The Contractor shall submit RFVs using RFV DD Form 1694 and shall include information as outlined in SAE EIA-649, Configuration Management Standard, and MIL-HDBK-61, Configuration Management Guidance, for additional guidance on preparation of RFVs.

Note: A copy of the required RFV Form DD Form 1694 is available at:

https://www.esd.whs.mil/Directives/forms/dd1500_1999/

Additional guidance for completion of RFV can be found at the Attachment "*RFV Form DD1694 Example Only dated 02/21/2025*". This attachment is incorporated by reference with the same force and effect as if contained herein.

The Contractor's assigned RFV number shall use the following numbering format:

- a. The last seven alpha-numeric characters of the contract number followed by a dash ().
- b. The letter "V", followed by consecutively assigned numeric characters beginning with 001.

Definitions of RFV Classifications: (See current SAE EIA 649 and MIL-HDBK-61, Configuration Management Guidance, for additional guidance on critical, major and minor classifications.)

Critical: Critical variances impact safety, health, environment, or other critical requirement. A departure from a requirement classified as critical in configuration documentation.

Major: Major variances have significant impacts such as performance or operational limits, structural strength, interchangeability, reliability, survivability, maintainability, durability of the item or repair parts, supportability, cost, effective use or operation, weight or size, or appearance. A departure from a requirement classified as major in configuration documentation.

Minor: Minor variances are issued when departure does not involve any of the factors listed for critical or major variance. Minor variances have little or no impact and are generally associated with non-functional factory defects that can be dispositioned locally as: "use as is" or "after suitable repair". A departure from a requirement classified as minor in configuration documentation.

3. Engineering Change Proposal (ECP) - ECPs shall be designated as Major (Class I) or Minor (Class II). The Government will maintain configuration control and change authority for all modifications or changes affecting form, fit, function, or interface parameters of the end-item and its sub-assemblies. Minor (Class II) and Major (Class I) ECP changes shall be approved by the Navy Configuration Control Board (CCB) and technical approval authority prior to implementation. The DD Form 1692 is the preferred format for ECP submissions. ECPs may also be prepared in Contractor format, provided it fulfils the requirements of DD Form 1692, and shall include information outlined in SAE EIA-649 and MIL-HDBK-61, which provides additional guidance for preparation of ECPs.

ECPs submitted using DD Form 1692 shall use the following numbering format:

- a. The last seven alpha-numeric characters of the contract number followed by a dash ().
- b. The letters "ECP", followed by consecutively assigned numeric characters beginning with 001.

Definitions of ECP Classifications: (See current SAE EIA 649 and MIL-HDBK-61 for additional guidance on Major (Class I) and Minor (Class II) classifications.)

Major (Class I):

- a. A change that affects specified and approved requirements for product attributes, including safety, reliability, and supportability.
- b. A change, after establishment of the product baseline, that affects compatibility with interfacing products, including such products as test equipment, support equipment, software, and products furnished by a customer or that affects one or more of the following:
 - required calibration to the extent that product identification should be changed
 - interchangeability or substitutability of replaceable products, assemblies, or components
 - change to add a previously non-qualified supplier, where supplier selection is specified
 - requires retrofit of delivered products

c. A change that affect the form, fit, and/or function, and/or requirements, performance, interoperability, supportability, maintainability, cost, safety, addition of a vendor, or a vendor moves facility and the item has not been qualified at that site.

Definitions of form, fit and/or function:

Form: the shape, external size, and marking which uniquely characterizes an item.

Fit: the ability of an item to physically interface or interconnect with and become an integral part of a higher level assembly..

Function: the action[s] that an item is designed to perform including performance, durability and safety.

The following are examples of Major (Class I) changes with regard to function

- a. Change to energetic material
- b. Change to component material or material properties
- c. Change to electrical characteristics.
- d. Change in ballistic performance.

Minor (Class II):

Affects configuration documentation (released design information), product or processes but does not affect Major Change Criteria.

Changes that do not affect the form, fit, or function.

If the Navy technical approval authority does not approve the ECP submitted by the Contractor, then the Contractor is required to revert to the Government approved revision of the drawing per the approved product baseline or to the revision used in the prior lot accepted by the Government.

The Government reserves the right to invoke First Article Testing (FAT) per paragraph 2 of "Section E-CAD/PAD Inspection and Acceptance", or require the Contractor to undergo qualification testing.

4. The Contractor shall submit an electronic copy of any ECP or RFV to the Contracting Officer, Local DCMA QAR, and the technical activity below:

- a. Local DCMA QAR
- b. NAVSUP WSS Contracting Officer
- c. NSWC IHD CAD/PAD Division Acquisition Management Specialist (AMS)

5. Technical approval authority for RFVs and ECPs is NSWC IHD

6. Final approval of any ECP and/or RFV shall be in writing, by the Contracting Officer, NAVSUP Weapon Systems Support.

7. Contractors do not have Material Review Board (MRB) authority.

a. Authorization to accept "as-is" or repair any nonconformance is specifically retained by the Contracting Officer. The contractor's MRB shall not make any use "as-is" or "repair" disposition on any nonconformance, and the MRB recommendations shall be submitted per paragraph four (4) above.

b. Authorization to rework the lot prior to submission to the Government for inspection and acceptance is allowed for all parts, subassemblies, and even the end item that undergoes in-process screening for defects. Such rework under the direction of the contractor must ensure all parts meet the requirements of the Technical Data Package (TDP) and/or detailed specification.

c. Authorization to rework the lot after submission to the Government for inspection and acceptance is specifically retained by the contracting officer. The MRB recommendations shall be submitted per paragraph six (6) below. Rework of a lot to correct a deficiency after it has been presented to the Government may require the lot number and all the associated records to be changed, per the requirements of MIL-STD-1168.

If the contractor recommends, through an internal MRB, to process non-conforming parts, subassemblies, or the end item for use "as-is" or "repaired", then the contractor will be required to submit a Request for Variance (RFV) to the Government for disposition. If a non-conformance is discovered, which results in a failure of the item to meet the requirements of the TDP or detailed specification after the lot has been presented to the Government, then the contractor will be required to provide to the Government documentation such as RFVs, Discrepancy Reports (DR) related to contractor's MRBs, and/or rework procedures used to correct the deficiency (if applicable).

8. Rework and Repair are defined as follows:

a. Rework: The reprocessing of nonconforming material to make it conform completely to the drawings, specifications or contract requirements.

b. Repair: The reprocessing of nonconforming material in accordance with approved written procedures and operations to reduce, but not completely eliminate, the nonconformance. The purpose of repair is to bring nonconforming material into a usable condition. Repair is distinguished from rework in that the item after repair still does not completely conform to all of the applicable drawings, specifications or contract requirements.

- Test samples are required from each production lot and are to be tested in accordance with the approved test plan. A production lot **shall** consist of the net deliverable quantity plus additional lot test samples and any retained sample units for investigative purposes (if applicable) as detailed in section B.

3. The contractor is allowed to pre-select no more than 30% of the required production lot test samples per lot which have minor external cosmetic defects such as nicks, dings, scratches, paint blemishes, plating blemishes, and small burrs. These units can be used as pre-selected production lot test samples as long as the defects do not create an interference with the form, fit, or function of the unit and/or test fixture. The selection of the production lot test samples **shall** be noted in a discrepancy report (DR) identifying the item part number, DODIC, contract, lot number, serial numbers of the pre-selected units, and the cosmetic defects of each serial number. A copy of the DR **shall** be submitted to the Contracting Officer. A second copy of the DR **shall** be submitted to DCMA/QAR when presenting the production lot for random selection of the remaining lot test samples as stated in paragraph 4 below. The contractor **shall** also annotate the DR number in the remarks section of the ADC for the applicable production lot. This clause is only applicable to the production lot test samples and the external cosmetic defects mentioned above. If additional units with minor external cosmetic defects are part of the deliverable lot and the contractor would like for the government to accept those units "as is", then a RFV **shall** be submitted to the Contracting Officer for the determination of disposition for those non-compliant deliverable units.

4. The production lot(s) must be manufactured and presented to the Government Quality Assurance Representative (QAR) with all applicable. The documentation (WAWF-RRs and Ammunition Data Card printed from WARP) accompanying the production **shall** contain the contract number, item, lot number identification, DODIC, NSN, and serial numbers. The production lot test samples **shall** be selected, at random (unless following the exception noted in paragraph 3), from each production lot, by the QAR. The retains are considered part of the production lot test samples and **shall** also be selected, at random, from each production lot, by the QAR and identified as such.

NOTE: Sample units removed for testing from different lots **shall** not be commingled.

5. Production lot testing **shall** be performed by the Contractor within 30 calendar days of production lot sample selection. Production lot testing **shall** be witnessed by at least the cognizant QAR. A representative of the engineering activity may also elect to witness testing, therefore; the Contractor **shall** provide written notification to the Contracting Officer, with concurrent notification to the AMS in Section H, and the QAR, at least 10 working days prior to the planned testing date citing the lot number that is ready to be tested. If testing is cancelled within the 10 working day period, the contractor **shall** provide notification to the Contracting Officer, with concurrent notification to the engineering activity. At a minimum, cancellation notification **shall** be sent no later than two days prior to planned test date.

NOTE: If a failure occurs during testing and an engineering activity representative is not present, all testing **shall** be halted and the engineering activity and Contracting Officer shall be notified within 24 hours. A Government representative **shall** be allowed to participate in the failure investigation in accordance with applicable CDRLs. Contractor testing **shall** resume upon notification by the Contracting Officer.

6. *Disposition of Production Lot Test Samples -*

The production lot samples are subjected to Non-Destructive Test (NDT) depending on the requirements delineated by the TDP and/or item specification specified in section C.

The production lot test samples are also subjected to destructive testing. These units cannot be used to meet the total contract quantity.

7. A production lot test report is required and **shall** be submitted in accordance with the contract data requirement list (CDRL) DD Form 1423, sequence number A004. The test report **shall** include all results of testing conducted in accordance with the approved test plan.

8. Acceptance, shipment, and payment **shall** not be accomplished until the production lot test samples have been tested, the required CDRLs received, and the lot has been released for service use. The retains for investigation purposes, if applicable, **shall** be shipped to the address provided in Section F of the contract after the lot has been released for service use.

9. The only valid and contractually binding notification of production lot approval, conditional approval, or disapproval **shall** be in writing and issued by the Contracting Officer. This notification **shall** be made to the Contractor within fifteen 15 calendar days after the Contracting Officer receives all applicable CDRLs. Any CDRLs provided by the Contractor deemed to be inaccurate and/or incomplete after engineering review will automatically reset the notification of production lot approval, conditional approval, or disapproval. Upon receipt of the written approval accepting a production lot (s) and final approval of the Material Inspection Receiving Report in Wide Area Workflow (WAWF), the Contractor **shall** ship the production lot(s) as soon as possible and no later than fifteen (15) calendar days after receipt of such notice. Final acceptance of the production lot(s) **shall** be the responsibility of the cognizant DCMA QAR, but **shall** not occur unless and until the production lot approval has been issued in writing by the Contracting Officer.

a. Any notice of approval or conditional approval **shall not** relieve the Contractor from complying with all requirements of the specifications and all other terms and conditions of this contract.

b. A notice of conditional approval may state any further action required by the Contractor.

c. A notice of disapproval may cite reasons for such. In the event of a failure, the Contractor **shall** submit a Failure Analysis and Corrective Action Report (DD Form 1423, sequence number, A005) with all associated costs and expenses to be borne solely by the Contractor. "Failure" is defined as follows:

- (i) Any of the test samples failing to meet the requirements of the specification and/or drawing,
- (ii) Any of the test samples fracturing and/or exhibiting any cracks post-firing unless specifically designed to do so,
- (iii) A non-ignition or failure to fire.

10. At a minimum, the following is required:

- a. Failure date
- b. Failed part number (e.g. national stock number (NSN), logistics control number, work unit code)
- c. Test or mission being performed when the failure occurred(LAT/FAT)
- d. Failure symptoms and description of detection or diagnosis methods (e.g. Built In Test)
- e. Failure effects (e.g. none, degradation, abort)
- f. Repair action (e.g. remove/replace)
- g. Failure mode description
- h. Failure mechanism/cause of failure

i. Contributing factors, including multiple factor interactions, or secondary effects of the failure

j. Corrective action required to mitigate the failure mode, including:

- Identification of the failure mode

- The recommended process or process control changes, when the failure cause is due

to workmanship defects

- Proposals for retrofit of all equipment already delivered or assembled, including

recommended effectivity, in accordance with the contract

- Disposition of all defective material and material rendered obsolete because of any

necessary redesign, to assure their exclusion from production items

- Identification of previous functional and environmental qualification tests, if any,

invalidated by the corrective action changes and recommendation of those tests

that should be repeated, in accordance with the terms of the contract, to

demonstrate the corrective action's effectiveness.

11. If the production lot test sample is disapproved by the Contracting Officer, the QAR may be required to select an additional production lot test sample(s) for testing. This direction may be given by the Contracting Officer in the notice of disapproval. The Contractor **shall** furnish such additional production lot test sample(s) under the terms and conditions and within the time specified in the notification. The cost of each additional approval test, and all costs related to such test(s), **shall** be borne by the Contractor. Upon approval of the production lot test sample(s) and all required CDRLs, the Contracting Officer may, at his/her discretion, equitably adjust the delivery schedule of the contract for only the lot represented by such sample(s). The Government reserves the right to require an equitable decrease of the contract price for any extension of the delivery schedule necessitated by additional test(s) or for any additional costs incurred by the Government due to the need for additional approval test(s).

12. If the Contractor fails to deliver any production lot test sample(s) within the time or times specified, or if the Contracting Officer disapproves any of the required CDRLs, the contract may be deemed to have failed to make delivery within the meaning of the "Default" clause of this contract, and this contract may be subject to termination for default. In such an event, failure of the Government to terminate this contract for default **shall not** relieve the Contractor of the responsibility to meet the delivery schedule for production quantities.

SECTION E - INSPECTION AND ACCEPTANCE OF TEST PLANS / PROCEDURES

1. The Contractor **shall** submit a test plan/procedure for Government approval/disapproval as specified in the Contract Data Requirements List (DD Form 1423, sequence number, A006). The test plan **shall** be submitted within sixty (60) calendar days after contract award date. The Acceptance Test Plan **shall** identify that test fixtures are available for use at the Contractor's Facility. Any revisions to an approved Test Plan / Procedure require resubmission in accordance with DD1423, sequence number A006).

2. Notification of test plan approval, conditional approval, or disapproval **shall** be provided via Wide Area Workflow (WAWF). This notification may be made within 30 calendar days after receipt of the Test Plan/Procedure.

3. The notice of approval or conditional approval **shall not** relieve the Contractor from complying with all requirements of the specifications and all other terms and conditions of this contract.

4. A notice of conditional approval may state any further action required of the Contractor.

5. A notice of disapproval **shall** cite the reasons for such. If the plan or procedure is disapproved by the Government, the Contractor may be required, at the option of the Government, to submit a revised plan or procedure for evaluation. After each notification by the Government to submit

a revised plan or procedure, the Contractor **shall**, at no additional cost to the Government, make any necessary revisions or modifications to the plan or procedure. Such revisions **shall** be furnished in accordance with terms and conditions and within the time specified in the notification. The Government may take action on the resubmitted plan or procedure within the time specified above. The Government reserves the right to require an equitable adjustment of the contract price for any extension of the delivery schedule necessitated by resubmission of the plan or procedure.

6. If the Contractor fails to deliver the plan or procedure within the time specified, or if the Contracting Officer disapproves any plan or procedure, the Contractor **shall** be deemed to have failed to make delivery within the meaning of the "Default" clause of this contract, and this contract **shall** be subject to termination for default. However, failure of the Government in such an event to terminate the contract **shall not** relieve the Contractor of the responsibility to meet all requirements of the contract including delivery of any first article sample(s), data requirements, and/or production quantities.

7. There is hereby created an option for the Government to waive the requirement for submission of a plan or procedure. If the offeror has had its plan previously approved by the Government, the following information **shall** be furnished:

Approved by _____

Date of approval _____

Contract number and Contractor under which plan/procedure was approved _____.

Test Plan number, revision date and NSN for which the item was previously approved _____.

8. If the submission of the plan or procedure is waived, the previously approved plan or procedure shall apply to the contract.

SECTION E - CAD/PAD INSPECTION AND ACCEPTANCE

1. Inspection and acceptance **shall** be in accordance with **DL855AS101**.

2. The Government reserves the right to invoke the requirement for First Article Testing (FAT) if there is a change in process, facilities, materials, equipment, or production of the item. "Process" is defined as the steps or tasks that are performed to create a product. An example of a process change that could invoke FAT is implementation of a new production line. "Facilities" is defined as location or buildings where the process(es) are performed to manufacture a product. A contractor may have several buildings already approved for manufacture of the item that do not require notice if already approved. "Materials" is defined as all the raw ingredients that are used in the manufacturing of the item. An example of a material change that could invoke FAT is a new energetic material supplier, which will need to meet the requirements of the applicable specification. "Equipment" is defined as all the tools used to manufacture a product. An example of an equipment change that could invoke FAT is a machine upgrade that changes energetic material processing technique. "Production" is defined as to make, manufacture, or create a product. An example of a production change that could invoke FAT is a revised method to manufacture delay composition. FAT can also be invoked if two years or more have passed since the item was last manufactured, or if the item has developed a manufacturing or performance related issue that can affect form, fit, or function such as changes to technical requirements, performance, interoperability, supportability, maintainability, or safety.

If there is a desire to have predetermination of a potential change to the process, facilities, materials, equipment, or production of the item, a proposal describing the change and any supporting documentation should be written in a formal letter and provided to the Contracting Officer. The Contracting Officer will provide the letter with the supporting documentation of the proposed changes to the cognizant engineering activity. A formal response on the determination of whether an FAT is required may be provided within fifteen (15) business days after receipt from the Contracting Officer.

Note: The examples provided above are not meant to be all inclusive. The Government **shall** have the final decision if FAT is invoked based on the proposed change submitted by the contractor as well as the Technical Data Package and/or item specification incorporated by reference in Section C.

3. The Contractor **shall** provide and maintain a quality program acceptable to the Government and modeled on ISO 9001:2015 or an equivalent quality system. If the quality program is not modeled on ISO 9001:2015 the offeror/prospective Contractor **shall** indicate the quality system proposed along with how it is equivalent, under separate letter submitted with the offer/proposal.

ISO 9001:2015 Other

This quality system along with program specific production documentation **shall** be made available for review by the Government's representative upon request, at the Contractor's facility at no cost to the Government.

4. Due to the critical nature and safety application of these items, the Contractor and the QAR are cautioned that it is mandatory to ensure the correct identification and nomenclature are assigned for all items and shipping containers prior to shipment including CAGE codes. CAD/PAD Devices are exempt from MIL-STD-129 shelf life markings on packaging; however, they **shall** have a minimum of 85% of the shelf life remaining at time of delivery. Any delivery from a contractor not having at least 85% shelf-life remaining shall be considered non-conforming.

NOTE: The shelf life for CLIN 0001 is: 8 years and 0 months.

5. Radiographic equipment and procedures **shall** meet the standards stipulated in the latest revision specification **ASTM E1742**. Neutron radiography (N-rays), when required for a specific item, **shall** meet the requirements of ASTM E748 and ASTM E545.

6. Radiographers **shall** be certified level II or III and qualified in accordance with the requirements described in specification NAS 410.

7. In order to fulfill contractual requirements, the Contractor **shall** submit acceptable radiographs for each Contract Line Item. Radiographs **shall** be of an image quality to effectively inspect for acceptable assembly of components and defects. Radiographs should be reviewed by a Level II or Level III certified radiographer in accordance with NAS 410. Radiographs not conforming to the requirements specified herein will not be accepted by NSWC IHD. Disposition of nonconforming radiographs will be by mutual agreement of the parties.

8. Representative Quality Indicators (RQI) are recommended to be used on radiographic film or digital images for all CAD/PAD devices. The RQI (also known as a defect standard) contains a known defect (i.e. missing explosive charge, missing O-rings, etc.) placed next to a good unit for comparison, to aid in interpretation. Radiographic test technique **shall** include RQI to be used and RQI placement.

9. The Contractor **shall** submit radiographs as marked (X) below:

X-RAYS (per applicable spec)	N-RAYS (per ASTM E748)	Sample / LOT Description
		First Article Sample
X		Lot Acceptance Test Samples
X		Production Lot Units
		Explosive Sub-Assemblies (i.e., NON-GFP CTGS, Booster Sleeves, etc.) DWG No/Part No of sub-assembly to be provided by ISE. (AMS type in, then remove this red note).

Radiographs of Production Lot Units **shall** include Lot Acceptance Testing (LAT) samples.

10. Neutron radiographs (N-rays) **shall** be produced using film (conventional techniques). Radiographs (X-ray) **shall** be produced using non-film (digital) techniques such as Digital Detector Array (DDA), or Computed Radiography (CR), with the understanding that the Contractor must be qualified and given prior approval to use digital radiography by NSWC IHD. A qualification plan must be submitted to the Level III Radiographer at NSWC IHD for review prior to qualification of the digital x-ray system. Once the qualification plan has been reviewed and approved, the Level III Radiographer at NSWC IHD will conduct a site visit (i.e. audit) to witness the qualification of the digital x-ray system. The results of the tests performed during the digital x-ray system qualification will be documented in a qualification plan, which will be submitted to the Level III Radiographer at NSWC IHD. At a minimum, the qualification plan **shall** include information such as the type of system (Make/Model of DDA or CR system, x-ray sources etc.), as well as the specific types of tests (performance checks, as described in the ASTM standards) to be performed to verify the performance of the system. The tests are described in the appropriate ASTM standards (i.e. ASTM E2445 and ASTM E2033 for CR, and ASTM E2737 and ASTM E2698 for DDA systems). An official approval letter will then be issued by the Commanding Officer, NSWC IHD, which authorizes the use of the digital system. Follow up audits at regular intervals of every five years may be conducted to assure the long term stability and performance of the digital x-ray system. If digital radiographs are submitted, they shall be in the form of raw data that is Digital Imaging and Communication in Nondestructive Evaluation (DICONDE) compliant. In addition to the raw DICONDE data, 16 bit Tagged Image Format (TIF) images of the digital radiographs must be submitted. The qualification of non-film techniques will be done IAW the latest versions of standards referenced in the latest version of ASTM E1742 (currently ASTM E1742/E1742M-12), such as ASTM E2698 and ASTM E2737 (for the qualification of Digital Detector Array (DDA) detectors), or ASTM E2033 and ASTM E2445 (for the qualification of Computed Radiography (CR) systems).

11. When submitting the radiographic images, the Contractor **shall** also submit a report of radiographic inspection. This report **shall** clearly indicate the units subjected to radiographic inspection by the following data:

- Item Nomenclature and DODIC
- Span of serial numbers displayed
- Complete lot number
- Missing units by serial number
- Complete contract number
- Nonconforming units by serial number and reason
- Government drawing or part number for rejection

NOTE: For the span of serial numbers, include list of serial numbers for units that have been accepted. Any units found to be nonconforming shall be clearly identified. The specific nature of the non-conformance shall be cited, as well as any assignable cause or analysis related to the occurrence.

12. When undergoing radiographic inspection, each unit in the sample or lot **shall** be permanently serialized in consecutive numerical order per MIL-STD-1168 before radiographic inspection. Serial numbers **shall not** be repeated on items with the same part number regardless of changes in the lot number. The numbering **shall** be from left to right, top to bottom with the first item on the left of each row having the lowest serial number. All annotation must be represented using a method which leaves a permanent image on the radiograph, such as placing lead letters on the film cassette or digital detector prior to each exposure. It is **NOT** acceptable to use adhesive labels, or to write annotation on the radiograph using a marker or other writing instrument. Units that are missing on a radiograph must be indicated by identifying the serial number of the unit immediately preceding, and immediately following, the missing unit(s). All units **shall** be arranged on trays or boards in consecutive numerical order. Radiographs shall reveal internal components. This may require using various techniques which may include multiple exposures, multiple speeds of film being loaded for each exposure, or additional orientation of unit(s) i.e. 0 degree and 90 degree exposures. Any discontinuities in the serial numbers displayed **shall** be clearly marked on the representative radiographic image. Specific reasons for the missing serial number(s) and all rejects from the Contractor and QAR inspections prior to radiographic inspection **shall** be recorded on the radiographic inspection report as described in paragraph 14 and forwarded with the LAT sample. Row-unit-quantities **shall** be consistent except the ending row of the production lot, which may vary. In addition, serial numbers **shall** appear at the end of each row when more than 100 units appear on one radiograph image; these serial numbers may appear on tape and be affixed to the radiograph.

13. This radiographic image and report **shall** be shipped prepaid. The delivery of the radiographic image and report **shall** be in accordance with Contract Data Requirement List (CDRL) DD Form 1423, sequence number A007. The film **shall** be placed in film envelopes or sleeves. Radiographic film **shall** be placed into an appropriate shipping container that will not damage the film. The film envelopes **shall** be placed in either a fiberboard, cardboard, or wooden box. X-rays or N-ray film **shall not** be placed directly into a shipping container (i.e. FedEx or UPS box). X-ray or N-ray film **shall not** be rolled up and placed in a shipping tube. When approved for digital radiography, digital radiographic images **shall** be shipped prepaid on a compact disc (CD). Digital radiographic images **shall not** be submitted on USB flash drives.

a. Digital radiographic images may also be submitted electronically through DoD SAFE in addition to CD shipment to improve efficiency in initial Government review. Electronic submission **shall** optionally be in addition and **shall not** replace CD shipment for long-term Government storage purposes.

b. Requests for DoD SAFE links for digital radiographic image submission **shall** in writing (e-mail) to the AMS listed in Section H with the contracting officer on copy.

14. All radiographic images **shall** be retained by the Government. All radiographic images **shall** display a permanent identification of the following information:

- Item Nomenclature and DODIC
- Government Drawing or Part Number
- Complete Lot Number
- Span of Serial Numbers Displayed
- Complete Contract Number
- Name of radiographic facility
- Date of radiograph

15. All documentation, i.e., packing slip, invoice, WAWF-RR, etc., accompanying the radiographic images **shall** clearly indicate, as a minimum, the following information:

- Contract Number
- Item Nomenclature
- National Stock Number (NSN)
- Department of Defense Identification Code (DODIC)
- Lot Number

16. Due to the critical nature and safety application of these items, the Contractor and the QAR are cautioned that it is mandatory to assure the correct identification and nomenclature are assigned for all item and shipping containers prior to shipment.

17. The Contractor **shall** have the ballistic test fixtures and/or capabilities to assure that the item being procured meets the specification requirements.

18. The Contractor **shall** provide, upon Government request and at Contractor's own cost, copies of all certificates of compliance for all materials (mechanical properties, alloying) and all quality conformance tests (Hydrostatic, X-ray, Protective Finish, Magnetic Particle, Dye Penetrant).

SECTION E - CAD/PAD ENERGETIC MATERIALS REQUIREMENTS

1. The age of the energetic materials and components (i.e. ALL explosives, propellants, pyrotechnics, cartridges, and/or initiators) used in the manufacture of these items or sub-components **shall not** exceed twenty-four (24) months based on the original manufacturing date or retest date; unless otherwise noted in the detail specification of the item being procured. Propellant manufactured **shall** be in accordance with the required specifications of paragraph one, section E - CAD/PAD Inspection and Acceptance (Apr 2017). Any government furnished property provided in conjunction with the contract is considered acceptable for meeting the requirement. This requirement must be met prior to loading of any of the energetic materials into the item or sub-components.
3. The Government may waive the energetic and constituent material requirements listed above or portions thereof, on a case-by-case basis (when acceptable to the Government) provided the Contractor furnishes all details of the reason for the waiver and the age, lot numbers, traceability, and other pertinent information/ test data and Certificate of Analysis/ Conformance (COA/COC) of the subject materials or components. Waivers **shall** be requested in only one of the following formats:
 - a. Request for Variance: RFVs **shall** be submitted in accordance with Section C. The RFV may be subject to, but not limited to, conditions such as sensitivity testing, stabilizer analysis and/or dehumidification at Contractor's cost. RFVs may be submitted with a recertification plan (if available). The recertification plan will be kept on record once approved by the cognizant engineering activity.
 - b. Energetics Test Matrix: The contractor may request waiver of the energetic and constituent material requirements as long as the Cognizant Engineering Organization (CEO), which is NSWC IHD, has an approved Energetic Test Matrix available for incorporation into Section C at time of award. SECTION I - QUALIFICATION REQUIREMENTS: 52.209-1 (FEB 1995)

1. Definition - "*Qualification requirement*," as used in this clause, means a Government requirement for testing or other quality assurance demonstration that must be completed before award.

2. One or more qualification requirements apply to the supplies or services covered by this contract. For those supplies or services requiring qualification, whether the covered product or service is an end item under this contract or simply a component of an end item, the product, manufacturer, or source must have demonstrated that it meets the standards prescribed for qualification before award of this contract. The product, manufacturer, or source must be qualified at the time of award whether or not the name of the product, manufacturer, or source is actually included on a qualified products list, qualified manufacturers list, or qualified bidders list. Offerors should contact the agency activity designated below to obtain all requirements that they or their products or services, or their subcontractors or their products or services, must satisfy to become qualified and to arrange for an opportunity to demonstrate their abilities to meet the standards specified for qualification.

Even though a product or service subject to a qualification requirement is not itself an end item under this contract, the product, manufacturer, or source must nevertheless be qualified at the time of award of this contract. This is necessary whether the Contractor or a subcontractor will ultimately provide the product or service in question. If, after award, the Contracting Officer discovers that an applicable qualification requirement was not in fact met at the time of award, the Contracting Officer may either terminate this contract for default or allow performance to continue if adequate consideration is offered and the action is determined to be otherwise in the Government's best interests.

5. If an offeror, manufacturer, source, product or service has met the qualification requirement but is not yet on a qualified products list, qualified manufacturers list, or qualified bidders list, the offeror must submit evidence of qualification prior to award of this contract. Unless determined to be in the Government's interest, award of this contract **shall not** be delayed to permit an offeror to submit evidence of qualification.

6. Any change in location or ownership of the plant where a previously qualified product or service was manufactured or performed requires reevaluation of the qualification. Similarly, any change in location or ownership of a previously qualified manufacturer or source requires re-evaluation of the qualification. The re-evaluation must be accomplished before the date of award.

(c) This list must be updated during performance of the contract whenever the Contractor determines that any other material to be delivered under this contract is hazardous.

(d) The apparently successful offeror agrees to submit, for each item as required prior to award, a Material Safety Data Sheet, meeting the requirements of 29 CFR 1910.1200(g) and the latest version of Federal Standard No.313, for all hazardous material identified in paragraph (b) of this clause. Data shall be submitted in accordance with Federal Standard No.313, whether or not the apparently successful offeror is the actual manufacturer of these items. Failure to submit the Material Safety Data Sheet prior to award may result in the apparently successful offeror being considered nonresponsive and ineligible for award.

(e) If, after award, there is a change in the composition of the item(s) or a revision to Federal Standard No.313, which renders incomplete or inaccurate the data submitted under paragraph (d) of this clause, the Contractor shall promptly notify the Contracting Officer and resubmit the data.

(g) Nothing contained in this clause shall relieve the Contractor from complying with applicable Federal, State, and local laws, codes, ordinances, and regulations (including the obtaining of licenses and permits) in connection with hazardous material.

(h) The Government's rights in data furnished under this contract with respect to hazardous material are as follows:

(iii) Have others use, duplicate, and disclose the data for the Government for these purposes.

(2) To use, duplicate, and disclose data furnished under this clause, in accordance with paragraph (h)(1) of this clause, in precedence over any other clause of this contract providing for rights in data.

(3) The Government is not precluded from using similar or identical data acquired from other sources.

(End of clause)

52.243-7 Notification of Changes.

(Jan 2017)

NOTIFICATION OF CHANGES (JAN 2017)

(a) *Definitions.* "Contracting Officer," as used in this clause, does not include any representative of the Contracting Officer.

"Specifically Authorized Representative (SAR)," as used in this clause, means any person the Contracting Officer has so designated by written notice (a copy of which shall be provided to the Contractor) which shall refer to this paragraph and shall be issued to the designated representative before the SAR exercises such authority.

(b) *Notice.* The primary purpose of this clause is to obtain prompt reporting of Government conduct that the Contractor considers to constitute a change to this contract. Except for changes identified as such in writing and signed by the Contracting Officer, the Contractor shall notify the Administrative Contracting Officer in writing promptly, within _____ (to be negotiated) calendar days from the date that the Contractor identifies any Government conduct (including actions, inactions, and written or oral communications) that the Contractor regards as a change to the contract terms and conditions. On the basis of the most accurate information available to the Contractor, the notice shall state-

- (1) The date, nature, and circumstances of the conduct regarded as a change;
- (2) The name, function, and activity of each Government individual and Contractor official or employee involved in or knowledgeable about such conduct;
- (3) The identification of any documents and the substance of any oral communication involved in such conduct;
- (4) In the instance of alleged acceleration of scheduled performance or delivery, the basis upon which it arose;
- (5) The particular elements of contract performance for which the Contractor may seek an equitable adjustment under this clause, including-
 - (i) What line items have been or may be affected by the alleged change;
 - (ii) What labor or materials or both have been or may be added, deleted, or wasted by the alleged change;
 - (iii) To the extent practicable, what delay and disruption in the manner and sequence of performance and effect on continued performance have been or may be caused by the alleged change;
 - (iv) What adjustments to contract price, delivery schedule, and other provisions affected by the alleged change are estimated; and
- (6) The Contractor's estimate of the time by which the Government must respond to the Contractor's notice to minimize cost, delay or disruption of performance.

(c) *Continued performance.* Following submission of the notice required by paragraph (b) of this clause, the Contractor shall diligently continue performance of this contract to the maximum extent possible in accordance with its terms and conditions as construed by the Contractor, unless the notice reports a direction of the Contracting Officer or a communication from a SAR of the Contracting Officer, in either of which events the Contractor shall continue performance; provided, however, that if the Contractor regards the direction or communication as a change as described in paragraph (b) of this clause, notice shall be given in the manner provided. All directions, communications, interpretations, orders and similar actions of the SAR shall be reduced to writing promptly and copies furnished to the Contractor and to the Contracting Officer. The Contracting Officer shall promptly countermand any action which exceeds the authority of the SAR.

(d) *Government response.* The Contracting Officer shall promptly, within _____ (to be negotiated) calendar days after receipt of notice, respond to the notice in writing. In responding, the Contracting Officer shall either-

- (1) Confirm that the conduct of which the Contractor gave notice constitutes a change and when necessary direct the mode of further performance;
- (2) Countermand any communication regarded as a change;
- (3) Deny that the conduct of which the Contractor gave notice constitutes a change and when necessary direct the mode of further performance; or
- (4) In the event the Contractor's notice information is inadequate to make a decision under paragraphs (d)(1), (2), or (3) of this clause, advise the Contractor what additional information is required, and establish the date by which it should be furnished and the date thereafter by which the Government will respond.

(e) *Equitable adjustments.*

(1) If the Contracting Officer confirms that Government conduct effected a change as alleged by the Contractor, and the conduct causes an increase or decrease in the Contractor's cost of, or the time required for, performance of any part of the work under this contract, whether changed or not changed by such conduct, an equitable adjustment shall be made-

- (i) In the contract price or delivery schedule or both; and
- (ii) In such other provisions of the contract as may be affected.

(2) The contract shall be modified in writing accordingly. In the case of drawings, designs or specifications which are defective and for which the Government is responsible, the equitable adjustment shall include the cost and time extension for delay reasonably incurred by the Contractor in attempting to comply with the defective drawings, designs or specifications before the Contractor identified, or reasonably should have identified, such defect. When the cost of property made obsolete or excess as a result of a change confirmed by the Contracting Officer under this clause is

included in the equitable adjustment, the Contracting Officer shall have the right to prescribe the manner of disposition of the property. The equitable adjustment shall not include increased costs or time extensions for delay resulting from the Contractor's failure to provide notice or to continue performance as provided, respectively, in paragraphs (b) and (c) of this clause.

Note: The phrases "contract price" and "cost" wherever they appear in the clause, may be appropriately modified to apply to cost-reimbursement or incentive contracts, or to combinations thereof.

___ (2) The Offeror is providing separate information with its offer in accordance with paragraph (d)(2) of this provision.

(c) Procedures for reviewing the annual unclassified report (see paragraph (b)(1) of this provision). For clarity, references to the report in this section refer to the entirety of the annual unclassified report, including any separate reports that are incorporated by reference into the annual unclassified report.

(1) Check the table of contents of the annual unclassified report and the country section headings of the reports incorporated by reference to identify the foreign countries listed there. Determine whether the Offeror or any person owned or controlled by the Offeror may have engaged in any activity related to one or more of such foreign countries.

(2) If there may have been such activity, review all findings in the report associated with those foreign countries to determine whether or not each such foreign country was determined to be in violation of its obligations undertaken in an arms control, nonproliferation, or disarmament agreement to which the United States is a party, or to be not adhering to its arms control, nonproliferation, or disarmament commitments in which the United States is a participating state. For clarity, in the annual report an explicit certification of non-compliance is equivalent to a determination of violation. However, the following statements in the annual report are not equivalent to a determination of violation:

(i) An inability to certify compliance.

(ii) An inability to conclude compliance.

(iii) A statement about compliance concerns.

(3) If so, determine whether the Offeror or any person owned or controlled by the Offeror has engaged in any activity that contributed to or is a significant factor in the determination in the report that one or more of these foreign countries is in violation of its obligations undertaken in an arms control, nonproliferation, or disarmament agreement to which the United States is a party, or is not adhering to its arms control, nonproliferation, or disarmament commitments in which the United States is a participating state. Review the narrative for any such findings reflecting a determination of violation or non-adherence related to those foreign countries in the report, including the finding itself, and to the extent necessary, the conduct giving rise to the compliance or adherence concerns, the analysis of compliance or adherence concerns, and efforts to resolve compliance or adherence concerns.

(4) The Offeror may submit any questions with regard to this report by email to NDAA1290Cert@state.gov. To the extent feasible, the Department of State will respond to such email inquiries within 3 business days.

(d) Do not submit an offer unless--

(1) A certification is provided in paragraph (b)(1) of this provision and submitted with the offer; or

(2) In accordance with paragraph (b)(2) of this provision, the Offeror provides with its offer information that the President of the United States has

(i) Waived application under 22 U.S.C. 2593e(d) or (e); or

(ii) Determined under 22 U.S.C. 2593e(g)(2) that the entity has ceased all activities for which measures were imposed under 22 U.S.C. 2593e(b).

(e) Remedies. The certification in paragraph (b)(1) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Offeror knowingly submitted a false certification, in addition to other remedies available to the Government, such as suspension or debarment, the Contracting Officer may terminate any contract resulting from the false certification.

52.229-11 Tax on Certain Foreign Procurements--Notice and Representation (Jun 2020)

(a) Definitions. As used in this provision--

Foreign person means any person other than a United States person.

Specified Federal procurement payment means any payment made pursuant to a contract with a foreign contracting party that is for goods, manufactured or produced, or services provided in a foreign country that is not a party to an international procurement agreement with the United States. For purposes of the prior sentence, a foreign country does not include an outlying area.

United States person as defined in [26 U.S.C. 7701\(a\)\(30\)](#) means

(1) A citizen or resident of the United States;

(2) A domestic partnership;

(3) A domestic corporation;

(4) Any estate (other than a foreign estate, within the meaning of [26 U.S.C. 701\(a\)\(31\)](#)); and

(5) Any trust if-

(i) A court within the United States is able to exercise primary supervision over the administration of the trust; and

(ii) One or more United States persons have the authority to control all substantial decisions of the trust.

(b) Unless exempted, there is a 2 percent tax of the amount of a specified Federal procurement payment on any foreign person receiving such payment. See [26 U.S.C. 5000C](#) and its implementing regulations at 26 CFR 1.5000C-1 through 1.5000C-7.

(c) Exemptions from withholding under this provision are described at 26 CFR 1.5000C-1(d)(5) through (7). The Offeror would claim an exemption from the withholding by using the Department of the Treasury Internal Revenue Service Form W-14, Certificate of Foreign Contracting Party Receiving Federal Procurement Payments, available via the internet at www.irs.gov/w14. Any exemption claimed and self-certified on the IRS Form W-14 is subject to audit by the IRS. Any disputes regarding the imposition and collection of the 26 U.S.C. 5000C tax are adjudicated by the IRS as the [26 U.S.C. 5000C](#) tax is a tax matter, not a contract issue. The IRS Form W-14 is provided to the acquiring agency rather than to the IRS.

(d) For purposes of withholding under [26 U.S.C. 5000C](#), the Offeror represents that

(1) It is not a foreign person; and

(2) If the Offeror indicates "is" in paragraph (d)(1) of this provision, then the Offeror represents that--I am claiming on the IRS Form W-14 a full exemption, or # partial or no exemption [Offeror shall select one] from the excise tax.

(e) If the Offeror represents it is a foreign person in paragraph (d)(1) of this provision, then--

(1) The clause at FAR [52.229-12](#), Tax on Certain Foreign Procurements, will be included in any resulting contract; and

(2) The Offeror shall submit with its offer the IRS Form W-14. If the IRS Form W-14 is not submitted with the offer, exemptions will not be applied to any resulting contract and the Government will withhold a full 2 percent of each payment.

(f) If the Offeror selects "is" in paragraph (d)(1) and "partial or no exemption" in paragraph (d)(2) of this provision, the Offeror will be subject to withholding in accordance with the clause at FAR [52.229-12](#), Tax on Certain Foreign Procurements, in any resulting contract.

(g) A taxpayer may, for a fee, seek advice from the Internal Revenue Service (IRS) as to the proper tax treatment of a transaction. This is called a private letter ruling. Also, the IRS may publish a revenue ruling, which is an official interpretation by the IRS of the Internal Revenue Code, related statutes, tax treaties, and regulations. A revenue ruling is the conclusion of the IRS on how the law is applied to a specific set of facts. For questions relating to the interpretation of the IRS regulations go to <https://www.irs.gov/help/tax-law-questions>.

52.230-1 Cost Accounting Standards Notices and Certification (Jun 2020)

Note: This notice does not apply to small businesses or foreign governments. This notice is in three parts, identified by Roman numerals I through III.

Offerors shall examine each part and provide the requested information in order to determine Cost Accounting Standards (CAS) requirements applicable to any resultant contract.

If the offeror is an educational institution, Part II does not apply unless the contemplated contract will be subject to full or modified CAS coverage pursuant to 48 CFR 9903.201-2(c)(5) or 9903.201-2(c)(6), respectively.

I. Disclosure Statement-Cost Accounting Practices and Certification

(a) Any contract in excess of the lower CAS threshold specified in Federal Acquisition Regulation (FAR) 30.201-4(b) resulting from this solicitation will be subject to the requirements of the Cost Accounting Standards Board ([48 CFR chapter 99](#)), except for those contracts which are exempt as specified in 48 CFR 9903.201-1.

(b) Any offeror submitting a proposal which, if accepted, will result in a contract subject to the requirements of [48 CFR chapter 99](#) must, as a condition of contracting, submit a Disclosure Statement as required by 48 CFR 9903.202. When required, the Disclosure Statement must be submitted as a part of the offeror's proposal under this solicitation unless the offeror has already submitted a Disclosure Statement disclosing the practices used in connection with the pricing of this proposal. If an applicable Disclosure Statement has already been submitted, the offeror may satisfy the requirement for submission by providing the information requested in paragraph (c) of Part I of this provision.

Caution: In the absence of specific regulations or agreement, a practice disclosed in a Disclosure Statement shall not, by virtue of such disclosure, be deemed to be a proper, approved, or agreed-to practice for pricing proposals or accumulating and reporting contract performance cost data.

(c) Check the appropriate box below:

(1) # Certificate of Concurrent Submission of Disclosure Statement. The offeror hereby certifies that, as a part of the offer, copies of the Disclosure Statement have been submitted as follows:

(i) Original and one copy to the cognizant Administrative Contracting Officer (ACO) or cognizant Federal agency official authorized to act in that capacity (Federal official), as applicable; and

(ii) One copy to the cognizant Federal auditor.

(Disclosure must be on Form No. CASB DS-1 or CASB DS-2, as applicable. Forms may be obtained from the cognizant ACO or Federal official.)

Date of Disclosure Statement: _____ Name and Address of Cognizant ACO or Federal Official Where Filed: _____

The offeror further certifies that the practices used in estimating costs in pricing this proposal are consistent with the cost accounting practices disclosed in the Disclosure Statement.

(2) # Certificate of Previously Submitted Disclosure Statement. The offeror hereby certifies that the required Disclosure Statement was filed as follows:

Date of Disclosure Statement: _____ Name and Address of Cognizant ACO or Federal Official Where Filed: _____

The offeror further certifies that the practices used in estimating costs in pricing this proposal are consistent with the cost accounting practices disclosed in the applicable Disclosure Statement.

(3) # Certificate of Monetary Exemption. The offeror hereby certifies that the offeror, together with all divisions, subsidiaries, and affiliates under common control, did not receive net awards of negotiated prime contracts and subcontracts subject to CAS totaling \$50 million or more in the cost accounting period immediately preceding the period in which this proposal was submitted. The offeror further certifies that if such status changes before an award resulting from this proposal, the offeror will advise the Contracting Officer immediately.

(4) # Certificate of Interim Exemption. The offeror hereby certifies that (i) the offeror first exceeded the monetary exemption for disclosure, as defined in (3) of this subsection, in the cost accounting period immediately preceding the period in which this offer was submitted and (ii) in accordance with 48 CFR 9903.202-1, the offeror is not yet required to submit a Disclosure Statement. The offeror further certifies that if an award resulting from this proposal has not been made within 90 days after the end of that period, the offeror will immediately submit a revised certificate to the Contracting Officer, in the form specified under paragraph (c)(1) or (c)(2) of Part I of this provision, as appropriate, to verify submission of a completed Disclosure Statement.

Caution: Offerors currently required to disclose because they were awarded a CAS-covered prime contract or subcontract of \$50 million or more in the current cost accounting period may not claim this exemption (4). Further, the exemption applies only in connection with proposals submitted before expiration of the 90-day period following the cost accounting period in which the monetary exemption was exceeded.

II. Cost Accounting Standards-Eligibility for Modified Contract Coverage

If the offeror is eligible to use the modified provisions of 48 CFR 9903.201-2(b) and elects to do so, the offeror shall indicate by checking the box below. Checking the box below shall mean that the resultant contract is subject to the Disclosure and Consistency of Cost Accounting Practices clause in lieu of the Cost Accounting Standards clause.

The offeror hereby claims an exemption from the Cost Accounting Standards clause under the provisions of 48 CFR 9903.201-2(b) and certifies that the offeror is eligible for use of the Disclosure and Consistency of Cost Accounting Practices clause because during the cost accounting period immediately preceding the period in which this proposal was submitted, the offeror received less than \$50 million in awards of CAS-covered prime contracts and subcontracts. The offeror further certifies that if such status changes before an award resulting from this proposal, the offeror will advise the Contracting Officer immediately.

Caution: An offeror may not claim the above eligibility for modified contract coverage if this proposal is expected to result in the award of a CAS-covered contract of \$50 million or more or if, during its current cost accounting period, the offeror has been awarded a single CAS-covered prime contract or subcontract of \$50 million or more.

III. Additional Cost Accounting Standards Applicable to Existing Contracts

The offeror shall indicate below whether award of the contemplated contract would, in accordance with paragraph (a)(3) of the Cost Accounting Standards clause, require a change in established cost accounting practices affecting existing contracts and subcontracts.

# Yes	# No

(End of provision)

52.230-7 Proposal Disclosure-Cost Accounting Practice Changes (Apr 2005)

If the offeror checked "Yes" above, the offeror shall-

(1) Prepare the price proposal in response to the solicitation using the changed practice for the period of performance for which the practice will be used; and

(2) Submit a description of the changed cost accounting practice to the Contracting Officer and the Cognizant Federal Agency Official as pricing support for the proposal.

252.204-7024 NOTICE ON THE USE OF THE SUPPLIER PERFORMANCE RISK SYSTEM (MAR 2023)

(a) Definitions. As used in this provision--

"Item risk" means the probability that a product, based on intended use, will introduce performance risk resulting in safety issues, mission degradation, or monetary loss.

"Price risk" means a measure of whether a proposed price for a product or service is consistent with historical prices paid for that item or service.

"Supplier risk" means the probability that an award may subject the procurement to the risk of unsuccessful performance or to supply chain risk (see Defense Federal Acquisition Regulation Supplement [239.7301](#)).

(b) The Supplier Performance Risk System (SPRS), available at <https://piee.eb.mil/>, will be used in the evaluation of the Quoter or Offeror's performance. SPRS retrieves item, price, quality, delivery, and contractor information on contracts from Government reporting systems in order to develop risk assessments.

(c) The Contracting Officer will consider SPRS risk assessments during the evaluation of quotations or offers received in response to this solicitation as follows:

(1) Item risk will be considered to determine whether the procurement represents a high performance risk to the Government.

(2) Price risk will be considered in determining if a proposed price is consistent with historical prices paid for a product or a service or otherwise creates a risk to the Government.

(3) Supplier risk, including but not limited to quality and delivery, will be considered to assess the risk of unsuccessful performance and supply chain risk.

(d) SPRS risk assessments are generated daily. Quoters or Offerors are able to access their risk assessments by following the access instructions in the SPRS user's guide available at <https://www.sprs.csd.disa.mil/reference.htm>. Quoters and Offerors are granted access to SPRS for their own risk assessment classifications only. SPRS reporting procedures and risk assessment methodology are detailed in the SPRS user's guide. The method to challenge a rating generated by SPRS is also provided in the user's guide. SPRS evaluation criteria are available at https://www.sprs.csd.disa.mil/pdf/SPRS_DataEvaluationCriteria.pdf.

(e) The Contracting Officer may consider any other available and relevant information when evaluating a quotation or an offer.
