

Question: I am currently working on your quotation and have received a few questions from the vendor that require clarification. Please provide your responses at your earliest convenience so we can proceed without delay.

Kindly confirm:

- Operating system required
- Storage: 256 GB / 512 GB

Answer: No operating system is required as we will slick the drive and put a government version of Windows on the system. If it's easier for the process, the system can come with basic Windows.

For the drive, it only needs to be 256GB. If that is considered a custom size and will cost more, then 512GB is fine.
