

Department of War Non-imminent Ingredient Review Process Map

Purpose: This process is designed for use for routine review of ingredients. This process is not for imminent safety concerns. Concerns of food safety (contamination, adulteration, allergan), regulatory non-compliance, recall/outbreak are regulated by the Food and Drug Adminstration (FDA) and the U.S. Department of Agriculture (USDA).

*A proposal can be provided by any office within the Department or Service

**The DoD NC may determine additional information is necessary and can repeat any of steps 5-7 until sufficient information is gathered.

***Return for public comment (step 6) if significant changes are made due to Federal partner input.
