REQUEST FOR INFORMATION

SIC TSCM Support

1.0 DESCRIPTION & PURPOSE

1.1 The National Geospatial-Intelligence Agency (NGA) in support of the *Office of Counterintelligence (SIC)* is seeking information on how an interested contractor could *provide security support services* to integrate, enhance, and optimize technical security and signals countermeasures programs in support of the protection of national intelligence, sources, and methods, including sensitive compartmented information, and the facilities, systems, and networks that house them.

1.2 The purpose of this Request for Information (RFI) is to determine if adequate competition exists in the commercial marketplace to meet the requirements outlined in the NGA TSCM Draft Statement of Work (SOW) dated 25 March 2026.

1.3 THIS IS A REQUEST FOR INFORMATION (RFI) ONLY. This RFI is issued solely for information and planning purposes – it does not constitute a Request for Proposal (RFP) or a promise to issue an RFP in the future. This RFI does not commit the Government to contract for any supply or service whatsoever. Further, NGA is not seeking proposals at this time and will not accept unsolicited proposals. Responders are advised that the U.S. Government will not pay for any information or administrative costs incurred in response to this RFI. All costs associated with responding to this RFI will be solely at the interested party's expense. Not responding to this RFI does not preclude participation in any future RFP, if any is issued.

2.0 BACKGROUND

NGA has a mission-critical need for technical security support services to the Office of Counterintelligence necessary to complete associated tasks and responsibilities in the following functional areas outlined below:

- Technical Surveillance Countermeasures (TSCM): Pre-Construction Surveys, Emergency Surveys, Routine Surveys, In-Place Monitoring
- Data Engineering: Database design, implementation, and management
- Software Development: Application design, coding, testing, and maintenance
- Front-End Development: User interface design and implementation
- Back-End Development: Server-side logic and API development
- Technical Security and Signals Countermeasures (TSSC) Analysis: Technical security assessments and analysis
