Clearance: Top Secret

PROFESSIONAL SUMMARY

Growth-oriented solutions architect and senior technical strategist who helps defense firms turn customer mission friction into funded task orders, qualified captures, technical architectures, and delivery transitions.

Operates between business development and operations: discovery, mission problem, architecture, contract path, capture package, and execution handoff.

Direct fit for Sabre growth across Systems Engineering Department and NAVAIR Digital Department work, connecting PMA-level engineering needs with enterprise data, cloud, software, cyber, AI, and governed automation capabilities.

CORE FOCUS

- Business-development-to-operations growth strategy
- Contract-aware discovery, scope, funding, and OCI screening
- SED-to-NDD digital growth bridge
- Technical capture, proposal strategy, and transition planning
- WDP, data platforms, digital thread, DevSecOps, and cloud authorization
- AI, GenAI, agentic workflows, automation, and mission analytics

SABRE VALUE PROPOSITION

ENTERPRISE CAPTURE ACCELERATOR

Establish the customer problem, stakeholder map, acquisition drivers, solution baseline, discriminators, partner gaps, proof points, narrative, and delivery model.

PORTFOLIO-TO-OPPORTUNITY MAP

Convert delivery knowledge into a register of mission friction, fundable demand, task-order paths, delivery constraints, data rights, security assumptions, and next customer engagements.

NDD OFFERING ACTIVATION

Shape repeatable packages for program data-to-WDP, software modernization, DevSecOps, digital thread, AI-for-test, cloud authorization, workflow automation, and portfolio analytics.

90-DAY PRACTICAL OUTCOME

Build the SED/NDD adjacency map, run two focused discovery engagements, produce two technical-insertion packages, and advance one opportunity toward a funded or qualified action.

EXPERIENCE

KBR - Senior Technical Strategist / Solutions Architect

2025 - present

Serve as a growth-focused solutions architect for Mission Engineering Technical Operations, connecting business development, capture, operations, and engineering across Navy, DoD, and federal markets.

GROWTH, CAPTURE, AND MISSION DISCOVERY

Built lightweight program-discovery and technology-insertion methods to uncover customer requirements, preserve mission knowledge, identify technical insertions, strengthen recompute posture, and convert operational insight into qualified growth opportunities.

Shaped the Mission Engineering Technical Operations operating model across sustainment, discovery, and enablement activities, tying customer expansion, capability development, internal research, partner ecosystems, and early-stage capture support into one repeatable growth motion.

Led broad technical solutioning, capture intelligence, competitive analysis, compliance mapping, win-theme development, and proposal narrative work across Navy, DoD, and federal opportunity spaces while maintaining the connection between evaluator expectations and executable delivery.

Mapped capabilities, past performance, partners, digital-engineering assets, and subject-matter expertise to adjacent customers and markets, improving positioning for recompetes, extensions, and new-business growth.

MODERNIZATION ARCHITECTURE

Advanced Navy data modernization and War Data Platform strategies through approaches for authoritative data onboarding, cross-domain exchange, governance, access control, analytics, and AI-enabled decision support.

Produced reusable reference architectures and executive artifacts across GovCloud, JWCC, DevSecOps, data fabrics, digital engineering, continuous authorization, generative AI, and agentic workflows.

Clearance: Top Secret

Booz Allen Hamilton - Solutions Architect

2024 - 2025

Supported DoD CIO Information Enterprise across software modernization policy, AI4SDLC governance, cloud, DevSecOps, acquisition coordination, and Navy Market growth support.

DOD CIO INFORMATION ENTERPRISE - SOFTWARE MODERNIZATION AND CLOUD DIRECTORATE

Primary author for DoD Modern Software Directive and Instruction work; led a 10-week Department-wide collaboration to identify policy gaps and drive modernization.

Led SHARE IT Act implementation guidance to streamline software reuse, acquisition, and licensing compliance.

Aligned initiatives with Deputy Secretary goals in the Fulcrum IT Advancement Strategy to modernize digital infrastructure and improve interoperability.

Directed strategic and technical modernization of CODE.mil and CLOUD.mil, including ownership transition support from Defense Digital Service and strengthened software sharing posture.

Created the Digital Arsenal catalog of DevSecOps platforms and software factories for DoD-wide visibility and reuse.

Developed AI-enabled frameworks for quantitative and qualitative policy analysis, enabling scalable, repeatable evaluation of policy issuances.

Co-led the AI for Software Development Lifecycle work group; authored AI integration policies and guidance under a tri-chaired SES-level Senior Steering Group.

BOOZ ALLEN NAVY MARKET SUPPORT

Provided executive-level guidance on Global Defense-aligned, AWS-focused marketing initiatives for Navy Market leadership.

Advised VP/SVP stakeholders on strategic alignment, opportunity tracking, and GenAI applications to improve contract value delivery.

Provided domain guidance for localized opportunity pursuits to strengthen competitive positioning and client value.

KBR - Solutions Architect

2022 - 2024

Supported Navy aviation mission-system modernization, IL5 cloud architecture, DevSecOps alignment, software/data modernization, secure cloud integration, and technical capture.

COMFRC HQ DIGITAL GROUP - AVPLM CLOUD MIGRATION AND MODERNIZATION IPT

Led AWS-based cloud architecture for Aviation Product Lifecycle Management to improve capability, scalability, and security.

Implemented modernization approaches that strengthened cloud integration and security posture while increasing team proficiency in cloud operations.

Coordinated with engineering and AWS stakeholders on security-first cloud optimization to mitigate vulnerabilities and improve resilience.

Built relationships with AWS and the Naval Enterprise to secure technical consultancy and support.

Produced and delivered training on cloud modernization, DevSecOps, and cybersecurity to enable continuous learning.

PEO MLB - LOGISTICS IT SERVICES

Integrated AvPLM efforts into the LOG-IT portfolio and developed long-term cloud adoption strategies aligned to enterprise technology goals, resilience, and efficiency.

KBR CAPTURE, PROPOSAL, AND TECHNICAL WRITING

Section Lead for IAC MAC proposal work to modernize legacy logistics systems; shaped integration and efficiency approaches.

Performed technical review and strategic input for LOG IT portfolio integration work, aligning response material to cloud integration and long-term infrastructure objectives.

Led technical writing for operational support strategy, aviation logistics modernization, and cloud value-delivery narratives.

Booz Allen Hamilton - Solutions Architect

2019 - 2022

Advised Information Warfare, NAVAIR, PEO Digital, PEO Submarines, OPNAV, and NECC stakeholders on DevSecOps, secure cloud architecture, modernization strategy, and Compile-to-Combat initiatives.

PEO DIGITAL, PEO SUBMARINES, AND NAVAIR CLOUD BROKER

Trusted advisor to the Service Family Owner for Software Practice and Automation; provided cloud and cybersecurity guidance to shape strategy and operating model.

Led mission-owner outreach and onboarding for Black Pearl, aligning platform adoption, training, and support to mission objectives.

Provided DevSecOps, software factory, and cloud SME support to improve cybersecurity posture and operational efficiency.

Led architecture assessments for custom and COTS applications; developed modernization and cloud migration strategies with scope, cost analysis, and technical advisories.

Provided architecture support to roughly 30 teams across about 75 applications, ranging from tactical adjustments to full-stack redevelopment.

Clearance: Top Secret

DEPARTMENT OF DEFENSE AND NAVY STRATEGY SUPPORT

Authored documentation and training on software modernization, cloud migration, and cybersecurity, including a Software Modernization Approach document that bridged leadership expectations and technical execution.

Contributor to DevSecOps Task Force behavior and practices work; gathered and synthesized enterprise feedback and briefed DASN IWAR on adoption path forward.

Led OPNAV N2N6 software modernization alternatives analysis leveraging Cloud Broker and Service Provider capabilities.

Implemented cloud development strategies that reduced operational costs by roughly 90 percent while maintaining operational efficiency.

Briefed senior Navy leaders on NAV-ITAS Compile-to-Combat compliance roadmap and modernization initiatives at the Pentagon.

NECC AND INTERNAL BOOZ ALLEN GROWTH

Led architecture and gap analysis for the Readiness and Cost Reporting Program; produced modernization and cloud migration roadmap to improve efficiency and resilience.

Provided cloud adoption guidance at IL5 and IL6; facilitated discussions between Amazon and Navy stakeholders to enable secure cloud use.

Led architecture analysis and solutioning for white papers, technical responses, quick-look assessments, cloud broker performance, Agile Core Services integration, NCCS intake automation, NSWCCD, NAVAIR, and NECC response work.

KBRwyle - Cloud Architect / Site Reliability Engineer

2018 - 2019

Built and operated automated cloud environments with CI/CD, configuration management, monitoring, recovery automation, disaster-recovery planning, documentation, and cost tracking.

CLOUD OPERATIONS

Architected and built scalable, reliable, automated cloud environments with supporting documentation.

Implemented configuration management, CI/CD, and cloud monitoring to improve reliability and deployment velocity.

Partnered with development teams to monitor service health and implement automated failure recovery to reduce downtime.

Developed cloud best practices and procedures for deployment and cloud-native operations.

Implemented cost-tracking mechanisms to monitor and reduce cloud spend without degrading service quality.

KBRwyle - Architecture Analyst / Software Engineer

2018

Stabilized multi-host development environments spanning TFS, SQL, SharePoint, Fortify, custom apps, ESXi/vCenter, and storage.

INFRASTRUCTURE AND REMEDIATION

Diagnosed and resolved issues across single-host and multi-host deployments, including TFS, SQL, SharePoint, Fortify, and custom applications.

Analyzed an inherited development environment and delivered remediation recommendations focused on root-cause resolution.

Administered a multi-host ESXi environment, including a roughly 70-VM HA cluster and NAS devices with roughly 80 TB raw / 60 TB usable capacity.

KBR - Software Engineer

2015 - 2018

Delivered Agile software, strengthened ALM and security tooling, configured Fortify SSC/SCA, reduced technical debt, and shipped reusable shared libraries.

SOFTWARE DELIVERY AND SECURITY TOOLING

Delivered iterative product increments using Agile/Scrum under tight timelines.

Applied MVP and MVC patterns to produce maintainable architectures.

Managed and optimized the Application Lifecycle Management tool suite.

Administered HP Fortify Software Security Center and Static Code Analysis across C/C++, ColdFusion, Java, and C#.NET.

Provided cross-department technical support and led intern integration, training, and supervision.
