

**Request for Information
DARPA-SN-26-51**

**Low Cost, Manufacturable Counter-Air Missile Propulsion
Defense Advanced Research Projects Agency
Tactical Technology Office**

Responses due 22 April 2026, by 4:00 PM Eastern Time (ET).

This Request for Information (RFI) from the Defense Advanced Research Projects Agency (DARPA)'s Tactical Technology Office (TTO) seeks to improve its understanding of the U.S. industry and supplier base for rocket propulsion technologies that can enable the development and production of low-cost missiles at speed and scale.

Responses to this RFI will be used to inform DARPA programs on emerging weapons technologies and suppliers that could play a role in the development of low cost, highly manufacturable missiles.

Intellectual or other privileged or proprietary information contained in responses to this RFI will not be distributed outside of the U.S. Government. In the event that a new DARPA program is developed in response to this RFI and a solicitation is issued, no intellectual or other proprietary information received in response to this RFI will be divulged to agencies outside the U.S. Government.

BACKGROUND:

DARPA is seeking to revolutionize weapons development by dramatically shrinking the time it takes to produce today's systems. One proposed strategy inverts the traditional process by prioritizing manufacturability from the outset, allowing the weapon's ultimate capabilities to be determined by what can be produced quickly and efficiently at mass scale. An important area of focus for this initiative is the production of propulsion systems, which are a notorious bottleneck in missile manufacturing. DARPA is actively scouting breakthrough technologies capable of compressing this production timeline from months to days and potentially hours.

DESCRIPTION:

This RFI seeks information on state-of-the-art development and manufacturing processes for missile propulsion systems, leveraging advanced propulsion prototyping, manufacturing, and testing. This RFI will also be used to identify industry partners that can assist in rapid prototyping, specifically as it applies to missile propulsion development.

REQUESTED INFORMATION:

DARPA is interested in responses that must address all of the following technical areas:

1. Advanced, high performance missile propulsion technologies and rapid manufacturing and production approaches.
2. Rapid propulsion system prototyping technologies and approaches for rapid design iteration.
3. Anticipated propulsion system performance based on proposed rapid production approaches.

SUBMISSION FORMAT:

Attachment 2 contains a format template for responses to this RFI.

General Guidelines:

- Respondents to this special notice are encouraged to be as succinct as possible, while also providing actionable insight.
- All submissions must be written in English.
- White papers shall not exceed seven (7) single-sided written pages using 11-point font with 1" margins all around. Font no smaller than 10-point may be used for figures, tables, and charts.
- Electronic submittal shall be in Microsoft Word or PDF format.
- All documents submitted must be clearly labeled with the DARPA special notice number (DARPA-SN-26-51), respondent organization, and white paper title.
- To the maximum extent possible, respondents are encouraged to send non-proprietary information.
 - Respondents are responsible for clearly identifying proprietary information. Submissions containing proprietary information must have the cover page and each page containing such information clearly marked with a label such as "Proprietary" or "Company Proprietary." *NOTE: "Confidential" is a classification marking used to control the dissemination of U.S. Government National Security Information as dictated in Executive Order 13526 and should not be used to identify proprietary business information.*
- Do not include elaborate brochures or marketing materials; only include information relevant to the areas identified above.
- Use of a diagram(s) or figure(s) to depict the essence of the response is permitted and counted towards page count.
- Send unclassified submissions to DARPA-SN-26-51@darpa.mil. **DO NOT SUBMIT CLASSIFIED INFORMATION TO THIS ADDRESS.** Please see *Attachment 1 - Security* to this notice for instructions on submitting classified information.

- Submissions must be received no later than 4:00 PM ET, 22 April, 2026. Submissions sent through other mediums, channels, or after the prescribed deadline will not be considered. Early responses are encouraged.

All white papers shall contain the following sections which are included in the page count:

- A. Cover Sheet. Provide the following information:
 - a. Response Title
 - b. Technical point of contact name, organization, telephone number and email address (The contact information should include the respondent's technical and/or administrative points of contact (names, addresses, phone numbers, fax numbers, and e-mail addresses) to enable potential clarification discussions. Identify your primary work location as appropriate.
 - c. Indicate classification level of response (e.g., Unclassified, Unclassified/Controlled Unclassified Information (CUI), Secret Collateral).
 - d. Submissions must include company Commercial and Government entity (CAGE) Code, Facility Clearance status/level, and document safeguarding level. Technical Description. Graphics within the technical descriptions are encouraged to the extent that they aid in succinctly describing the concepts.
- B. Graphic Overview Slide. If desired, include a single PowerPoint slide that graphically depicts the main ideas of the response.
- C. Bibliography/References

All technical and administrative correspondence and questions regarding this announcement and how to respond to this RFI should be sent to DARPA-SN-26-51@darpa.mil. E-mails pertaining to this RFI that are sent directly to individual DARPA Program Managers will not receive a response. No telephone inquiries will be accepted.

NOTE: DARPA may conduct individual discussions with respondents as necessary to gain a full understanding of the technical and partnership models submitted. DARPA will contact respondents individually via e-mail.

ELIGIBILITY

DARPA invites white paper submissions from all those engaged in related research activities and appreciates responses from all capable and qualified sources, including, but not limited to, universities, University-Affiliated Research Centers (UARCs) and Federally Funded Research and Development Centers (FFRDCs), private or public companies, and Government research laboratories.

DISCLAIMERS AND IMPORTANT NOTES:

- This is an RFI issued solely for information and new program planning purposes; it does not constitute a formal solicitation for proposals. In accordance with Federal Acquisition Regulation 15.201(e), responses to this RFI are not offers and cannot be accepted by the Government as such.
- Responses do not bind DARPA to any further actions related to this topic, including requesting follow-on proposals from respondents to this RFI.
- Submission is voluntary and is not required to propose to a subsequent solicitation (if any) on this topic.
- DARPA will not provide reimbursement for costs incurred in responding to this RFI.
- Respondents are advised that DARPA is under no obligation to acknowledge receipt of the information received or provide feedback to respondents with respect to any information submitted under this RFI.
- DARPA will disclose submission contents only for the purpose of review. Submissions may be reviewed by the Government (DARPA and other Government partners), FFRDCs, and Scientific, Engineering and Technical Assistance (SETA) support contractors bound by appropriate non-disclosure agreements.
