

SINGLE SOURCE JUSTIFICATION (UNDER SAT)

JOINT ADMINISTRATIVE OPERATIONS Acquisitions Operations

Pursuant to FAR subpart 13.106-1(b)(1)(i) and (ii), for purchases not exceeding the Simplified Acquisition Threshold (SAT), Contracting Officers may solicit from only one source if the circumstances deem only one source is reasonably available (e.g., urgency, exclusive licensing agreements, brand name, or industrial mobilization).

Instructions: The information in the text boxes are provided as sample language or to indicate a needed fill-in. Sample language should be removed from the final document. All text boxes require information and shall not be left blank.

1. Description of Need

The FWS Upper Colorado River Recovery Program (UCRP) requires continued maintenance, support, and improvements (O&M) of its fishery data collection system named UCRP-BORG. The "data system" consists of a centralized cloud-based database, a mobile data collection application with a suite of electronic data entry forms and a secure web-based data management portal for viewing, managing, reporting, and analyzing project data in near real-time. The application is hosted within the Fish and Wildlife Service (FWS) Federal Risk and Authorization Management Program (FedRAMP) compliant Microsoft Azure tenant.

2. Market Research Conducted

Market research for O&M was not conducted as this is a proprietary system purpose built for the UCRP by Real Time Research LLC (RTR).

3. Other Capable Sources

UCRP-BORG platform was sole source developed by Real Time Research LLC specifically for the UCRP and no other vendors can offer support and maintenance of this data system.

4. Barriers to Competition

The Recovery Program partners (UCRP) used non-federal funds to develop the UCRP-BORG and the USFWS acted as the federal sponsor. The UCRP requires that the system which they have invested in is maintained by its developer to ensure successful implementation and data management for all partners.

5. **Contractor's Qualifications**

RTR developed and currently provides active O&M of the UCRP-BORG. RTR developed this system in collaboration with the USFWS to ensure FedRAMP compliance and has built and currently maintains similar custom built data systems for The Arcata US Fish and Wildlife Office (AFWO). RTR has approved and authorized to access the FWS Azure tenant and will manage the deployment, support, and maintenance of the production system there.

6. **Determination of Fair and Reasonable Cost**

The contracting officer has determined that the anticipated cost will be considered fair and reasonable based on prior acquisition history.

7. **Recommendation and Certification by Program Office**

Based on the above justification, I recommend this acquisition to be conducted using sole source acquisition procedures. I hereby certify that this justification is accurate and complete to the best of my knowledge and belief.

Program / Project Officer

8. **Contracting Officer Certification and Approval: *Under SAT***

Based on the above justification, I hereby certify and approve the use of sole source acquisition procedures under FAR Part 13 for this purchase.
