

SUPPLY PRODUCTION DESCRIPTION

Miller Dynasty TIG Welder 800 208-600 V

- Tungsten Electrode to weld Group I,II,IV Metals.
- 208-600 V,3-Phase or 1-Phase power
- H: 43.125 in. (1,095 mm)
- W:23.125 in. (587 mm)
- D: 41.625 in. (1,057 m)
- Blue and Black
- Principles of Operation-Tungsten Inert Gas (TIG) welding, also known as Gas Tungsten Arc Welding (GTAW), is an arc welding process renowned for producing high-quality, precise, and clean welds. The Dynasty 800 uses the foundational principles of a non-consumable tungsten electrode and an inert gas shield to create a pure weld. It then enhances this process with advanced, user-friendly digital controls that give the welder unprecedented command over the arc's characteristics for maximum quality and productivity.
- Restrictive Environmental Conditions-TIG Welding can only occurring the welding shop that has an authorized Hot Work permit from the installation Fire Chief.
- Intended to Precision Weld, Aerospace Ground Equipment, Support Equipment and off equipment Aircraft components.
- Essential operation conditions
- Aerospace Ground Equipment, Support Equipment, aircraft components off equipment.
- 1+2 accessories
- 159FW 400 Russell Ave New Orleans La 70143 Bldg. 31 ATTN: MSgt Marvin Vides.

PRODUCT DESCRIPTION FOR SUPPLIES

LOUISIANA AIR NATIONAL GUARD (LA ANG)

159 MXS/MXMFM

DATE: 18 February 2026

TITLE: Miller Dynasty TIG Welder 800 208-600 V

1. PURPOSE. To precision weld Aerospace Ground Equipment, Support Equipment and off equipment Aircraft components and to certify on Metals Groups I,II,IV as dictated by DAFI 21-101_Ang Sup and Technical order 00-25-252.

2. SCOPE OF WORK. The vendor/ contractor shall provide a Miller Dynasty 800 TIG welding machine

3. DELIVERY LOCATION AND DELIVERY DATE. This equipment shall be delivered to 400 Russell AVE. New Orleans La, 70143 Bldg 31 _ATTN: MSgt Marvin Vides

4. QUANTITY REQUIRED: 1 machine package with 2 Hand remotes

5. SPECIFICATIONS REQUIRED. *(Provide this level of detail for EACH of the items you are requesting)*

5.1 Must be made by Miller to be compatible with existing Miller equipment.

5.2 Must be capable of welding up to 1 in Aluminum

5.3 Must have the following AC Frequency Control, Quiet Pulse or Pulse welding capability, Lift Arc Capability , cooler power supply and cooler on Demand auxiliary cooling system.

5.4 Wireless Hand Control 301582 and RCC-14 Current Control, to assist with welding large pieces of Age that extend slightly beyond the shop area.

5.5. Program memory for switches between different base metals.
