Part 1 Description of Services

1.0 General: Private Security Contractors (PSCs) contracted by the U.S. Government (USG) operate as one means of a whole-of-government approach to support peace and stability initiatives in areas of armed conflict, post-conflict, comparable situations and in peace/routine garrison operations. Where military or other government security forces are unavailable, insufficient, or inappropriate, PSCs protect relief, recovery, reconstruction activity from theft, extortion, vandalism, terrorism, and other unlawful activities in addition to emergent security requirements in stable garrison environments, Outside the Continental United States (OCONUS). This encompasses planned security initiatives, capacity-building efforts, and support for ongoing stability and peacekeeping operations. Effective discipline, training, and oversight of USG contracted PSCs builds the confidence of the local population, reduces the risk of civilians and civilian activities becoming targets, and supports the restoration or protection of the rule of law. To accommodate this objective, this performance-based statement of work provides a full spectrum of private security functions in support of contingency operations, other significant military operations, humanitarian, and peace operations, exercises or garrison operations. This Performance Work Statement (PWS) is for the Global Protective Services (GPS) program, which in accordance with 10 U.S. Code § 2465 provides agencies the operational reach of performance throughout all OCONUS Combatant Command (COCOMs) Areas of Responsibility (AORs) provided the Contracts performance will be carried out at a location outside the United States (including its commonwealths, territories, and possessions). Any change to performance requirements will only become effective upon approval from the Procuring Contracting Officer (PCO).

1.1 Description of Services: The GPS program provides Armed and Unarmed guard (Fixed and Mobile) and protective security services in support of the Department of Defense (DoD) and other applicable agencies. The Contractor shall provide all management, tools, supplies, equipment, and labor necessary to perform armed or unarmed security guard services and protective security services. This is an Indefinite Delivery/Indefinite Quantity (IDIQ) Contract. All services will be performed through Task Orders (TO) and all TOs will be competed amongst the GPS Base Contract holders unless a Justification for an Exception to Fair Opportunity (JEFO) is staffed accordingly. GPS is a non-personal service(s) Contract under which the personnel rendering the service(s) are not subject, either by the Contract's terms or by the manner of its

administration, to the supervision and control usually prevailing in relationships between the Government and its employees.

1.2 Background: The GPS requirement is a recompetes to the Security Support Services – Global (SSS-G) Program competitively awarded in November 2018 as a Firm-Fixed-Price (FFP) Multiple-Award Task Order Competition (MATOC)IDIQ Contract.

1.3 Task Order Performance Location Business Risk: The Contractor needs to be well-informed or and competent in managing various business risks and issues, especially in high-risk international environments. These risks may include but are not limited to exposure to loss, labor disputes, political unrest, and compliance with exporting/importing regulations, particularly with regard to the production and export of products and services controlled under the International Traffic in Arms Regulations and dual-use items controlled under the Export Administration Act. Other risks include unstable local politics, geographical challenges, and differing legal systems that could impact the Contractor's ability to meet contractual obligations.

1.4 Task Order Specifics and Performance Guidelines: The specific requirements, specifications, and deliverables for each TO under GPS will be clearly outlined and specified in the corresponding TO Competitions Solicitation documents. All terms and conditions of the Basic Contracts are applicable to all TOs awarded under them and shall serve as overarching terms and conditions. However, each TO will be the official source for comprehensive guidance on performance expectations, timelines, and other important details. Contractors shall follow the specifications provided in each TO and should customize their performance accordingly.

1.5 Integrated Compliance Framework: While this PWS establishes a foundation referencing U.S. Army and DOD regulations and clauses, it is imperative to note that individual TOs issued on a decentralized basis may necessitate compliance with additional regulations and standards as mandated by other relevant agencies. The specific regulatory framework and standards applicable to each TO will be explicitly detailed within the respective TO Competition documents. Contractors shall adapt and adhere to the unique regulatory requirements specified in each TO, ensuring comprehensive compliance with any additional stipulations set forth by the respective agency associated with the TO.

1.6 Ordering: The GPS Contract offers flexibility in its utilization allowing for both centralized and decentralized Task Order execution. The decision to adopt a decentralized or centralized approach will be made based on the operational requirements, efficiency considerations, and overall mission objectives determined by the ACC-RI Contracting Officer or authorized ordering agencies Contracting Officer. Contracting activities within the DOD along with Other Government Agencies may receive access to the GPS Contract to award and administer TOs as listed in Solicitation Attachment 0005 – Authorized Ordering Agencies. Centralized orders will be issued and administered through ACC-RI, and decentralized orders will be issued and administered through the authorized organization's Cognizant Contracting Activity.

Decentralized ordering agencies will follow the attached Ordering Guide (Attachment 0002, ACC-RI reserves the right to update the Ordering Guide at any time, and the ordering guide will be adhered to by authorized ordering agencies. GPS Contractors will be notified in writing which offices have been granted decentralized ordering authority during the performance of this Contract. GPS Contract holders shall provide a copy of any TO award they receive and any subsequent TO modifications within 48 hours of the TO award or execution of the modification to the ACC-RI Contracting Officer.

1.7 Security Systems: The USG acknowledges the dynamic and ever evolving nature of security technology and recognizes that advancements may lead to the development of new and unknown security systems during the lifespan of this contract. Therefore, Contractors may be required to operate and integrate with future security systems provided by the Government, even if such systems are not explicitly defined or known at the time of GPS' award. The Contractor shall demonstrate flexibility and readiness to adapt to evolving technologies, participate in relevant training programs, and efficiently incorporate emerging security systems into their operational capabilities as directed by the Contracting Officer or designated [U.S.] Government representative. This requirement ensures that the GPS program remains responsive to emerging security needs and technological advancements throughout its duration.

1.8 GPS Intent: The intent of this centralized/decentralized MATOC program PWS is to offer an array of private security services that all ordering authorities may require during the performance of GPS. To provide flexibilities and customized solutions based on the diverse and unique requirements of different organizations and U.S. Government Agencies. The decentralized ability allows for individual units or entities who have varying needs, priorities, and operational requirements to tailor the services to align with their specific requirements, ensuring that resources are allocated efficiently and effectively. The intent is to allow for resource optimization, allow for entities to plan for dynamic environments, enhance mission effectiveness, while utilizing private security expertise, to reduce administrative burden on the U.S. Government and offer a mission-centric approach to Private Security Contract operations for the Department of Defense or other USG agencies, i.e., the North Atlantic Treaty Organization (NATO), the United States Agency for International Development (USAID), and agencies or organizations authorized to order under this program.

1.9 Ordering Authorities Scope Changes: To maintain quality, uniformity, and overarching program oversight, all decentralized scope changes, shall be submitted to the Office of the Under Secretary of Defense for Acquisitions and Sustainment (OUSD A&S) through the ACC-RI Contracting Officer for a scope review and determination. As the single point of contact/review for scope changes, OUSD A&S will ensure that all requested scope changes do not include Inherently Governmental functions. This will not alleviate and ordering authorities responsibilities of an in-scope determination made at the appropriate level. Approved agencies delegated ordering authority can be found in Attachment 0002 – GPS Ordering Guide.

2.0 General Information

2.1 Quality Control Plan (QCP): The Contractor is responsible for creating and maintaining a QCP to ensure that the services provided are in line with the requirements of this PWS. The Contractor shall establish and implement procedures to identify, prevent, and ensure that there is no repetition of defective services. The QCP is the means through which the Contractor assures that the work provided meets the requirements of the contract. Specific details about the QCP will be provided at the TO level.

2.1.1 Quality Assurance: The Government will evaluate the Contractor's performance under this Contract in accordance with (IAW) the Quality Assurance Surveillance Plan (QASP). This plan is primarily focused on what the Government must do to ensure that the Contractor is and has performed IAW the performance standards. It defines how the performance standards will be applied, the frequency of surveillance, and the acceptable quality levels (performance thresholds).

2.2 Recognized Holidays: The recognized holidays for performance will be detailed at the TO level to include Host Nation Holidays.

2.2.1 Hours of Operation: Contractors may be required to provide security services 24 hours per day, seven (7) days per week, 365 (or 366) days per year, including all holidays. The hours of operation shall be defined at the TO level. The Contractor must always maintain an adequate workforce to ensure uninterrupted performance of all tasks defined within the TO PWS.

2.2.2 Place of Performance: The work to be performed under this Contract will be performed at locations determined at the TO level, as restricted by 10 U.S. Code § 2465 TOs will only be carried out at OCONUS locations (including its commonwealths, territories, and possessions) at which members of the armed forces would have to be used for the performance of a function described in subsection (a) at the expense of unit readiness. Or to be carried out on a [U.S.] Government-owned but privately operated installation. If 10 U.S. Code § 2465 is amended during the performance period of GPS those changes will be effective under the GPS program immediately.

2.3 Facilities Security Clearance, Facilities Access: A DD Form 254 Contract Security Classification Specification is required to be held by the Contractor (or NATO equivalency). The Contractor shall have and maintain a U.S. SECRET or NATO SECRET facilities clearance with the ability to obtain a TOP SECRET or NATO COSMIC TOP SECRET facilities clearance within 60 days of TO award. The Contractor shall provide the Information Security Program Manager (ISPM) a Visitor Authorization

List (VAL) and comply with specific ISPM and other Government agencies requirements for employees to gain access to specific Government facilities. The Contractor shall provide an Entry Authorization List (EAL) to facility Security Managers (SM) and alarm monitoring agencies to gain access to customer-limited access areas. The Contractor shall develop and maintain EALs for authorized personnel granted access to contractor-limited access areas. The Contractor shall perform occasional escort duties for contractor work centers. The Contractor is responsible for ensuring all employees meet the requirements to receive badges and gain access to facilities.

The Contractor shall immediately notify the appropriate ISPM when employees no longer require access and/or Contract termination and the Contractor shall return all Government identification and access badges. The Contractor shall immediately notify the cognizant Contracting Officer's Representative (COR) and the appropriate ISPM when Government identification and access badges are lost or stolen.

2.3.1 Personal Security Clearance (PCL) and Background Checks: The Contractor shall comply with DD Form 254 and 32 CFR Part 117 NISPOM <https://www.dami.army.pentagon.mil/site/IndustSec/docs/DDForm254Fillable1.pdf> f. (or NATO equivalency) The Contractor shall ensure all employees have the required security clearances and/or required background checks equal to or greater than the classified information to which they are granted access. The Contractor shall work with the ISPM on all security-related issues and shall act appropriately to prevent the unauthorized disclosure of classified information and material to unauthorized individuals, In conjunction with the supported organization(s).

For all personnel positions requiring either SECRET or TOP SECRET or NATO equivalency (NATO SECRET/NATO COSMIC TOP SECRET) clearances, the Contractor will provide a copy of the approved clearance to the cognizant Contracting Officer or the Administrative Contracting Officer (ACO) and COR team, if applicable, within 5 days of TO award, interim clearances will be acceptable (while clearance processes) unless otherwise restricted at the TO level.

Local Nationals (LN) and Other Country Nationals (OCN) will not be eligible for a U.S. security clearance; therefore, they will not be expected to have access to U.S. SECRET classified material. Where appropriate, OCNs should have at a minimum a Favorable Background check and pass necessary vendor threat mitigation policies and procedures outlined at the TO level.

2.3.2 Security Clearance Requirements: The work performed under the GPS program, the resultant Contracts, and awarded TOs may involve the Contractor having access to and/or the potential safeguarding of Classified information/material and may require a U.S. TOP SECRET or NATO COSMIC

TOP SECRET clearance, as specified per TO requirement and may be granted access to Joint Worldwide Intelligence Communications System (JWICS) Secret internet Protocol Router Network (SIPRNET) and Non-Classified Internet Protocol Router Network (NIPRNET) or NATO equivalency . If required by the TO, the security policies, procedures, and requirements stipulated by 32 CFR Part 2004 National Industrial Security Program (NISP) and 32 CFR Part 117 National Industrial Security Program Operating Manual (NISPOM) and supplements thereto are applicable to include the following security requirements and/or guidance whenever Contract performance will occur on a DOD installation or within a DOD-controlled facility or activity. Agencies outside of the DOD will specify particular security clearance requirements at the TO level.

2.4 Contractor Compliance: The Contractor shall ensure that (i) all Contractor personnel and their subcontractor personnel at all tiers comply, at all times, with all applicable DOD regulations, directives, instructions, policies, procedures, and orders issued by the DOD Commander (or agency equivalency defined at TO level) or their representative; (ii) U.S. Host Nation, and international laws and regulations; and (iii) international agreements, (e.g. treaties, conventions, protocols, Status of Forces Agreements, Host Nation Support Agreements, and Defense Technical Agreements); applicable to Contractors supporting the U.S. Armed Forces under the facts and circumstances of any Host Nation. The Contractor shall comply with the most current version of ANSI/ASIS PSC.1–2022, American National Standard, Management System for Quality of Private Security Company Operations—Requirements with Guidance or the International Standard ISO 18788, Management System for Private Security Operations—Requirements with Guidance. The USG reserves the right to remove ISO 18788 standards as an equivalency to the ANSI/ASIS PSC.1-2022 standard.

2.4.1 OCONUS PSC Compliance expectations: When Private Security Contractors operate OCONUS they are subject to International Law, U.S. Military Laws (if applicable), U.S. Federal Laws, Defense Base Act (DBA), the Anti-Terrorism Act (ATA), Export Control Laws, Foreign Corrupt Practices Act (FCPA), and any other law or regulation dictated at the TO level.

ADP 3-37	Protection	10 Jan 2024

The policies, laws, publications, manuals, and regulations referenced in this document will be updated as necessary. GPS contractors shall stay informed of, and abide by, the terms and conditions of any changes and updates that may be made to the above listed items. Any and all changes, updates, and/or amendments made to any of the aforementioned items will be considered to be incorporated into this contract as of their respective effective date or publication date with a formal modification to follow, if necessary.

2.4.1 Specific Host Nation Laws & Regulations: All Host Nation laws, policies, decrees, doctrines, etc. shall be applicable to this contract. Any TO issued for any specific country will incorporate and identify that Host Nation's laws, polices and regulations. If the Contractor believes that compliance with Host Nation law may cause the Contractor to violate applicable U.S. law, the Contractor will immediately advise the Contracting Officer and request further guidance.

2.4.2 Host Nation Business Licenses: Contractors performing work under this Program shall possess any and all required business and/or PSC Licenses from the Host Nation. All Contractors shall submit a current copy of their licenses with their proposal for the first TO competition for that country or countries. Host Nation Business Licenses will be determined at

the TO level. All copies must be Statement Licenses submitted in English; as available, the English version should include proof of translation from a certified translation service.

2.4.3 Arming Authorizations: The Contractor shall not be permitted to authorize the carry of weapons until an arming authorization is granted. Such arming authorization shall meet requirements described in 32 CFR 159.6, Section 3 of DoDI 3020.50, and the implementing orders of the relevant COCOM Commander and the relevant Joint Force Commander. The arming authorization is contingent on the Contractor submitting acceptable acknowledgment, forms, and information as required for any applicable COCOM and subordinate Operations Orders (OPORD), Fragmentary Orders (FRAGOs), Arming Procedures for DoD Contractors, or non-DoD agency equivalency.

The Contractors shall ensure contracted security guards carry the arming authorization memorandum on their person while performing armed duties at all times.

Armed Contractor authorization to possess weapons and ammunition may be suspended or revoked for noncompliance with US or Host Nation laws and/or DOD mandates, including during the period of investigation following an incident or allegation.

2.5 Biometric Collection: As applicable (detailed at the TO level), collection of LN and OCN Biometric information as a condition of employment protects the Government and Government-contracted personnel from the threat of insider/terrorist attacks. All LNs and OCNs shall participate in Biometric Collections to facilitate local badging requirements, base access, and authorization to carry weapons in a theater of operations. This participation is voluntary, but refusal could preclude access to Government or Coalition Forces facilities.

To facilitate the collection, the Contractor shall submit a written request for Biometric enrollment to the COR identifying the names and National Identification Numbers (e.g., SSN) of all LNs and OCNs requiring enrollment/screening within five (5) days of their arrival in theater. After the employees are biometrically enrolled, the local [US]Government Biometrics office (e.g., Task Force Biometrics) or other appropriate authority shall provide a memorandum certifying such enrollment per applicable COCOM or subordinate command orders, directives, or procedures.

Biometric enrollment and vetting of all LNs and OCNs shall be required before issuing arming authorization. It is incumbent upon the Contractor to submit the request for Biometric enrollment as quickly as possible to minimize delays in the arming authorization process.

2.5.1 Screening and Badging: As applicable (detailed at the TO level), The Contractor shall provide all employees with a Company unique identification badge that shall not resemble the local installation badging scheme or color. The Contractor shall submit an acceptable unique badging scheme to the COR & Contracting Officer within ten (10) days of TO award. All Contractors shall be enrolled/screened and receive a Government installation badge before performance. Screening processes that include background investigations can vary by location, grade/responsibility level of employees, and alternate areas of concern. The Contractor shall be advised of such processes and requirements (if applicable) within the TO competition documents.

2.6 Medical Screening: As applicable (detailed at the TO level), all Contractor employees will be medically screened per applicable COCOM and subordinate command OPORDs and FRAGOs at the Contractor's expense

2.7 Weapons Accountability and Control: The Contractor shall maintain a serialized weapons accountability list and maintain constant weapons accountability.

Contractor security personnel shall only be armed when on duty and shall carry a weapons authorization card on their person. The Contractor shall not authorize nor allow any employee to carry a weapon or use a weapon for security until the Arming Authority Approval has been granted for that employee.

2.7.1 Weapon Inventory: The Contractor shall maintain a serialized weapons accountability list and always maintain weapons accountability.

2.7.2 Weapon Maintenance: All weapons shall be checked and cleaned daily. All armed personnel shall ensure their weapons are always in proper working order. All armed personnel shall conduct daily function checks on all assigned weapons before assuming duties. If an employee knows or should know, that their weapon is not in the proper working condition, the employee shall immediately report to their Security Guard Supervisor or the Contractor's appropriate chain of command for repair and/or approved replacement.

NOTE: "[S]hould know" implies a level of responsibility and awareness on the part of the employee who is responsible for the weapon. It requires that the employee has a duty to be aware of the condition of their weapon and take responsible steps to ensure it is in proper working condition, and requires a standard of care and diligence that the employee is expected to exercise in relation to their assigned weapon.

2.7.3 Ammunition Supply: Ammunition may or may not be provided by the Government and maintained by the Contractor and will be defined at TO level. The Contractor shall immediately notify the COR upon determining that on-hand

ammunition is unserviceable. The Contractor shall not stock, carry, or employ any ammunition other than Government provided or authorized ammunition. While on duty, all guards shall have a basic load (to be defined at TO level) of ammunition on their person for their assigned individual weapon and the required basic load for crew-served weapons systems (if any). Ammunition shall not be modified in any way.

2.8 Period of Performance: The Period of Performance of the GPS program is as follows:

Base Ordering Period: Award plus 5-years

Optional 5-year Ordering period: Base period expiration plus 5-years.

Period of Performance for an individual TO will be detailed in TO competition and award documents.

2.9 Early Alerts (EAs): EAs are required for individual TOs. The EAs are intended to provide the Government with immediate feedback regarding matters that may pose a potential risk to the Contractor's ability to complete the work as planned (either scope of coverage or timeline), to identify new impediments, or to otherwise communicate critical matters to the Government that have not been specifically defined as a Contract deliverable. The EAs should provide enough information regarding the background; criteria include: scope of the issue, condition, cause, and effect, to enable decisions to be made regarding alternate or additional procedures. It is expected that EAs may be communicated either in a written report or through a briefing. In the case of a briefing, the documentation for the issues will be detailed briefing charts.

2.10 Post-Award Conference/Periodic Progress Meetings: The Contractor shall attend any post-award conference convened by the Contracting Activity or cognizant Contract Administration Office IAW Federal Acquisition Regulation (FAR) Subpart 42.5 Post-award Orientation. The Contracting Officer, ACO and COR team, and other Government personnel, as appropriate, may meet periodically with the Contractor to review the Contractor's performance. At these meetings the Contracting Officer will apprise the Contractor of how the Government views the Contractor's performance and the Contractor will apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be at no additional cost to the Government.

2.11 Contracting Officer's Representative (COR): The COR will be identified by a COR appointment letter from either the Contracting Officer or the ACO. The COR monitors all technical aspects of the Contract and assists in contract administration.

2.12 Identification of Contractor Employees: All contracted personnel attending meetings, answering Government telephones, and working in situations where their Contractor status is not obvious to third parties are required to identify themselves as such to avoid creating an impression in the minds of members of the public that they are Government Officials. They must also ensure that all documents or reports produced by Contractors are suitably marked as Contractor products or that Contractor participation is appropriately disclosed.

2.13 On-Ramping: The Government reserves the right to reopen competition at any time during the terms of the Contract. The ACC-RI Contracting Officer will conduct market research to assess if other Contractors are able to meet the qualifications of the GPS Program. The Government will review the need for additional GPS Contractors to keep the eligible pools viable/competitive, and/or to ensure that the agency maintains the latest private security solutions. The Government may evaluate the benefit of conducting an on-ramp on the multiple award IDIQ vehicle on an annual basis. The Government will reserve the right to on-ramp vendors in both the base 5-year ordering period and the optional 5-year ordering period.

2.14 Off-Ramping: The Government reserves the right to review all contracts under the GPS multiple award IDIQ Program to determine if it is appropriate to remove existing contracts. The Government may evaluate the benefit of conducting an off-ramp on the multiple award IDIQ vehicle on an annual basis. The Government will strongly consider an off-ramp in year four of the base ordering period. However, the Government may conduct an off-ramp in any year of the base or option ordering periods in order to reduce administrative burden and costs for the Government and contractors and to maintain streamlined and efficient processes on the contract. Any contractor that is off-ramped shall not receive any further TO awards under this contract.

Part 3 Definitions & Acronyms

3.1 Definitions: Although not inclusive of every term used within this PWS, the following list provides definitions used throughout this PWS and commonly used in the acquisition field. Additional definitions of words used in this Contract may be found in the regulations and policies listed in Section 2.4 above. Such policies and regulations may be updated from time-to-time. Contractors shall be aware of and use the most current definition incorporated in the updated policies and regulations.

Armored Vehicles - An Armored Vehicle (AV) is a vehicle in which the entire passenger compartment is enclosed in lightweight composite armors that are impervious to all handgun and submachine gun munitions up to and including .30 caliber / 7.62 mm, i.e. B6 level.

Contracting Officer – A person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings on behalf of the Government. Note: The only individual who can legally bind the Government.

Contracting Officer's Representative (COR) – As defined in DFARS 202.101, means an individual designated and authorized in writing by the Contracting Officer to perform specific technical or administrative functions. DoD Instruction (DoDI) 5000.72, Part II Definitions states the following when defining a COR: “Defined in subpart 202.101 of Reference (f). Any individual delegated responsibilities under subpart 1.602-2 of Reference (e), regardless of local terminology, must be certified by this instruction. For example, local terminology can be COR, Contracting Officer’s technical representative, technical point of contact, technical representative, alternate COR, administrative COR, assistant COR, line item manager, TO manager, quality assurance personnel, quality assurance evaluator, or COR management.” In addition, Army Regulation 70-13, Chapter 2, paragraph 2-2g, states, in part, the following when providing other surveillance support personnel to assist the COR when needed, “...These other surveillance support personnel may serve as on-site representatives of the COR in performance of actual Contract surveillance if they meet all COR requirements and have been appointed by the Contracting Officer as alternate CORs.”

Contractor - Contractor and its sub-contractors at any tier.

Dismounted – Movement of personnel and equipment mainly by foot, with limited support by vehicles.

Local National (LN) - Any individual who is a citizen of the country in which the Contract is being performed.

Mounted (activity) – Operating from a mobile platform such as an armored car or truck.

Mounted (system) – A device that is affixed to another piece of equipment. Example: A combat optic affixed to an M-4 carbine.

Other Country National (OCN)/Third Country National (TCN) - Any individual who is employed by a U.S. mission abroad and is neither a citizen of the United States nor of the country to which assigned for duty.

Performance Work Statement - A statement of work for performance-based acquisitions that describes the required results in clear, specific, and objective terms with measurable outcomes.

Protective Security Details (PSD)- (Close Protection Details) Bodyguards and security advisors.

Quality Assurance (QA) - Those actions taken by the Government to assure services meet the requirements of the Performance Work Statement.

Quality Assurance Surveillance Plan (QASP) - An organized, written document specifying the surveillance methodology to be used for surveillance of Contractor performance.

Quality Control - Those actions taken by a Contractor to control the performance of services so that they meet the requirements of the PWS.

Quality Control Plan (QCP) – A plan that defines the Contractor's quality control program and through which the Contractor assures that its work complies with the requirements of the Contract.

Rules for the Use of Force (RUF) – Set of conditions that apply to non-military entities when an accelerated show of force against possible enemy action or imminent threat is used. The following are graduated techniques to use that will not unnecessarily endanger you or others:

SHOUT: verbal warning to Halt.

SHOVE: physically restrain, block access, or detain SHOW: your weapon and demonstrate intent to use

SHOOT: to remove the threat only where necessary. Fire only aimed shots so not to harm innocent bystanders.

Security Escort Teams (SET) - Contractor personnel specifically responsible for providing security for personnel during travel to, from, and at construction sites anywhere.

Tapestry - Satellite link communication system that tracks vehicular movements within theater.

Threat Environment - The Contractor shall be aware of the changing threat conditions and of the environment where TO performance is conducted. Threats shall be continuously monitored by the Contractor through its Anti-Terrorism and Force Protection Specialists who shall be responsible for reviewing information available via U.S. Military, U.S. Government Agencies, and other sources on the potential threat environment in the AOR and recommending to the appropriate Government personnel any adjustments of the security force and Technical Training Procedures (TTPs) based upon the changing threat environment.

3.2 Acronyms: Although not inclusive of every acronym used within this PWS, or that may be included in an acquisition, the following is a list of acronyms used in this PWS

ACC-RI	Army Contracting Command – Rock Island
ACO	Administrative Contracting Officer
ACP	Access Control Point
AFB	Air Force Base
AOR	Area of Responsibility
AR	Army Regulation
ATA	Anti-Terrorism Act
ATP	Army Techniques Publication
BDOC	Base Defense Operations Center
CAC	Common Access Card
CCDR	Combatant Commander
CCIR	Commander's Critical Information Requirement
CET	Convoy Escort Team
CFR	Code of Federal Regulations
CMO	Civil-Military Operations
COCOM	Combatant Command
CONUS	Continental United States
COR	Contracting Officer's Representative
CRC	CONUS Replacement Center
CUI	Controlled Unclassified Information
DA PAM	Department of the Army Pamphlet
DBA	Defense Base Act
DD	Directives Division
DDD	Drug Detection Dog
DDDT	Drug Detection Dog Team
DFARS	Defense Federal Acquisition Regulation Supplement
DOD	Department of Defense
DoDD	Department of Defense Directive
DoDI	Department of Defense Instruction
EA	Early Alert
EAL	Entry Authorization List
ECP	Entry Control Point
EDD	Explosive Detection Dog
EMR	Emergency Medical Responder
EMT	Emergency Medical Team
EXORD	Executive Order
EXPAT	Expatriate
FAR	Federal Acquisition Regulations
FCPA	Foreign Corrupt Practices Act

FEAD	Facilities Engineering and Acquisition Divisions
FFP	Firm-Fixed Price
FITP	Firearms Instructor Training Program
FLETC	Federal Law-Enforcement Training Centers
FMG	Fixed/Mobile Guard
FOC	Full Operational Capability
FRAGO	Fragmentary Orders
FVEY	Five Eyes (Australia, Canada, New Zealand, the United Kingdom and the United States)
GPS	Global Protective Services
HAZMAT	Hazardous Materials
HN	Host Nation
IAW	In Accordance With
ID	Identification
IDIQ	Indefinite-Delivery/Indefinite-Quantity
IO	International Organizations
ISPM	Information Security Program Manager
ITV	In-Transit Vehicle
J3	Joint Plans Officer
J5	Joint Operations Officer
JFC	Joint Force Commander
JOC	Joint Operations Center
JWICS	Joint Worldwide Intelligence Communications System
LAV	Light Armored Vehicle
LN	Local National
LOA	Letter of Authorization
LOAC	Law of Armed Conflict
LOW	Law of War
MATOC	Multiple-Award Task Order Competition
MD	Master Driver
MEDEVAC	Medical Evacuation
MEJA	Military Extraterritorial Jurisdiction Act
MVL	Master Vehicle List
MWD	Military Working Dog
NAPWDA	North American Police Work Dog Association
NATO	North Atlantic Treaty Organization
NCO	Navy Contracting Office
NGO	Non-Governmental Organization
NIPRNET	Non-Secure Internet-Provided Network
NISP	National Industrial Security Program
NISPOM	National Industrial Security Program Operating Manual

NLEFIA	National Law-Enforcement Firearms Instructor's Association
NREMT	National Registry of Emergency Medical Technicians
NTV	Non-Tactical Vehicles
NVG	Night Vision Goggles
OCN	Other Country National
OCONUS	Outside the Continental United States
OCS	Operational Contract Support
OPORD	Operations Order
OPSEC	Operations Security
PCL	Personal Security Clearance
PCO	Procuring Contracting Officer
PEDD	Dual-Purpose Explosive Detection Dog
PMCS	Preventive Maintenance Checks and Services
POC	Point of Contact
PPE	Personal Protective Equipment
PS	Protective Security
PSC	Private Security Contractor
PSD	Protective Security Detail
PSS	Protective Security Service
PST	Protective Security Teams
PWS	Performance Work Statement
QA	Quality Assurance
QASP	Quality Assurance Surveillance Plan
QCP	Quality Control Plan
QRF	Quick Reaction Force
ROC	Reconstruction Operations Center
R&R	Rest & Recuperation
RUF	Rules for the Use of Force
SAPI	Small Arms Protective Insert
SET	Security Escort Team
SIPRNET	Secure Internet Provider Network
SIR	Safeguards Implementation Report
SM	Security Manager
SOP	Standard Operating Procedures
SROE	Standing Rules of Engagement
SRT	Security Reconnaissance Teams
SSS-G	Security Support Services- Global
TAPESTRY	Registered trademark of a Tracking System
TB	Tuberculosis
TCN	Third Country National

TO	Task Order
TOC	Tactical Operations Center
TTP	Tactics, Techniques, and Procedures
US	United States
USACE	United States Army Corps of Engineers
USAID	United States Agency for International Development
USEXPAT	US Expatriate
USG	U. S. Government
USPCA	United States Police Canine Association
VAL	Visitor Authorization List
VIN	Vehicle Identification Number
VRAM	Vulnerability Remediation Asset Manager

Part 4 Government Furnished Property, Equipment and Services

4.1 Government Furnished Items and Services: All information for Government-furnished items and services will be defined at the TO level as applicable.

Part 5 Contractor-Furnished Items and Services

5.1 Contractor-Furnished Items and Responsibilities: All information for Contractor-furnished items and responsibilities will be determined at the TO level.

5.2 Contractor-Provided Vehicles: All Contractor-provided vehicles shall be licensed and registered IAW with all host nation laws and policies. The Contractor is responsible for all repair and maintenance services to any contractor-provided vehicle for the entire life of the Contract. The Contractor shall maintain a Vehicle Acquisition, Operation, Maintenance, and Recovery Plan that addresses vehicle registration, licensing, permit requirements, make and model of vehicles, and type of maintenance performed. The Contracting Officer and/or authorized representative shall have the right to inspect vehicles and maintenance work. Vehicles used by the Contractor personnel while performing services under this Contract shall not be painted or marked to resemble US/Coalition or host nation military and police force vehicles. Unless otherwise required for supporting peacetime engagement and in other environments supporting Contractor administrative purposes and within base compound based on the performance location or approved by the Contracting Officer, Contractor Provided Vehicles will not be allowed to travel outside U.S./NATO locations in contingency operations or combat operations.

The Contractor shall be responsible for registering all vehicles used in the performance of this Contract IAW local laws and policies.

5.2.1 Light Armored Vehicles (LAVs): For TOs requiring mobile security teams in areas of armed conflict or other significant military operations, the Contractor will be required to provide Level III/B6 armored LAVs. The model year of all LAVs utilized under this contract shall be within three years of the active Period of Performance of the TO or newer. and the number of vehicles will be specified at the TO level. Shipping will be provided by the Contractor with the appropriate expediency based on the TO requirements. The LAVs shall be equipped with:

- a. One (1) fire extinguisher
- b. Run-flat and/or roadworthy tires
- c. Side view mirrors
- d. Seat belts
- e. One (1) spare tire first aid kit
- f. Sufficient electrical power to run required equipment such as radios and ITV
- g. Factory-installed heating/cooling system
- h. 3-ton trolley jack
- i. Wheel brace (aka "lug wrench")
- j. Jumper cables
- k. Tow strap (including d-shackles)

5.2.2 Non-Tactical Vehicles (NTVs): Unless otherwise required for supporting peacetime engagement and in other environments supporting Contractor administrative purposes and within base compound based on the performance location or approved by the Contracting Officer, NTVs will not be allowed to travel outside U.S./NATO locations in contingency operations or combat operations. The model year of all NTVs utilized under this contract shall be within three years of the active Period of Performance of the TO or newer. The Contractor shall provide unarmored NTVs in good mechanical condition. Shipping will be provided by the Contractor with the appropriate expediency based on the TO requirements. All vehicles shall be equipped with the following at a minimum:

- a. Fire extinguisher
- b. Red Cross-approved first aid kit
- c. One (1) inflated (full-size) spare tire
- d. Commercial/heavy-duty factory-installed heating/cooling system
- e. Side view mirrors
- f. Seat belts
- g. Safety glass on all windows

5.2.3 NTV Maintenance: The Contractor shall maintain NTV vehicles IAW the vehicle manufacture's maintenance schedules while ensuring they meet all Contract and regulatory safety standards. The Contractor will fix or remove inoperable vehicles from the installation within thirty (30) days.

5.2.4 Master Vehicle List (MVL) Report: The Contractor shall maintain and produce an MVL report as required per TO. The Contractor will submit the MVL to the COR weekly. The COR shall approve the contents and format of the MVL. The MVL will include at a minimum the following information:

- a. a. Location
- b. b. Supported team or capability
- c. c. Vehicle make
- d. d. Model
- e. e. VIN
- f. f. Mission capability status
- g. g. Services
- h. h. Inspections
- i. i. Repairs
- j. j. Work orders
- k. k. Date and odometer reading of last service
- l. l. Date and odometer reading of last inspection

5.2.5 In-Transit Visibility (ITV): All Contractor-provided vehicles that travel outside the base shall be equipped with ITV compatible with the Operations Center as applicable in contingency environments and determined at the TO level. Absent guidance provided by the AOR Combatant Commander (CCDR) in contingency environments, Contractors shall follow local Standard Operating Procedures (SOPs). Contractor will be responsible for obtaining airtime and ensuring tracking of movements within Contractor's operation center. Contractor will ensure Operations Centers are provided full visibility on movements of Contractor-operated vehicles with installation of headquarters system into Operations Center. Contractor will provide all maintenance of ITV systems operated by the Contractor.

DEFINITION: Contingency Environment: A Contingency environment is any area that is within a Contingency operation. Per DoDI 3020.50, A Contingency operation "Pursuant to Section 101(a)(13)(a) of Title 10, United States Code, a military operation that is designated by the Secretary of Defense as a contingency operation, or that becomes a contingency operation as a matter of law in accordance with Section 101(a)(13)(b) of Title 10, United States Code."

5.3 Contractor Furnished Vehicle, Maintenance, and Escort: The Contractor shall be responsible for providing transportation for all Contractor employees that must travel from their living quarters to the contract performance site and vice versa. The Contractor shall be required to provide and maintain NTVs for this purpose at their expense.

5.4 Communications: Specific communications device requirements, such as computers, telephones, and radios, may be a requirement of Contract performance and will be specifically addressed at the release of TO Competition.

5.5 Uniforms and Equipment: The Contractor shall provide uniforms for all employees. The Contractor shall issue all workforce personnel a minimum of two (2) complete sets of uniforms (to include boots), weapons and magazines as defined at TO level, body armor with Small Arms Protective Insert (SAPI) inserts with enhanced small arms, front and back; side 6x8 plates, Kevlar helmets, ammunition, ESS Profile Night Vision Goggles (NVG); M40A1 Protective Mask and canister(filter) with carrier; Night Vision device (PSV-14 or equivalent), aiming devices (LA-5 PEQ or equivalent); as defined at TO level and gear and other individual equipment as required. The Contractor will replace worn, tattered, or unusable items as needed. Uniforms shall have a standardized color scheme and shall be easily distinguishable and not possess any similarities to current Coalition military members' uniforms. Contractor's uniform must be recognizable on sight and properly worn and must be marked with a clear visible sign/logo of the employing company. Logo t-shirts are prohibited unless part of a company-issued uniform. The contractor's uniform shall be approved by the COR, to ensure the color scheme is distinguishable and does not conflict with coalition or agency uniforms.

5.5.1 Personal Identification: The Contractor shall furnish an Identification (ID) badge to each employee, which shall include, at a minimum, a recent photograph, name, and name of the Contractor. Ordering authorities may except this requirement for Contractor's employees required to possess a Common Access Card or Local Access Badge on their Letter of Authorization (LOA).

5.6 Housing and Life Support: The Contractor shall provide or arrange for housing that meets all standards for housing and safety in the Host Nation for each employee unless provided by the Government at the TO level per section 4.1 of this PWS . The Contractor shall, at all times during the performance of this Contract and all subsequent Task Orders, comply with the terms, conditions and requirements set forth in FAR Clause 52.222-50 Combating Trafficking in Persons.

Part 6 Scope of Work

6.0 Specific Tasks: The work performed under this Contract and any awarded TO will provide various security services as defined within this PWS. Specific security services

required at specific locations will be defined at the TO level. At no time shall the Contractor engage in offensive or combat operations under this contract or any TOs awarded under the GPS program. DoDI 1100.22 establishes the criteria for determining what constitutes combat as follows: "When determining what is Inherently Governmental (IG), an authorized, deliberate, destructive, and/or disruptive action against the armed forces or other military objectives of another sovereign government or other armed actors on behalf of the United States (i.e., planning, preparing, and executing operations to actively seek out, close with, and disrupt and/or destroy an enemy, hostile force, or other military objective). Includes employing firepower and/or other destructive/disruptive capabilities to the foregoing ends. This definition is not intended and should not be construed to limit in any way the inherent right of an individual to act in self-defense."

6.1 Fixed Guard Services: Fixed site security is intended to deter hostile elements from conducting illegal activities against DOD or other agencies' resources. Private security, as part of installation or mission security, protects service members, civilians, contractors, facilities, information, and material resources against criminal trespass, terrorism, and other unlawful activities. Duties may include vehicle and pedestrian security screening, perimeter surveillance, and internal mobile patrols. Private security guards must possess the ability to operate both hand-held and walk-through metal detectors, and high throughput personnel inspection systems (e.g. Rapid Scan).

The Contractor shall provide guard services for the security of Government-owned/leased/controlled facilities, buildings, property, and areas as well as all Government employees and their eligible accompanying household members and other designated persons. Guard services shall include, at a minimum, the following:

- a. Preventing, deterring, detecting, and detaining by use of necessary force persons from attempting or gaining unauthorized access to Government owned/leased/controlled facilities, buildings, property, and areas.
- b. Preventing, detecting, and defending by use of necessary force Government-owned/leased/controlled facilities, buildings, property, and areas as well as Government employees and their eligible household members and other designated persons against criminal, terrorist, and hostile acts, or attacks, including hostile intent.
- c. Preventing, detecting, and deterring damage to and theft of Government-owned/leased/controlled facilities, buildings, and property as well as that of Government employees and their eligible household members and other designated persons.
- d. Maintaining order within designated Government-owned/leased/controlled facilities/buildings and areas.

- e. Providing immediate and detailed warnings of any imminent or actual threat actions related to the Government's employees, designated persons, facilities, buildings, property, activities, and information.
- f. Responding to and bringing any situation under control, i.e. crisis management.
- g. Calling for necessary emergency response services.

6.1.1 Access Control Points (ACPs) and Entry Control Points (ECPs): The Contractor shall assign guards to maintain access and exit control of areas identified at the TO level. The Contractor shall provide the required personnel at designed ACPs and ECPs to detect, identify, report, and guard against entry of unauthorized personnel and contraband. Such control responsibilities include, at a minimum the following:

- a. Conducting access and exit-point screening and control of employees, visitors, deliveries/packages, and vehicles to ensure no unauthorized person, vehicle, hazardous devices, weapons, or contraband are allowed into the protected facility/building or area. The Government may, as deemed appropriate and in the best interest of the Government, provide Vulnerability Remediation Asset Manager (VRAM) or other systems to the contractor as necessary at the TO level.
- b. Checking employee and visitor identification to ensure only authorized access to the protected facility/building or area.
- c. Signing in employees, visitors, and vehicles once identification has been confirmed and it has been determined there is valid authorization to enter the protected facility/building or area.
- d. Controlling and issuing visitor and vehicle passes.
- e. Directing and stopping vehicular traffic outside the protected facility/building or area's gate(s).
- f. Performing emergency procedures for gate closure.

6.1.2 Perimeter Security/Roving Patrols: The Contractor shall provide the required personnel at designed positions to prevent the entry of unauthorized personnel and detect, identify, and report threats to the perimeter fencing/wall, building, or structure, as well as to perform daily internal security patrols, either mounted or dismounted, to check for breaches in the perimeter barrier and identify threats and/or suspicious activity in the vicinity of the facility perimeter.

6.1.3 Surveillance: The Contractor shall provide the required personnel to maintain a constant watch over property and facilities using surveillance

cameras, monitors, or patrolling an area to identify and report to any suspicious activities or security breaches.

6.1.4 Tower Security: The Contractor shall assign guards to maintain fixed stationary positions identified at the TO level, who are responsible for maintaining continuous surveillance of activities occurring outside of the protected facility, under all visibility conditions, for signs of potential threats to the facility or area. Providing immediate and detailed warnings of any imminent or actual threat actions.

6.1.5 Relief Guards: The Contractor shall provide additional guard services personnel to allow relief breaks for guard services personnel for Rest/Meals/Breaks. The contractor shall not use working/on-duty roving patrol guards to fulfill this requirement.

6.1.6 Customer Service: The Contractor shall provide customer services by assisting visitors, providing information and directing them to appropriate locations within the facility.

6.1.7 Equipment Monitoring: The Contractor shall be responsible for monitoring and maintain security equipment such as surveillance cameras, alarms, access control systems ensuring operability, this is to include security systems provided by the Government.

6.1.8 Crisis Management: In the event of a crisis or security threat the Contractor shall be involved in crisis management activities to include coordination with law enforcement and other relevant authorities as detailed at the TO level.

6.1.9 Reporting: The Contractor shall be responsible for documenting and reporting incidents, observations, and any irregularities during performance, precise reporting procedures will be detailed at the TO level.

6.1.10 English Proficiency: A Level 2 language proficiency is required unless otherwise outlined at the TO level. For all candidates being considered for language requirement positions/labor categories, the Contractor shall submit an official certification for each candidate indicating the current proficiency level (0 – 5) for each respective skill (e.g., reading, listening, speaking, writing, etc.) and applicable TO-defined target language(s) as well as English as measured by the Interagency Language Roundtable. In all cases, the test results and certification shall not be more than five (5) years old. The certification shall identify the full name, office address, and telephone number of the government-approved testing service and be signed and dated by the testing official.

6.2 Key Personnel: Below is a list of positions considered Key Personnel, which are further defined throughout this PWS. Key Personnel apply as required by each individual TO.

- a. Guard Site Manager
- b. Guard Site Assistant Manager
- c. Guard Shift Leader U.S. Expat
- d. Guard Shift Leader FVEY/NATO
- e. Guard Shift Leader (OCN/LN)
- f. Operations Center Chief
- g. Internal Roving Security Guard Team Leader
- h. PSD Shift Leader U.S. Expat
- i. PSD Team Leader FVEY
- j. SRT Guard Team Leader U.S. Expat
- k. Kennel Master

6.3 Mobile Security Requirement: Security services to escort any asset (personnel or cargo) from any US/NATO location to an unsecured outside location and back; or from one (1) US/NATO/secured location to another. Minimum standards of performance are listed in STP 17-19D24-SM-TG AUGUST 2021. Contractor personnel shall complete all required training before assuming any post on any GPS TO. Training shall include, but is not limited to, driver's training, self-defense, and the rules for the use of force and escalation or de-escalation of force.

6.3.1 Mission Coordination and Movement Requests: All mobile security movements outside U.S./NATO locations shall coordinate with all appropriate agencies and shall know all applicable checkpoint policies and procedures. Contractor personnel shall know and follow all COCOM policies and procedures, base, and host nation policies, rules, laws, and regulations. The company operations personnel will maintain communications with Country Operations Center and file Serious Incident Reports IAW Government policy and timelines.

6.3.2 Security Escort Teams (SETs): The SETs shall transport military and civilian personnel conducting administrative duties, contracted services, site inspections, base-to-base movements, and official liaison missions. The contractor's security personnel shall provide comprehensive security utilizing all team assets for escorted personnel at all times during movement. Contractor services shall include all protective/defensive actions required to deter, detect, and respond to threats to designated personnel through threat analysis, operations security (OPSEC), responsive communications, and integrated team support using armed vehicle escorts as necessary. SETs will include a minimum of two (2) Light Armored Vehicles with drivers for each vehicle, mobile guards, at least one (1) medic (with the same qualifications as SRT Medic), and a team leader with qualifications as described in paragraph 6.9.1 of this PWS. The mission will dictate the specific number of guards. Specific missions or force protection may require more than two (2) vehicles and will be described in the specific TO. Missions may require multiple-day movements.

6.3.2.1. Contractor shall provide protective services for the personal protection and movement of designated principals, which includes mission preparation (e.g., mission planning, route and site surveys, pre-mission briefings), venue protection, mission review and documentation, and any other mission essential tasks as directed.

6.3.2.1.1. Contractor shall prevent adverse events from occurring to the principal(s) and failing that, minimize the resulting consequences and recover from any effects.

6.3.2.2. Contractor shall conduct all mission essential training (e.g., mission planning, route, and site survey, attacks on principals, motorcade operations, rules on use of force, venue protection, etc.) on non-duty days.

6.3.2.3 Patrols: The Contractor shall conduct patrols as detailed at the TO level, these patrols may include, foot, bicycle, vehicle or boat patrols to cover a broad area to help determine criminal activity and ensure a visible security presence. Further information will be provided at the TO level, should boat patrols be necessary.

6.3.2.4 Random Checks: The Contractor shall perform random checks on different areas of an installation or property including entrances, exits, parking lots and other vulnerable points as outlined in the TO PWS.

6.3.2.5 Alarm Response: The Contractor shall respond to alarms, alerts to investigate the cause of alarms and take appropriate action to address any security breaches or concerns.

6.3.2.6 Emergency Response: The Contractor shall be prepared to respond to emergencies, accidents, or security incidents, and respond accordingly to quickly assess the situation and take appropriate action as outlined in local SOPs to mitigate risks and report appropriately.

6.3.2.7 Surveillance: The Contractor shall use their mobile assets to actively observe and monitor different parts of the installation or property to include looking for signs of suspicious activity, potential security risks or safety hazards and report according to the local SOP dictated at the TO level.

6.4 Convoy Escort Teams (CETs): CETs Shall be able to protect sustainment and retrograde cargo from attack and other unlawful activities while in transit between locations and to multiple points of destination within the borders of any country. The

Contractor shall provide necessary resources, including labor and armed vehicles if applicable, to support convoy escort teams to meet mission requirements. The Scope of the CETs minimum and maximum escort capacity will be detailed in the TO competition solicitation. The composition of the CET will be determined by the local threat level defined at the TO level, but may include Light Armored Vehicles with drivers, mobile guards, and medics (with the same qualifications as SRT Medic), and team leader with qualifications as described in paragraph 6.9.1 of this PWS. Convoy escort teams will coordinate all mission movements with the appropriate Operation Center on the installation, base, or location IAW force protection and mission requirements.

6.4.1 Tasks Associated with CETs:

6.4.2 Route Planning: The Contractor shall, based on the risk and threat analysis associated with the protected individuals utilize secure and discreet routes for travel, considering factors such as potential threats traffic condition and security entry and exit points along with alternate routes and contingency plans coordinated through the supported agency detailed at the TO level.

6.4.3 Threat Assessment: The Contractor, prior to departure, shall coordinate with the appropriate USG intel section to conduct a threat assessment based on intelligence and information on the relevant AOR, to anticipate potential risks and prepare appropriate security measures detailed at the TO level.

6.4.3 Security Briefing/Convoy Briefings: The Contractor shall conduct or participate in pre-departure briefing for convoy personnel providing information on the main and alternate routes as applicable, potential threats, emergency procedures, security protocols, and contact information to the USG Quick Reaction Force (QRF) as applicable, ensuring all personnel Contractor, USG and Civilian are aware of the security measures and emergency procedures in place.

6.4.4 Vehicle Inspections: The Contractor shall inspect and ensure the readiness of all vehicles in the convoy, this includes checking for mechanical issues, verifying communication equipment and ensuring the vehicle is equipped with the necessary safety and security features and described in the local SOP.

6.4.5 Convoy Formation: The Contractor shall establish and maintain a secure convoy formation during transit, optimizing defensive capabilities, the Contractor shall consider additional formations based on the terrain, threat condition and communication factors.

6.4.6 Communication: The Contractor shall maintain constant communication with elements in the convoy, and the central command and control center, and shall report any changes to the mission or route as required by local SOP detailed at the TO level.

6.4.7 Security Measures: The Contractor shall employ defensive security measures appropriate to the threat condition to include defensive driving techniques, and the use of firearms to respond to and deter ambushes, attacks and attempted theft IAW the RUF.

6.4.8 Liaison with Local Authorities: The Contractor shall establish communication and coordination channels with local authorities, military units, security forces etcetera while they are transiting through the designated AOR.

6.5 Protective Security Services (PSS): PSS provide specialized security tasks operating outside of US/NATO secured locations.

6.5.1 Protective Security Detail (PSD): The Contractor shall furnish all labor, materials, weapons, equipment, consumables, transportation, logistical support, management, command, and control and supervision, except as stated in this PWS, to provide a continuous, responsive, uninterrupted, and highly skilled protective security services program to safeguard dignitaries, senior government officials, senior military leadership and other designated personnel through the use of specialized, tailored security teams and associated equipment. PSDs are not, under any circumstances, to be involved in or engage in offensive operations or use tactics that provide the appearance of offensive operations.

The Contractor shall provide protective services for personnel in either a dismounted, mounted, or travel status. Specific levels of effort will be outlined in each TO. Responsibility includes actions to deter, detect, and respond to threats to designated personnel using their training (skills) and tools such as threat analysis, personnel security operations, OPSEC, responsive communications, emergency trauma care/Combat Lifesaver/Emergency Medical Responder (EMR), and integrated team support. TOs may specify overt or low-profile (covert) protection depending on the threat and as authorized under rules applicable to the area of operations. Low-profile operations may require special authorizations for concealed carry weapons (specified by TO). Team members will perform tasks IAW Soldier Manual Task 191-379-7029: Participate in a Protective Service (PS) Operation. Duties will typically involve, but not limited to, protection of designated personnel from terrorist attacks or criminal activities

during travel to/ while visiting/ from project worksites and while engaged in the performance of duties at project worksites; convoy route briefings; convoy command and control; actions upon contact; and vehicular Preventive Maintenance Checks and Services (PMCS) IAW the U.S. Army Standards to help ensure maximum readiness of contractor-furnished vehicles.

6.5.2 Key PSD Tasks:

6.5.2.1 Advanced Planning: Contractor PSD teams shall conduct thorough advanced planning, including risk assessments, intelligence gathering, and coordination with relevant authorities to identify potential threats and vulnerabilities of the AOR, further coordinating instructions will be detailed at the TO level.

6.5.2.2 Route Planning: The Contractor shall, based on the risk and threat analysis associated with the protected individual(s) and area, secure discreet routes for travel, considering factors such as potential threats traffic condition and security entry and exit points along with alternate routes and contingency plans coordinated through the supported agency detailed at the TO level.

6.5.2.3 Close Protection: The Contractor shall provide close protection to the principals under their care, this involves physical security, maintaining close proximity to the principles and ensure proactive and responsive approach to potential threats while ensuring for the safety of other in immediate area.

6.5.2.4 Threat Mitigation: The Contractor shall be capable of employing various tactics required to mitigate potential threats including threat detection, avoidance strategies and de-escalation techniques, PSD Contractors shall be trained to assess and respond to evolving situations swiftly and decisively while remaining within the Rules for the Use of Force. PSD Contractor team shall only engage hostile elements as long as necessary to ensure a secure departure from the hostile encounter, PSD teams shall not engage in combat as defined above.

6.5.2.5 Crowd Management: The Contractor shall be able to deal with situations where large crowds are expected, the Contractor shall be able to manage crowds and create a secure pathway for the principal to pass and minimize the risk of unauthorized access.

6.5.2.5 Risk Management: The Contractor's PSD Teams shall analyze potential risks associated with the principal, the operating environment, host

country, and specific events or activities and recommend additional security measures or protocols as applicable to the cognizant security personal, command center or military/government organization as defined at the TO level.

6.5.2.6 Communication: The Contractor's PSD shall maintain constant contact with the principal and the Agency operation center and shall report any information laid out in the local SOP, CCIR, SIR accordingly.

6.5.3 Security Reconnaissance Teams (SRTs): The main SRT tasks are the provision of project site reconnaissance, project site reporting, and liaison with local leaders and populace in support of construction or reconstruction projects. The SRT will also assist in the delivery of Reconstruction Civil Affairs projects. Primary responsibilities include management of SRT mission planning, execution of infrastructure assessment and civil reconnaissance, operational and administrative management of the SRT members and team equipment, management of SRT collective training standards, the provision of administrative and operational reports and returns as required. The SRT must possess a basic understanding of infrastructure assessment IAW Appendix C of ATP 3-34.81 Engineer Reconnaissance and civil affairs tasks.

The Contractor shall provide SRT in order to facilitate the completion of construction projects. The SRTs facilitate construction by liaising with local authorities and leaders and will conduct themselves in a manner that contributes to the development of positive relationships with the communities surrounding the construction sites, meeting with local leaders to coordinate community involvement, security, support for the construction projects, conducting technical inspections of ongoing construction and conducting atmospheric threat assessments as it pertains to reconstruction projects.

Specific requirements under Section 6.5.3 will be established and defined at the TO level.

6.5.3.1 Team members: May include a mix of local nationals, US, OCNs, or other FVEY expats. LN team members are critical for engagement with the local civilian leaders and the population. All team members will have advanced tactical training (as described below) and the ability to operate all team equipment, including any team weapon. (When so equipped, secure communications equipment will be restricted to cleared FVEY citizens.)

6.5.3.2 Additional Requirements: In addition to the weapons qualification and other tactical training common to all PSC personnel and otherwise described in this section, Security Reconnaissance Teams will understand and be able to apply:

6.5.3.3 Advanced Planning: Contractor PSD teams shall conduct thorough advanced planning, including risk assessments, intelligence gathering, and coordination with relevant authorities to identify potential threats and vulnerabilities of the AOR, further coordinating instructions will be detailed at the TO level.

6.5.3.4 Route Planning: The Contractor shall based on the risk analysis associated with the protected individuals plan secure and discreet routes for travel, considering factors such as potential threats traffic condition and security entry and exit points along with alternate routes and contingency plans coordinated through the supported agency detailed at the TO level.

6.5.3.5 Close Protection: The Contractor shall provide close protection to the principals under their care, this involved physical security, maintaining close-proximity to the principals and ensure proactive and responsive approach to potential threats while ensuring for the safety of other in immediate area.

6.5.3.6 Threat Mitigation: The Contractor shall be capable of employing various tactics required to mitigate potential threats including threat detection, avoidance strategies and de-escalation techniques, PSD Contractors shall be trained to assess and respond to evolving situations swiftly and decisively while remaining within the Rules for the Use of Force. PSD Contractor team shall only engage hostile elements as long as necessary to ensure safe departure from the hostile encounter, PSD teams shall not engage in combat as defined above.

6.5.3.7 Crowd Management: The Contractor shall be able to deal with situations where large crowds are expected, the Contractor shall be able to manage crowds and create a secure pathway for the principal to pass and minimize the risk of unauthorized access.

6.5.3.8 Risk Management: The Contractors PSD Teams shall analyze potential risks associated with the principal, the operating environment, host country, and specific events or activities and recommend additional security measures or protocols as applicable to the cognizant security personnel as defined at the TO level.

6.5.3.9 Communication: The Contractors PSD shall maintain constant contact with the principal and the Agency operation center and shall report any information laid out in the local SOP, CCIR, SIR accordingly.

6.5.3.10 Intelligence Gathering: The Contractors reconnaissance teams shall collect and analyze intelligence related to the security environment, potential, threats and activities of individuals or groups that may pose a risk, the Contractor shall provide relevant intelligence through the command center.

6.5.3.11 Further SRT requirements:

6.5.3.11.1 Mounted and dismounted reconnaissance techniques

6.5.3.11.2 General engineering reconnaissance techniques listed in ATP 3-34.81 "Engineer Reconnaissance", paragraphs 1-10 and described in Chapters 5 and Appendix C of the document

6.5.3.11.3 Reconstruction support: The Contractor shall provide SRT to facilitate the completion of construction projects. The supported engineering staff officer will brief the SRT Team Leader on specific infrastructure assessment objectives and requirements in preparation for any reconstruction support mission.

6.5.3.11.4 Support to Civil-Military Operations (CMO). The Contractor shall provide SRT to support civil security, humanitarian relief, and other Civil Affairs Operations. The supported Civil-Military Operations staff officer or Civil-Military Team Leader will brief the SRT Team Leader on specific civil reconnaissance objectives and debrief the SRT when the mission is complete. CMO supporting tasks may include:

i. Liaison with local authorities and populace to assess the local populace's perceptions, their willingness to support US and friendly forces, and other information related to CMO.

ii. Liaison with Non-Governmental Organizations and International Organizations (IO) active in the Area of Operations.

6.5.3.11.5 Civil Reconnaissance to support other stability operations. The SRT's familiarity with the operational environment, including the terrain, local population, and civilian leaders facilitates the execution of other stability operations. Stability operations supporting tasks include site reconnaissance of proposed stability operations sites and route reconnaissance ahead of SET, PSD, or convoy movement.

6.5.3.12 SRT Team Members: The SRT must include team members with the following knowledge, skills, and attributes:

- a. Basic knowledge of site evaluation and construction inspection, including use of any specialized equipment necessary for that task
- b. Civil affairs tasks
- c. Local language proficiency of at least Level 2+, culture and customs
- d. Reconnaissance techniques, including tactical movement, contact avoidance, and actions on contact
- e. Advanced combat trauma first aid. Two (2) team members will have current certification as Combat Lifesaver or Lifesaver or Emergency Medical Responder (EMR) equivalent to National Registry of Emergency Medical Technicians (NREMT). All team members will have training to stabilize trauma injuries.

6.6 Private Security Contractor Qualifications: Unless otherwise indicated, all requirements described as “must possess”, “must be able”, or “the ability to” are necessary before beginning work under this Contract and its associated TOs.

6.6.1. Physical Abilities Common to All Armed PSC Personnel:

- a. May be any gender.
- b. Must be 21 years of age or older (supervisory personnel must be 25 years or older.)
- c. Must be able to perform the following physical tasks
 - i. Drag, carry, lift, and/or pull a person to safety.
 - ii. Use physical force to detain a subject or prevent unauthorized entry.

- iii. Prolonged standing and/or sustained patrol on foot or in a vehicle.
- iv. Sustained pursuit of a suspect on foot.
- v. Dodging, crawling, climbing, and/or rapid ascent of stairs.
- vi. Perform the above wearing duty equipment and/or personal protective equipment under adverse environmental conditions.
- vii. Performing the above requires—
 - 1. The ability to be stable with regard to consciousness and the control of voluntary motor functions and have the functional capacity to respond appropriately to routine and emergencies of the job.
 - 2. The ability to maintain mental alertness, deductive, and inductive reasoning, memory, and reliable judgment.
 - 3. The ability to identify colors and read placards and street signs or see and respond to imminently hazardous situations in less than standard visual lighting conditions.
 - 4. The ability to temporarily perform minimum required duties in the event eyeglasses are broken or displaced by emergency activity.
 - 5. The ability to verbally communicate effectively under noisy circumstances with a potential for voice obstruction by personal protective equipment (PPE).
 - 6. The ability to distinguish low-intensity voice sounds from background noise in order to respond to imminently hazardous situations.
 - 7. The ability to work in closed or confined spaces.
 - 8. The ability to judge distances closer than thirteen (13) feet demonstrated, either by testing of depth perception or by a practical field test.
 - 9. The ability to direct traffic or perform crowd control.
 - 10. The ability to maintain balance under adverse conditions, weight loads, and at above-ground heights, and maintain body flexibility
 - 11. The ability to properly and effectively wear or use PPE, including that used to prevent exposure to chemical, biological, or radiological agents.
 - 12. Acuity of senses and ability of expression sufficient to allow essential, accurate communication by written, spoken, audible, visible, or other signals while using required personal protective or other equipment.
 - 13. Adequate motor power, dynamic strength, range of motion, neuromuscular coordination, stamina, gross body coordination, and dexterity.

14. Must pass an Annual Physical Ability Test per Appendix D-1
AR 190- 56

- d. PSC personnel must be able to perform the following tasks in extreme conditions:
- i. Operate both as a member of a team and independently at incidents of uncertain duration.
 - ii. Spend extensive time outside exposed to the environmental elements.
 - iii. Perform physically demanding work in hot (over 100 degrees Fahrenheit) and humid (up to 100 percent humidity) atmosphere while wearing duty equipment and/or PPE, which may significantly impair body-cooling mechanisms.
 - iv. Experience frequent transitions from hot to cold and from humid to dry atmospheres.
 - v. Work, including walking, running, standing, pulling, and pushing in wet, icy, or muddy areas.
 - vi. Perform a variety of tasks on slippery, hazardous surfaces, such as on icy pavement, wet grass, or leaves.
 - vii. Work in areas where sustaining traumatic or thermal injuries are possible.
 - viii. Face exposure to infectious agents.
 - ix. Wear PPE weighing approximately thirty (30) pounds while performing emergency tasks*.
 - x. Perform physically demanding work while wearing a protective mask or respirator, which increases the resistance of inhalation and reduces the efficiency of air exchange.
 - xi. Perform complex tasks during life-threatening emergencies.
 - xii. Work for long periods (up to the limits allowed by applicable labor law), requiring sustained physical activity and intense concentration.
 - xiii. Make life-or-death decisions during emergency conditions.
 - xiv. Be exposed to grotesque sights and smells associated with major trauma and burn victims.
 - xv. Make rapid transitions from rest to near-maximum exertion without warm-up periods.
 - xvi. Freedom from frequent episodes of pain or inability to perform work or sudden incapacitation.
 - xvii. Operate in environments of high noise, poor visibility, limited mobility, above-ground heights, and in closed or confined spaces.
 - xviii. Use manual and power tools in the performance of duties.
 - xix. Rely on sense of sight, hearing, smell, and touch to help determine the nature of the emergency; maintain personal safety; and make

critical decisions in a confused, chaotic, and potentially life-threatening environment throughout the duration of the operation.

- xx. Employ and/or manipulate and accurately engage with various assigned weapons systems, radios, flashlights, less lethal implements, etc. while moving and communicating under all the above conditions.

*NOTE: Individual PPE requirements will be defined and established at the TO level.

6.6.2 Fixed/Mobile Guard (FMG) Qualifications:

6.6.2.1 Guard Shift Leader U.S. Expat: Shift supervisors are responsible for an entire internal security shift. The shift leader operates under the direction and control of the Guard site manager. Shift leaders may be required to work in an operations center or equivalent or force protection command watch floor. If required, the Contractor shall provide shift leaders to cover the operations center 24 hours per day, seven (7) days per week. Shift supervisors provide operational linkage between the Government force protection elements and the Contractor during the execution of force protection duties of that shift. Duties include issuing directions to those Contractor personnel taking part in the integrated defense of the installation in concert with Government or coalition forces (coordinated via the COR and Guard Site Manager). Shift leaders are considered key personnel and shall possess the following qualifications:

- a. Must possess experience of not less than ten (10) years total with at least four (4) years of Military background and the remaining can be either military, police, and/or PSC. Must have received an honorable discharge as verified by a form DD-214 (U.S. Military). Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top Secret Clearance.
- c. Must have reached the grade of E-7 (NATO Code OR-7) or greater or equivalent rank in civilian police or successfully served in a supervisory role for at least one (1) year at the platoon level or equivalent, verified by military or police transcripts and evaluations (waivers to this requirement can be requested through the PCO).
- d. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.

6.6.2.2 Internal Roving Security Guard Team Leader: Leads, directs, and supervises a team of guards performing internal security services through coordination with U.S. Forces. The Team Leader shall represent all members of the roving patrol team. Guard Team Leaders are considered key personnel shall possess the following qualifications:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top Secret Clearance.
- c. Must possess a Military background with honorable discharge, have reached the grade of E-6 (NATO Code OR-6) or equivalent leadership experience in private security or civilian police, and successfully served in a supervisory role for at least one (1) year, verified by military transcripts and evaluations (waivers to this requirement can be requested through the PCO).
- d. Must possess a valid U.S. driver's license.
- e. Able to obtain an operator's license on military tactical vehicles. The military will provide training on the applicable military vehicle(s) as necessary at the TO level.

6.6.2.3 Internal Roving Security Guard (USEXPAT): Performs internal roving guard services and must possess the ability to react to force protection threats. Armed roving security patrol personnel shall possess the following qualifications and be physically able to perform all duties:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top Secret Clearance.
- c. Four (4) years in the armed forces, police, or private security company in a contingency area with honorable discharge.
- d. Must possess a valid U.S. driver's license.
- e. Able to obtain an operator's license on military tactical vehicles.

6.6.2.4 Internal Roving Security Guard (OCN/LN): Performs internal roving guard services and must possess the ability to react to force protection threats. Armed roving security patrol personnel shall possess the following qualifications and be physically able to perform all duties:

- a. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Four (4) years experience in armed forces, armed police, or armed private security duties in armed conflict, post-conflict, or other comparable areas.

6.6.2.5 Guard Shift leader FVEY/NATO: Leads, directs, and supervises a team of guards performing internal security services. The shift leader shall represent all members of the Fixed Security Guard shift. Guard Shift Leaders is considered key personnel shall possess the following qualifications:

- a. Prior experience as an officer, non-commissioned officer, or team leader in armed forces, police, or private security company in a contingency area.
- b. Must possess experience of not less than ten (10) years total with at least four (4) years of Military background with honorable discharge and the remaining can be either military, police, and/or PSC Must have reached the grade of E-7 [NATO Code OR-7] or greater and successfully served in a supervisory role for at least one (1) year at the platoon level or equivalent, verified by military transcripts and evaluations.
- c. Shall be a citizen of a NATO member state, Australia, or New Zealand.
- d. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- e. The Guard Shift Leader shall interface directly with the U.S. Government supervisory personnel who shall be designated as the company POC.
- f. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.

6.6.2.6 Guard Shift leader OCN/LN: Leads, directs, and supervises a team of guards performing internal security services. The shift leader shall represent all members of the Fixed Security Guard shift. The Guard Shift Leader is considered key personnel shall possess the following qualifications:

- a. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Must possess experience of not less than ten (10) years total with at least four (4) years of Military background with honorable discharge and the remaining can be either military, police, and/or PSC. Must have reached the grade of E-7 [NATO Code OR-7] or greater and successfully served in a supervisory role for at least one (1) year at the platoon level or equivalent police, civilian police,

or private security company team leader level in a contingency area, verified by military transcripts and evaluations.

- c. The Security Guard Shift Leader shall interface directly with the U.S. Government supervisory personnel who shall be designated as the company POC.

6.6.2.7 Fixed/Mobile Guard (FMG) U.S. EXPAT: All guards shall possess the following qualifications:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- c. Three (3) years Military experience. Guard may substitute experience as a contract security guard in a contingency area for two (2) of the total three (3) years' experience. Law enforcement is also acceptable experience. Must have received an honorable discharge as verified by a form DD-214 (U.S. Military).
- d. Screeners shall be proficient at utilizing hand-held metal detectors, a walk-through metal detector, and high throughput personnel inspection systems (Rapid Scan).

6.6.2.8 FMG FVEY/NATO: All guards shall possess the following qualifications:

- a. Shall be a citizen of a NATO member state, Australia, or New Zealand.
- b. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- c. Military experience with honorable discharge or four (4) years of equivalent police experience or four (4) years of equivalent private security experience. Qualification or relevant experience are defined as follows:

Security Guard or Officer Experience: Working as a Security Guard or officer for a private security company, providing such services as access control, patrol, and response to incidents.

Loss Prevention or Asset Protection Experience: Working in a retail or commercial setting to prevent and investigate theft, vandalism, and other forms of property loss.

Executive Protection or Bodyguard Experience: Providing personal protection services for high profile individuals, such as executives, celebrities, or government officials.

Investigations Experience: Conducting investigations into incidents such as theft, fraud, or other forms of misconduct, either as a private investigator or as part of a security team.

Security Consulting Experience: Providing advice and guidance to organizations on security-related matters, such as risk assessments, security protocols, and emergency response planning.

Alarm Response or Monitoring Experience: Working in a central station or monitoring center, responding to alarm activations, and coordinating responses with law enforcement or other emergency services.

Private Investigation Experience: Conducting investigations into civil or criminal matters, such as infidelity, Worker-Compensation Claims, or background checks.

Security Management Experience: Overseeing security operations, including supervising security personnel, managing budgets, and developing security policies and procedures.

Emergency Response or Crisis Management Experience: Responding to and managing emergency situations, such as natural disasters, workplace violence, or other crises.

Law Enforcement or Military Experience: Relevant experience in law enforcement or the military can be considered acceptable private security experience, especially if it involves security-related duties such as patrol, investigations, or tactical operations.

6.6.2.9 FMG Other Country Nationals (OCNs): All Guards shall possess the following qualifications:

- a. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Military experience with honorable discharge or four (4) years of equivalent police experience or four (4) years of equivalent private security experience.

6.6.2.10 FMG Local National (LNs): All guards shall possess the following qualifications:

- a. Shall be a citizen of the duty location.

- b. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- c. Military experience with honorable discharge or four (4) years of equivalent police experience or four (4) years of equivalent private security experience.

6.6.2.11 Mobile Guard Driver (LN):

- a. Military experience with honorable discharge or four (4) years of equivalent police experience or four (4) years of equivalent private security experience.
- b. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- c. Must possess a valid host nation driver's license.
- d. Able to obtain an operator's license on military tactical vehicles.

6.6.2.12 Mobile Guard Medic:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Four (4) years Armed Forces experience in an emergency response unit (e.g., civil defense, police, fire, and rescue).
- c. Current qualification as Emergency Medical Technician equivalent to NREMT EMT.
- d. The acceptable nationality of the Mobile Guard Medic will be determined at the TO level.

6.7 Operations Center: The primary purpose of the Operations Center is to provide the military and other Government agencies with a central point of contact for monitoring and/or coordination of PSC activities in an area of combat operations or other significant military operations. As specified in TO, the Operations Center may serve as a central point of contact, at the operational, tactical, or installation level, which allows military commanders and similar government civilian personnel to gain awareness of, track, and coordinate the day-to-day movements and activities of PSC personnel.

Requirements for the Operations Center shall be specified in the TO. In general, an Operations Center shall be designed to fulfill one (1) of the following four (4) roles: (A) an individual or team that provides accountability for PSC personnel assigned to guard an installation and coordinates their activities with military or other government agency personnel on that installation; (B) a team or cell, generally embedded in a Military Base Defense Operations Center (BDOC) or other such organization, that provides 24/7 monitoring and coordination of PSC activities; (C) a team that augments the capability of the military or DOD civilian staff assigned to provide government oversight of PSC

personnel in an area of operations; or (D) an operations cell, either stand-alone or embedded within a military or other government agency operations center, that provides full capability to monitor and coordinate all PSC activities and movements in an assigned area.

As specified in the TO, the Contractor will establish, equip, staff, and operate an Operations Center to maintain situational awareness over and relay information and direction to PSC teams. The Operations Center will include the communications equipment and information technology compatible with military equipment, sufficient to perform the functions assigned in the TO, and capable of communicating with base operations/government counterparts. Forms of monitoring may include, but are not limited to, electronic, video, and personnel reporting. The Operations Center will maintain operational capability 24 hours per day, seven (7) days per week with on-duty personnel strength adequate to perform the situational awareness and information-sharing mission as specified in TO.

As specified in TO, the Operations Center may be required to provide constant monitoring of PSC activities, share and receive relevant threat information with government counterparts, maintain awareness of military and other Government activities that have the potential to impact PSC operations, and share information about PSC activities with military and other Government agencies, to de-conflict PSC and government activities, reduce the potential for fratricide, and improve the military's ability to provide support to PSC personnel should they become engaged in hostilities. Members of the Operations Center may be required to provide status reports, issue emergency notifications/warnings, and coordinate with other contractors and government agencies. As specified in TO, the Operations Center may be required to function as a central point of contact for military and government authorities, through which directions, such as PSC mission cancellation or modification, may be passed to specific PSCs and PSC teams. The Contractor shall provide any needed personnel, equipment, tools, materials, and supervision, as specified by the Contracting Officer, to perform the support functions under this PWS.

6.7.1 Operations Center Functions: At the installation level there will be an Operations Center to maintain situational awareness over the scheduling, deployment, and activity of the private security guard force on that installation. The Operations Center is also responsible for coordinating PSC guard force activity with military force protection operations. As part of this coordination, operations center personnel shall:

- a. Provide security-related information from the military force protection officer to appropriate PSC personnel;
- b. Transmit security-related information collected by PSC personnel to the military force protection officer;

- c. Provide daily accountability of all PSC guard force personnel to the COR;
- d. Maintain inventory and accountability of all PSC weapons at that installation and provide regular inventory reports to the COR, as specified in TO;
- e. Maintain accountability for all PSC vehicles, as specified in TO;
- f. Collect and develop reports and products about PSC operations as required in orders, directives, guidance, and standard operating procedures (SOPs), or as specified in TO;
- g. Prepare, maintain, and process serious incident reports from the PSC to the COR and military force protection officer.

For TOs that include mobile security, such as SETs, Convoy Security, and PSDs, the Operations Center will require advanced capabilities to assure the safe movement of persons and property protected by PSC personnel. As specified in the TO, the PSC may establish an Operations Center, or a cell within an existing Military/Government Operations Center, to facilitate information sharing at the operational level with the Joint Force Commander (JFC), or at subordinate levels in the chain of command, or with other government agencies. Such operations centers (or cells) will function more effectively if embedded within counterpart military/government Operations Centers (e.g., JFC Joint Operations Center (JOC), or subordinate command Tactical Operations Center (TOC)). In these cases, in addition to the tasks listed above, Operations Center (or cell) personnel shall:

- h. Share Controlled Unclassified Information (CUI) level intelligence information relevant to private security services and pass tactical information from PSC personnel to military intelligence and analysis centers.
- i. Coordinate with military and government personnel to maintain awareness of threat information and military/government activities affecting PSCs and Mobile Security/PSS teams within an area of operations. When appropriate, disseminate information or recommend PSC mission cancellation or modification to the appropriate government authority to prevent incidents.
- j. Receive movement requests from PSCs and disseminate them to appropriate battlespace owners for approval/disapproval. Provide positive confirmation of mission approval/disapproval to the PSC.
- k. Maintain situational awareness of PSC movements and ensure military forces are aware of PSC movements in their operational area.
- l. Provide a central point of contact for PSC personnel requesting military assistance. Assistance requests include but are not limited to support from the military Quick Reaction Force (QRF) and medical evacuation (MEDEVAC).

- m. Facilitate communication between PSC teams and military forces.
- n. Track PSC movement through a real-time tracking system using a global positioning system which includes a communications link with the Reconstruction Operation Center (ROC) if assistance is needed (e.g., Tapestry or similar Blue-Force Tracker compatible systems.)
- o. Maintain situational awareness of PSCs operating and moving within an assigned operational area, including tracking PSCs entering, transiting, and departing the assigned area.

6.7.2 Operations Center Requirements: The Contractor shall establish an Operations Center to liaise with and receive operational and tactical tasks from the Government, to support mission scheduling, planning, and execution, and to manage the operational, logistical, communications, and reporting requirements of SETs, PSDs, CETs, and Static Guards. The Operations Center shall resolve conflicting requirements according to Government-specified prioritization. The Operations Center must contain at least one (1) US Secret-cleared member on duty 24/7 to coordinate threat intelligence and conduct planning with CJFLCC-I J2, J3, and J3 Protection Cell as specified at the TO level. The Operations Center shall be responsible for accounting for the Contractor's personnel daily. The Contractor personnel accountability will be provided in the format and time specified by the government. These reporting requirements may change and/or be replaced with another of the U.S. Government preferences depending on mission needs.

6.7.3 Operations Center Personnel Qualifications:

6.7.3.1 Operations Center Chief: Manages Operations Center personnel, coordinates with military and Government counterparts on matters that relate to PSC activities, coordinates threat intelligence, and conducts planning with Intelligence, Operations, and Force Protection personnel (J2, J3, and J3 Force Protection) as appropriate. Responsible for accounting for the Contractor's personnel daily. The Contractor personnel accountability will be provided in the format and time specified by the Government. Responsible for ensuring that the Operations Center, as an organization, fulfills its duties as specified in TO and as applicable in section 2.5.1 of this PWS. The Operations Center Chief is considered key personnel and shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a U.S. citizen.
- c. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.

- d. Must possess experience of not less than ten (10) years' total with at least seven (7) years of Military background and the remaining can be either Military, police, and/or PSC. Must have received an honorable discharge and shall provide evidence of honorable discharge (form DD356) or release from active duty with honorable character of service (form DD-214) (U.S. Military) or comparable document from other FVEY Military forces.
- e. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.

6.7.3.2 Operations Center Assistant Chief: Assists the Operations Center Chief in the performance of his duties. The Operations Center Assistant Chief shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a U.S. citizen.
- c. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- d. Prior experience as an officer, warrant officer, or senior non-commissioned officer (E- 7 or higher) or team leader in armed forces, police, or private security company in a contingency area.
- e. Must possess a Military background of not less than four (4) years. Must have received an honorable discharge and shall provide evidence of honorable discharge (form DD356) or release from active duty with honorable character of service (form DD-214) (U.S. Military) or comparable document from other FVEY military forces.
- f. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible word browser.

6.7.3.3 Operations Center Watch Officer: Maintains accountability of all PSC personnel in an area of operations as specified in TO. Performs the applicable duties specified in section 2.5.1 of this PWS and as specified in TO. If specified in TO, the PSC must provide sufficient watch officers to cover 24/7 operations. A Watch Officer shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a U.S. citizen.

- c. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- d. Prior experience as an officer, warrant officer, or senior non-commissioned officer (E- 7 or higher) or team leader in armed forces, police, or private security company in a contingency area.
- e. Must possess a Military background of not less than four (4) years. Must have received an honorable discharge and shall provide evidence of honorable discharge (form DD356) or release from active duty with honorable character of service (form DD-214) (U.S. Military) or comparable document from other FVEY military forces.
- f. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.

6.7.3.4 Operations Center Assistant Watch Officer: Assists the Watch Officer in the performance of his duties. If specified in TO, the PSC must provide sufficient assistant watch officers to cover 24/7 operations. An Assistant Watch Officer shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a U.S. citizen.
- c. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- d. Prior experience as an officer, warrant officer, or non-commissioned officer (E-5 or higher) or team leader in armed forces, police, or private security company in a contingency area.
- e. Must possess a Military background of not less than four (4) years. Must have received an honorable discharge and shall provide evidence of honorable discharge (form DD356) or release from active duty with honorable character of service (form DD-214) (U.S. Military) or comparable document from other FVEY military forces.
- f. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.

6.8 Protective Security Detail (PSD) Qualifications:

6.8.1 PSD Shift Leader: is considered key personnel and shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.

- b. Shall be a U.S. citizen.
- c. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- d. Prior experience as officer, warrant officer, or senior non-commissioned officer with at least three (3) years of experience at the grade of (E7 [NATO Code OR-7] or higher) or team leader in armed forces, police, or private security company in a contingency area.
- e. Must possess experience of not less than ten (10) years' total with at least four (4) years of Military background with honorable discharge and the remaining can be either military, police, and/or PSC.
- f. Four (4) years' experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, Special Operations Forces, or Civilian Police.
- g. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.
- h. The PSD Shift Leader shall interface directly with the U.S. Government supervisory personnel who shall be designated as the company POC.

6.8.2 PSD Team Leader FVEY: is considered key personnel and shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a citizen of FVEY member state.
- c. Shall possess TOP SECRET or NATO COSMIC TOP SECRET clearance.
- d. Six (6) years' experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, or Special Operations Forces. Guard may substitute experience as a contract security guard in a contingency area for two (2) of the total six (6) years experience. Must have received an honorable discharge as verified by a form DD-214 (U.S. Military) or comparable document from other FVEY military forces.
- e. Advanced combat trauma/first aid equivalent to Combat Lifesaver/NREMT EMR.
- f. Must have reached the grade of E-7 (NATO Code OR-7) or higher and successfully served in a supervisory role for at least one (1) year at the platoon level or equivalent, verified by military transcripts and evaluations.
- g. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.

DEFINITION: A Contingency Area is any area that is within a Contingency Operation, per DoDI 3020.50 a Contingency operation "Pursuant to Section 101(a)(13)(a) of Title 10, United States Code, a military operation that is designated by

the Secretary of Defense as a contingency operation, or that becomes a contingency operation as a matter of law in accordance with Section 101(a)(13)(b) of Title 10, United States Code.”

6.8.3 PSD Guard U.S. EXPAT:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance (or NATO equivalency if applicable).
- c. Four (4) years experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, or Special Operations Forces. Must have received an honorable discharge as verified by a form DD-214 (U.S. Military). Advanced combat trauma/first aid equivalent to Combat Lifesaver/NREMT EMR.
- d. Must possess a valid U.S. driver’s license.
- e. Able to obtain an operator’s license on military tactical vehicles.

6.8.4 PSD Guard FVEY:

- a. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a citizen of a FVEY member state.
- c. Four (4) years’ experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, or Special Operations Forces.
- d. Must possess a valid driver’s license of the host nation or the state of nationality.
- e. Able to obtain an operator’s license on military tactical vehicles.

6.8.5 PSD Guard Medic:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a citizen of a FVEY member state.
- c. Four (4) years of armed Force experience.
- d. Four (4) years experience in Military Occupational Specialty or Armed Force Specialty Codes designated a combat medic or civilian certification equivalent to NREMT EMT.

6.9 Security Reconnaissance Teams (SRT) Guard Qualifications:

6.9.1 SRT Guard Team Leader U.S. EXPAT: is considered key personnel and shall possess the following qualifications:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a U.S. citizen.
- c. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance (or NATO equivalency if applicable).
- d. Six (6) years experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, or Special Operations Forces. Guard may substitute experience as a contract security guard in a contingency area for two (2) of the total six (6) years experience. Must have received an honorable discharge as verified by a form DD-214 (U.S. Military).
- e. Must have reached the grade of E-7 (NATO Code OR-7) or higher and successfully served in a supervisory role for at least one (1) year at the platoon level or equivalent, verified by military transcripts and evaluations.
- f. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.
- g. The SRT Guard Team Leader shall interface directly with the U.S. Government supervisory personnel who shall be designated as the company POC.

6.9.2 SRT Guard Medic:

- a. Shall be a Level 2+ in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a citizen of NATO member state, Australia, or New Zealand.
- c. Four (4) years of armed Force experience.
- d. Four (4) years experience in Military Occupational Specialty or Armed Force Specialty Codes designated a combat medic or civilian certification equivalent to NREMT EMT.

6.9.3 SRT Guard U.S. EXPAT:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance (or NATO equivalency if applicable).
- c. Four (4) years experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, or Special Operations Forces. Must have received an honorable discharge as verified by a form DD-214 (U.S. Military).
- d. Must possess a valid U.S. driver's license.
- e. Able to obtain an operator's license on military tactical vehicles.

6.9.4 SRT Guard FVEY:

- a. Shall be a Level I 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- b. Shall be a citizen of FVEY member state.
- c. Four (4) years' experience in Military Occupational Specialty or Armed Force Specialty Codes designated as combat arms, Military Police, or Special Operations Forces.
- d. Must possess a valid driver's license of the host nation or the state of nationality.
- e. Able to obtain an operator's license on military tactical vehicles.

6.9.5 SRT Guard Driver (LN):

- a. Four (4) years of Armed Force experience.
- b. Shall be a Level 2 in English unless otherwise outlined at the TO level. See Attachment 0008 – ILR.
- c. Must possess a valid host nation driver's license.
- d. Able to obtain an operator's license on military tactical vehicles.

6.10 Guard Site Assistant Manager: The Guard Site Assistant Manager assists the Guard Site Manager in the performance of his duties and executes the duties of the Guard Site Manager in his absence. Guard Site Assistant Managers may be required to work in an operations center or equivalent or force protection command watch floor in periods when the Guard Site Manager is off-duty or otherwise unavailable. At other times the Guard Site Assistant Manager will perform supporting managerial duties as directed by the Guard Site Manager at locations determined by the Guard Site Manager. Guard Site Assistant Managers are considered key personnel and shall possess the following qualifications:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- c. Team leader (or above) in armed forces, police, or private security company in a contingency area. Must have experience in armed forces, law enforcement, or private security services in contingency operations or eight (8) years experience at the Squad Leader level or above.
- d. Must possess a Military background of not less than four (4) years
- e. Must have demonstrated proficiency in Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.
- f. The Guard Site Assistant Manager shall interface directly with the U.S. Government supervisory personnel who shall be designated as the company POC.

6.11 Guard Site Manager: The Guard Site Manager is responsible to the COR and the installation force protection officer for the scheduling, supervision, and other direction and control of all vendor security personnel at that location. The Guard Site Manager is the planning and operational linkage between the Government and the Contractor for all contracted security functions. The Guard Site Manager schedules team composition and shift periods oversees transfer of responsibility between shifts, and reports to the COR and FPO on the status of the vendor's security force. Guard Site Managers may be required to work in an operations center or equivalent or force protection command watch floor. If required, the Guard Site Manager shall provide shift leaders to cover the operations center 24 hours per day, seven (7) days per week. Guard Site Managers are considered key personnel and shall possess the following qualifications:

- a. Shall be a U.S. citizen.
- b. If required at the TO level, shall possess an active U.S. Secret or Top-Secret Clearance.
- c. Prior experience as an officer, warrant officer, or senior non-commissioned officer (E- 7 or higher) or team leader in armed forces, police, or private security company in a contingency area.
- d. Must possess experience of not less than ten (10) years total, with at least six (6) years, of Military background with an honorable discharge and the remaining can be either military, police, and/or PSC Must have demonstrated proficiency of Microsoft Office Suite software to include Outlook, PowerPoint, Excel, Word, and compatible web browser.
- e. The Guard Site Manager shall interface directly with the U.S. Government supervisory personnel who shall be designated as the company POC.

6.12 Interpreters:

- a. Must be a Level 3 in English and the language for translation unless otherwise outlined at the TO level. See Attachment 0008 – ILR. Previous work experience with military, prefer in contingency environments, ability to attain clearance or pass a security check, physical fitness levels as detailed at the TO level.

Part 7 Contractor Working Dogs (CWDs)

7.1 Overview: Contractor shall provide Contractor Working Dogs, to include Explosive Detection Canines (CWD) and Drug Detection Canines (DDC), referred to as Contractor Working Dogs (CWDs), as part of the essential performance of this Contract and as required at the individual Task Order level. Specific requirements for Contractor Working Dogs will be identified in the Performance Work Statement issued with each Request for

Proposal, Solicitation, and Task Order issued under this Contract. All Contractors providing Contractor Working Dogs shall comply with all regulations, policies, and requirements, related to Working Dogs, as may be modified from time-to-time or superseded by new regulations, policies, and requirements. These regulations, policies, and requirements shall include, at a minimum, but not be limited to, the following:

Army Regulation 190-12 (AR 190-12)	Military Working Dog Program
Department of the Army Pamphlet 190-12 (DA PAM 190-12)	y Working Dog Program
10 USC §2387	Contract Working Dogs
AFI 31-126 DAFGM 2023-01	Department of the Air Force Guidance Memorandum to AFI 31-126, DoD Military Working Dog (MWD) Program
Department of the Air Force Instruction (DAFI) 31-126	DoD Military Working Dog (MWD) Program
DoDD 5200.31E	Military Working Dog (MWD) Program
	American Veterinary Medical Association (AVMA) Animal Welfare Principles
	American Veterinary Medical Association (AVMA) Companion Animal Care Guidelines
Army Regulation 40-905/Secretary of the Navy Instruction 6401.1B/AFI 48-131	Veterinary Health Services
Code of Federal Regulations (CFR) Title 9, Chapter 1, Subchapter A	Animal Welfare

Contractor shall have a positive obligation to remain apprised of all current regulations, policies, and requirements related to Contractor Working Dogs and shall ensure that their Contractor Working Dog program complies with all regulations, policies, and requirements at all times.

The Contractor shall provide CWD/Canine team services to search and detect explosives and related materials as well as to enhance the operational objectives and effectiveness of the protective and security operations. CWD/Canine teams may be utilized for, but not limited to, the following:

- a. Access control support for explosives detection (e.g., vehicles, visitors, material, etc.);
- b. Bomb threat and alarm responses;
- c. Open area searches; and
- d. Building and structure searches.

7.2 Work Scheduling:

7.2.1: Contractor shall ensure that Contractor personnel and explosives detection canines (CWDs) performing work under this Contract do not assume work under this Contract unless the individual or canine has been in a non-working status for a minimum of eight (8) consecutive hours prior to reporting for work.

7.2.2: Contractor shall ensure that all Contractor personnel and canines performing work under this Contract have one (1) twenty-four (24) consecutive-hour rest period after no more than six (6) consecutive workdays, to include training days.

During this rest period, personnel and canines shall not engage in any type of training, weapons qualification or practice, administrative functions, or perform any other work assignments. Food-reward canines are exempted from this restriction.

Specific workweek scheduling (i.e., X days on, X days off) and staffing patterns within the scope of this requirement will be established in the Task Order.

Contractors shall ensure that guard services personnel performing work under this Contract have a minimum of one (1) dedicated training day per month for necessary in-service training and firearm range time. This dedicated training day counts as a workday for billing purposes and meeting the above 6:1 schedule.

7.2.3: Contractor shall ensure that the length of work for CWD teams is consistent with the needs of CO/COR, taking into consideration the climate and terrain conditions which can enhance or reduce a team's effectiveness. This work schedule also does not include the handler's responsibility for record keeping, the canine's feeding, grooming, and daily health checks, as well as the inspection, maintenance, and cleaning of the canine's equipment, housing, and other facilities.

7.2.4: Contractor shall ensure handlers are not assigned additional duties that interfere with their canine-related duties during the standard work schedule.

7.2.5: Contractor shall ensure that any seventh day work request are coordinated through the Project Manager, CO/COR for approval.

7.3 Work Breaks:

7.3.1: Contractor shall schedule, record, and ensure that canines receive a twenty (20) minute biological break for every hour of work. However, if the temperature is over one hundred [and] five (105) degrees (°), then Contractor shall ensure that the canine receives equal biological break time to work time (e.g., after thirty (30) minutes of work the canine receives thirty (30) minutes of break time). This record shall be made available for Government inspection at the Task Order performance location.

7.3.2: Contractor shall schedule, record, and ensure that canines receive a twenty (20) minute biological break for every two (2) hours they are housed in a temporary enclosure (exception is hours of rest/ sleep for the CWD). This record shall be made available for Government inspection at the Task Order performance location.

7.4 Incorporate Explosives Detection Canine Team Certification Standards & Procedures:

7.4.1: Contractor shall train new CWD teams to detect explosives as specified in Attachment 0008, "Explosives Detection Canine Team Assessment and Certification Standards."

7.4.2 Recertification: The Government shall recertify the CWD teams as follows:

7.4.2.1: Every 365 calendar days following successful Government-performed initial certification or recertification at a customer-approved validation facility.

7.4.2.2: When an CWD team has been separated or has not conducted proficiency training together for forty (40) or more consecutive days.

7.4.2.3: Ensure that all CWD handlers attending the initial fourteen (14) day training and certification cycle at a customer-approved validation facility must attend the entire fourteen (14) days.

7.5 Equipment:

7.5.1: Contractors shall provide all required canine equipment to handlers upon arrival at the Task Order location. This includes, but is not necessarily limited to, leashes/leads, reward items, portable kennels, etc. A per-team list of items and quantities shall be provided upon issuance of the equipment.

7.5.2: The Contractor shall replace identified consumable canine equipment as Contractor Acquired Property (CAP), if applicable by contract, at the place of performance due to breakage, wear-and-tear, end of life cycle, etc. The Contractor shall be responsible for maintaining adequate replacement equipment in stock (OCONUS), which shall be addressed within the Task Order Task Order Management Plan (TOMP) and Standard Operating Procedures (SOP) to ensure sufficient supplies and equipment are available for the duration of the associated Task Order. Quantities of consumable canine equipment shall be reported as part of the quarterly inventory report.

7.5.3: Contractor shall provide canine life support at the place of performance in accordance with the GPS IDIQ contract, the associated Task Order, as well as the TOMP and associated SOPs.

7.6 Kennel Master:

7.6.1: The following is a description of the duties and responsibilities the Kennel Master for which the Kennel master shall be accountable. Applicable roles and responsibilities are outlined below, but are not limited to, additional assigned duties as instructed per the Project Manager:

1. Conducts roll call (Muster).
2. Supervise all canine staff (Kennel Masters and Handlers) assigned to their location. Works primarily in an administrative roll and is responsible for assisting the Project Manager in preparing all deliverables and submissions as required.
3. Monitor, review, and approve employee timesheets.
4. Manages and assign rooms for CWD personnel.
5. Prepare, review, and submit weekly work schedule to Project Manager.
6. Prepare, review, and submit Explosive Safety brief/schedule.
7. Reviews project in-service weekly explosive training (prepared by appointed Canine Trainer).
8. Conducts weekly/monthly explosive inventory and consumption reports.
9. Updates count sheets (monthly) and Composite Risk Management reports (quarterly).
10. Ensures all Courses of Action (COA) are being met
11. Handler counseling (initial / mid-terms) & employee evaluations.
12. Orders/forecasts supplies.
13. Conduct CWD explosive training.
14. Conduct post checks – three (3) per shift.
15. Schedules training [weapons/ Physical Evaluation Board (PEB)], and provides daily updates to Project Manager.
16. Submit and coordinate CWD Air Travel (Local & CONUS).
17. Accurately annotate and submit Incident Reports (IR) per policy.
18. Manage and maintain the kennel and facilities.
19. Conduct in-country training of program explosives detection canines.
20. Perform “daily” maintenance training (Vehicle Entrapment Training) and verify maintenance of canine training and utilization records.

21. Verify the maintenance of day-to-day health and welfare of assigned detection canines.
22. Maintain all assigned canine-related equipment.
23. Perform basic canine emergency first aid and first aid training as needed.
24. Responsible for the safe and efficient control, handling, and disposal of explosive training aids, ensuring that all training aids are handled, stored, and disposed of in accordance with established protocols/best practices.
25. Conduct an explosive inventory at least once per month, or at the request of Project Manager and/or government representative, when needed.
26. Ensure all handlers and their assigned responsibilities are in compliance with this SOP
27. Review and submit Weekly Field Report (WFR).

*Additional details will be determined at the TO level

7.6.2 The Kennel Master is considered key personnel and is in charge of the Contractor's Working Dog (CWD) program at the designated Task Order locations. Responsible for overall management of contract dogs, health, morale and welfare, team utilization, training, and coordination of services to support the program. The Kennel Master shall be responsible for administration, logistics, operations, physical security, health care and maintenance of all contractors, contract facilities and CWD teams. Kennel Masters shall have all of the following qualifications:

- 7.6.2.1 Must have at least 6 years prior military/law enforcement canine experience;
- 7.6.2.2 Must have a minimum of 4 years of experience as a handler;
- 7.6.2.3 Must have 2 years as a Kennel Master as denoted on his/her DD-214 (in accordance with AR 190-12);
- 7.6.2.4 Must have extensive knowledge of US Army EDD standards, AR 190-12, and DA PAM 190-12 Military Working Dogs; and
- 7.6.2.5 Must have experience in the certification of both dual and single purpose canines and teams.

7.7 Canine Trainer:

7.7.1: The Canine Trainer shall supervise the Task Order canine training program in accordance with the Contract. The Canine Trainer is directly responsible to the

Project Manager and reports to the Kennel Master where use of the CWD Team is permitted. The Canine Trainer shall be responsible for, but not limited to, the following:

7.7.1.1 Conduct initial training and testing/validation of canines in order to validate proper olfactory capabilities, behavioral suitability, and physical traits for entrance into the program.

7.7.1.2 Perform daily maintenance training (i.e., performance and explosives detection) and maintain training records for assigned detection canines.

7.7.1.3 Collect and maintain accurate records relating to the imprinting and training of Contract canines.

7.7.1.4 Maintain the day-to-day health and welfare of assigned detection canines.

7.7.1.5 Maintain all assigned canine-related equipment.

7.7.1.6 Perform basic canine emergency first aid as needed.

7.7.1.7 Maintain working knowledge of applicable Contract training and testing standards (as defined by Contract).

7.7.1.8 Look at duty schedule the night before training and in the morning before the start of training and plan accordingly. Provide a training plan brief to duty Kennel Master.

7.7.1.9 Review pro-report daily before and after training, and make an effective plan to meet training requirements.

7.7.1.10 Inform Kennel Master(s) of training location and time.

7.7.1.11 Send e-mail to relief trainer notifying him/her of the training location and intent of training.

7.7.1.12 Ensure Kennel Master(s) complete "daily" vehicle entrapment training.

7.7.1.13 Complete training validities.

7.7.1.14 Update pro-report after each shift "daily."

7.7.1.15 Upload all training documents to Share Point.

7.7.1.16 Ensure that all Contract canines hit each odor twice per month and conduct each venue twice per month. This is tracked on the monthly pro-report.

7.7.1.17 Ensure CWD Teams are receiving four (4) hours of detection training per week.

7.7.1.18 Ensure CWD Teams are receiving two (2) hours of obedience training per week.

7.7.1.19 Ensure the pro-report is e-Mailed to the Lead CWD Trainer no later than (NLT) Friday at midnight.

7.7.1.20 Mid-Month Review: CWD record review shall be completed by the 15th of each month by the Canine Trainer and Kennel Master.

7.7.1.21 End of Month Review: CWD Records shall be sent for final review to the Lead CWD Trainer NLT the 6th of each month by 0600 hours and shall send to the Project Manager for delivery to the USG.

7.7.2 CWD Trainer/Supervisor: The CWD Trainer/Supervisor is personally responsible for the planning, supervision, maintenance of training records, security of training aids, and the conduct of training CWD under the contract. The CWD Trainer/Supervisor shall verify that all training and certifications specific to Canine Handlers are maintained current and shall provide timely requalification training for recertification. The CWD Trainer/Supervisor also will perform the duties of an Assistant Kennel Master. The CWD Trainer/Supervisor will ensure the CWD training program is in keeping with the standards of AR 190-12, DA PAM 190-12 and (ATTP) 3-39.34, guidance outlined by the Certification Authority, and the CWD contract. The CWD Trainer/Supervisor will ensure that the CWD training program is geared towards the keeping with the principle of one dog — one handler. The CWD Trainer/Supervisor is directly responsible to the Kennel Master for the operation and maintenance of training aids, records, and training areas, exercise area, obedience course, and any other training areas or equipment that are included in the kennel facility. The CWD Trainer/Supervisor is responsible for maintaining accurate, complete and current training records, and for accountability of sensitive items. CWD Trainer/Supervisor shall have all of the following qualifications:

7.7.2.1 Must have a minimum of 4 years of experience as a handler;

7.7.2.2 Must demonstrate Level 3 English language proficiency.

7.7.2.3 Must be third party trained (e.g. prior military training 341st CWDTS or Municipal Government-Sponsored Course, North American Police working Dog Association (NAPWADA) United States Police working dog association (ESPCA) or equivalent);

7.7.2.4 Must have a minimum of 2 years of experience as a narcotics or explosives detector handler;

7.7.2.5 Must have over 2 years of experience as a military kennel master, as denoted on his/her DD-214;

7.7.2.6 Must have extensive knowledge of US Army EDD standards, AR 190-12, and DA PAM 190-12 Military Working Dogs; and

7.7.2.7 Must have experience in the certification of both dual and single purpose canines and teams and possess NAPWDA, master trainer or ISPCA certification.

7.8 Canine Handler:

7.8.1: CWD Handlers shall be responsible for, but not limited to, the following:

7.8.1 Provide on-compound detection of explosive materials;

7.8.2 Perform daily maintenance training (i.e., performance and explosives detection) and maintain training records for assigned detection canines;

7.8.3 Maintain the day-to-day health and welfare of assigned detection canines;

7.8.4 Maintain all assigned canine-related equipment (see Attachment at the TO level, Standard Equipment);

7.8.5 Perform and report basic canine emergency first aid as needed;

7.8.6 The Handler shall ensure that the CWD receives proper nutrition, grooming, training, medical care, affection, and living conditions;

7.8.7 The Handler shall maintain all issued equipment under his/her control in a clean and serviceable condition;

7.8.8 Handlers shall permit the Project Manager or Kennel Master to conduct on-site inspections of the CWD kennel or room to verify that conditions and equipment conform to the appropriate policy and procedure;

7.8.9 Whenever an CWD Handler departs for emergency circumstances and the CWD cannot accompany the team member, the handler is responsible for arranging for care and maintenance of the canine with the Kennel Master prior to departure;

7.8.10 When not on duty, CWD may be released from kennel crate while under direct supervision of the handler;

7.8.11 When a handler leaves the assigned CWD in his/her designated room unattended, the animal will be placed in the secure assigned kennel crate, and handler's room/CHU door shall be locked to prevent any negative canine-related situations from occurring;

7.8.12 Do not leave reward, toys, food, or any other objects in kennel crates;

7.8.13 Do not place objects on or around the kennel crate;

7.8.14 CWD Handlers will maintain a neat and professional appearance and demeanor that represents the high standards of the company and CWD section; and

7.8.15 CWD Handlers will bathe their CWD at a minimum, once per month, or as needed, or at the request of the Kennel Master.

7.8.2 Handler: Each Handler is personally responsible for his or her assigned dog. The Handler trains, employs, feeds, cares for, cleans, and otherwise maintains his or her assigned dog in every way. The dog depends directly on the Handler and, in keeping with the principle of one dog — one handler, the dog should never have to depend on anyone other than the assigned Handler. The Handler is responsible for the cleaning and maintenance of the dog's kennel. The Handler is directly responsible to the Kennel Master for the operation, maintenance, and cleaning of the kennels, kennel support building, training area, exercise area, obedience course, and any other areas or equipment that are included in the kennel facility. The Handler is responsible for maintaining accurate, complete, and current utilization records. Handlers shall have all of the following qualifications:

7.8.2.1 Must have a minimum of 2 years verified experience in dual purpose and single purpose canines in either law enforcement and/or military service;

7.8.2.2 Must demonstrate Level 2 English language proficiency;

7.8.2.3 Must be third-party trained (e.g. prior military training 341st CWDTS or Municipal Government-Sponsored Course, North American Police working Dog Association (NAPWADA) United States Police working dog association (ESPCA) or equivalent) as a narcotics or explosives detector handler prior to arriving at TO location;

7.8.2.4 Handler Certifications must include US military certification, North American Police Working Dog Association (NAPWADA), United States Police Working Dog Association (USPCA) or equivalent certification; and

7.8.2.5 Minimum of 1 year of experience as a narcotics or explosives detector handler.

7.9 Operational Assignments:

7.9.1: CWD Handlers shall be assigned duties by any of the following personnel:

7.9.1.1 Project Manager;

7.9.1.2 Kennel Master (KM);

7.9.1.3 Canine Trainer (CT);

7.9.1.4 Canine Government Technical Monitor (Government Technical Monitor); or

7.9.1.5 Government Contracting Officer.

7.9.2: CWD Handlers are responsible for the following:

7.9.2.1 Ensuring the safety of the CWD while deployed.

7.9.2.2 Ensuring that all CWDs shall be on-leash at all times unless in the CWD Handler's room, vehicle, or break area (see break area procedures for additional guidance).

7.9.2.3 Canine teams shall loudly and clearly announce themselves going around blind spots or entry/exit from an area. Example: "Canine Coming Around," or "Canine Coming Out/In."

7.9.2.4 While traveling with an CWD, the CWD Handler shall always maintain positive control of the CWD. If the CWD is not in a kennel or crate, the CWD shall always be leashed and muzzled if required, and physical control shall be maintained to restrict the movements of the CWD while in the vehicle.

7.9.2.5 It is the CWD Handler's or designee's responsibility to maintain the security, safety, and welfare of the CWD during all movements.

7.9.2.6 CWD Handlers deploying in the field shall have the opportunity not to deploy the canine when requested by leaders. This option can be used if the task is above the scope of their deployment capabilities, or if they have a safety concern that they feel unnecessarily places them in harm's way.

7.9.2.7 Ensure the safety of themselves through adequate protective gear, equipment, and firearms as authorized.

7.9.2.8 Ensure he or she is physically fit and capable of performing mission tasks as assigned prior to mission.

7.9.2.9 When applicable, ensure complete, accurate, and timely Incident Reports (IR's) are reported to the Project Manager, Kennel Master, or Canine Trainer as soon as possible. Photographs, when authorized by the Project Manager, shall be provided in the Incident Report. Reports shall answer who, what, when, where, why, and how. All reports shall be drafted in accordance with the approved contract report format.

7.10 Explosives Detection Canine Deployment:

7.10.1 CWD utilization shall be in accordance with Contract standards:

7.10.1.1 SCWDs shall search vehicles, buildings, bags, and any other articles deemed necessary.

7.10.1.2 An explosive detection canine shall conduct searches as deemed necessary by the Project Manager, Kennel Master, and Canine Trainer while on site.

7.10.1.3 When responding to an CWD search location, the CWD Handler shall be briefed with as much information as possible prior to making the decision for deployment.

7.10.1.4 When possible, the CWD Handler and CWD shall conduct a search of the evacuation area prior to moving people into the evacuation area (Evacuation Secondary Sweep).

7.10.1.5 A CWD is a detection asset and shall not be used as an assessment indicator or confirming device. Suspected explosive packages or devices shall not be moved and shall not be searched by the canine team (wires protruding, ticking sound, or leaking dangerous substances). EOD (Explosive Ordinance Disposal) personnel shall be contacted by the respective KTR POC and/or RSO TOC.

7.10.1.6 A positive response or "alert" shall not be subject to inspection by additional CWD Teams. One positive response results in the aforementioned notification process.

7.10.1.7 CWDs shall never call an area "CLEAR". Only Explosive Ordinance Disposal (EOD) and appropriate government staff/representatives can deem an area clear.

7.11 Accidental CWD Canine Bites and Injuries:

7.11.1: In the event of an accidental canine bite or injury caused by an CWD, the Handler shall do the following:

7.11.1.1. If the incident occurs while on duty, notify the Kennel Master and see that the injured person receives immediate medical treatment immediately. The Kennel Master shall collect all vital information, to include that of the injured party(ies) and witness statements. Photographs shall be taken of the injuries prior to and after treatment. Contact the Project Manager as soon as possible.

7.11.1.2. The duty Kennel Master shall generate an Incident Report (IR) within (2) hours of the incident.

7.11.1.3. Following a canine bite, the CWD shall be taken to the veterinary clinic for an examination and quarantine directive.

7.12 Request for CWD Support (Property, Facilities and Events)

7.12.1: The Kennel Master, through the Project Manager, shall coordinate the request for canine support. The requesting personnel must provide a statement of justification for the request via e-mail to the duty Kennel Master. The Kennel Master shall coordinate approval based on the justification through the Project Manager. The Project Manager shall communicate the request for CWD support through the Kennel Master, KO, and COR.

7.13 Medical Care:

7.13.1 Emergency Canine Medical Care: In the event of an emergency, the CWD shall be taken to the nearest veterinarian or veterinarian technician for emergency medical treatment. The Kennel Master or Canine Trainer shall be notified immediately when emergency care is required. The Project Manager shall be notified at the first available opportunity.

7.13.2 Non-Emergency Canine Medical Care: All non-emergency CWD medical related concerns shall be reported to the Kennel Master. If the Kennel Master deems the medical situation requires more advanced treatment, a request for service with the Veterinarian staff shall be made and the CWD Handler shall be directed to proceed to the veterinary clinic. The Kennel Master shall notify the Project Manager.

7.13.3: Yearly canine vaccinations shall be administered to all CWDs while in country by the available veterinary staff. Monthly preventive medications shall include medication for heartworm and parasite diseases that shall be administered by the handler under the guidance of the Kennel Master.

7.13.4: All records of medical treatment shall be maintained by the veterinary staff.

7.14 Transportation of Canines:

7.14.1 CONUS & OCONUS Movements: All canines shall be transported between CONUS and country of contract on commercial airlines or government air support with prior approval and agreement between CO/COR. All canines shall be escorted by a member of the canine team for the entire duration of travel, unless otherwise approved by government representative.

7.14.2 In-country movement: While transporting CWD in a vehicle, to include all terrain vehicles (ATV), the CWD shall be transported in a secure canine kennel crate. The crate may consist of plastic, metal, or wooden material with removable warning signs stating "Caution --- Working Dog" in both English and applicable host nation language(s) on all sides and the rear of any and all vehicles used to transport canines, unless otherwise directed by CO/COR/Canine Government

Technical Monitor. When in open cargo areas of vehicles, the Contractor shall ensure the canines are properly secured in size-appropriate kennels that are appropriately ventilated and allow climatic conditions suitable for a canine's breed and conditioning to be maintained. When traveling in a passenger vehicle, the vehicle shall maintain operational air conditioning and ensure that canines are not left unattended in a vehicle.

Note: In the situation that a kennel crate is not available, the CWD Handler will maintain complete control of the leash and, if required or needed, shall muzzle the canine throughout the duration of the movement. At no time shall the canine be left unattended in a vehicle.

7.15 Kennel Maintenance:

7.15.1 Building maintenance: The Kennel Master shall conduct a daily inspection of the canine office and kennel facilities. Any item in need of repair shall be reported to the proper agency and it shall be the responsibility of the duty Kennel Master to ensure the necessary maintenance is completed. Handlers shall report any facility discrepancies to the Kennel Master. Emergency or after-hours urgent work requests shall be reported directly to the Project Manager.

7.15.2 Kennel Sanitation: Contractor personnel shall be especially careful to dilute bleach at 1:32— one-part bleach to 32-parts water—and thoroughly rinse surfaces after its use (bleach may corrode metal cages, ruin clothing, and even irritate dogs' nasal passages and upper airways.) Contractor personnel shall then thoroughly apply the solution to all surfaces of the kennel. If utilized, kennel runs, including the exterior runs, shall be cleaned daily and whenever stool and urine is present in the kennel runs. Drainage troughs shall be washed down anytime stool or urine is present. Contractor personnel shall squeegee floors to remove all surface water from internal kennel area and runs. All canines shall be given enough breaks throughout the day to prevent urine and feces from being deposited in the kennel runs. Kennel runs, air crates, break areas, etc. shall be cleaned following any temporary use to house a canine. Temporary housing shall be thoroughly cleaned and left in an appropriate state for continued usage. Sanitation of break area utilizing bleach-water solution shall be conducted daily.

7.16 Semi-Annual In-Service Explosive Safety Training:

7.16.1 Contractor-provided Semiannual In-service Explosives Safety Training – The Contractor shall:

7.16.1.1 Prepare a Projected In-service Explosives Safety Training Schedule in Microsoft Excel format that identifies, at a minimum, planned training date(s), training location, and the names of the instructors and students, and submit it (via e-mail). The completed training schedule shall be submitted to the CO, COR, and Government Technical Monitor by noon on Friday of the week prior to when the training is scheduled. When any

changes are made to this schedule, the CO/COR and the Government Technical Monitor shall be immediately informed (verbally).

7.16.1.2 Deliverable - Quarterly (January, April, July, October), an In-service Training Status Report, tracking the completion of such training, shall be prepared in Microsoft Excel format and submitted (via e-mail) to the CO, COR and Government Technical Monitor.

7.16.1.3 Ensure that CWD personnel who fail to complete the mandatory semiannual in-service training within the required time frame are not assigned to work under the TO until they have completed and have been certified as having completed such training. The mandatory semiannual in-service training requirement begins once the Contractor's personnel commence work on the TO, through the end of the 180 calendar days following, and then begins again on the first day following while the individual is still working on the TO.

7.17 Contractor-provided Explosives Detection Canine Proficiency and Obedience Training

7.17.1: Contractor shall provide and ensure that Contractor CWD teams performing work under this Contract complete a minimum of four (4) hours of proficiency detection training each week. The TO will identify the types and provider of the training aids required for proficiency training.

7.17.2: Contractor shall coordinate the use of Government facilities for CWD training with, and receive pre-approval from, KO/COR/ Government Technical Monitor.

7.17.3: Contractor shall ensure that the Kennel Master or canine trainer monitors a representative sample of the handler-conducted proficiency training sessions to identify and correct deficiencies and improve performance. If deficiencies are noted, Contractor shall develop a training plan to eliminate identified weaknesses. If increased training frequency or length of time is required to correct deficiencies, Contractor shall adjust the canine's utilization requirements to accommodate such increased training needs and advise the Government Technical Monitor (via e-mail).

7.17.3: Contractor shall prepare an Explosives Detection Canine Training Record for each CWD team to log the completion of all proficiency training. Contractor shall maintain this record in the team's file in accordance with the Section C – Statement of Work, for Government inspection. At a minimum, the training record shall identify the:

7.17.3.1. Handler and canine's name;

7.17.3.2. Training and detection tasks/categories;

7.17.3.3. Date and total amount of time devoted to detection training on each specific task/category for each day, including the monthly total for each specific task/category;

7.17.3.4. Detection areas utilized (e.g., vehicle, buildings, containers, open area, packages, etc.);

7.17.3.5. Number of training aids planted, as well as the number of correct or false/missed responses;

7.17.3.6. Monthly canine detection proficiency computation. The canine's proficiency is computed monthly by adding the total number of correct responses, "a" for the month, and adding the total number of false/missed responses, "b" for the month. The two numbers "a" (for total correct responses) and "b" (for total false/missed responses) are used in the following formula to obtain the canine's proficiency rating: $(a) \div (a+b) \times 100 = \text{proficiency rating}$. For example, during the month the canine made ninety-three (93) correct responses on training aids. The canine also had four (4) false and three (3) missed responses on training aids. Applying these two (2) numbers ($a=93$ and $b=7$) to the formula, the following is obtained: $(93) \div (93+7) \times 100 = 93$ percent. This shows that the canine is working at a ninety-three (93) percent proficiency rating; and

7.17.3.7. Provide and ensure that CWD teams performing work under this contract complete a minimum of two (2) hours of obedience training each week. Ensure that obedience training is not conducted during the proficiency detection training or the exercise period.

7.17.4: In the absence of an assigned handler, Contractor shall ensure that the Kennel Master or canine trainer exercises and conducts proficiency and obedience training with the unassigned canine until the handler returns or is replaced.

7.18 Personnel and Explosives Detection Canine Team Record Keeping Systems - Online Personnel Record Keeping System

7.18.1: The Contractor shall establish, maintain, and use a secure web-based personnel record keeping system for filing required records (e.g., documents, certifications, records, etc.) related to all candidates selected to work under this Contract. This system shall have controls to ensure the integrity, accuracy, authenticity, and reliability of the documents maintained within.

7.18.2: The Contractor shall retain paper copies of any documents that cannot be clearly or completely transferred into this system.

7.18.3: The Contractor shall allow access to this system only to contract-specific personnel or CO identified (in writing) customer personnel who have a need to know.

7.18.4: The Contractor shall retain these files in accordance with FAR 52.215.2, "Audit and Records - Negotiation."

7.19 Task Order Explosives Detection Canine Team File:

7.19.1: The Contractor shall establish a unique permanent file for each CWD team working under the Contract. Basic elements of this file shall include, but not be limited to, the following:

7.19.1.1. Name;

7.19.1.2. Photograph;

7.19.1.3. Microchip number;

7.19.1.4. The name and address of the person/company from whom the canine was purchased or otherwise acquired, as well as the US Department of Agriculture (USDA) license or registration number of the person/company;

7.19.1.5. The date on which the canine was acquired, arrived/departed the TO performance location, was adopted, retired, or euthanized;

7.19.1.6. The identity of the method of transportation to and from the Task Order performance location, including the name of the intermediate handler, if applicable; and

7.19.1.7. Handler's name(s) and corresponding dates of assignment(s).

7.19.2: The Contractor shall ensure that all certifications, proficiency assessments, training, and utilization records are kept in this file.

7.19.3: The Contractor shall ensure that all such files are kept current and maintained at the Task Order performance location for the duration of the canine's performance under the Contract in any capacity and made available to the Government upon request or for examination. Contractor shall ensure that the file transfers with the canine on every permanent assignment to another Task Order performance location.

7.19.4: The Contractor shall maintain this file in a centralized location at the performance location as well as an identical file at the CONUS PMO.

7.19.5: The Contractor shall retain these files in accordance with FAR 52.215.2, "Audit and Records - Negotiation."

7.20 Veterinary care for Task Order CWD operations shall include:

7.20.1. Medical and surgical care at the Task Order performance location;

- 7.20.2. Inspection of kennel facilities and CWD housing areas;
- 7.20.3. Professional review of plans for new construction and modification of kennels, support buildings, and sites;
- 7.20.4. Prescribing an adequate feeding program;
- 7.20.5. Prescribing an adequate weight management program; and
- 7.20.6. Instructing canine handlers and supervisors in all matters related to the health of CWDs.
- 7.20.7: The veterinarian shall provide treatment for the diseased or injured CWD at the kennel site or the veterinary medical treatment facility.
- 7.20.8: An examination shall be completed just before shipment/transport. A health certificate shall be issued for the state or country into which the canine is shipped/transported.
- 7.20.9: Canines shall be examined to detect injury or disease and support the safe shipment and continued good health of the canine.
- 7.20.10: Canines shall be routinely immunized against contagious diseases. Immunizations shall begin at the procurement or training facility and shall continue regularly throughout the canine's service life.
- 7.20.11: The zoonotic control program refers to prevention and control of diseases and conditions common to man and other animals (i.e., Rabies).
- 7.20.12: Quarterly, the veterinarian shall inspect the kennel facility to ensure standard sanitation measures are implemented and maintained. The veterinarian shall ensure that insect and rodent control efforts are adequate, and general health of the canines maintained. When a veterinarian is not available, the Project Manager and Kennel Master shall conduct the inspection with the Canine Government Technical Monitor.
- 7.20.13: Quarterly inspection shall include the following elements:
- 7.20.13.1. Examination of the kennel facilities for safety hazards and distractions that may interfere with the rest and relaxation of the canines;
 - 7.20.13.2. Review of the adequacy of the kennel structure (particularly for environmental conditions), and the adequacy of feeding and watering schedules. Make recommendations to prevent disease and injury; and
 - 7.20.13.3. The veterinarian shall instruct handlers about canine health, care, feeding, and first aid. This instruction helps the handler to have a better understanding of the canine's health needs and improves the handler's ability to care for the canine.

7.21 Ideal Weight Range (IWR):

7.21.1: Each CWD shall be weighed weekly on a day specified by the veterinarian and annotated in the weekly weight chart. An average weight limit +/- 5 pounds is preferred. This limit shall be determined by the veterinary staff, to include input from the Kennel Master.

7.21.2: The Duty Kennel Master shall assess Body Conditioning Scale (BCS) on a weekly basis and shall provide an IWR change request to the DVM and/or CVT. Any IWR adjustments shall be approved through the DVM and CVT. The Project Manager shall be notified of any and all IWR adjustment approvals via e-mail.

7.22 Feeding Procedures:

7.22.1: Each handler shall be responsible for feeding their assigned CWD daily with the prescribed portion of food that maintains their working weight.

7.22.2: Purina Pro Plan 30/20 Dog Food is the recommended food for Explosive Detection Canines (CWD) under the canine program, unless specifically directed otherwise by the veterinarian. At the time a handler takes custody of their canine at the CONUS port of departure, they shall be provided three (3) days dog food to cover unexpected delays in travel. Contractor shall be responsible for supplying the authorized food on post and ensure all CWDs continue the prescribed diet while serving OCONUS.

7.22.3: At no time shall an CWD be fed human food for consumption unless authorized by veterinary staff. All feeding requirements shall be annotated on the CWD Training and Utilization Record indicating the daily amount consumed by the CWD.

7.22.4: **(2)-Hour Window Rule:** CWDs shall not be fed within two hours before, or two hours after, strenuous activity (i.e., training, excessive search, etc.).

7.22.5: If an CWD requires medication, the CWD Handler shall be responsible for administering such and annotating on the CWD Training and Utilization Record.

7.23 Personnel Safety and Incident Prevention:

7.23.1: Handlers shall make clear and loud verbal announcements when:

7.23.1.1. Walking with CWD;

7.23.1.2. Exiting and Entering any room or building with CWD; and

7.23.1.3. Going around corners/blind corners.

7.23.2: In the event a handler loses positive control of his/her CWD within a building (i.e., the CWD slips out of collar, pulls the leash from handler's hand, etc.), the following shall happen immediately:

7.23.2.1. The handler shall immediately sound off "Loose Dog," and regain positive control of CWD;

7.23.2.2. The handler, and/or other handlers in the area, shall attempt to block the CWD until the handler regains positive control of CWD; and

7.23.2.3. Once positive control of the CWD gained, the handler (or his designee) shall immediately notify the Kennel Master and Project Manager of the incident.

7.23.3: No more than one CWD shall be housed in an individual room/living space.

7.23.4: CWDs shall be secured whenever non-CWD personnel enter the CWD Handler's room.

7.23.5: At no time shall non-CWD personnel be allowed to feed, walk, or give commands to CWD.

7.23.6: Lighting shall be sufficient, effectively illuminating all areas surrounding the housing area of CWD, walkways leading to break areas, and the internal portion of the break areas. There shall be an emphasis on corners to ensure that on-leash CWDs do not encounter one another while walking around corners.

7.23.7: CWDs on quarantine status shall not use break areas used by non-quarantined CWDs.

7.23.8: Non-quarantined CWDs shall not have access to areas used to break quarantined CWDs.

7.24 CWD Abuse and Reporting:

7.24.1: At no time shall any person physically abuse an CWD. Physical abuse is the striking of an CWD with any object or kicking, hitting, or punching. Abuse also may be defined as using an excessive amount of physical force such as throwing the CWD either to the ground or into a fixed object. Suspected abuse of any CWD shall immediately be reported to the Kennel Master, who shall report it up the chain of command.

7.24.2: The Kennel Master shall investigate any injury to an CWD sustained from the application of force. The Kennel Master shall approve any unusual or unorthodox training methods construed as excessive, abusive, or inappropriate before utilization.

7.25 Quarantine and Infectious Disease Response:

7.25.1: At no time shall quarantined CWDs interact in any way with non-quarantined CWDs, including separate:

7.25.1.1. Break areas;

7.25.1.2. Portable kennels used to transport to post;

7.25.1.3. Portable kennels used to house while on post;

7.25.1.4. Food bowls; and

7.25.1.5. Water bowls.

7.25.2: Any area accidentally contaminated by a quarantined CWD shall be immediately sanitized using a sanitizer approved by the veterinarian.

7.25.3: Any signs of disease or abnormal CWD behavior shall be immediately reported to the Kennel Master.

7.25.4: It is highly recommended that in cohabitation situations, quarantined CWDs shall be housed during this time at a remote location that conforms to the standards set forth above in the “CWD Housing in a Kennel Facility” section.

7.25.5: The veterinary clinic shall only be used as a quarantine facility as a last resort. Quarantining in the veterinary clinic could contaminate the clinic for all other CWDs entering the clinic during the quarantine period; therefore, this strategy should be used with caution.

7.25.6: The veterinarian shall ensure that all CWDs are current on the following, and shall administer or conduct them if deficient:

7.25.6.1. Monthly heartworm and flea/tick preventatives;

7.25.6.2. Required vaccinations; and

7.25.6.3. Required medical tests (e.g., heartworm and/or fecal testing, blood work).

7.25.7: If a CWD is diagnosed with, or suspected of harboring an infectious disease, the CWD shall be immediately quarantined from other CWDs.

7.25.8: Quarantined CWDs shall be placed on ‘medically unfit for duty’ status (i.e., CAT III) and not assigned to a post or training until released from quarantine by the veterinarian.

7.25.9: Handlers assigned to these quarantined CWDs shall have no interaction with other non-quarantined CWDs.

7.25.10: The quarantine area will be disinfected and sanitized once the CWD is released from quarantine.

7.25.11: The veterinarian shall be responsible for ensuring the integrity and effectiveness of the quarantine area and sanitation procedures.

7.25.12: At no time shall there be any interaction between quarantined and non-quarantined CWDs.

7.26 Veterinary Care, Trauma Management and Emergency Response Procedures:

7.26.1: Veterinary Care and CWD Identification:

7.26.1.1 Identification: All CWDs shall be implanted with a microchip for permanent identification. Microchips shall be the 15-digit type and will conform to ISO standard 11784 and 11785 microchip readers.

7.26.2: Routine, preventative, urgent, and emergent CWD veterinary care while the CWD is performing under a Task Order shall be the responsibility of customer-provided or customer-approved veterinary service.

7.26.3: Routine examinations, vaccinations, and other treatments shall be coordinated between the Kennel Master and the veterinarian.

7.26.4: The Kennel Master shall keep on hand at all times the veterinarian's phone number, e-mail address, and other relevant contact information. This information shall also be discreetly located in the feed prep room.

7.26.5: All CWDs shall be evaluated at least annually for fitness-for-duty (semi-annual examinations are recommended).

7.26.6: Vaccinations - At a minimum, all CWDs shall be vaccinated with the below vaccines at the listed frequencies. It is understood that various Task Orders could require vaccines over and above the standard requirements (e.g., Lyme disease). All vaccines shall be USDA-approved products and shall be administered according to label instructions.

7.26.6.1. Rabies (annually);

7.26.6.1.1. Triennial rabies administration, though available, does not comply with the regulations of numerous countries that CWDs move through (e.g., Iraq, Afghanistan, UAE, Jordan, Bahrain).

7.26.6.1.2. All rabies certificates shall be maintained in the E-vet software application.

7.26.6.2. Distemper, Parvovirus, Adenovirus, Parainfluenza (annually);

7.26.6.3. Bordetella (annually);

7.26.6.4. Leptospirosis 4-way (annually);

7.26.6.5. Canine influenza H3N8 (annually); and

7.26.6.6. Canine influenza H3N2-recommended (annually).

7.26.7 Medical Tests: – All CWDs shall have the following medical tests administered annually. When required by the Task Order, additional medical tests shall be conducted. Records and results shall be documented in the E-vet software application.

7.26.7.1 Heartworm test;

7.26.7.2 Fecal parasite check;

7.26.7.3 Hematology count; and

7.26.7.4 Serum chemistry analysis evaluating the following at a minimum:

7.26.7.4.1 Blood glucose;

7.26.7.4.2 Kidney function; and

7.26.7.4.3 Liver function.

7.26.8: The veterinarian shall be responsible for establishing an ideal weight range (IWR) for each CWD. This IWR can be changed at any time at the veterinarian's discretion. This IWR shall be used by Kennel Masters when establishing feeding amounts and frequencies for their assigned CWDs.

7.26.8.1 Medications:

7.26.8.1.1 The veterinarian shall notify the Kennel Master of all prescribed medications. The Kennel Master shall ensure that the handler administers the medication correctly and in accordance with label instructions.

7.26.8.1.2 All controlled medications shall be stored in a secured location.

7.26.8.1.3 All medication administration will be noted on the appropriate feed/medication chart.

7.26.8.2 Pain Management:

7.26.8.2.1 The veterinarian shall be responsible for ensuring that all CWD pain is managed appropriately; both acute (e.g., postoperative) and chronic (e.g., hip arthritis) pain.

7.26.8.2.2 The veterinarian shall also work with the CWD's Kennel Master, trainer, and handler to ensure that pain management strategies are effective.

7.26.8.2.3 Handlers shall never administer any medications, pain or otherwise, to their CWD without a veterinary prescription.

7.26.8.2.4 Veterinarians shall always maintain sufficient supplies and quantities of effective CWD pain therapies.

7.26.8.2.5 If pain cannot be managed effectively long-term (e.g., hip arthritis, post-operative surgical pain) then the CWD shall be immediately considered for demobilization.

7.26.8.2.6 “Therapeutic pain” and similar strategies shall not be utilized.

7.26.9 Routine Maintenance: – On a monthly basis, the Kennel Master shall ensure that the following occur. The Kennel Master shall seek veterinary guidance on grading criteria and standards for the ears and teeth evaluation.

7.26.9.1 CWDs shall be weighed and compared to IWR, and weights shall be recorded into the Routine Maintenance section of E-vet; and feeding amounts/frequencies shall be changed as needed. Any feed changes shall be noted in E-vet and Utilization Records.

7.26.9.2 CWD’s ears and teeth shall be evaluated and graded on a Good, Fair, Poor scale.

7.26.10 Parasite Control and Preventatives: – All CWDs shall be administered heartworm, flea, tick, biting fly, mosquito, and intestinal parasite preventatives. These preventatives shall be administered at the appropriate dose and frequency according to the CWD’s weight and the preventative labeled instructions.

7.26.11: Handlers shall be familiar with normal body functions of CWDs such as temperature, appetite, fecal consistency and frequency, and general attitude of their CWD.

7.26.12: Normal vital signs and parameters for most CWDs are as follows:

7.26.12.1 Resting heart rate should be between sixty (60) and ninety (90) beats per minute.

7.26.12.2 Rectal temperature should be between one hundred degrees Fahrenheit (100°) and one-hundred-and-four degrees (104°) Fahrenheit.

7.26.12.3 Resting (non-panting) respiration rate should be between ten (10) and thirty-six (36) breaths per minute.

7.26.12.4 Deviations shall be immediately reported to the Kennel Master, and it shall be the responsibility of the Kennel Master to seek veterinary consultation immediately.

7.26.13: In the event of an CWD emergent medical condition, the handler shall immediately contact the Kennel Master and he/she shall request support from the most accessible veterinarian at the given moment.

7.26.13.1 The Kennel Master shall be responsible for informing the Project Manager. The Kennel Master shall be required to complete an incident report.

7.26.13.2 In the event of an CWD medical emergency at a location without a permanent veterinarian, the Kennel Master shall exhaust every effort to

either coordinate veterinary care at their remote location, or to coordinate immediate CWD MEDEVAC to the veterinarian's location. The veterinarian shall be ultimately responsible for the decision of whether to MEDEVAC the CWD, or to provide care on-site.

7.26.13.3 The decision to muzzle an CWD in an emergent situation shall be determined by either a veterinarian or an appropriately trained Kennel Master.

7.26.14: Emergency first aid training shall be provided to handlers semiannually at a minimum. Training records shall be maintained by the Kennel Master and veterinarian. Each of the following topics shall be covered annually:

7.26.14.1 Basic physical exam, trauma assessment, basic first aid & first aid kit use;

7.26.14.2 Gastric Dilatation and Volvulus (GDV, i.e., "Bloat");

7.26.14.3 Traumatic fracture stabilization;

7.26.14.4 Hemorrhage management and bandaging;

7.26.14.5 Airway management, and respiratory/chest cavity emergencies;

7.26.14.6 Heat and cold injury prevention and management;

7.26.14.7 Muzzle application and use during emergencies; and

7.26.14.8 Envenomation injuries, including snakes, scorpions, spiders.

7.26.15 First aid kits: CWD first aid kits shall be maintained as follows:

7.26.15.1 An CWD first aid kit shall be available at each CWD kennel facility, and work or training site (can be located in a training vehicle);

7.26.15.2 First aid kits shall not be left at search locations unless they are stored within a secure, locked facility;

7.26.15.3 First aid kits are intended to provide basic initial care for injuries and shall not be equipped with prescription drugs; and

7.26.15.4 Attending veterinarians shall ensure that first aid kits are at the appropriate locations and contain the appropriate supplies.

7.27 CWD Death and Euthanasia:

7.27.1 Euthanasia:

7.27.1.1 A veterinarian shall have the authority to euthanize an CWD when deemed medically appropriate.

7.27.1.2 CWDs shall only be euthanized in accordance with the most current AVMA-approved euthanasia techniques.

7.27.1.3 The veterinarian shall only euthanize an CWD after the following:

7.27.1.3.1 The IDIQ Program Manager and relevant governmental entities have been notified and consent to on-site euthanasia; and

7.27.1.3.2 Written consent has been received from the Project Manager.

7.27.1.3.3 An intravenous catheter shall be placed prior to administration of intravenous euthanasia solutions.

7.27.2 Death from Unknown Causes:

7.27.2.1 Should an CWD die suddenly from unknown causes, or have a medical condition requiring emergent euthanasia, a necropsy shall be performed by a veterinarian within 24 hours.

7.27.2.2 The remains shall not be frozen prior to necropsy. Every effort shall be made to keep the remains cool.

7.27.2.3 Results of the necropsy shall be annotated in the CWD's medical record and added to the already completed IR as an attachment. The veterinarian shall provide suggestions as to any corrective measures that may have been taken.

7.27.2.4 Once a necropsy is completed, the CWD's remains shall be either buried in a dignified area, free of pedestrian or vehicle traffic, with a small marker (planted flowers, shrub, posted plaque, flag, etc.) or cremated in a medical grade incinerator in which its cremains may be returned to the Kennel Master. Once the ashes are recovered, a determination shall be made as to a dignified location to spread the cremains or the relinquishment of the cremains to the CWD's handler.

7.28 Emergency Response Procedures:

7.28.1 Canine bite incidents: In the event that an CWD bites a human or another CWD, then the following shall happen immediately:

7.28.1.1 The CWD shall be immediately placed in a kennel/cage;

7.28.1.2 The incident shall be immediately reported through the handler's management channel;

7.28.1.3 The CWD shall be examined by a veterinarian within 24 hours and placed on a working bite quarantine (WBQ) for a duration of 10 days;

7.28.1.4 The CWD shall be allowed to train while on WBQ, but the CWD shall not leave the handler's assigned duty area during that time (i.e., the

CWD cannot depart for R&R, go on missions, etc.), or go to any place that would potentially lead to the CWD biting another human or CWD.

7.28.1.5 The veterinarian shall examine the CWD again at the end of the WBQ to assess fitness-for-duty.

7.28.1.6 Response plan for various serious incidents, possibly requiring evacuation – These response plans shall vary greatly depending on location, Prime Contractor, the presence of government entities, and resources. Under no circumstances shall CWDs be left behind if kennel personnel evacuate. It is also highly recommended that CWD teams (handlers and CWDs) not be geographically separated during any evacuation.

7.28.2: A local, site-dependent SOP or response plan shall be tailored to the location, security treat(s) and treat level, historical seismic activity, and climate threats. This SOP shall be developed and closely coordinated between the site veterinarian, Kennel Master, and Government Technical Monitor (if applicable). Once these SOPs are developed, documented drills shall be conducted periodically. These SOPs shall include the following:

7.28.2.1 Plans to secure the safety of the CWDs at all times;

7.28.2.2 Implementation of alternative kenneling;

7.28.2.3 Providing basic needs (food, water, shelter, exercise) to CWDs; and

7.28.2.4 Providing emergent veterinary care to CWDs before, during, and after a potential evacuation.

7.28.3: Incident command shall be established in accordance with local policy. It shall be the ultimate responsibility of the Kennel Master to ensure the response plan is effectively initiated within the CWD unit.

7.28.4: Handlers shall respond and report directly to the Kennel Master in these situations.

7.28.5: In events where advanced planning is possible, every effort shall be made to conduct these procedures efficiently and calmly, keeping the safety of the CWDs, handlers, and other CWD personnel at the forefront.

7.28.6: The Kennel Master shall keep on hand, fully stocked and ready to deploy, kits containing all necessary items to safely evacuate every CWD on their TO. These kits shall include, at a minimum, the following:

7.28.6.1 One portable kennel for every CWD assigned to the TO;

7.28.6.2 One muzzle for every CWD assigned to the TO;

7.28.6.3 Canine food in quantities sufficient to sustain all CWDs assigned to the TO for 14 days;

7.28.6.4 Potable water in quantities sufficient to sustain all CWDs assigned to the TO for 48 hours;

7.28.6.5 In areas where outdoor temperatures are below 50°F, one blanket large enough to cover the kennel in quantities sufficient for all CWDs; and

7.28.6.6 Powered air system, NBC-resistant covers for portable kennels, in quantities sufficient for every CWD assigned to the TO.

7.28.7: The Kennel Master, veterinarian, and veterinary technicians (if applicable) shall work closely to develop, stock, and maintain an emergency evacuation veterinary kit. This kit shall include, at a minimum, items necessary to triage and initiate treatment for the following:

7.28.7.1 Traumatic puncture wounds and/or lacerations to the head, thorax, abdomen, and extremities;

7.28.7.2 Arterial hemorrhage;

7.28.7.3 Shock;

7.28.7.4 Heat and cold injuries;

7.28.7.5 Dehydration and fluid resuscitation;

7.28.7.6 Cardiopulmonary resuscitation (CPR);

7.28.7.7 Conditions requiring sedation;

7.28.7.8 Minor medical conditions (e.g., antibiotics, GI medications);

7.28.7.9 Painful conditions and/or conditions requiring any type of pain management; and

7.28.7.10 Euthanasia. (Note: see above section referencing applicable requirements to CWD euthanasia. These procedures still apply in an emergent situation covered in this section.)

7.28.8: In the event of any situation where an CWD evacuation is ordered, the veterinarian shall stay on-location with the CWDs at all times. The veterinarian and Kennel Master shall leave with the CWDs or the last group of CWDs (if CWDs are evacuated in groups). If a veterinary technician is present or available, this individual shall serve as the advance party to the evacuation point.

7.28.8.1 The veterinary technician shall be responsible for working with relevant personnel on determining the location of, and initiating the establishment of, a temporary CWD triage/treatment location.

7.28.8.2 The technician (or individual assigned by the Kennel Master or veterinarian) shall also identify temporary break areas for the CWDs so that they can be removed from their portable kennels to urinate/defecate once evacuated to the future location.

7.28.9 Duties and/or plans during specific disasters:

7.28.9.1 Fire – In the event of a fire in, around, or threatening an area housing CWDs, the following shall be responsible for:

7.28.9.1.1 Kennel Master:

7.28.9.1.1.1 Immediate ordering of evacuation of CWDs to previously established rally point (RP) away from the area with the fire;

7.28.9.1.1.2 Immediate accountability once at the RP, and reporting through management channels; and

7.28.9.1.1.3 Coordinating the evacuation of any CWD whose handler is either away from the area, or CWDs that are unassigned.

7.28.9.2 Handlers:

7.28.9.2.1 Upon receiving direction from the Kennel Master, moving with their assigned CWD to the previously established Reporting Post.

7.28.9.3 Veterinarian and Veterinary Technician:

7.28.9.3.1 Veterinarian shall maintain accountability of the veterinary technician, and assist with all aspects of the evacuation;

7.28.9.3.2 Advise the Kennel Master and handlers on when/if to muzzle CWDs; and

7.28.9.3.3 Prepare to triage and treat respiratory conditions related to smoke inhalation or other burn injuries.

7.28.10 Serious Security Situations (e.g., explosions or ground assaults by multiple personnel):

7.28.10.1 Major emphasis in these serious security situations shall be:

7.28.10.1.1 CWD accountability and ensuring that CWDs are never left behind unless necessary to save your life or other human beings.

7.28.10.1.2 Follow all instructions from the incident command team.

7.28.10.1.3 CWDs shall accompany their handler to their previously established Reporting Post, whether that be a 'duck and cover' bunker, or other consolidation point.

7.28.10.1.4 The Kennel Master shall maintain accountability of all handlers and CWDs.

7.28.10.1.5 Handlers shall carry a muzzle with them at all times during these situations and be prepared to muzzle their CWD with short notice, and when deemed appropriate.

7.28.10.1.6 If applicable, veterinary personnel shall remain with the CWDs, staying in close contact with the Kennel Master. Veterinary personnel shall be equipped with trauma kits and triage equipment, treating CWDs as deemed necessary.

7.28.11 Weapons of mass destruction or NBC/CBRN attacks:

7.28.11.1 The Kennel Master shall respond to instruction from the established entities (e.g., CO/COR or Site Security Manager), maintaining accountability of handlers and CWDs.

7.28.11.2 CWD teams shall only be moved upon the direction of incident command.

7.28.11.3 Kennel Masters and handlers shall be prepared to move one portable kennel for every CWD to the Reporting Post (if necessary).

7.28.11.4 Veterinary personnel shall heed all guidance from incident command and be prepared to immediately deploy to the area where the CWDs are located.

7.28.11.5 In the event that an CWD requires decontamination, the veterinarian and/or veterinary technician shall assist, ensuring that steps are taken to ensure the CWD's safety.

7.28.11.6 Muzzles shall be used with extreme caution in these types of situations.

7.28.11.7 If deemed appropriate by incident command, the veterinarian and Kennel Master shall oversee the application of NBC-resistant covers over each CWD's portable kennel. As an alternative, CWDs shall be placed in a room, tent, or similar facility capable of providing an equivalent measure of protection.

7.28.12. Natural disasters (flooding, flash flooding, hurricanes, typhoons, earthquakes):

7.28.12.1 Follow all instructions of the incident command team;

7.28.12.2 See above for evacuation procedures, should an evacuation be ordered in advance of a natural disaster, or in response to a similar incident.

7.28.11.3 As these responses are primarily reactionary, accountability is paramount. The Kennel Master shall ensure accountability of handlers and CWDs before (if necessary), during, and after these incidents.

7.28.11.4 All CWD injuries shall be reported to veterinary personnel, who will respond appropriately.

7.28.11.5 Handlers shall not evacuate or relocate to a Reporting Post without their CWD. Handlers are responsible for ensuring the safety of their CWD, reporting all injuries or illnesses to veterinary personnel.

7.28.11.6 Handlers shall make every effort to keep their CWD calm in these situations.

7.29 Physical & Mental Conditioning

7.29.1 Due to numerous factors, including their breed, work-drive, age, and maturity, CWDs need access to physical and mental conditioning programs. This will help to ensure peak performance and enhance longevity. All conditioning programs shall be at the discretion of the Kennel Master. The Kennel Master shall consult with the veterinarian to ensure all conditioning programs are safe, appropriate, and beneficial to the CWD. Veterinarians shall have the authority to alter, temporarily suspend, or recommend alternatives to any exercise program based on medical conditions or mission performance.

7.29.2 All CWDs shall be taken out, given breaks, walked, or otherwise allowed to urinate/defecate a minimum of 3 times per day. The maximum allowed interval between breaks shall be not more than 4 hours unless the Handler is finished with their shift and sleeping for the evening.

7.29.3 All CWDs, whether in training or deployed, shall be given the opportunity to exercise for a minimum of 30 minutes per day. This shall be the responsibility of the Handler.

7.29.4 Time spent working a training problem shall not count towards this 30-minute minimum.

7.29.5 All CWDs shall be walked or exercised for a minimum of 30 minutes per day.

7.29.6 Examples of a complete physical conditioning program include a combination of the following:

7.29.6.1 Leash walks at normal pace; at a longer duration. This aerobic conditioning will enhance stamina/endurance, musculoskeletal performance, and cardiac function.

7.29.6.2 “Kong toss”/fetch/line drills; short duration. This anaerobic exercise builds cardiopulmonary performance, musculoskeletal performance, and serves as an excellent way to “burn off energy.” An obedience course or exercise area, when used appropriately, also helps to enhance performance.

7.29.6.3 Jogging, medium-longer duration. The CWD is kept at a steady “trot” for longer and longer periods at the CWD’s own pace and distance. This can be done by jogging with the handler. The CWD shall be closely observed during these times for exhaustion or overheating.

7.29.7 Mental stimulation and conditioning are also paramount to an CWD’s longevity and success. The following shall be used for mental stimulation and conditioning. These activities can concurrently provide mental and physical enrichment.

7.29.7.1 Allowing the CWD to relax outdoors in an area where they can observe outdoor surroundings and breathe fresh air.

7.29.7.. Obedience course or exercise area use.

7.30 Retirement and Adoption – Government Furnished Property (GFP) Canine

7.30.1 GFP CWD canines providing services under this Contract shall be retired:

7.30.1.1 On the day the canine reaches seven (7) years of age.

7.30.1.2 Deliverable - When the Contractor’s veterinarian has recommended that a canine be retired because of injury or disease. The veterinarian may also recommend the appropriateness of euthanasia in lieu of retirement if a condition is likely to leave the canine in pain or with a very poor quality of life. Prior to retiring or euthanizing any canine, the Contractor shall notify (via e-mail) CO/COR and Government Technical Monitor and receive approval (via e-mail) from CO/COR before retiring or euthanizing any canine. The following list of examples may be causes for retirement (it is not inclusive):

7.30.1.2.1 Hip problems

7.30.1.2.2 Back and neck problems

7.30.1.2.3 Arthritis

7.30.1.2.4 Physical and/or psychological abnormalities

7.30.1.2.5 Epilepsy/seizures (zero tolerance)

7.30.1.2.6 Skin conditions

7.30.1.3 Deliverable - The Contractor shall make and document every effort to place a retired canine with a suitable owner or US adoption agency, where the canine will be safe and cared for. Prior to placement, the Contractor shall inform (via e-mail) CO, COR, and Government Technical Monitor of the canine's adoption information, including the location's identity and contact information, for approval. The Contractor shall place a retiring canine by using the following options for placement in order of priority:

7.30.1.3.1 The current handler

7.30.1.3.2 Other U.S. handlers to the respective canine being retired:

7.30.1.3.2.1 Handler with the longest cumulative deployment time.

7.30.1.3.2.2 Other U.S. Handlers in order of succession (based on deployment time).

7.30.1.3.2.3 Any other interested current canine staff member or Project Manager. ***The COR shall make the final decision if two or more parties are interested.***

7.30.1.3.2.4 Contractor personnel.

7.30.1.3.2.5 US Government employees.

7.30.1.3.2.6 US canine adoption agencies.

7.30.1.4 Government Provided Retirement Assistance – Upon retirement, CWDs are eligible to receive a full medical exam and any required corresponding treatment, within the scope of the Government's capacity, and availability. Examination results may be retained by the Government for research purposes. If requested by the Contractor, the Government may assist in arranging for adoption of retired CWDs. Contractors may not seek reimbursement for the cost of the canine, associated training, transportation, care, or any other previously funded costs. The Contractor may not exceed previously negotiated transportation and demobilization costs. All requests for examinations or adoption assistance must be coordinated a minimum of thirty (30) days in advance through the CO/COR, unless otherwise authorized by the CO.

7.30.1.5 In the event a recommendation is made by either the assigned veterinarian, Kennel Master or Project Manager to have a canine demobilized from a project for medical purposes, the Task Order Project

Manager or CONUS Program Manager will submit a disposition request. The disposition request shall be sent to the CO/COR/Canine Government Technical Monitor via e-mail.

7.30.1.5.1 The detailed medical notes shall be received from the veterinarian for inputting. The Project Manager or CONUS Program Manager shall input sections regarding behavior and training.

7.30.1.5.2 Veterinarians shall also have the option of providing the Project Manager with memorandums stating that an CWD has limited work expectancy remaining. The Project Manager shall use these memorandums for things such as forecasting CWD procurement and future handler assignment, arrangements for demobilization, and locating an adoptive home for CWD's once officially retired – pending USG approval.

7.30.1.5.3 At no time shall a veterinarian request an CWD be demobilized for any reason other than medical. Training deficiencies, non-medically related behavioral deficiencies, and aggression demobilizations are the responsibility of the Kennel Master and/or trainer with review and approval via the Project Manager. The Disposition request shall be sent to the CO/COR via e-mail.

7.31 Retirement and Adoption Policy (Disposition) – Contractor Acquired Property (CAP) Canine

7.31.1. The Contractor shall provide their intended individualized disposition plans for all CAP canines to the appropriate COR and CO for review and approval prior to implementation. The Contractor shall provide complete disposition records for all CAP canines to the appropriate COR and CO immediately upon disposition. If there have been any canines retired, repurposed, euthanized, or have left the Task Order for any other reason throughout the life of the Task Order, the Contractor shall ensure disposition letters and proof of disposition are supplied as required by the terms and conditions of the IDIQ contract. The disposition request shall be sent to the CO/COR via e-mail.

7.31.2 CAP CWD canines providing services under this Contract shall be retired:

7.31.2.1. On the day the canine reaches seven (7) years of age.

7.31.2.2 Deliverable - When the Contractor's veterinarian has recommended that a canine be retired because of injury or disease. The veterinarian may also recommend the appropriateness of euthanasia in lieu of retirement if a condition is likely to leave the canine in pain or with a very poor quality of life. Prior to retiring or euthanizing any canine, the

Contractor shall notify the CO, COR, and Government Technical Monitor via e-mail and receive approval from the CO/COR before retiring or euthanizing any canine. The following list of examples may be causes for retirement (it is not inclusive):

7.31.2.2.1 Hip problems

7.31.2.2.2 Back and neck problems

7.31.2.2.3 Arthritis

7.31.2.2.4 Physical and/or psychological abnormalities

7.31.2.2.5 Epilepsy/seizures (zero tolerance)

7.31.2.2.6 Skin conditions

7.31.2.3 Deliverable - The Contractor shall make and document every effort to place a retired canine with a suitable owner or US adoption agency, where the canine will be safe and cared for. Prior to placement, the Contractor shall inform the CO and COR by e-mail of the canine's adoption information, including the location's identity and contact information, for approval. The Contractor shall place a retiring canine by using the following options for placement in order of priority:

7.31.2.3.1 The current handler:

7.31.2.3.1.1 On the day the (CAP) canine reaches five (5) years of age or the CWD Handler has completed five (5) consecutive contract-approved recertification Passes with the canine being requested for adoption/retirement.

7.31.2.3.2. Other U.S. handlers to the respective canine being retired:

7.31.2.3.2.1. Handler with the longest cumulative deployment time.

7.31.2.3.2.2 On the day the canine reaches five (5) years of age or the CWD Handler has completed five (5) consecutive contract-approved recertification Passes with the canine being requested for adoption/retirement.

7.31.2.3.2.3 Other U.S. Handlers in order of succession (based on deployment time).

7.31.2.3.2.4 Contractor personnel.

7.31.2.3.2.5 US Government employees.

7.31.2.3.2.6 US canine adoption agencies.

7.31.2.4 Government Provided Retirement Assistance – Upon retirement, CWDs are eligible to receive a full medical exam and any required corresponding treatment, within the Government's capacity and availability. Examination results may be retained by the Government for research purposes. If requested by the Contractor, the Government may assist in arranging for adoption of retired CWDs. Contractors may not seek reimbursement for the cost of the canine, associated training, transportation, care or any other previously funded costs. The Contractor may not exceed previously negotiated transportation and demobilization costs. All requests for examinations or adoption assistance must be coordinated a minimum of thirty (30) days in advance through the CO/COR, unless otherwise authorized by the CO.

7.31.2.5 In the event a recommendation is made by either the assigned veterinarian, Kennel Master or Project Manager to have a canine demobilized from a project for medical purposes, the Task Order Project Manager or CONUS Program Manager, will submit a disposition request. The disposition request shall be sent to the CO/COR/ via e-mail.

7.31.2.5.1 The detailed medical notes will need to be received from the veterinarian for inputting. The Project Manager or CONUS IDIQ Program Manager shall input sections regarding behavior and training.

7.31.2.5.2 Veterinarians shall also have the option of providing the Project Manager with memorandums stating that an CWD has limited work expectancy remaining. The Project Manager shall use these memorandums for things such as, forecasting CWD procurement and future handler assignment, arrangements for demobilization, and locating an adoptive home for CWD's once officially retired, pending USG approval.

7.31.2.5.3 At no time shall a veterinarian request an CWD be demobilized for any reason other than medical. Training deficiencies, non-medically related behavioral deficiencies, and aggression demobilizations are the responsibility of the Kennel Master and/or trainer with review and approval via the Project Manager. The disposition request shall be sent to the CO/COR/Canine Government Technical Monitor via e-mail.

Part 8 Training Requirements

NOTE: Specific training requirements, beyond the basic requirements outlined in this Section, will be defined and established at the individual TO level based on the location, services to be provided, and threat level. In addition to self-training the Contractor may be required to provide training to partner nation forces or US Military forces as determined at the TO level.

8.1 Weapons and Weapons Training: This section is required for all employees who are required to be armed under the scope of this Contract and/or personnel who have been granted authorization to be armed for self-defense. Before assuming duties, each employee must be granted arming authorization per applicable COCOM and subordinate command arming OPODs and FRAGOs. The Contractor will also ensure that the training listed in this Part 7 has been conducted and documented for each person working for the Contractor or as a subcontractor.

8.2 Individual Weapons Training: All armed personnel are required to qualify semiannually with their assigned weapons. In-country firearms re-qualification firing will be arranged and take place at the local Military range, if available, at the TO level. Re-qualification locations will be prescribed at the TO level, based on availability and location. Qualification training must include instructions on safety functions, capabilities, limitations, and maintenance of the firearm to be carried. Personnel must be qualified IAW standards for their assigned weapon as described in the appropriate Department of the Army (or appropriate authority detailed at the TO level) weapons training manual or training circular for that weapon. DA-PAM 350-38 Chapter 8 provides guidance

regarding minimum acceptable training time and ammunition requirements for this training. Initial individual weapons qualification must be completed before beginning duty pursuant to a specific TO, with correctly completed scorecards per Standard Arming Authorization requirements. Initial qualification will be through live fire. Semiannual and sustainment training can be by live fire or firearm training device (e.g., EST- 2000 or authorized equivalent) as approved by the Contracting Officer and as resources allow. Units will document quarterly dry fire or simulator marksmanship training. Firearm training device semi-annual sustainment qualification is only permissible if live fire ranges are not available.

Armed personnel will qualify IAW ST 19-LEWTAQ, Law Enforcement Weapons and Training Qualifications, 9 February 2017 (See Attachment 0010 – Annex Private Security Company Weapons Qualifications Standards). All PSD members will conduct monthly sustainment training for all weapons used by the team. Training will include quick response drills and off-hand firing. Training will include dry fire drills and live fire or approved simulator training, such as the EST 2000 or approved equivalent.

All armed guards will familiarize themselves with other weapons that they may be required to use while on duty or during response situations (for example, crew-served weapons, rifles, shotguns, and nonlethal weapons). Weapons familiarization will be conducted IAW standards for their assigned weapon as described in the appropriate Department of the Army weapons training manual or training circular for that weapon. Armed personnel who are required by the nature of their duties to carry protective masks will familiarize themselves with firing their assigned weapon while wearing protective masks at least annually according to the standards described in applicable Department of the Army weapons training manuals or training circulars described above.

8.3 Crew-Served Weapons: Where Contractors have access to crew-served weapons, training and qualification shall be conducted by the Contractor. Crew-served weapons and ammunition are government-owned, military organizational equipment. No waivers should be expected. The contractor(s) shall be prepared and able to conduct this training, unless otherwise directed.

8.4 Instructor Qualifications: Firearms instructors must be properly credentialed and accredited as firearms instructors by civil law enforcement, military, or a nationally recognized firearms safety and training organization (such as the Federal Law-Enforcement Training Centers (FLETC) Firearms Instructor Training Program (FITP), or the National Law-Enforcement Firearms Instructor's Association (NLEFIA), Firearms Instructor's Training, or equivalent. The Contractor may provide its own firearms instructor certification as long as the Contractor can provide support that it is equivalent to the listed certifying organizations.

8.5 Rules for the Use of Force (RUF) and Use of Force Training: The Contractor will document individual training in the particular RUF applicable to the TO and COCOM, and training in applying the RUF. RUF and Use of Force training will be scenario-based and require subjects to apply appropriate levels of force in response to realistic, stress-induced simulations. Subject material must cover Section 3 of DoDD 5210.56 w C1 (2022), Arming and the Use of Force Section A.9.5.2 of ANSI/ISIS PSC 1-2022, or (as applicable), A.8.7.3 of ISO 18788. Training must be accomplished before individuals assume duties and annually thereafter.

8.6 Annual Training:

8.6.1 Antiterrorism Level 1 (General): All Contractor employees, to include subcontractor employees, requiring access Army installations, facilities, and controlled access areas shall complete AT Level I awareness training within 30 calendar days after contract start date or effective date of incorporation of this requirement into the contract, whichever is applicable. The Contractor shall submit certificates of completion for each affected Contractor employee and subcontractor employee, to the COR or to the contracting officer, if a COR is not assigned, within 14 calendar days after completion of training by all employees and subcontractor personnel. AT level I awareness training is available at the following website: <http://jko.jten.mil>

8.6.2 Antiterrorism Awareness Training for US Based Contractor Personnel Traveling Overseas: US based Contractor employees and associated sub-Contractor employees to make available and to receive Government-provided area of responsibility (AOR) specific AT awareness training as directed by AR 525- 13. Specific AOR training content is directed by the combatant commander with the unit ATO being the local point of contact.

8.6.3 OPSEC Level 1: Per AR 530-1 Operations Security, the Contractor's employees must complete Level I OPSEC Awareness training. New employees must be trained within 30 calendar days of their reporting for duty and annually thereafter.

8.6.4 iWATCH Training: The Contractor and all associated sub-Contractors shall brief all employees on the local iWATCH program (training standards provided by the requiring activity ATO). This local developed training will be used to inform employees of the types of behavior to watch for and instruct employees to report suspicious activity to the COR. This training shall be completed within 60 calendar days of Contract award and within 30 calendar days of new employees commencing performance with the results reported to the COR NLT 90 calendar days after Contract award.

8.6.5 Army Training Certification Tracking System (ATCTS) Registration: All Contractor employees with access to a government information system must be registered in the ATCTS Army Training Certification Tracking System) at

commencement of services and must successfully complete the DOD Information Assurance Awareness prior to access to the IS and then annually thereafter.

8.6.6 Information Assurance Training: All Contractor employees and associated subcontractor employees must complete the DoD IA awareness training before issuance of network access and annually thereafter. All Contractor employees working in IA/IT functions must comply with DoD and Army training requirements in DoDD 8570.01, DoD 8570.01-M and AR 25-2 within six months of appointment to IA/IT functions.

8.6.7 Treat Awareness Reporting Program Training: Per AR 381-12 Threat Awareness and Reporting Program (TARP), Contractor employees with active US clearances must receive annual TARP training by a CI agent or other trainer as specified in 2-4b.

8.7 Other Training:

8.7.1 Law of War (LOW) and Law of Armed Conflict (LOAC): The Contractor will document individual training in the Law of War/Law of Armed Conflict (LOAC) appropriate to armed civilians in conditions of armed conflict. Training will include the status of PSC personnel as civilians under the LOAC, the consequences of direct participation in hostilities by civilians, and individual responsibility for violations of LOAC. Training shall minimally cover the information in Department of Defense Directive 2311.01. Training must be accomplished before individuals assume duties and annually thereafter.

8.7.2 Tactics Techniques and Procedures: Contractors will provide quarterly refresher training in the tactics, techniques, and procedures appropriate to the particular duty position and TO. Training references are included in the list of reference materials incorporated in this PWS.

8.7.3 Driver's Training: A Master Driver (MD) will be responsible for the Contractor's driver training and certification program as applicable in Declared Contingency environments or when tactical vehicles are provided as GFE as detailed at the TO level. The MD should have at least three (3) years of personal security operator experience and provide proof to the Contractor of certification as a driver instructor. The MD's certification should cover the concepts and principles of defensive driving, evasive driving, forward and reverse 180-degree turns, mobile and static ramming, offensive driving (front and rear contacts), route selection and planning, route mapping, braking, etc. Drivers must have experience in armored vehicles and the ability to adapt training requirements and driving tactics to the changing threat environment. NOTE: Detailed requirements

for driver training, beyond the basic requirements outlined in this section, shall be defined and established at the TO level.

8.7.4 Other Required Annual Training: Contractors will provide annual training for all contractor personnel and subcontractors in the following areas:

- a. Contractor standards of conduct and ethics.
- b. Applicable national law.
- c. Status of forces agreement applicable to the TO.
- d. Response force organization, mission, deployment, tactical movement, and use of force.
- e. Use of and defense against riot control agents.
- f. Defense against accidental or intentional use of chemical, biological, radiological, nuclear, and high-yield explosive devices, including the use of personal protective equipment when provided.
- g. Hazardous materials awareness.
- h. Unarmed self-defense and restraint techniques.
- i. Active Shooter Response.

8.8 Plans and Exercises: Contractors will be required to provide a planner/liaison to designated COCOM-level planning exercises. The Contractor representative must possess current clearance of SECRET or higher and be competent to provide advice on Contractor deployment and employment capabilities. Requirements for the Contractor to support exercises will be announced no later than thirty (30) days before the event.

8.9 Documentation and Review: The training and qualifications of each individual will be documented by the Contractor and will be readily available for review. Documentation will be made available to the Contracting Officer or their designee. Contractor training courses and supporting material will be available for the Contracting Officer or their designee and installation/facility Force Protection Officer for review. Documentation of all training for PSC personnel will be maintained on file for as long as the individual is employed by or assigned to the installation.

Contractors shall allow the Contracting Officer or their designee, or other designated US Government representative, to enter any Contractor facility in the COCOM to review and evaluate the Contractor's performance, training, and/or maintenance of armed Contractor records.

Part 9 Mobilization/Demobilization

9.1 Operational Capability: Each TO will define 100% operational capability. The contractor shall fulfill the personnel requirement outlined in the specific TO. The

Contractor shall maintain a pool of qualified personnel to mitigate shortfalls due to rest and recuperation (R&R), emergency leave, and other unforeseen restrictions.

9.2 Mobilization: Specific mobilization plan requirements will be determined at the TO level – no mobilization plan is required at the IDIQ level. The Contractor shall plan to provide an initial mobilization plan within as directed in the TO. Full Operational Capability (FOC) timelines will be defined at TO award.

For personnel who are not U.S. citizens and other OCNs, mobilization details will be provided at the TO level.

IAW DOD guidance, all U.S. Contractor personnel deploying to, or redeploying from theater in support of forward-deployed troops are required to process through CRC at a CONUS site designated by the Government. The Contractor shall comply with the Headquarters Department of the Army EXORD 171-14 CONUS Replacement Center (CRC) consolidation. CRC cannot be conducted in Contractor owned and/or operated facilities unless waived, or unless another agency's policies and procedures prescribe a different requirement.

The Contractor is responsible for mobilizing all personnel. Requirements for the OCONUS Replacement Center (CRC) will be determined at the TO level.

9.2.1 Military Airlift: Usage is restricted to the deployment and re-deployment of Contractor personnel only, and does not include travel for leave, R&R, sick leave, emergency leave, etc., unless alternative travel arrangements are made with Contracting Officer concurrence. Military air is not authorized for use by Contractor personnel who require travel due to debarment from the installation or relief for cause unless alternative travel arrangements are made with Contracting Officer concurrence.

9.2.2 Conference Calls: The Contractor shall participate in weekly conference calls with the contracting office, and COR to facilitate transition and initiation of Contractor duties to better understand the mission and transition of the team successfully.

The Contractor is responsible for providing all training as detailed in the PWS for all personnel before the arrival at the in-country performance location. Training for sites that require any crew-served weapons qualification (familiarization training must be provided by the Contractor before the arrival in theater) will take place once employees arrive at the performance location.

The Contractor shall ensure all deploying contracted personnel, before entering Host Nation, have been issued contractor-provided protective gear, helmet, gas mask, and any other personal protective equipment required. This requirement will be determined at the TO level.

9.2.3 Mobilization Implementation: After submission of the mobilization plan, the Contractor shall provide written information to the Contracting Officer and COR weekly that addresses the Contractor's mobilization progress. The Contractor shall continue to provide the information in the preceding sentence until the Contractor has completely mobilized. If deemed necessary by the Contracting Officer or COR, the Contractor will attend weekly conference calls to discuss progress against the mobilization timeline, discuss any issues that may impact completing milestones on time in the mobilization plan, and provide revised plans for authorized deviation from the initially approved mobilization plan. At the option of the in-theater commander, mobilization calls will be attended by appropriate plans (J5), operations (J3), and Operational Contract Support (OCS) personnel.

9.3 Demobilization: The Contractor shall submit a demobilization plan to the Contracting Officer for approval a minimum of 120 calendar days before the end of the current Contract performance period or as otherwise directed by the Contracting Officer. The content of the plan shall address the items specified in this section and must demonstrate the Contractor's plans and ability to remove its personnel and equipment from the Host Nation/Specific COCOM AOR and to return Government property no later than thirty (30) days after the expiration of the current PoP. Prime contractors are responsible and accountable to ensure their subcontractor(s) at all tiers comply with responsible and timely exit from Host Nation immediately following Contract performance completion or termination.

9.3.1 Exit from Host Nation: The prime Contractor shall follow the exit guidance issued by the U. S. Embassy or Host Nation and shall ensure subcontractor(s) at all tiers also follow the exit procedures. The prime Contractor is responsible for remaining cognizant of Host Nation laws regarding exit from each country. Currently, all foreigners traveling out of certain countries via commercial air transportation must have exit visas.

9.3.2 Badging: The prime Contractor is responsible for ensuring all employee badges, including subcontractor employees at all tiers, are returned to the local Access Control Badging Office for de-activation and destruction. The prime Contractor shall submit a Badge Termination Report to ensure each record is flagged and the badge is revoked. If a prime and/or subcontractor employee's badge is not returned, the prime Contractor shall submit a Lost, Stolen, or Unrecovered Badge Report to the appropriate Access Control Badging Office. Contractor employees in possession of a Common Access Card (CAC) shall be

responsible for turning in the CAC upon re-deployment through a CONUS Replacement Center in the U.S. Failure to return employee badges promptly may result in delay of final payment.

Part 10 Attachments/Technical Exhibit Listing

10.1 Attachments and Technical Exhibits:

Attachment 0001 PWS

Attachment 0002 Section L

Attachment 0003 Section M

Attachment 0004 Ordering Guide

Attachment 0005 Past Performance Info Sheet

Attachment 0006 HTRO Self Scoring Matrix

Attachment 0007 GPS Contract Data Requirements List Matrix

Attachment 0008 ILR

Attachment 0009 Explosive Detection Canine Team Assessment and Certification Standards

Attachment 0010 Annex Private Security Company Weapons Qualifications Standards

Part 11 Reporting Requirements

11.1 Deliverables: The Contractor will be required to submit the deliverables set forth below. Where a deliverable is identified as a TO deliverable, this shall be accomplished for each TO. The deliverables described herein are minimum requirements only and additional deliverables or modifications to these deliverables may be required for specific TO.

Deliverable	Contract Reference	IDIQ Proposal / TO/ After Award	Required Submission Date	Frequency	Medium	Submit To
Armed and Unarmed Private Security Contract List	CDRL 0007	After IDIQ Award	After award of IDIQ	As required	Electronic	Contracting Officer
Business License as required by the host nation.		TO	Submission of TO Proposal	Updates as directed by the Contracting Officer	Electronic	Contracting Officer
PSC Operating License as required by the host nation.		TO	Submission of TO Proposal	Updates as directed by the Contracting Officer	Electronic	Contracting Officer
Quality Control Plan (QCP)		After Award	After Award	Updates as directed by the Contracting Officer / ACO	Electronic	Contracting Officer / ACO
Facilities Security Clearance		IDIQ Proposal	Submission of TO Proposal	Updates as required (e.g., expiration, new personnel)	Electronic	Contracting Officer / ACO
Mobilization Plan		After Award of TO	After the Award of Task Order	One Time	Electronic	Contracting Officer
Communication Plan		TO	Submission of TO Proposal	As required with each TO Proposal	Electronic	Contracting Officer/ACO

Property Control Plan/System		TO	Initial Plan submitted with TO Proposal	As required with each TO Proposal	Electronic	Contracting Officer/ACO
Personnel Status (PERSTAT) Report	CDRL 0007	TO	Begins NLT 1800 the day after the full task order performance	Daily	Electronic	Contracting Officer
Daily Situation Report		TO	Begins NLT 1800 the day after the full task order performance	Daily	Electronic	COR / Contracting Officer
Weapons/Ammunition Inventory List		TO	First Report NLT 5 days after mobilization completion. As required within 48 hours of any updates/changes in the weapons/ammunition inventory list.	As Required	Electronic	COR
Weapons Training & Documentation		TO	Within 15 days of personnel entering AOR	As required when new personnel are added to TO	Electronic	COR
Deliverable	Contract Reference	IDIQ Proposal / TO/ After Award	Required Submission Date	Frequency	Medium	Submit To
Serious Incident Report as defined in the TO		TO	Immediately upon occurrence	As Required	Electronic Form	COR, Contracting Officer, ACO, PSC Operations Center
Serious Incident Report as defined in the TO		TO	Immediately upon occurrence	As Required	Electronic	COR, Contracting Officer, ACO, PSC Operations Center
Contractor Personnel Records		TO	Weekly	As required by the Contracting Officer/COR	Electronic	COR
Weapon Signature of Acknowledgement		TO	Within 24 hours of request	As required by the Contracting Officer/COR	Electronic	COR
Accident Report		TO	Within 24 hours of occurrence	As Required	Electronic	COR
Government Property List		TO	Within 24 hours of request	As required by the Contracting Officer/ACO	Electronic	Contracting Officer / ACO & COR
Serious Accident/Incident Report - Sexual Harassment/Assault			Immediately upon occurrence	As Required	Electronic	Contracting Officer/ACO /COR
Sexual Harassment Training Plan		IDIQ	After Award	As required by the Contracting Officer	Electronic	Contracting Officer/ACO /COR

11.2 Contract Manpower Reporting: The Contractor shall report ALL Contractor labor hours (including subcontractor labor hours) required for the performance of services provided under this Contract to the Contracting Officer and COR via a secure data collection site.

Reporting inputs will be for the labor executed during the period of performance during each Government fiscal year (FY), which runs from October 1 through September 30. While inputs may be reported at any time during the FY, all data shall be reported no later than October 31 of each calendar year. Beginning with FY 2025, Contractors may direct questions to the help desk by clicking on "Send an email" which is located under the Help Resources ribbon on the right side of the login page of the applicable Service/Components CMR website.
