

**NAVSUP FLEET LOGISTICS CENTERS (FLC) COMMERCIAL ONLY ONE SOURCE/BRAND
NAME JUSTIFICATION (NTE SAT) IN ACCORDANCE WITH FAR 12.102(a)**

Purchase Request Number:_____

Required Delivery Date/POP: 01 FEB 2027

Estimated Cost (Including Options) [REDACTED]

Description of Supply/Service

The requirement is for the following supplies to support repairs onboard [REDACTED]
[REDACTED] for delivery to BATS San Diego, CA:

1. MOTOR, ELECTRIC AC MFG; P/N: 1RA6317-6SC80-Z; QTY: 1.

Competition Will be Restricted to the Following Source

Name of Manufacture: SIEMENS ENERGY

Manufacture POC___Sven Fritzesche, Siemen's Maritime and Offshore Service_____

Manufacture Phone: 954-778-9679

Manufacture Email___fritzsche.sven@siemens-energy.com_____

Manufacture CAGE Code: 0ACF4

Manufacture Businesses Size___Large_____
(According to NAICS)

**NAVSUP FLEET LOGISTICS CENTERS (FLC) COMMERCIAL ONLY ONE SOURCE/BRAND
NAME JUSTIFICATION (NTE SAT) IN ACCORDANCE WITH FAR 12.102(a)**

Basis For Decision That Only One Source Is Available

Justification for the sole-source procurement of the PTO pony motor, part number 1RA6317-6SC80-Z (NIIN 012886356), from the original equipment manufacturer (OEM), Siemens Maritime and Offshore Service Company, is critical for ensuring the operational integrity and safety of the T-AO class vessels. This justification is grounded in the part's essential function, the proprietary nature of its design and integration, and the stringent requirements of COMSC Instruction 4490.1C for critical safety items.

The PTO pony motor is an integral component of the ship's power and propulsion systems. Its failure could lead to a catastrophic loss of power, rendering the vessel unable to perform its primary mission and endangering the crew and the ship itself. As such, it is designated as critical equipment under COMSCINST 4490.1C, a directive that establishes policy for the procurement and maintenance of items vital to the safe operation of Military Sealift Command (MSC) ships.

This instruction places a strong emphasis on maintaining the design integrity and performance standards of such equipment, a responsibility that falls to the MSC Engineering Director as the Design Control Activity (DCA).

The part in question is a highly specialized piece of machinery, and its design, manufacturing processes, and integration with the vessel's broader systems are proprietary to Siemens. The seamless interaction of the pony motor with other components, many of which are also of Siemens origin, is a key factor in the overall reliability of the ship's propulsion and power generation. Introducing a non-OEM part, even if it appears to be a direct replacement, would introduce a significant and unacceptable level of risk. Such a part would lack the OEM's extensive testing and validation within the specific T-AO shipboard environment, and its use could lead to unforeseen and potentially disastrous system failures.

Furthermore, only Siemens, as the OEM, can provide the necessary certifications and guarantees that the part meets all required naval and maritime safety standards. The use of a non-OEM part would void existing warranties and could complicate future maintenance and technical support. The federal government's own procurement regulations allow for sole-sourcing when an item is available from only one source, a situation that applies in this case due to the proprietary nature of the technology and the need for compatibility with existing equipment.

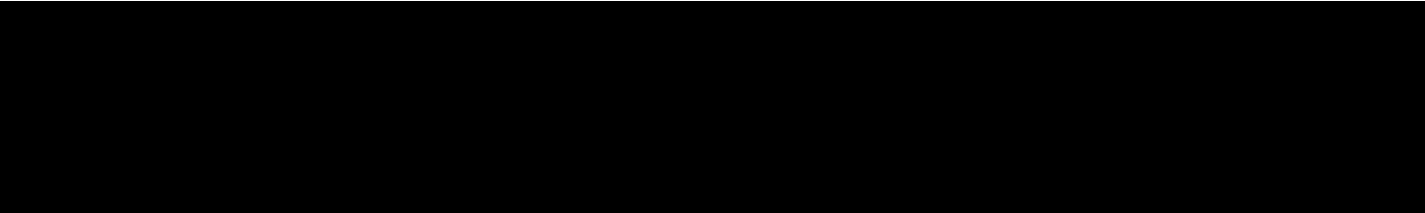

While MSC does have a process for qualifying non-OEM vendors for certain parts and services, the default and most prudent course of action for a component as critical as the PTO pony motor is to rely on the OEM.

This approach ensures that the part's performance and reliability are consistent with the original design specifications and that the vessel remains in compliance with all applicable safety and operational directives. The potential for cost savings from a non-OEM part is far

outweighed by the significant risks to the vessel, its crew, and its mission. Therefore, the procurement of the PTO pony motor, part number 1RA6317-6SC80-Z, exclusively from Siemens Maritime and Offshore Service Company is not only justified but is the only responsible course of action.
