

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION

1. Contracting Activity: Department of Veterans Affairs (VA)
Office of Procurement Acquisition and Logistics
Technology Acquisition Center
23 Christopher Way
Eatontown, New Jersey 07724
2. Description of Action: The proposed sole source action is for a firm-fixed price contract for a brand name Solventum RevCycle Health Services Platform (RHSP) Software and Maintenance Support solution with Solventum Health Information Systems, Inc., 575 W Murray Blvd, Murray, Utah 84123.
3. Description of the Supplies or Services: VA Financial Services Center (FSC) and Veterans Health Administration (VHA) have a requirement for an enterprise Solventum RHSP SaaS solution which automates its healthcare claims pricing methodologies. VA FSC requires the Solventum RHSP solution to continue to integrate with the existing medical claims processing system, the electronic Claims Administration and Management System (eCAMS) Health Care Engine (HCE). eCAMS HCE is a centralized and configurable healthcare claims processing platform that supports VA claims processing business functions, including pricing methodologies, and is capable of adjudicating, processing, and preparing payment of claims by healthcare providers. The eCAMS HCE platform supports a minimum of 85 percent of all claims transactions as auto-adjudicated with straight through processing, with no human touch points or human interaction.

The Solventum RHSP solution enables automated pricing methodologies within the eCAMS solution. It consists of various grouper and pricer functionalities which group healthcare claims by reading its diagnosis code, grouping it by code into high level functional areas, and calculating the associated price based on the claim and medical data. This enables eCAMS to adjudicate the claim and send bills to the VHA or non-VHA providers who will then administer as appropriate. These groupers and associated pricer functionalities provide Medicare and non-Medicare procedure grouping, editing, and assignment of reimbursement costs for inpatient and outpatient medical claims data ensuring accurate reimbursements are paid to the VHA and non-VHA health care medical claims in support of the Veterans Access to Care through Choice, Accountability, and Transparency Act of 2014 (H.R.4810; 113th Congress; Public Law (PL) 113-175). PL 113-175 requires VA to establish and implement a system to process and pay claims for care delivered to Veterans by non-VA providers under the program and other non-VA care authorities. The Veterans Access to Care through Choice, Accountability, and Transparency Act of 2014 has significantly increased the number and types of medical claims received each year from VHA and non-VHA healthcare providers. In order to remain in compliance with the Veterans Access to Care through Choice, Accountability, and Transparency Act of 2014, the VA FCS required seven (7) additional Solventum groupers with associated pricers for eCAMS medical claim automation functionalities: Hospital Outpatient Department

(HOPD), Ambulatory Surgical Center (ASC), Center for Medicare and Medicaid Services (CMS), Inpatient Psychiatric (IPF), Long Term Care Hospitals (LTCH), Inpatient Rehab, Medicare Renal Dialysis Editing and Reimbursement (RDF), and Professional Claims Editor and Reimbursement (PCER). Additionally, MAC pricing and Tricare pricing are required to adjudicate certain claims.

The Solventum RHSP software as a service solution shall allow the VA FSC to send specific claim information (non-identifying data) to the service and the service will return a price for eCAMS to adjudicate the claim. In addition, the Contractor shall provide maintenance support services. Specifically, these maintenance support services include software upgrades, updates, enhancements, and corrections within five (5) business days of being released by the contractor. The Contractor shall also provide remote and telephonic technical support 24 hours a day, seven (7) days a week. The period of performance for the software as a service solution shall be 12 months from delivery with two (2) 12-month option periods. Option periods are required to continue to provide healthcare medical claims and reimbursement services eCAMS HCE processing solution. The total estimated value of the proposed action, inclusive of all option periods is [REDACTED].

4. Authority: The statutory authority permitting other than full and open competition is 41 U.S.C.3304(a)(1) as implemented by the Federal Acquisition Regulation (FAR) Overhaul VA Deviation 6.103-1 entitled, "Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements."

5. Rationale Supporting Use of Authority Cited Above: The proposed source for this action is Solventum. Based on market research, as described in Section 8 of this justification, it was determined that only Solventum RHSP solution can meet the Government's requirements. Solventum is a SaaS solution on a FEDRAMP-approved server; RHSP is an AWS GovCloud-hosted solution that falls under Health Information Management. Only the Solventum RHSP solution is interoperable with the eCAMS HCE system. The eCAMS HCE solution is designed to integrate only with the Solventum RHSP proprietary source code. The eCAMS HCE solution was specifically designed and extensively tested to ensure its production rates provide a solution that meets the Government requirements including the requirement to auto-adjudicate 85 percent of claims transactions with straight through processing and no human touch points or human interactions. MAC pricing and Tricare pricing are required to adjudicate certain claims. Solventum's RHSP software is the only solution capable of providing the pricers for processing these types of claims. The use of another brand would require the Government to not only redesign its eCAMS HCE solution but also require redevelopment of an interface with any alternative software solution. Based on previous acquisition history and historical Government data, VA technical experts estimate that such a redevelopment effort would result in an approximate one-year delay and produce estimated duplicated costs of - . The redesign of eCAMS would consist of developing new requirements, design **and analysis** of the redesigned solution, implementation and deployment, developer testing, quality assurance acceptance testing, and evaluation. To redesign or procure a new healthcare claims system would result in a substantial duplication of cost and resources which would not

be recouped through competition. If the Government were to redesign this system, all current automated healthcare claims processing functionality would halt, and future automated processing would be severely delayed. This would severely impact VA FCS's ability to process and pay claims for care delivered to Veterans by non-VA providers under the Program and other non-VA care authorities and in direct compliance with the Veterans Access to Care Act of 2014. Additionally, VA would be at high risk of outside medical providers stopping their provided care to Veterans being supported under the VA Choice program, which would have serious negative impacts to Veterans' health.

Furthermore, Solventum RHSP software is a proprietary software product; therefore, no other software maintenance provider has the proprietary code to perform the necessary maintenance and technical support services including software upgrades, updates, enhancements, and corrections. Access to this code is also needed to ensure all services provided are properly configured. The maintenance and technical support of Solventum RHSP software is critical for the software to continue to remain operational in support of medical claims processing which is a mandated under the Veterans Access to Care Act of 2014.

6. Efforts to Obtain Competition: Market research was conducted, details of which are in the market research section of this document. This effort did not yield any additional sources that could meet the Government's requirements. There is no competition anticipated for this acquisition. Additionally, the proposed action will be synopsisized on the Contracting Opportunities Page in accordance with FAR 5.201. Any proposals that are received shall be evaluated.

7. Actions to Increase Competition: The Government will continue to conduct market research to ascertain whether additional solutions are able to integrate with VA eCAMS HCE.

8. Market Research: From November 2025 through February 2026, the Government technical experts conducted market research to see if there were any sources to provide healthcare claims pricing methodology software and maintenance requirements. The research consisted of web-based research that reviewed similar software products including [REDACTED] software and [REDACTED] software to which none were found to be viable. No other alternative software can integrate with eCAMS without a redesign of the respective solutions and redevelopment of an interface as detailed above in this justification. The Government contacted eCAMS HCE representatives on February 27, 2026 and they confirmed that both [REDACTED] and Solventum can integrate with eCAMS. However, the [REDACTED] solution lacks the MAC pricing and Tricare pricing. Additionally, [REDACTED] also lacks the MAC and Tricare pricing requirement. Any other software would require significant redesign and redevelopment. In addition, only Solventum currently has a SaaS solution that meets the VA requirements for FEDRAMP. The Government contacted Solventum representatives in February 2026 and it was confirmed that it is the sole provider of brand name Solventum software and support and that the firm does not have any authorized resellers.

Additional market research was conducted in November 2025 via a Request for Information (RFI) that was posted on the National Aeronautics and Space Administration Solutions for Enterprise-Wide Procurement V Government-Wide Acquisition Contract. The RFI was posted for the Brand Name Solventum requirement for 5 days ending November 28, 2025. No responses were received.

Other Facts: N/A

9. Technical and Requirements Certification: I certify that the supporting data under my cognizance, which are included in this justification, are accurate and complete to the best of my knowledge and belief.

3/18/2026

Date

10. Determination of Best Value: I hereby determine that the anticipated price to the Government for this contract action will be fair and reasonable based on analysis of the quotes against the Independent Government Cost Estimate and commercial catalog pricing.

3/18/2026

Date

12. Procuring Contracting Officer Certification: I certify that this justification is accurate and complete to the best of my knowledge and belief.

3/18/2026

Date

Approval

In my role as Contracting Activity Competition Advocate, based on the foregoing justification, I hereby approve the acquisition of Solventum RHSP software and maintenance support, pursuant to the authority cited in Section 4 above, subject to availability of funds, and provided that the property and services herein described have otherwise been authorized for acquisition.
