

STATEMENT OF NEED
FOR
PORTABLE EXPLOSIVE DETECTION DEVICES

A. BACKGROUND:

The 9th Reconnaissance Wing (9 RW) seeks to enhance its anti-terrorism and force protection capabilities through the procurement of modern, effective explosive detection devices. This equipment is essential for security operations at the Commercial Vehicle Inspection Area (CVIA), Schneider Gate, and the Upgraded-Early Warning Radar (UEWR). This procurement will replace currently degraded and ineffective systems, ensuring that security personnel can reliably screen for and detect explosive materials and homemade explosives (HMEs) before they can threaten the installation and its assets.

B. SCOPE:

The contractor shall provide three (3) complete Portable Explosive Trace Detector (ETD) kits. Each kit shall include the handheld detector unit, all required accessories for immediate operation, and a protective carrying case.

C. REQUIREMENT:

To meet its mission, the 9th Security Forces Squadron requires three complete Portable Explosive Trace Detector (ETD) kits with the following characteristics and purchase descriptions:

- Each of the three (3) individual SEEKER Pro-Explosives kits must be independently complete. For each one (1) kit procured, the vendor shall include the following exact quantities within that specific kit:
 - One (1) Handheld Explosive Trace Detector Unit
 - Two (2) Rechargeable Lithium-Ion Batteries
 - One (1) Battery Charging Station and Power Cord
 - One (1) Ruggedized Carrying Case with custom foam inserts
 - One (1) Adjustable Shoulder/Carrying Lanyard
 - One (1) Initial Supply of Consumable Test Swabs
 - One (1) Instruction Manual
- Essential Characteristics:
 - Detection Performance: Must detect a broad range of explosive materials, including (but not limited to): Nitroaromatics (TNT), Nitramines (RDX, HMX), Nitrate Esters (PETN), Inorganic Nitrates, Chlorates, and Peroxides (TATP). The device must provide simple, clear results (e.g., "ALARM" / "CLEAR") in under 30 seconds.
 - Must be highly accurate in detecting common explosive materials, over 90%
 - Portability: The handheld unit must be lightweight and designed for single-hand operation.

- Durability: The device must be ruggedized for field use, with a high degree of resistance to dust and water.
 - User Interface: Must feature a high-resolution screen that is readable in direct sunlight
 - If touchscreen, must be glove-friendly
 - Power: Must last for 4 hours before needing battery swapped/charged.
 - Data Management: Must have internal storage for a significant number of test results and support data export through a standard connection (e.g., USB, Wi-Fi or Bluetooth).
 - Warranty: A minimum three-year manufacturer warranty on all parts and labor is required.
- Delivery: Contractor shall coordinate a delivery time with the Government Point of Contact (POC) at least two (2) weeks prior to anticipated delivery. Products shall be delivered within the hours listed below.
 - LOCATION & HOURS OF OPERATION: The 9th Security Forces Squadron standard operating hours are Monday–Friday, 0800-1600 PST. The delivery location will be 17798 24th St. Bldg. 25470, Beale AFB, CA 95903.
 - The following Federal holidays for 2026 are observed:
 - New Year's Day (Thursday, 1 January)
 - Martin Luther King Jr.'s Birthday (Monday, 19 January)
 - President's Day (Monday, 16 February)
 - Memorial Day (Monday, 25 May)
 - Juneteenth National Independence Day (Friday, 19 June)
 - Independence Day (Observed on Friday, 3 July)
 - Labor Day (Monday, 7 September)
 - Columbus Day (Monday, 12 October)
 - Veterans Day (Wednesday, 11 November)
 - Thanksgiving Day (Thursday, 26 November)
 - Christmas Day (Friday, 25 December)

- **ACCESS:** Contractor Manager or alternate shall complete an entry authorization list (EAL) for access to Beale Air Force Base. The request shall be submitted within two (2) weeks of delivery to Pass and Registration via the Government POC. All contractor vehicles must enter the base via Wheatland Gate and shall be subject to inspection. All contractor personnel must obtain base passes or be listed on the EAL and are required to bring two (2) forms of identification or a single REAL ID to access the base.
- **TRAFFIC LAWS:** The contractor and their employees shall comply with all installation traffic regulations.
