TITLE: Probe Station Temperature Control

Requesting Laboratory / Division / Group:

Communications Technology Laboratory
RF Technology Division
Guided Wave Electromagnetics Group 672.01

General Statement of Need:

A temperature control system is required for a 200mm wafer probe station to enable variable chuck temperature down to minus 60 degrees C. The temperature control system must be compatible with an existing microwave wafer probe station, and utilize air only cooling with no liquids or Peltier elements. Variable temperature operation down to -60C is needed to evaluate temperature distributions via thermo-reflectance measurements under device operation conditions over a wide temperature range, to evaluate thermal performance of electronics under high power operation.

Item Specifications and Quantities:

Item 1:	Probe Station Temperature Control	
Quantity:	1 Each	
Specifications:	1.1	Must enable variable chuck temperature at temperatures down to -60C
	1.2	Must be compatible with existing 200mm MPI TS2000-IFE 2000-IFE Automated Test System
	1.3.	Must utilize air only cooling for -60C operation
	1.4.	Probe station with variable temperature control must operate ice-free down to -60C
Item 2:	Service to Install/Upgrade Probe Station Chuck Temperature Control	
Quantity:	1 Each	
Specifications:	2.1	Installation of temperature control system including integration with existing 200mm chuck and probe station and demonstration of ice-free operation for a chuck temperature of -60C
