

## **STATEMENT OF WORK**

### **1. Objective/Requirements**

The NASA Glenn Research Center (GRC) requires the purchase of Simcenter STAR-CCM+ Power Session Plus - Concurrent Simultaneous User (Floating) Subscription - 12 Months to expand existing capabilities within the current installation environment. STAR-CCM+ provides advanced computational fluid dynamics (CFD) capabilities, including validated modeling of boiling and condensation heat transfer, which are essential to ongoing projects.

### **2. Characteristics, Scope, and Specs**

| <b>Quantity</b> | <b>OEM Part #</b> | <b>Product Description</b>                                                                                                                      |
|-----------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| 2               | STAR2040          | Simcenter STAR-CCM+ Power Session Plus - Concurrent Simultaneous User (Floating) Subscription - 12 Months<br><br><b>Install Number:</b> 1684395 |

### **3. Place of Performance**

NASA Glenn Research Center (GRC) 21000  
Brookpark Road  
Cleveland, OH 44135

### **4. Period of Performance**

April 1, 2026 – March 31, 2027
