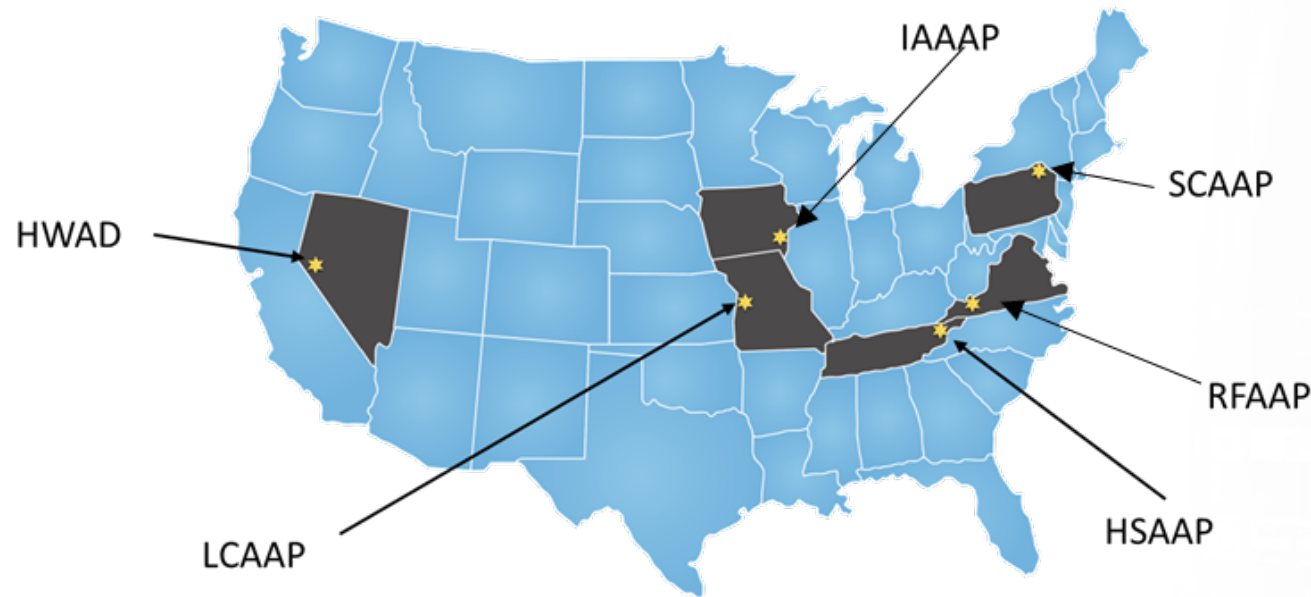

ARMS- Program Overview

Armament Retooling and Manufacturing Support (ARMS)

- ARMS is a Congressionally Mandated Program established in 1993 (10 USC 7551-7555) to encourage use of underutilized Army Ammunition Plants (AAP) facilities by commercial firms
 - Sustains Army manufacturing capability for Armed Services national security requirements and with ties with Department of War (DoW) Secretary's objectives
 - Reduces costs of ownership, operations and maintenance of facility
 - Reduces product costs
 - Accelerates private sector economic growth, employment and investment
- The ARMS program rents underutilized (idle) portions of available Government-Owned, Contractor-Operated (GOCO) Army Ammunition Plants/Depot (AAPs/AD) to the commercial sector to reduce the cost of operating the facilities and to compensate for reduced production volumes/facility closures that would negatively impact the local economies.
- Appropriated funds maybe available to repair, refurbish and upgrade existing facilities for commercial use
- Tenants can secure lease terms of up to 25 years and additional optional renewals.
- The GOCO operating contractor manages all Tenant User Agreements efficiently

Active ARMS Sites - Benefits of ARMS Program

ARMS Program Benefits:

- Sustains Army manufacturing capability for Armed Services national security requirements
- Maintains a workforce having the skills in manufacturing processes for National Security
- Reduces costs of GOCO operation and government product costs
- Encourages private sector commercial firms to use the facilities
- Enables commercial economic growth, employment and investment
- Demonstrates innovative business practices to support Department of War (DoW)
- Increase opportunities for small business
- Legislation allows to sole source for tenants using standard commercial rental practices

Marketing the Site and Shovel Ready Program

Sites are Co-Marketed:

- USG PL JS ARMS Team
- The operating contractor ARMS Property Manager
- State Economic Development Agencies where site certified
- Regional Economic Development Agencies

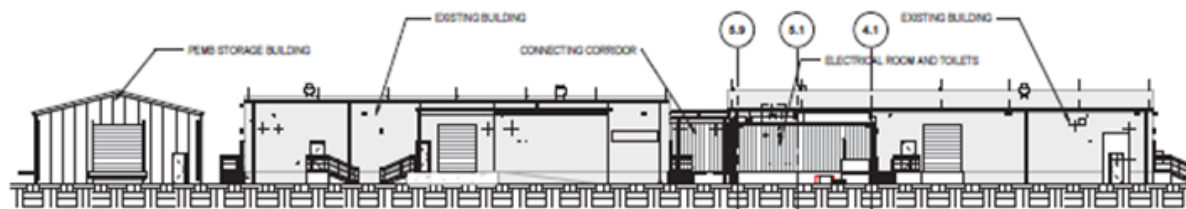

Shovel Ready Certified Site Programs:

- A program supported by the states economic development organizations that verifies site readiness for development that establishes a Pre-Certified Site program.
- A Pre-Certified Site program that accelerates renting/developing the property assuring prospective tenants or companies that the site is:
 1. Available: Ownership is clear, with no liens or legal issues affecting leasing or purchasing
 2. Fully served by utilities: Utilities such as natural gas, electricity, water, and sewer are available, with sizes and capacities clearly defined
 3. Developable: No significant easement issues exist, and all necessary due diligence, such as environmental assessments, has been completed

Example of a Recent ARMS Tenant 2024-2026

Advanced Ammunition – New River Energetics RFAAP

- Repurposed Underutilized Facility
- Renovated and modernized the facility
- Enhanced Defense Manufacturing Capabilities and national defense objective
- State of the art technology
- Economic and Operational Impact
 - Job creation
 - Long term sustainability
 - Created new NTIB capability
- Total Investment
 - ARMS Program \$ 12.5M

Iowa AAP Operating Contract RFI

IAAAP Operating Contract RFI

- Current Iowa Army Ammunition Plant (IAAAP) Operating contract expires 31 December 2031
 - Anticipate new contract award by 01 January 2031 to allow for one year transition
- USG is investigating alternate operating models for next operating contract
 - “Industrial Park Model”
 - Long Term Lease
 - Public Private Partnership
 - Other suggestions from industry
- Base operating contract may or may not include any ammunition production
- Sources sought # W519TC-26-R-0016 posted on SAM.GOV open until 12 April 2026
- Follow on Industry Day planned in June 2026 for further industry discussion
- Planned Contract Timeline:
 - Draft RFP ~March 2028
 - Final RFP ~October 2029
 - Contract Award NLT 01 January 2031

**IAAAP Plant
Sources Sought**

Industrial Park Operating Model

Award Contract to Facility Management Operator:

- Responsible for facility infrastructure:
 - Roads, Rails
 - Telecommunications
 - Utilities
 - Waste and Recycling
 - Security
 - Fire Protection/Prevention
 - Buildings
- Promotes services offered at IAAAP
- Incubator / Innovation Cell
- Provide Common Services: Trades, Calibration, Tool Room, Safety (Explosive and Occupational), etc.

Utilizing the ARMS model; Facility Management Operator Leases out Production Lines (or under separate direct contract with USG):

- Melt Pour – Line 3A; FAC 2.0; Flexible Melt-Pour Facility
- 40mm Production
- Tank Ammunition Production – 120mm AMP, Training
- Warhead Pressing
- C4 Production – MICLIC M112 Block
- Energetics Storage/Movement

Energetics Center of Excellence

PROJECT MANAGER COMBAT AMMUNITION SYSTEMS

Industry Day

19 March 2026

Presented by:
Mr. Matthew Glaser
Deputy Project Manager Combat Ammunition
Systems
matthew.s.glaser.civ@army.mil

BUILDING THE ARSENAL OF FREEDOM

Topics

- **PM CAS Introduction**

Presenter: Matt Glaser

- PM CAS Organization, Realignment, Goals, Products

- **Conventional Ammunition Division**

Presenter: MAJ Walerko

- Requirements for CAD Top Priorities (Base Bleed, MACE)

- **PdM Precision Attack Cannon Munitions**

Presenter: LTC Acevedo

- M1208 Onshoring/Long-term Planning

- **PdM Artillery, Mortars, & Precision Systems**

Presenter : LTC Welch

- PGK PNT Improvement Opportunities

- **Business Management Division - Acquisition**

Presenter: Al Klobchar

- Business Opportunities/Near-term Solicitations, Acquisition Procedures
- Future Investment/Demand Signal

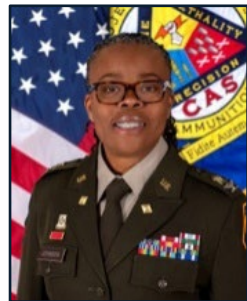

PM Combat Ammunition Systems Organization

OUR MISSION

*To develop, produce,
and equip the Joint
Warfighter with
conventional and
precision artillery and
mortar ammunition.*

Project Manager
COL Alicia J. Johnson
973-724-2003

Actg. Deputy Project Manager
Mr. Matt S. Glaser
(973) 724-9355

Executive Assistant
Angela Prelich
973-724-7073

**Lead Product Support
Manager**
Shaji John
973-724-4370

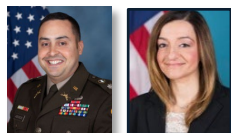

Chief Engineer
Kyle Hampson
520-672-5941

Test Lead
Michael Markowitch
520-672-5563

**PdM Precision Attack
Cannon Munitions**
PdM, LTC Rafael Acevedo
973-724-1839
DPdM, Ms. Peggy Metternich
973-724-9066

- Excalibur Block Ia-1
- Excalibur Block Ia-2
- Excalibur Block Ib
- BONUS
- C-DAEM Armor
- C-DAEM DPICM Replacement

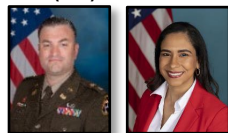

**PdM Extended Range
Artillery Munitions**
PdM, LTC Justin Bond
DPdM, Mr. Dave Ahmad
973-724-1521

- XM1230

**PdM Artillery, Mortars
& Precision Systems**
PdM, LTC Ian Welch
973-724-4209
DPdM (Actg.) Viviana Gutierrez
(520) 692-5710

- Guided Mortars
- PGK & PGK-E5
- LR-PGK
- Fuze Setters

**Conventional
Ammunition Division**
Chief, Raymond Colon
973-724-7617
APPI, Temporarily Vacant

- Artillery Ammunition
 - M1128, XM1113
 - Next Gen Propulsion
- Mortar Ammunition
- Fuzes
- Energetics
- JMC Commodity Team

**Business
Management**
Director, Ms. Chary Isabel Hernandez
973-724-2619

- Acquisition Planning
- Conventional and Precision Munitions
- Development and Strategic Planning
- Operations and Program Control

**International
Programs**
Director, (Munitions)
Ms. Lindsey Benjamin
973-724-2081

- Defense Export Policy
- Foreign Military Sales
- Project Agreements (NATO/bilateral)
- International Business Development and Relations

PM CAS Priorities

- **Deliver Indirect Fire Ammunition Capabilities at Scale and Speed**
 - Field XM1113 (NG RAP), M1128 and M1208
 - Precision Guidance Kit (PGK) with Anti-Jam capability
 - On-shore M1208 DPICM Replacement
 - Strengthen the Industrial Base
 - Continued emphasis on Safety and Quality
- **Innovating at the round to deliver Long Range Precision Effects and Mass Fires**
 - XM1230 FALCON - Program kick off, Accelerate Prototyping, demonstrate advanced capabilities
 - Fuzing, Projectiles and Propellant systems supporting MTC
 - Transition E81 Ammo and E120 Ammo to program of records
 - Develop kinetic and non-kinetic payloads for MACE/ER Cargo
- **Innovate the way we produce/develop munitions**
 - Focused on modularity in production and design
 - Leverage AI and best practices to improve processes
- **Strengthen Partnerships and Alliances**
 - Foreign Military Sale/Direct Commercial Sales
 - Interoperability demonstrations on foreign platforms (52 caliber)
 - Improve Interoperability / Interchangeability with Allied Partners
 - Execute Co-development Project Agreements and support Cooperative Research and Development Agreements (CRADAs)

PM Combat Ammunition Systems

Current Products

75/105/155mm Artillery Rounds

60/81/120mm Mortar Rounds

Fuzes/Propellants

Enhanced Portable Inductive Artillery Fuze Setter (EPIAFS)

Excalibur Inc. Ib

DPICM Replacement

- Number of products delivered FY25 – 2.884M

New Products

PGK-E5

LR- PGK

MACS Modernization

XM1230 FALCON

81mm HE IM M821A4

NG RAP XM1113

M1128 HE BB
XM103 APGMS

- Precision Guidance Kit - Anti-Jam (PGK-E5)
- Long Range - Precision Guidance Kit (LR-PGK)
- Modular Artillery Charge System (MACS) and Primer Modernization
- XM1230 Field Artillery Long-range Concept (FALCON)
- 155mm XM1113 Next Generation Rocket Assisted Projectile and M1128 Base Bleed Projectile
- XM103 Artillery Precision Guided Munition Setter (APGMS)

Product Concepts

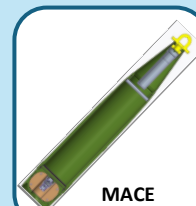

Top Program Manager S&T Priorities:

- Improved Lethality, Range and Advanced Propellants
- Modular Artillery for Combat Effectiveness (MACE)
- Improved Howitzer Survivability

Next Gen Propellant

Supercharge

MACE

XM1227 Enhanced 81mm

53 Active Programs
Over 296 Component Contracts
FY26: \$6.897B Army & Other Service (Base, OCO, Tranche, Supplemental)

ACAT I:	1	ACAT II:	5	MTA:	1
ACAT III:	44	ACAT IV:	2		

Perform Life-Cycle Management of Conventional and Precision Artillery Munitions, Mortar Munitions, Propellants, Fuzes and Fuze Setters.

UNCLASSIFIED

- Moving / movable
- Home-on-Transmitter (e.g. Jammer/Radar)
- Imprecisely located
- Medium to heavy armor
- Terminal Seekers and high maneuverability

- Good Enough guidance to get effects on target with a reduced cost in money and logistic burden
- Targets can include:
 - C2 Nodes
 - Logistics Sights
 - Reactive Counterfire
 - EW Systems
 - UAV Control Stations
 - Hardened Targets / Bunkers

- e.g. CAT 1 to 6
Coordinates (TLE)

- Constant destruction and Threat to enemy
- Low-Cost high volume ammunitions
- Terrain Shaping
- Special Munitions

- e.g. 10 km x 10 km TAI

- Movement to contact against HPTs
- Soft-Launch from Cannons
- terrain that restricts, prohibits, or degrades artillery strike accuracy and effectiveness
- Refined specific exquisite capabilities

**FLOT
LOC**

Base bleeds & MACE

MAJ PJ Walerko

philip.s.walerko2.mil@army.mil

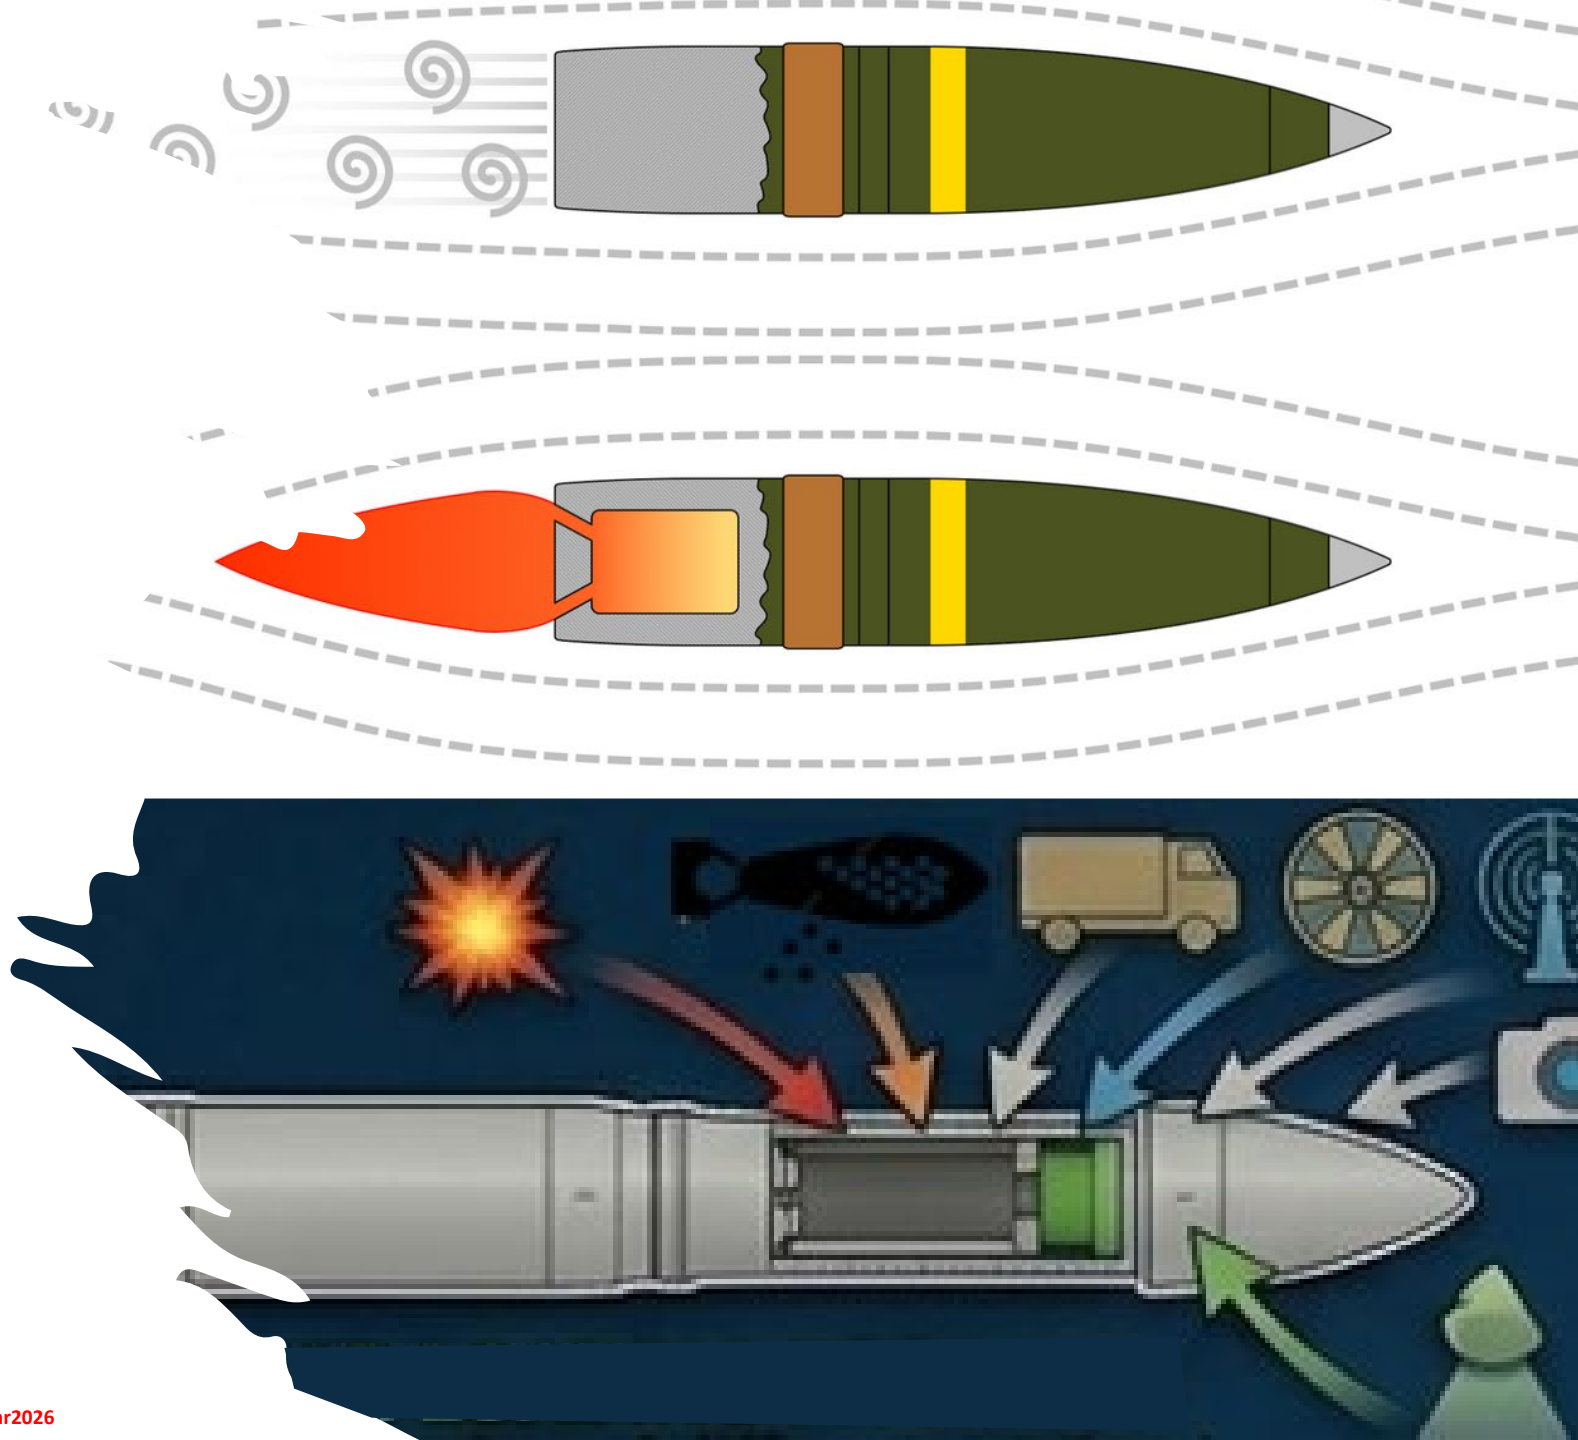

Base bleed and MACE Branch Chief

Jim Sarruda

james.a.sarruda.civ@army.mil

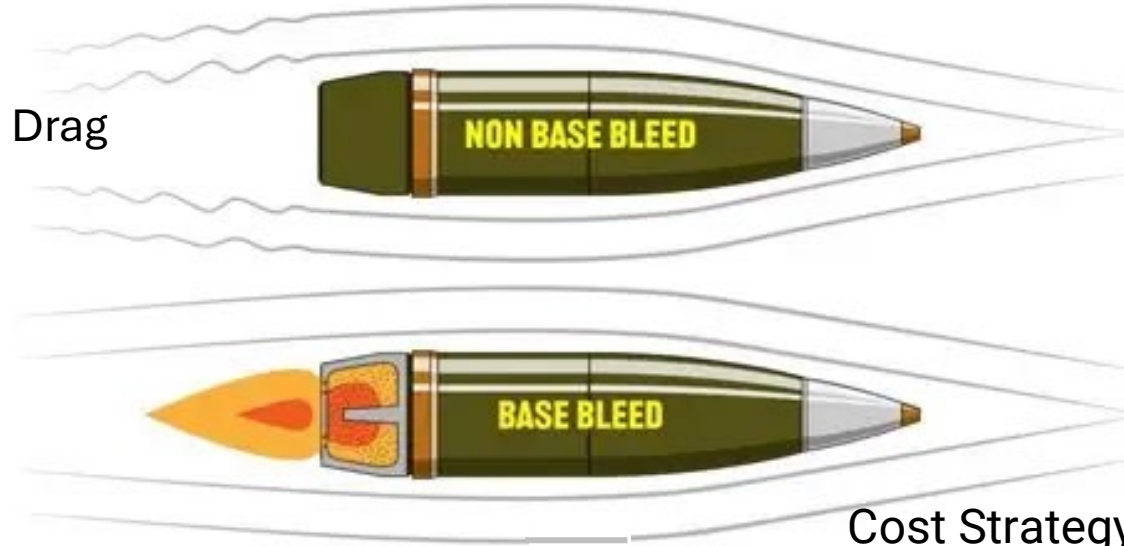

MAJ Rachel Kim

rachel.m.kim.mil@army.mil

Base bleeds & Rocket Grain Opportunities

Competitive Award

- OTA solicitation (PPON) posted in MAR 2026, proposals due in APR 2026. Award in AUG 2026.

Scope of Work

- Proof of Principle (Pilot Line): Develop qualifying mix (lab scale), casting grains and liner
- Industrialization: scale-up to 150gal+ mixer and casting equipment; 5k/mo capacity
- Option for production deliveries

Cost Strategy: Hybrid Approach

- FFP Phase 1: High engineering & process development risks, low capital and facility improvement risks
- CPFF Phase 2: High capital cost for equipment and facilities; risk profile are inverse of phase 1

Deliverables

- Successful FAT and report for Phase 1 and 2
- Base bleed deliveries to USG (optional)

Modular Artillery for Combat Effectiveness

What Is It?

- Developmental Program (New Capability)
- Head of Family
- Evolutionary Transition

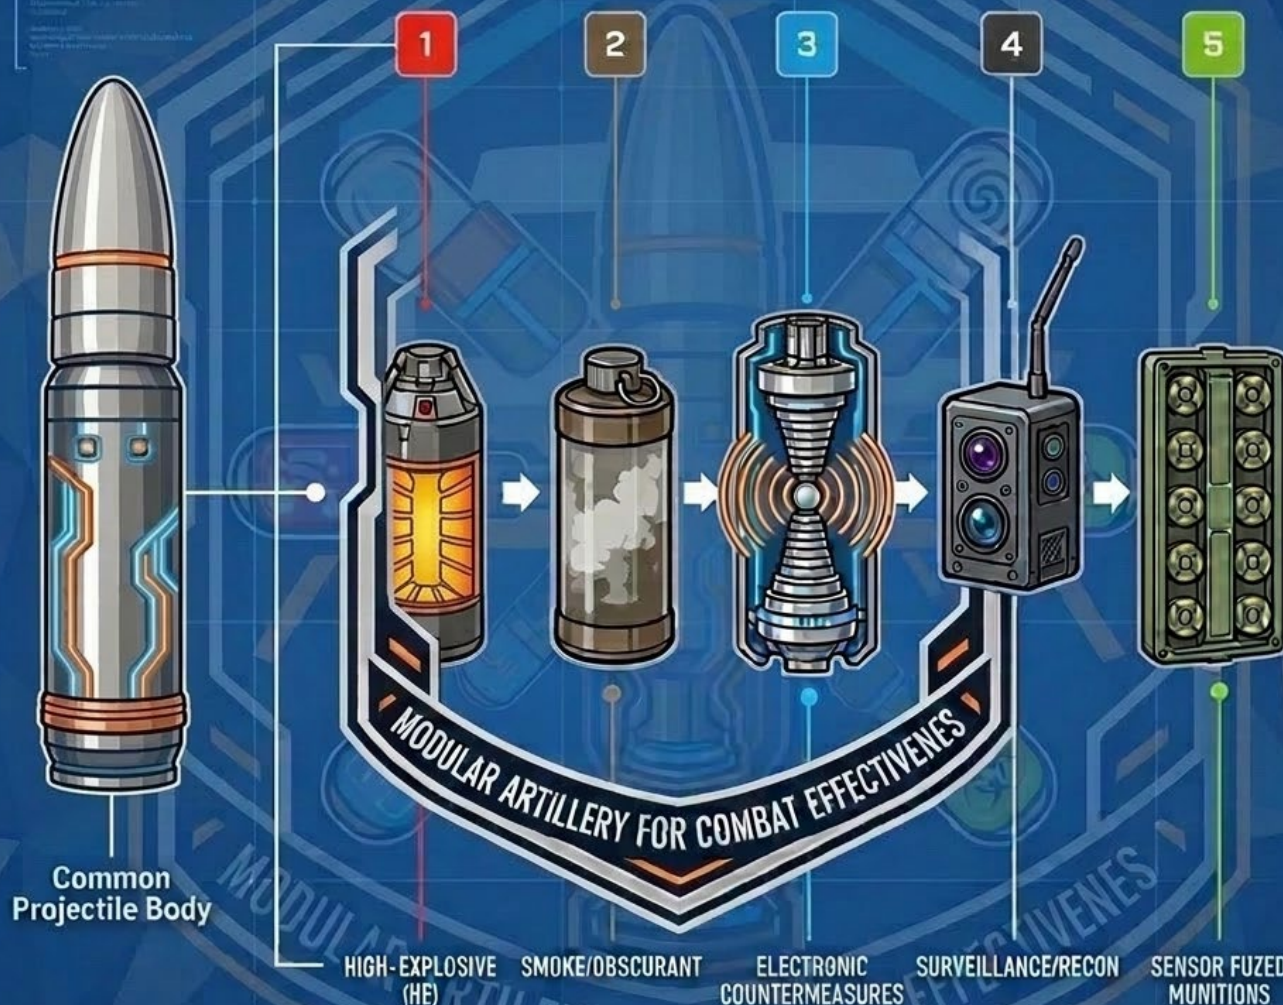

What Does It Do?

- Common shell body tailors effects to the operational environment: HE, Smoke, Electronic CM, Sensors, Sensor-Fuzed Munitions, etc.
- Range extension for cargo ammunition

Benefits?

- Strategic supply chain resilience
- Rapid insertion of advanced capabilities
- Invites traditional and nontraditional industry participation
- Scalable manufacturing to meet surge demands
- Reduced unit cost

MACE MODULAR ARTILLERY SHELL: INTERCHANGEABLE PAYLOAD MODULES

'MACE CONOP: One Projectile, Multiple Battlefield Effects'

MODULAR LOADING PROCESS:
Active integration of different payload missions into the common shell body.

Forward Line of Troops (FLOT)

HIGH EXPLOSIVE: The HE variant delivers powerful effects to destroy hardened point targets like command posts and enemy artillery.

Enemy Vehicle Convoy

AREA DENIAL: The Cargo variant is used to engage and neutralize area targets.

Forward Line of Troops (FLOT)

ELECTRONIC ATTACK: The EW variant delivers a jamming payload to disrupt enemy air defenses of command and control, creating a window for friendly air or ground operations.

MACE-Capable Artillery System

LEGACY SYSTEM REPLACEMENT

HE (M795): Traditional high-explosive round.

DPICM: Dual-purpose improved conventional munition (cluster).

ADAM/RAAMS: Area denial and remote mine dispensing rounds.

Friendly Maneuver Force

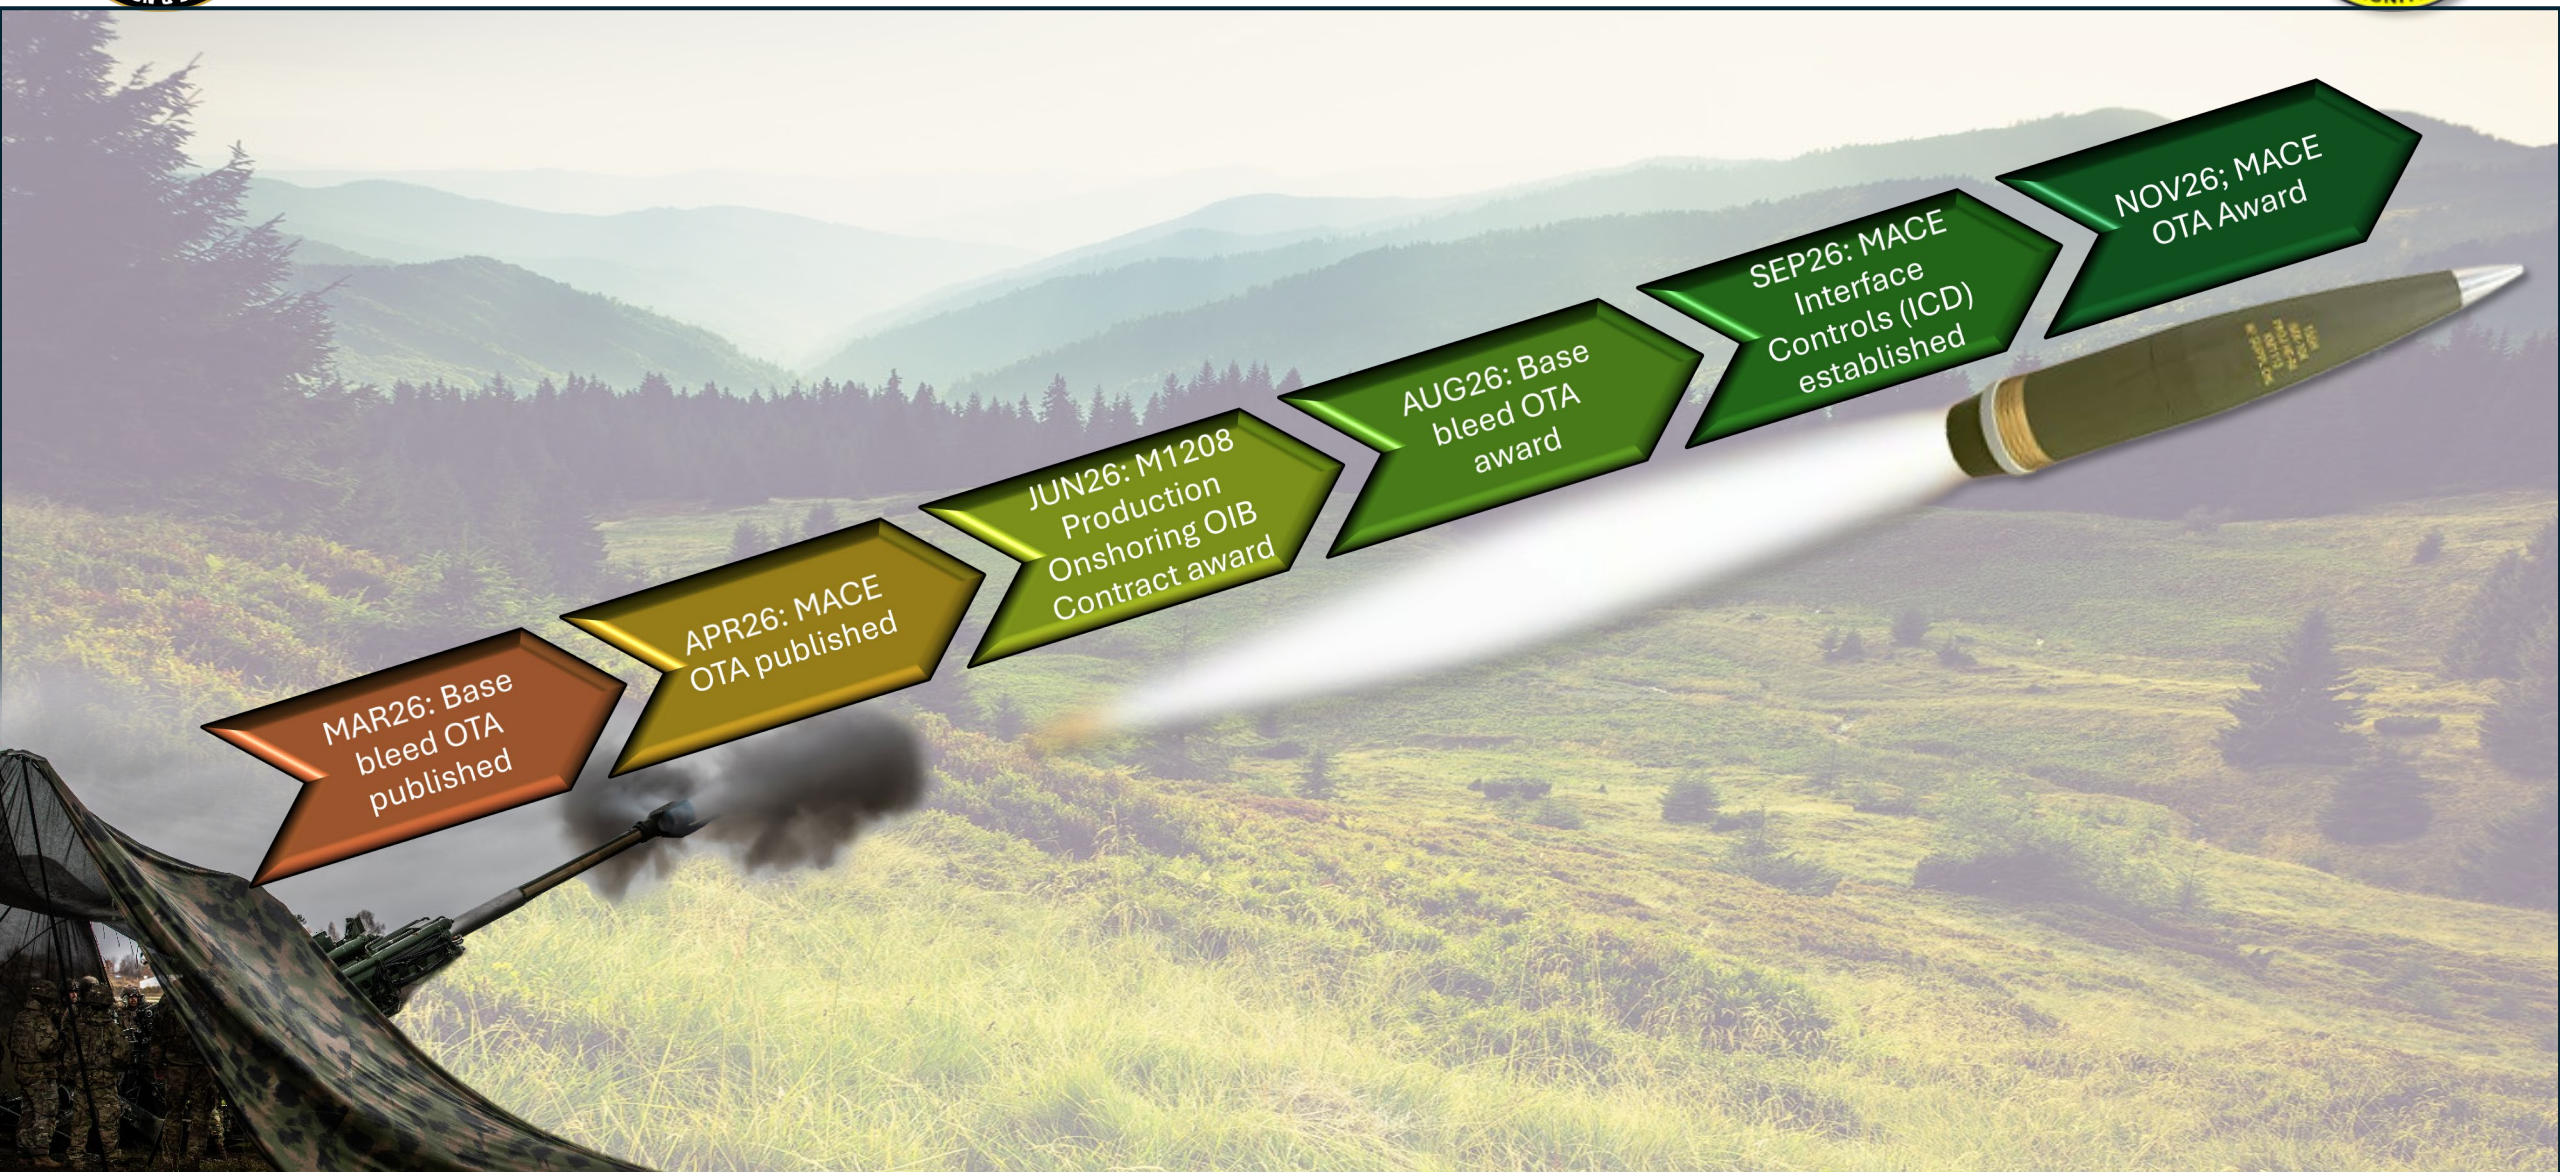

CONCEALMENT: The Obscurant variant creates a smoke screen to conceal friendly troop movements, allowing them to reposition safely or breach enemy defenses.

Suspected Enemy Staging Area

SITUATIONAL AWARENESS: The Sensor variant can deploy surveillance assets or illumination to unmask enemy positions, enabling follow-on strikes from other systems.

Call to Action

M1208

Onshoring/Long-term Planning

LTC Rafael Acevedo

PdM Precision Attack Canon Munitions

M1208 C-DAEM DPICM Replacement

The M1208 program is the replacement of the legacy DPICM projectiles and addresses the 2017 DoD's Cluster Munition policy of meeting 1% UXO rate at the submunition level. This round will be used via existing cannon artillery systems (155mm howitzers) while incorporating enhanced submunition reliability, improved target discrimination, reduced collateral damage, compatibility with current fire control systems.

Acquisition Strategy:

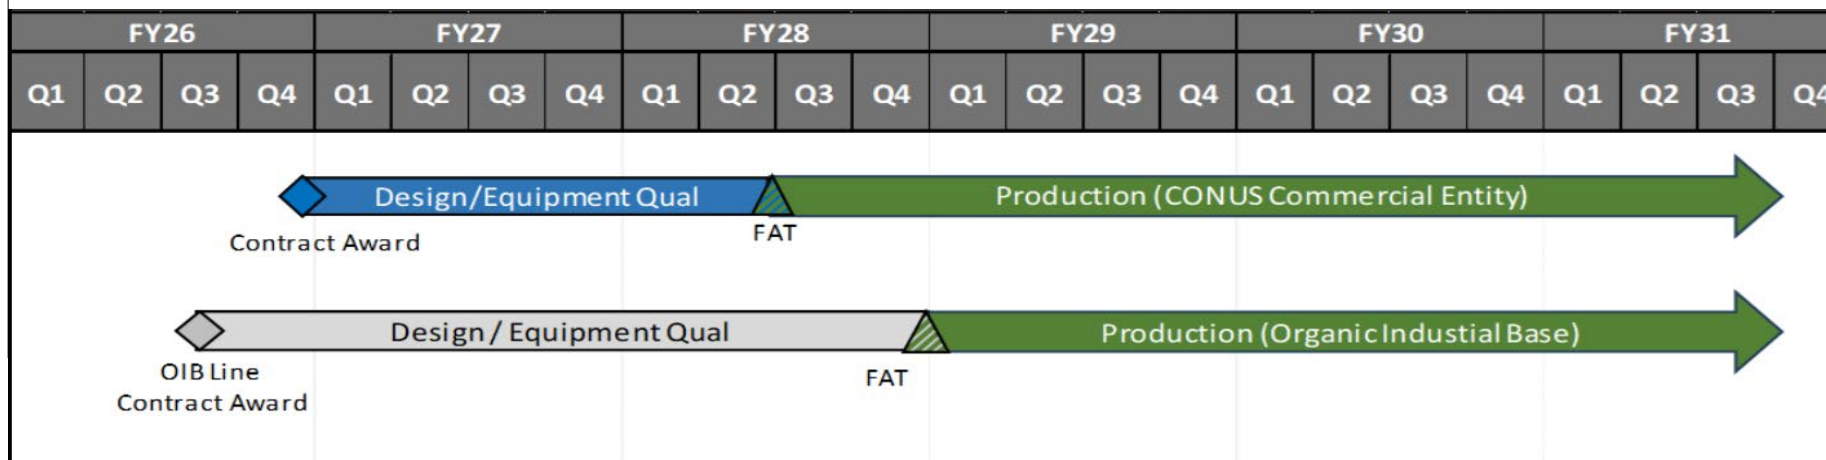

- Production contract: Sole Source FAR-FFP
- Begin production in Israel
 - Initial capacity 10k/yr
- Establish production capability in the US
 - OIB and Commercial LAP
 - US Supply Chain
 - Capacity up to 50k/yr

Vendor: Tomer (Israel)

Milestones/Decisions

Release RFP for Onshoring	3QFY26
Award Contract	4QFY26
Begin US Production	3QFY28
Transition Supply Chain to US	NLT FY29

Schedule

M1208 US Supply Chain Requirements

Metal Parts ♦ Thermal Battery ♦ Electric Detonators ♦ Propellant

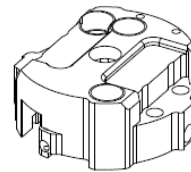

**Steel Monobloc Projectile
Metal Part &
Aluminum Base**

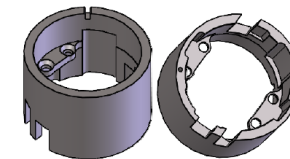

Aluminum Piston Plate

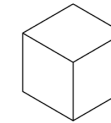

Aluminum Fuze Parts

**Steel
Submunition Body**

Steel Adapter

Preformed Frag

PGK PNT Improvement Opportunities

LTC Ian Welch
PdM Artillery, Mortars, & Precision Systems

PGK PNT Improvement Opportunities

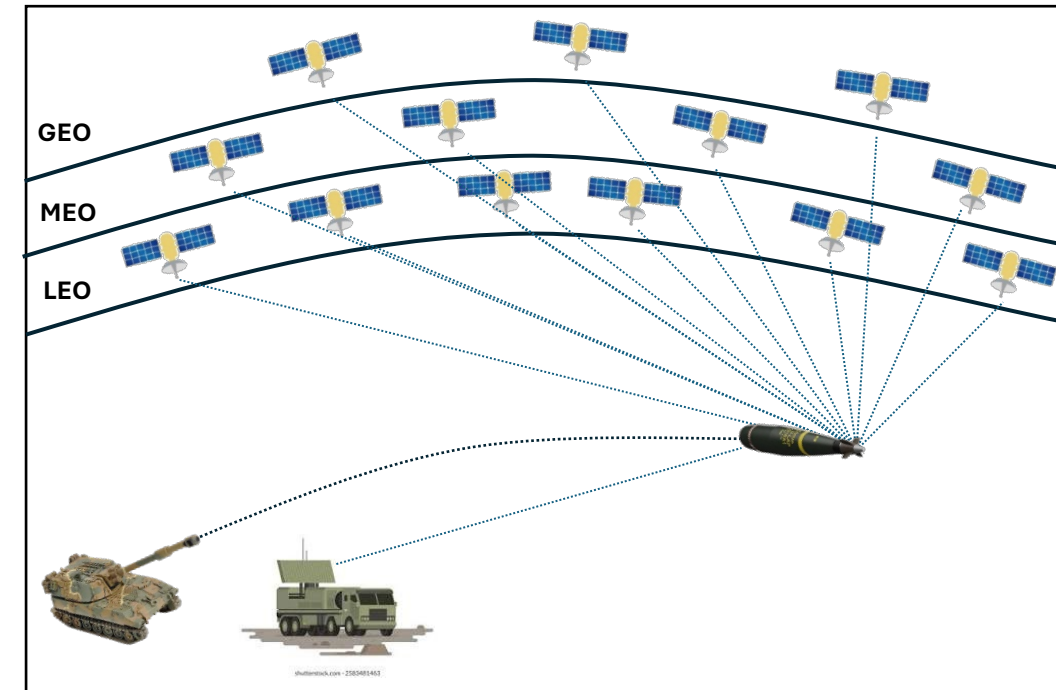

- **Capability Enhancements**

- Resilient and Survivable PNT
 - Frequency Diversification
 - Multi-Source Trusted PNT
- “Hot Start” System-of-Systems Dependencies

- **Technology Focus Areas**

- Next Generation Military ASIC
- M-code Regional Military Power (RMP)
- Data Link
- Alternate Up-Finding Solutions
- Multi Global Navigation Satellite System (MGNSS)
- Signals of Opportunity

PM CAS Acquisition Approach

Al Klobchar
Business Management Division,
Acquisition Manager

PM CAS Acquisition Approach

Army Transformation Initiative –Acquisition Goals:

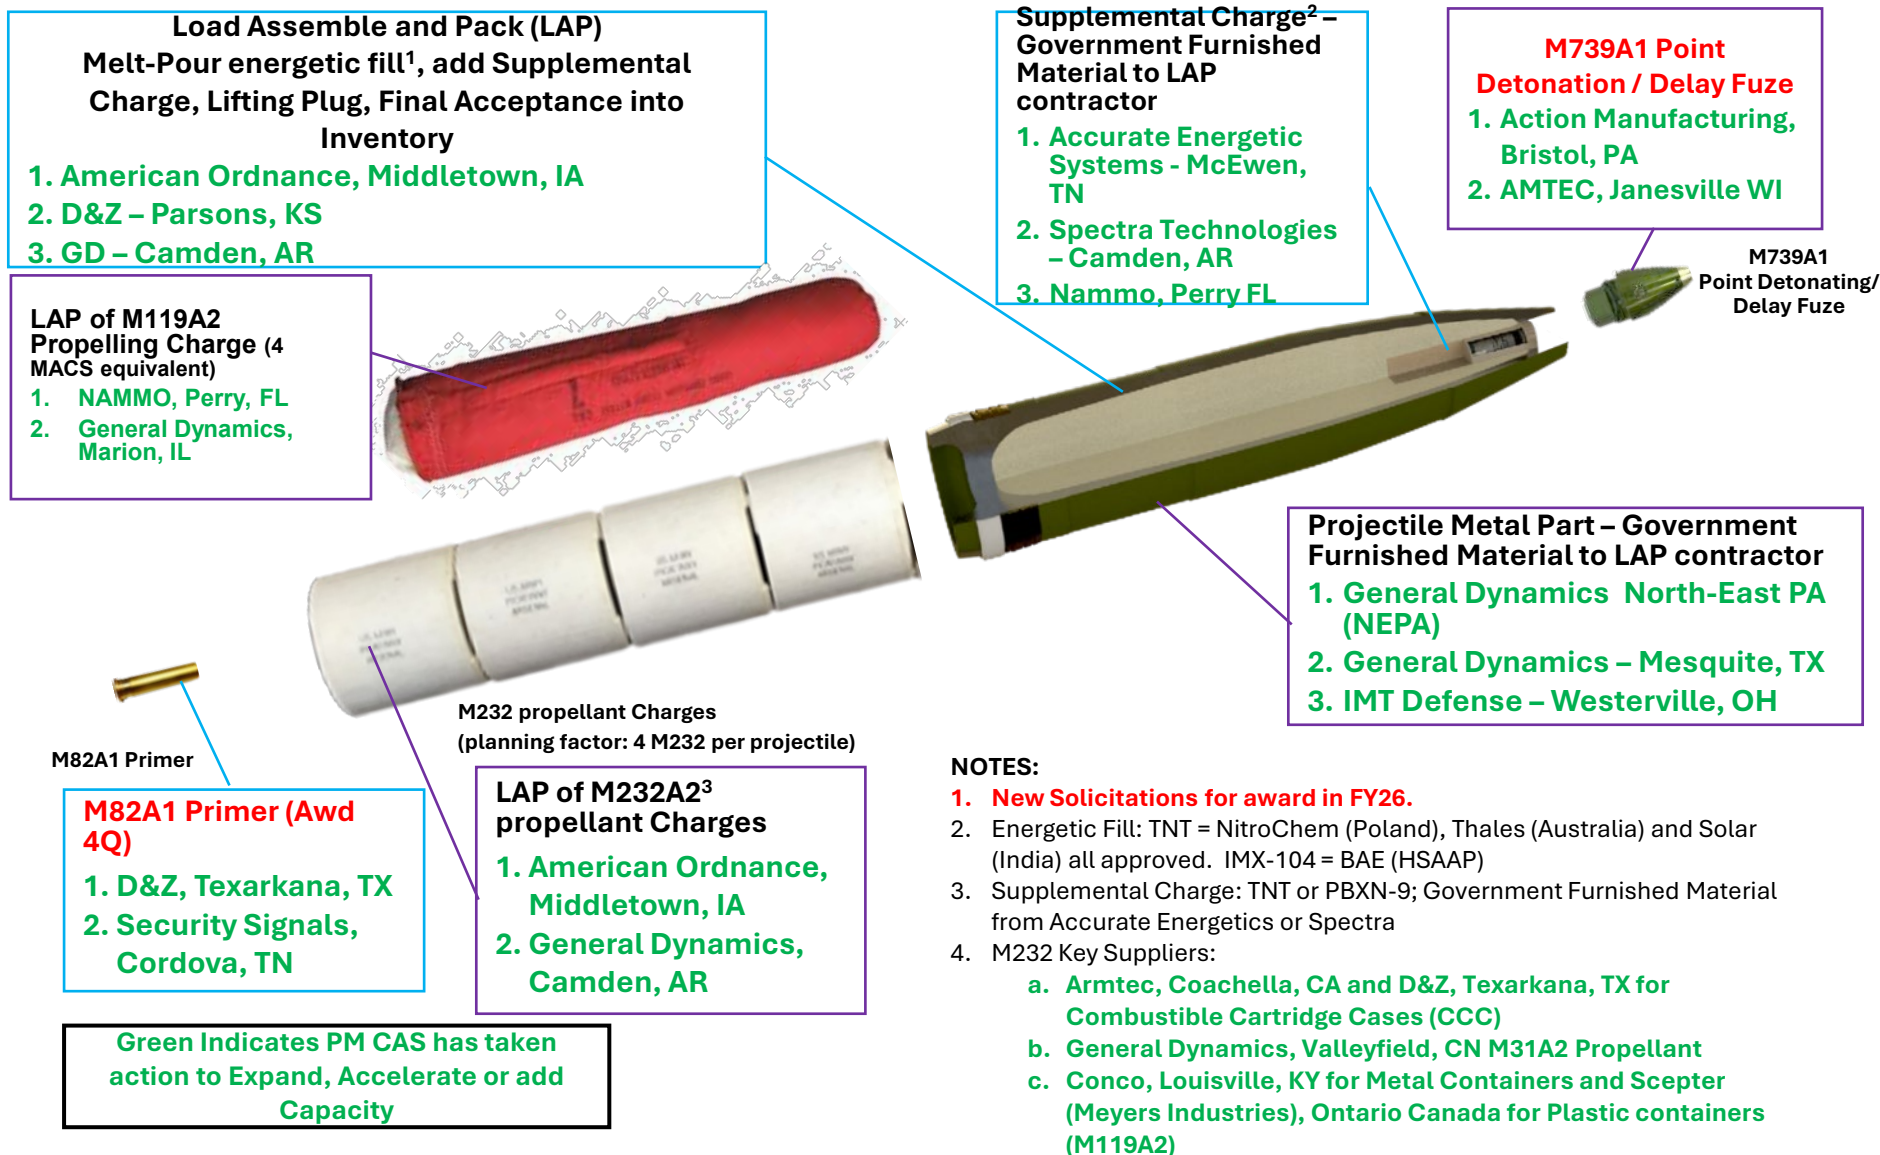

- Acquisition at Speed – Save 30% from traditional baseline schedules (Acquisition/Contract Execution)
- Contracting Efficiency Initiatives – PAE AS&A/CPE A&E led initiative to codify acquisition changes
 - Sub-IPTs for Statute, Regulation, Process, and Systems
 - Acquisition Approvals (Content & Process), Cost, Delegation of Authorities, Streamline Source Selection, OTA, AI, etc.

Approaches within PM CAS Control:

- FY24 NDAA, Temporary Authorities extended from Sept. 2024 to Sept. 2028
 - Use of Undefinitized Contract Actions still remain an option to begin performance quickly
 - 28 UCAs for Artillery and Propulsion during the Ukraine Replenishment build-up, exciting definitizations!
 - Acquisition Approvals with 50%+ reductions in lead-times
 - UCA awards on 50-75% reductions in lead-times
 - Facts: When authorities are implemented the U.S. Army can produce acquisition at speed
- Continue Other Transaction Authority (Broaden Scope)
- Oral Presentations (Proposal Presentations)
- Contract Consolidation

155mm Artillery Munition Systems & Suppliers

Component Breakout Strategy -Contract Consolidation

PM CAS Component Breakout Strategy:

- In Mid-2000's PM CAS implemented a Significant Component Breakout Strategy to Achieve Cost Savings
- Maximized production quantities in a Minimum Rate Environment
- At times, end-items have been broken-out into 8 separate contracts
- Recent consolidation has been for like-components to maintain cost-savings and accelerate acquisitions

Contract Consolidation – Path Forward:

- Reduce Contract Count to achieve better efficiency
- Prioritize speed while still achieving maximum buying power
- Continue to consolidate “like” components over contract cycles:
- Consolidation History:
 - 60mm/81mm/120mm Mortar HE LAP
 - 60mm/81mm/120mm FRPC LAP
 - 60mm/81mm/120mm Propelling Charges
 - 60mm/81mm/120mm Ignition Cartridges
 - 60mm/81mm/120mm Tail Fins
 - Mortar & Artillery Parachutes

New Business Opportunities – Artillery and Mortars

NOMENCLATURE:	TOTAL CONTRACT CEILING ESTIMATES	PATH-FORWARD:
60mm/81mm/120mm Mortar Containers	\$31.7M	Solicitation Closed. Source Selection. Award in 3QFY26.
M739 Fuze Production	\$712.5M	Solicitation Closed. Negotiations. Award in 3QFY26.
60mm/81mm/120mm Mortar Tail Fins	\$212M	Solicitation Closed. Source Selection. Award in 3QFY26.
Precision Guidance Kit (PGK)	\$862M	Solicitation Closed. Negotiations. Award in 4QFY26.
Artillery Base Bleed Grain	\$93M	OTA Solicitation: 2QFY26
155mm Next Generation Rocket Assisted Projectile	\$126M	OTA Solicitation: 2QFY26
155mm Modular Artillery for Combat Effectiveness	\$55M	OTA Solicitation: 3QFY26
M82 Primer	\$140M	Solicitation: 3QFY26
155mm M1208 Projectile CONUS (Modification)	\$960M	Solicitation: 3QFY26
Modular Artillery Charge System (MACS), Load/Assemble/Pack (LAP)	\$2.6B	Solicitation: 4QFY26
MACS Combustible Case	\$2.4B	Solicitation: 4QFY26
MACS M31-Series Propellant	\$2.3B	Solicitation: 4QFY26
MACS Container	\$500M	Solicitation: 4QFY26
MACS WC864 Powder	\$45M	Solicitation: 4QFY26
Artillery Metal Parts (FY28)	TBD	Market Research 2QFY26
Artillery LAP (M795/M1128) (FY28)	TBD	Market Research 2QFY26
Mortar LAP (High Explosive/Practice) (FY28)	TBD	Market Research 2QFY26
155mm Wood Pallet (FY27)	TBD	Market Research 3QFY26
M762/767/M782 Artillery Fuzes (FY28)	TBD	Market Research 3QFY26
Mortar/Artillery Fiber Containers	TBD	Market Research 3QFY26
M734/783 HE Mortar Fuzes (FY28)	TBD	Market Research 3QFY26
M67 Propelling Charge (FY28)	TBD	Market Research 3QFY26

Acquisition Key Takeaways

Acquisition at Speed:

- Attempting to permanently change the way we do business through codified changes in statute and regulation
- Temporary Authorities & UCAs are still the immediate way to rapidly respond to unplanned/emerging requirements
- Balanced contract consolidation will continue to be implemented to accelerate acquisition and preserve buying power
- **One-on-one Meetings: Provide industry input for acquisition challenges you experience**

Maintain Detailed Market Survey Responses:

- Consolidated Market Research:
 - Multiple Components under one sources sought
 - Provide Capability even if it is just for a portion of the requirement
- Wartime initiatives require responses with actionable information:
 - Examples: Production Rates, Delivery Schedule Lead-times, Integrated Master Schedules, Rough Order Magnitudes, Capacity Increases, etc.
 - Inform Army Leadership of industry capabilities and critical-path to award/delivery to make decisions
- Level of detail helps acquisition POCs answer questions upfront to maintain momentum

• Pyrophoric Flares Production

• 19 March 2026

COL Vinson Morris

Project Manager

(973) 724-7041

vinson.b.morris.mil@army.mil

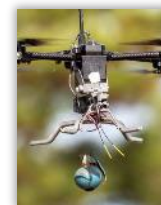

Mr. Joseph Pelino

Deputy Project Manager

(973) 724-3457

joseph.pelino.civ@army.mil

BLUF

- Chemring US has ended production operations at Alloy Surfaces Company. Alloy Surfaces is the sole global supplier of pyrophoric decoys.
- PM teams from Army, Navy and Air Force are assessing alternative sources and are developing mitigation plans to reduce the impact to Joint operations and allied partnerships.
- Looking for interest from industry to reestablish a flexible scalable pyrophoric production capability
- Pyrophoric flare currently deployed by U.S. Forces and partners:

Item (DODIC)	Service
M211 (LA14)	Army and FMS
M219 (A051)	SOCOM
MJU-49 (DWCI)	Navy and FMS
MJU-50 (LA19)	FMS
MJU-51 (LA20)	Air Force and FMS
MJU-52 (DWCO)	Air Force
MJU-64 (LA43)	Navy, Air Force and FMS
MJU-66 (A057)	Air Force and JSF

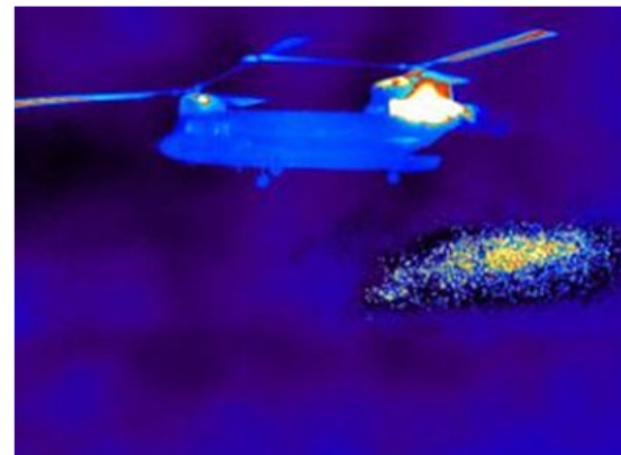

Alloy Surface Current Status

- Alloy Surfaces Company is located in Chester, PA
- All production has been completed; a limited number of employees remain in the plant conducting cleaning operations
- Chemring entertaining offers to purchase facility, Intellectual Property and Equipment
- US Government pursuing funding to reestablish a right-sized production capability
- Sustained Requirements of ~\$3-12M Year

Questions

OIB Industry Day

Assured Munitions Initiative
Presented by Gene Conner
CPE A&E Director of Integration
19 March 2026

Eugene Conner
Director of Integration CPE Ammunition and Energetics
eugene.c.conner.civ@army.mil

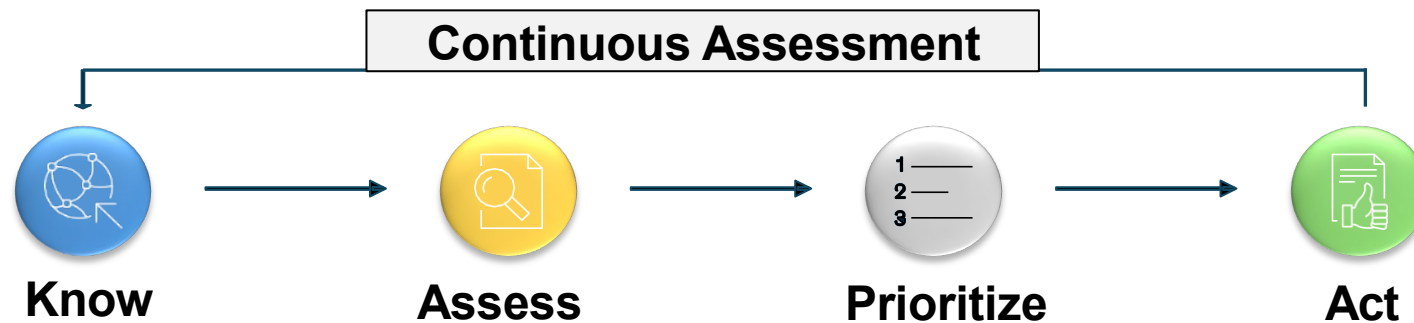

CPE Ammunition & Energetics Strategic Sourcing Strategy

- **Secure Our Domestic Munitions Supply Chains, Commercial and Organic**, to ensure continuous availability of end items and constituent components in peace and war
- **Develop International Partnerships and Strategic International Second Sourcing** to ensure an elastic supply chain is present which can respond at any time and under any conditions
- **Develop Alternative Chemistry Paths** with specification function, and performance and no reliance on foreign sources

Supply Chain Risk Management (SCRM) Integration

Risk Categories (12) and Sub-categories (123)

v1.2

Manufacturing and Supply	Political and Regulatory	Economic	Foreign Influence	Transportation and Distribution	Financial	Compliance
Obsolescence / Diminishing Manufacturing Sources and Materiel Shortages (DMSMS)	Political Government Changes	Demand Shocks	Weaponized Merger / Acquisition	Transportation Network Disruption	Solvency, Credit Risk	Contractor Misconduct
Throughput, Production Delays	Interstate Conflict (War or Armed)	Currency Fluctuations	Partnership with State Owned Entity	Poor On-Time Delivery (OTD) Performance / Correct Location	Liquidity	Past Suspension or Debarment
Outsourcing	Terrorism	Economic Sanctions	Industrial Espionage	Poor Shipment and Delivery Accuracy (Quantity and Item)	Operational Efficiency Risk	Defective Pricing, Price Fixing
Extended Lead Times	Corruption	High Unemployment Rates	Proprietary Information- Theft of Trade Secrets	Loss of Cargo	Cyclical Risk	SEC Enforcement Actions
Inventory or Capacity Incidents	Border Delays	Inflationary Changes / Inflation	Executive Poaching	Accidents	Unstable Payment Performance	Conflict Minerals in the Supply Chain
Equipment Downtime	Government Collapse	Price Volatility / Market Risk	Sabotage	Change in Trade Policy (Containers in Ports)	Lack of Funding Sources	Anti-Trust / Monopolistic Practices
Sole Source Dependency	Territorial Disputes on Trade Routes	Recession, Economic Slowdown	Veiled Venture	Production Quality and Design	Dependences on Defense Contracts	Import / Export Violation
Concentration Risks	New Regulations / Changes in Policy	Economic Instability	Cyber Espionage	Counterfeit Parts	Bankruptcy	Fraud (Procurement and Government)
Inventory Stock-out / Material Shortages	Trade War / Restrictions	Technology and Cybersecurity	Counterintelligence	System / Parts Performance Failure	Profitability Measures	Ethics Violations (Human Rights)
Material Sources	Watch List	Critical HW / SW Vulnerability	Counterintelligence Analysis	Non-Conforming Parts	Cost Overruns	Ethics Violations (Forced Labor)
Parts / Spares Inventory Shortages	Potential Political Exposure	Cyber Attack / Espionage	Counterintelligence Collection	Non-MILSPEC Parts (COTS)	Offshore Leaks / Database	Ethics Violations (Trafficking in Persons)
Single Sources	Environmental Protection	IT Disruption, Connectivity Issues	Foreign Intelligence Entity	Unreported Supplier Recalls	Financial Crime	Ethics Violations (Workers Health & Safety – OSHA)
Order Fulfillment / Requisitions	Government Policies	Loss or Theft of DCI or PII	Nationalization	Product Characteristics (I&S)	Infrastructure	Ethics Violations (Insider Threat)
Industrial Capacity	Environment	Unsecure Networks	State Owned Company		Utilities	Legal and Reputational
Industrial Capability	Natural Disaster	Operational Security/Information Security Violations	Provenance		Energy (Solar, Electricity, etc.)	Contract Non-Compliance
Reclamation / Utilization	Extreme Weather Event	Malicious Intrusion	Industrial Unrest, Labor Dispute		Building Conditions (of Facilities)	
Adjacency Risk	Pandemic	IT Implementation Failures	Loss of Talent / Skill, Mass Lay-Offs		Security	
Underdeveloped Product Pipeline	Wildfire	Data Breach	Lack of access to Capable Workforce		Equipment	
3rd Party Reseller / Middleman	Chemical Spill / HAZMAT risk	Obsolescence	Work Stoppage		Roads, Rail, Water, etc.	
Agriculture	Climate		Boycotts / Societal Risks			
	Man-made Risk

Materials in active mitigation are in blue font

Materials in Black font are being monitored

(1) MACS nitrocellulose is foreign sourced

(2) Black Powder is temporarily being sourced from NATO source while domestic rebuilt.

(3) Distributor is domestic, source is unknown

(4) Magnesium Ingot temporarily Foreign source until domestic restart

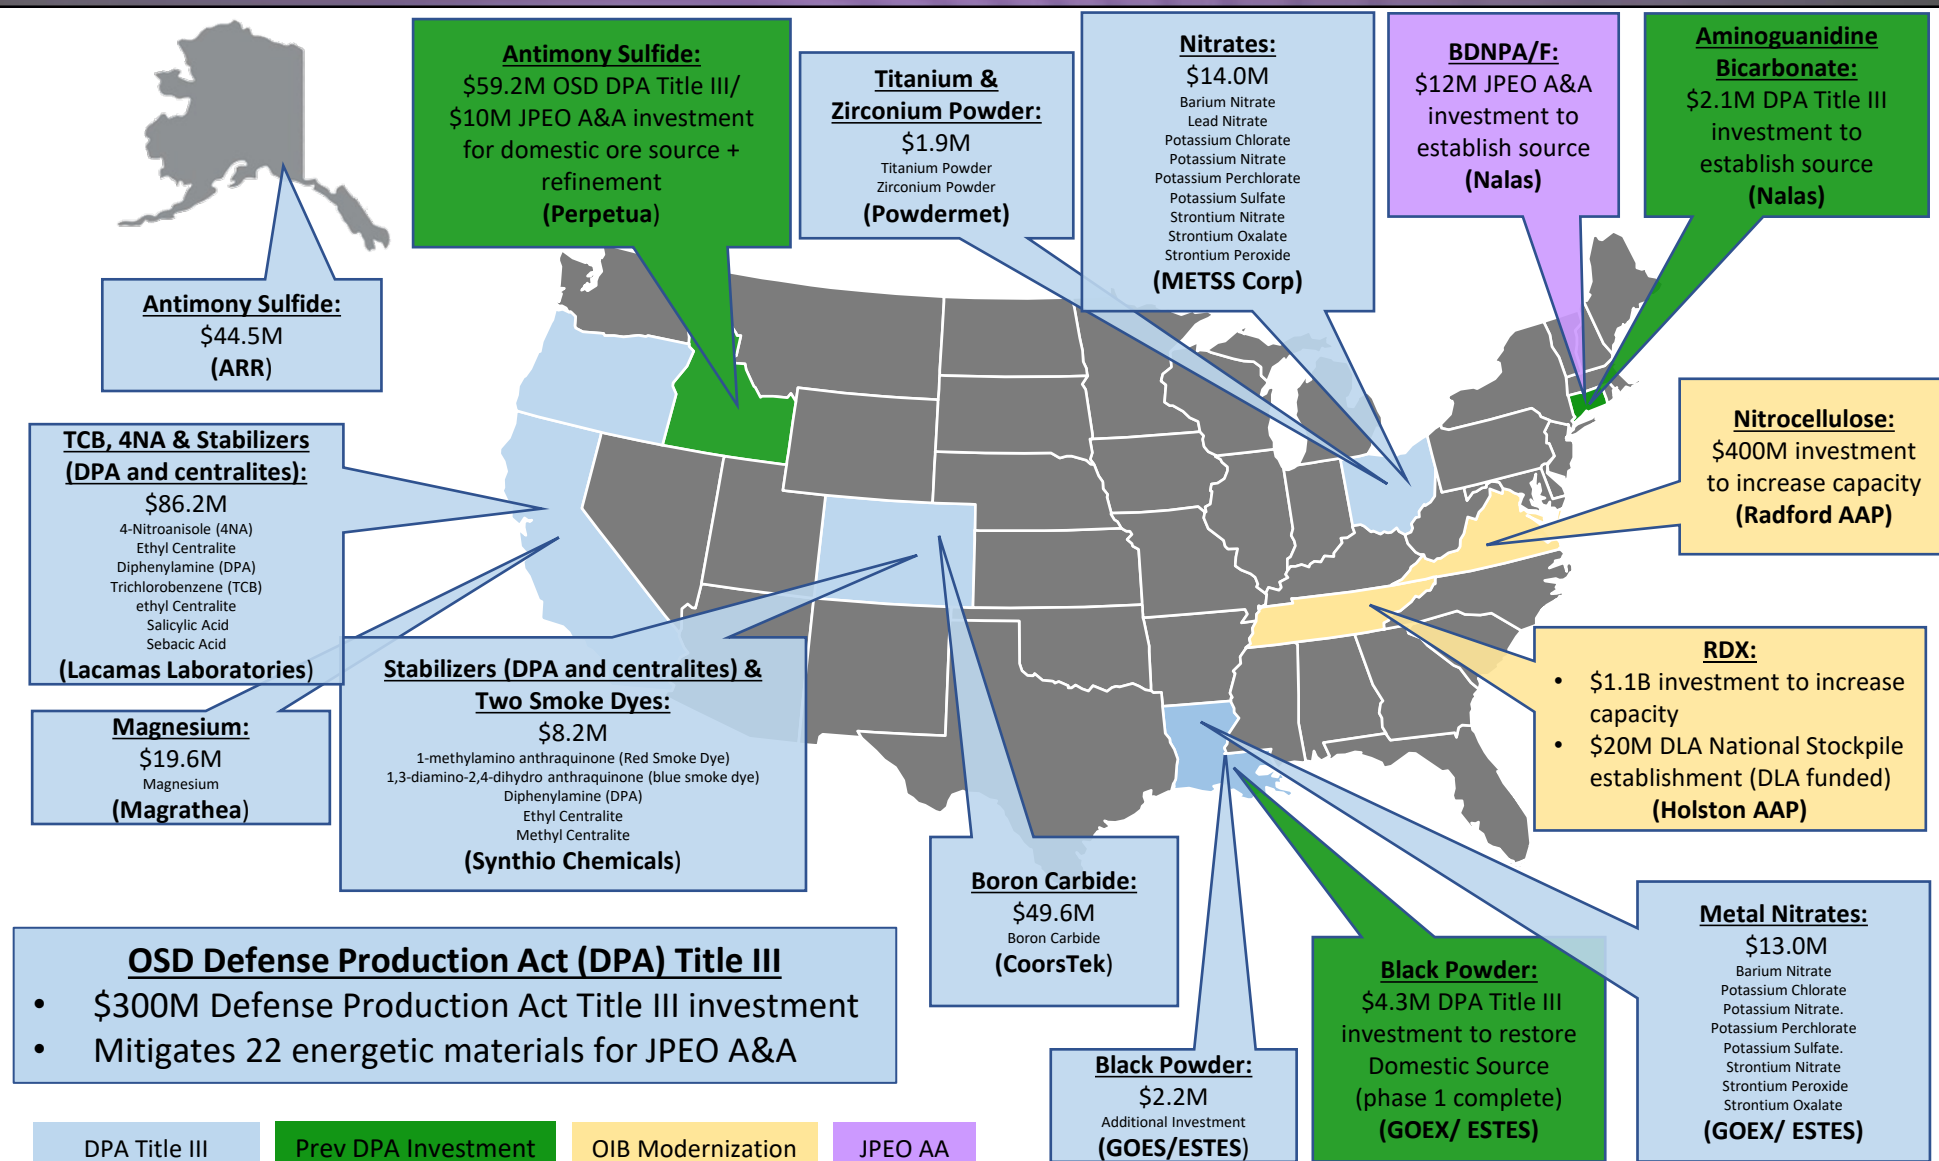

Distribution Statement A:
Approved for public release;
distribution unlimited.
PAO Log #168-26, 26 Feb 26

CPE A&E has prioritized materials for risk management

CPE AMMUNITION & ENERGETICS

Current Successes Restoring Domestic Production

Engagement with Industry

- Outreach
 - CPE A&E one on one meetings with current suppliers to discuss supply chain
 - Army Sustainment Command survey of current suppliers
- Industrial Committee of Ammunition Producers Supply Chain Working Team
 - Identify impediments to sustaining a responsive ammunition industrial base
 - Determine shared industry view for high priority risks and support prioritization for supply chain risk mitigation
 - Expand the CONUS contractor and sub-contractor base to achieve risk mitigation
 - Sustain and improve supply chain readiness to the warfighter
 - Provide feedback into the acquisition policies, procedures, and actions

Questions?

OIB Industry Day

Mr. Greg Matson

March 19, 2026

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-75, 10 Mar 25

Agenda

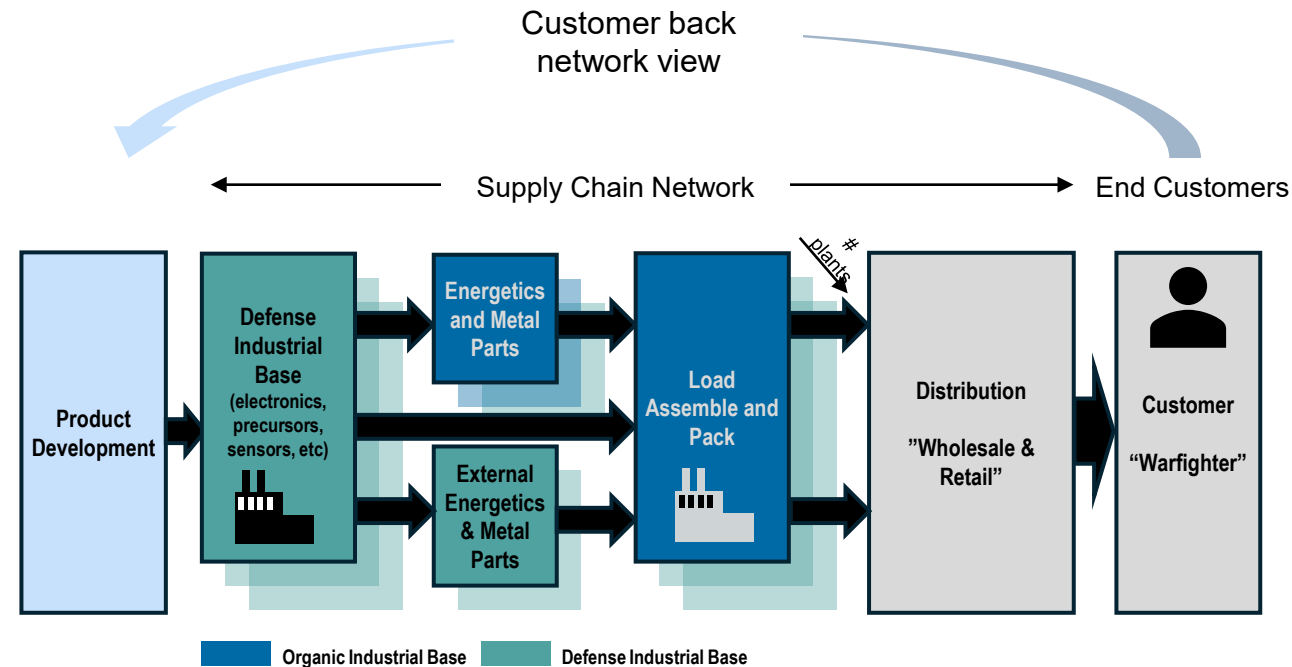

- Ammunition Supply Chain Management Introduction
- Demand Planning
- Case Study of Company
- Mature planning identify profitability growth opportunities, support investment business case
- Summary

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-26, 10 Mar 26

Supply Chain Management is the backbone to an organization's value creation performance

- Mature chain management provides investment insights for opportunities to grow organization performance
- Performance measures within supply chain management align to organizations' top level performance goals

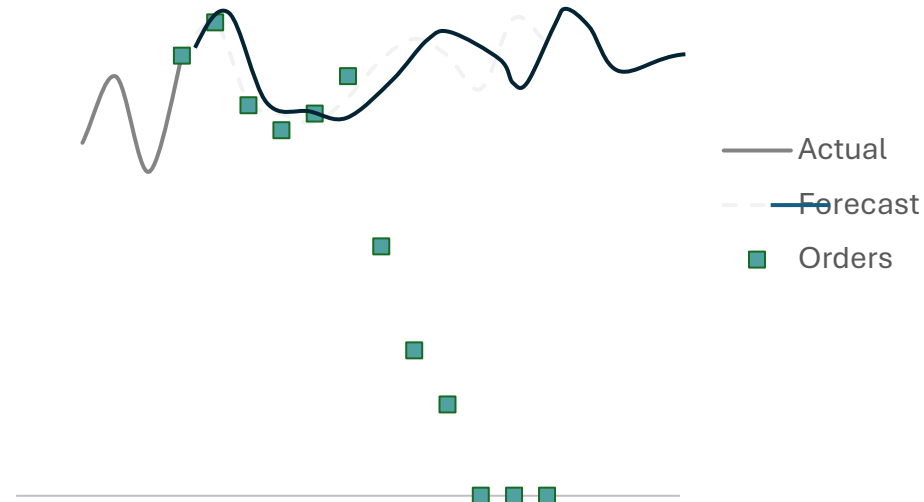

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-26, 10 Mar 26

Demand Forecasting creates the signal for the supply network to plan for the future

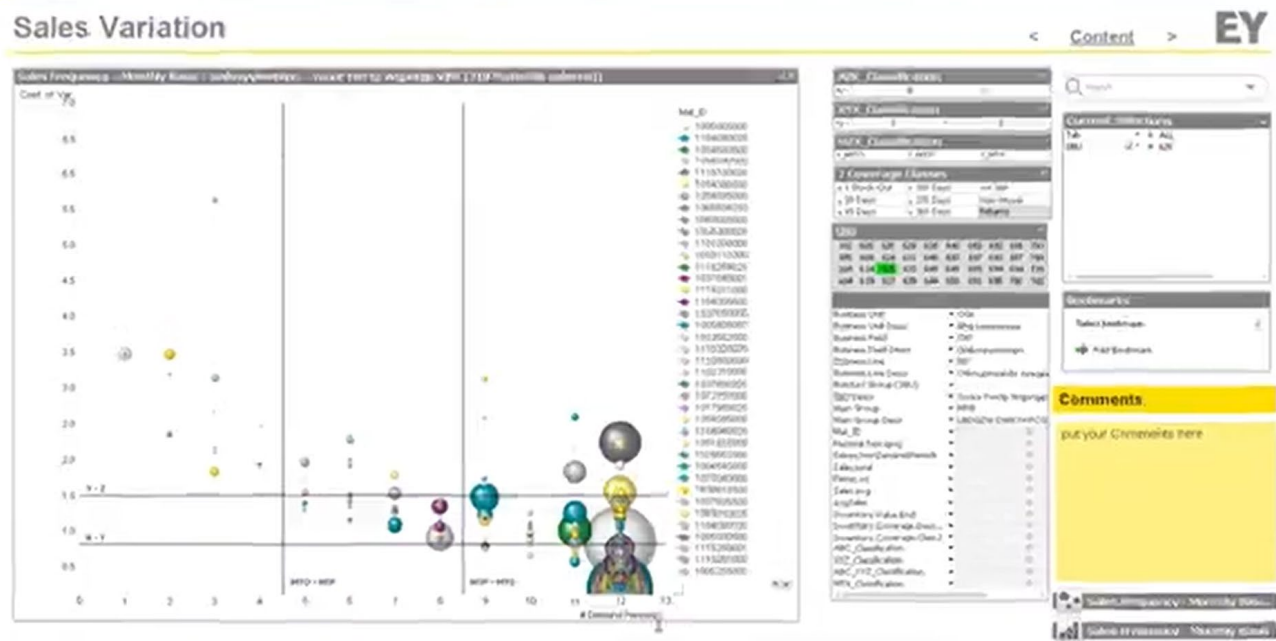

- Illustration is for a non-custom product
- Actual demand is what has been fulfilled (history)
- Orders Management will show Orders that need filled in short term, intermediate term
- For planning beyond visibility of orders, your market intelligence needs to be consolidated through Demand Forecasting

Demand Segmentation is a key step into demand forecasting incorporating market intelligence

- “9 Box” is a common approach to segment demand and customers
- Demand planning is typically a first step in the evolution of introducing analytics into supply chain management

Source: EY Supply Chain Smart Maps™ YouTube video

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-26, 10 Mar 26

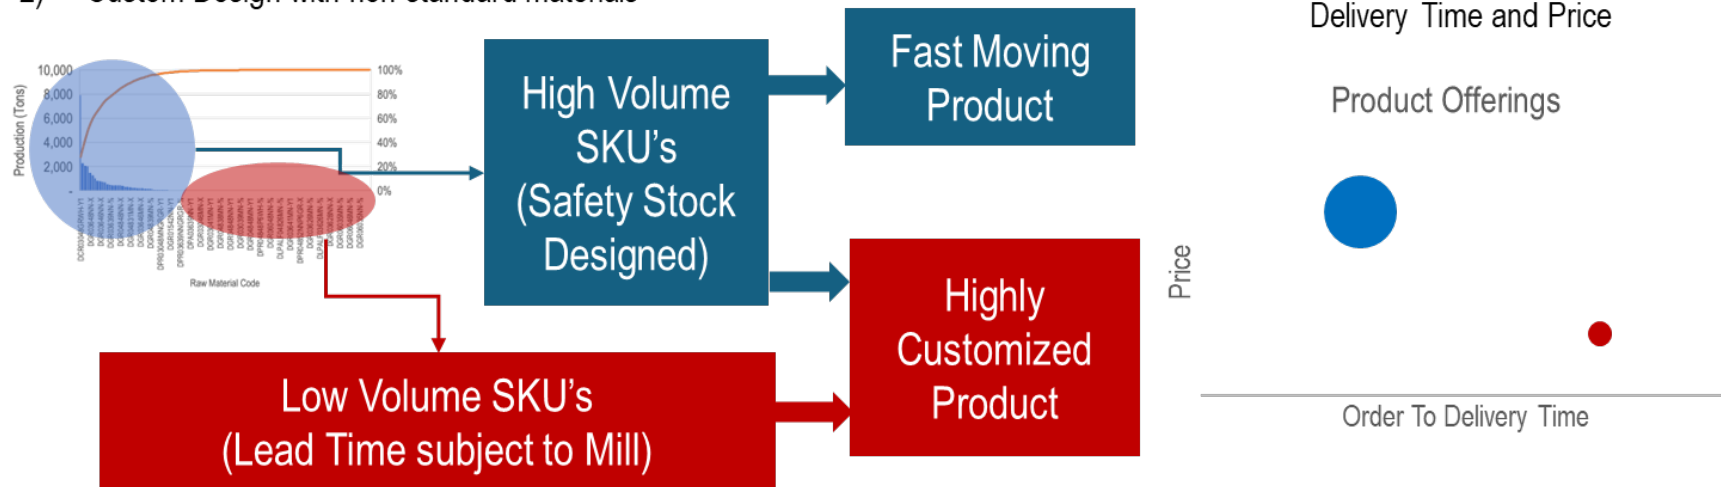

As customers and supply chains evolve analytics provide the basis for decision making and potential investment

Future State with SKU Rationalization

2 Offerings to customers

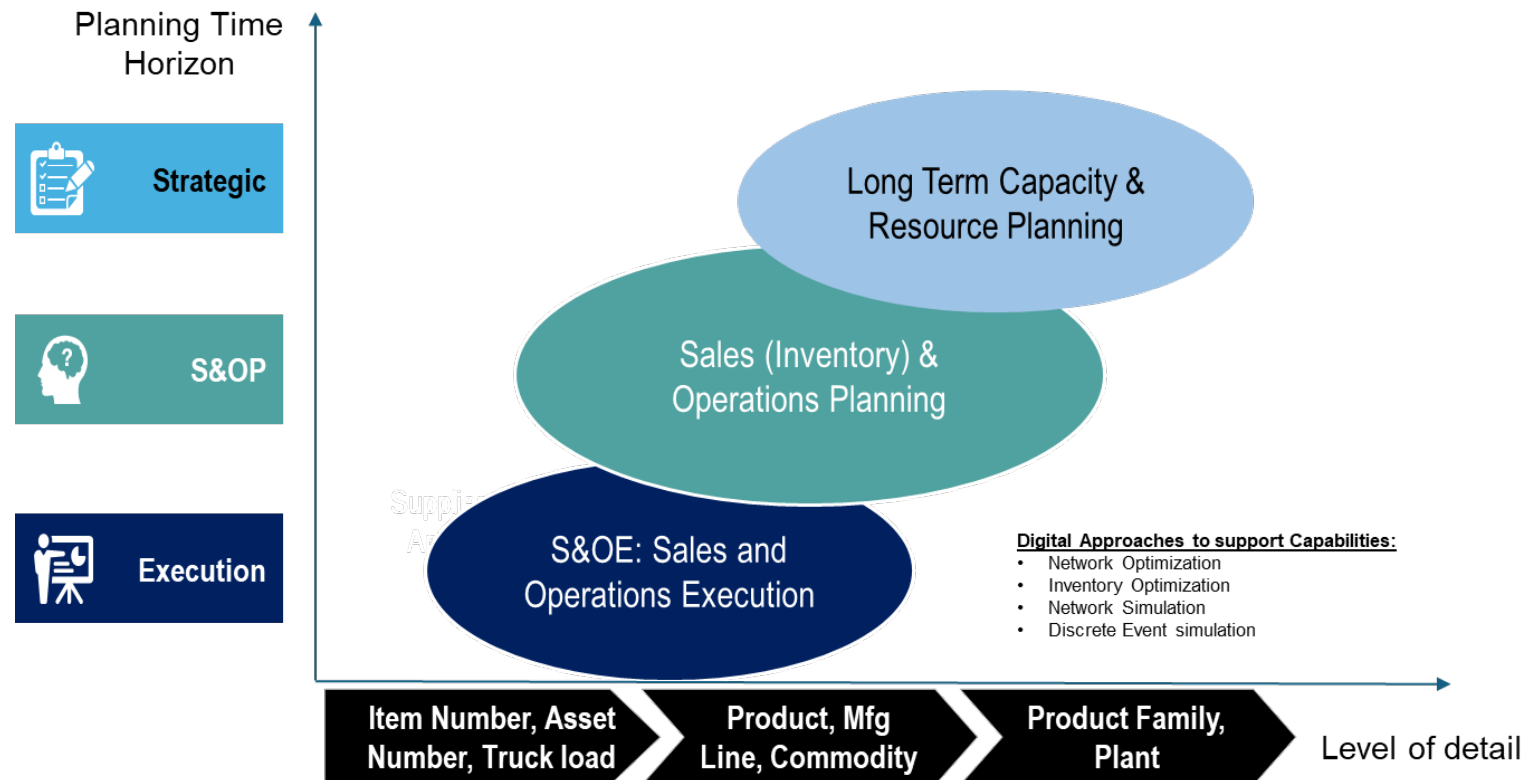

- 1) Fast OTD time utilizing available materials
- 2) Custom Design with non-standard materials

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-26, 10 Mar 26

Mature planning identifies profitability growth opportunities and support investment business cases

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-26, 10 Mar 26

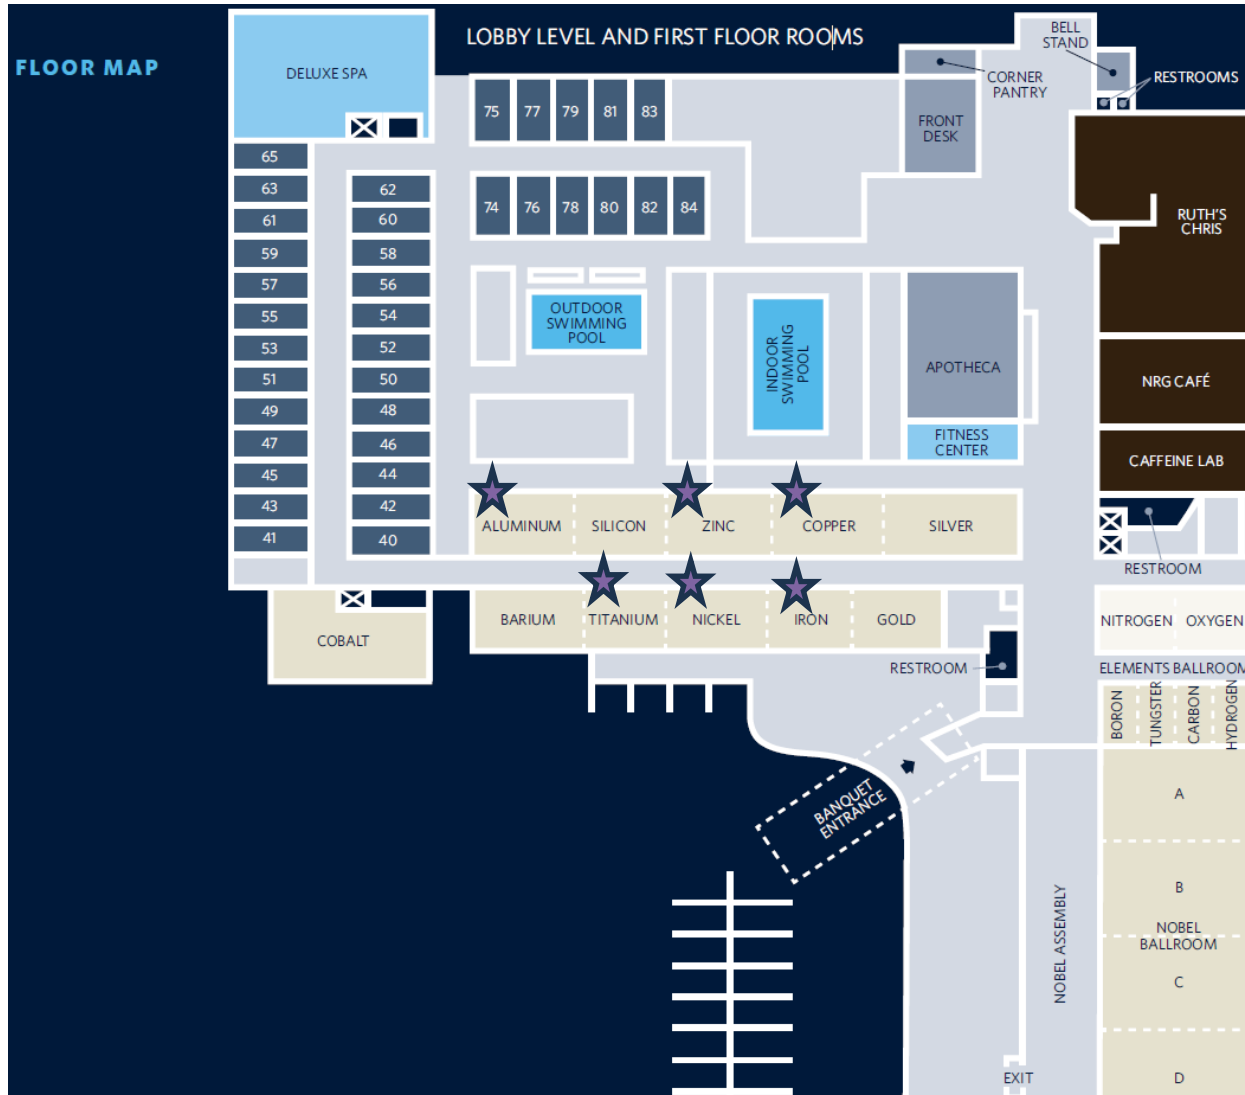

Summary

- Knowing your end customers is key to determining value enhancing investment opportunities
- Supply Chain Management processes provide critical views for opportunities
 - Demand planning (forecasting, order management) provides the signal for how much market opportunity exists in the future
 - Supply planning will provide internal and potential industry constraints
- Supply Chain Management maturity is a continual journey

DISTRIBUTION STATEMENT A: Approved for public release; distribution unlimited. PAO Log #191-26, 10 Mar 26
