

Federal Acquisition Service

Limited Sources Justification

FAR 8.405-6

1. **Identification of the agency and the contracting activity:** This requirement is an assisted acquisition conducted by the General Services Administration (GSA) for procurement of Travel Management Company (TMC) services in support of the Department of Defense (DoD), Defense Travel Management Office (DTMO).

Contracting Activity: General Services Administration (GSA), Federal Acquisition Service (FAS), Travel Acquisition Support Branch (QMACB), 1800 F Street, NW, Washington, D.C. 20405

2. **Nature and/or description of the action being approved:** The purpose of this limited sources justification is to support the award of a sole source task order to CW Government Travel, Inc., for continued support in providing official TMC services for Asia Pacific Defense Travel Area 8 (DTA 8).

The Department of Health and Human Services (HHS) Program Support Center (PSC) originally awarded contract HHSP233201700037I on September 17, 2017, to CW Government Travel, Inc. (CWT) with a period of performance from September 18, 2017, to March 17, 2020, to provide all personnel, equipment, material, supervision and other items or services necessary to perform TMC services for DTA 8.

On June 14, 2019, HHS/PSC officially notified DTMO by memorandum and email that it would be terminating its assisted acquisition program for non-HHS agencies. As a result, effective October 30, 2019, HHS PSC executed its termination of contract HHSP233201700037I. On September 24, 2019, GSA executed a bridge task order that continued services to DTA 8 from November 1, 2019, to January 29, 2021.

On January 29, 2021, GSA awarded a new sole source task order to CWT to ensure a continuation of support services between old and new task order awards. The sole source task order was awarded with a four (4) month base period and six (6) 1-month option periods and expired on June 1, 2022. This sole source bridge task order was awarded to cover performance while a competitive procurement was solicited and awarded. The competitive re-procurement was delayed based on multiple protests on related acquisitions. These protests caused significant delays and made it necessary to issue another bridge task order for this requirement. On June 2, 2022, GSA awarded a new sole source task order to CWT to ensure a continuation of support services between old and new task order awards, which expired on February 1, 2024.

During Review of all DTMO TMC Task order security requirements in May 2023, the DoD Defense Human Resources Activity (DHRA) Security Office identified significant issues with current security language that was no longer in compliance with current policy. To ensure increased protection of Controlled Unclassified Information (CUI) with respect to the aggregation of military Personally Identifiable Information (PII), the DHRA Security Office requested significant changes to the security language for personnel and

Federal Acquisition Service

cybersecurity. These changes were in process for DTMO for approximately six months which required an additional sole source task order for DTA8. This sole source task order 47QMCB24F0006 was awarded with an eight (8) month base and one (1) 2-month option period and will expire on June 1, 2025.

An additional protest was filed for the current full and open competition solicitation for the follow on task order for this requirement. Because this had significantly delayed the award of the follow on task order, an additional sole source task order to CW Government Travel was issued May 22, 2025 under Task Order Number 47QMCB25F000B. This task order expires on March 1, 2026.

This additional protest, along with two supplemental protests, were received and dismissed on December 22, 2025 with Omega World Travel keeping the new task order. Omega World Travel will begin transition duties from CW Government Travel. Because the protests were not dismissed until late December 2025, this does not allow for the contract transition activities to occur by the time the current task order expires. One last sole source task order is being requested for CW Government Travel, for a period from March 1, 2026 through April 8, 2026, in order to allow for timely transition duties to Omega World Travel.

The current limited sole source contracting action is pursuing a waiver from placing an order on a competitive basis pursuant to FAR 8.405-6(a)(1)(i)(A) which states that an urgent and compelling need exists and following the procedures would result in unacceptable delays. There is no alternative source that can meet the need for immediate uninterrupted travel services and mission readiness.

3. **A complete description of the supplies and/or services required to meet the agency's needs (including an estimated value):** The required TMC services are highly specialized and require familiarity with specific travel regulations and laws, including the Joint Travel Regulations (JTR), the Defense Travel Regulation (DTR), and local Business Rules developed by each site, as well as interfacing with DoD's travel management system for end-to-end travel. Therefore the TMC must have immediate capability to provide the required services as well as detailed knowledge of travel regulations and business rules to ensure traveler reservations are accurate, timely, and in accordance with numerous policies and regulations. This requirement does not lend itself to a quick transition for a new contractor. The transition period including implementation for a new contractor is 90 days for OCONUS locations applicable to this requirement.

In addition, DoD travelers often use a centrally billed account (CBA) to pay for travel. The contractor provides assistance in reconciling these accounts monthly. The procedures for reconciling vary by service and also require knowledge of the procedures in place by the Defense Finance and Accounting Service. This is a unique requirement to DoD that is not part of the travel requirements for the rest of the Federal Government. DoD travelers are mandated to use the Defense Travel System (DTS) to book all Temporary Duty travel, which also requires familiarity by the Contractor. Further, the Contractor must be prepared to ramp up and support DoD's requirements immediately

Federal Acquisition Service

upon Government notification to support surge requirements. Surge support is somewhat specific to DoD and responds to contingencies including, but not limited to, national emergencies, accident investigations, aircraft recovery teams, evacuations, rescue operations, EXODUS travel, civil disturbances, disasters, military peacetime and wartime contingency operations, exercises, personal emergencies, holiday travel and mass casualties (human remains). The current incumbent contractor, CWT, has provided support in this area with immediate response and the ability to continue services to all activities under the order. This further validates that they have the resources needed to maintain continuity of services to both the event at hand and normal day-to-day operations at all sites.

It is imperative that these TMC services continue with the incumbent contractor. Awarding to any source other than the incumbent contractor will severely jeopardize the continued provision of DoD's highly specialized, mission-critical services and result in unacceptable delays in fulfilling the agency's requirements. The incumbent has provided these services to date, although there have been ongoing performance issues relating to help desk call response times and in person staffing. Measures are currently in place to track and improve this performance. Any lapse of travel services will cause serious disruption to DoD's ability to support its travel requirements. To ensure that TMC services for DTA 8 locations are uninterrupted, these services must be obtained from the incumbent contractor until Omega World Travel can transition into the contract on April 8, 2026. The incumbent contractor is the only vendor that can meet the requirement without significant disruption and delays to DoD travel needs.

The requirement is below the simplified acquisition threshold and the estimated value is [REDACTED]. The period of performance for this sole source task order effort will be for a total of thirty-eight (38) calendar days from March 1, 2026, through April 8, 2026. The purpose of this task order is to maintain continuity and provide official TMC services for DTA 8 while the government finalizes the transition activities in support of this requirement. There is no alternative source that can facilitate the need for immediate uninterrupted travel services and mission readiness.

4. **The authority and supporting rationale (see FAR 8.405-6 (a)(1)(i)(A) - An urgent and compelling need exists and following the procedures would result in unacceptable delays:** Due to the circumstances noted above, it is imperative that TMC services are continued with the incumbent contractor. It is not feasible to complete a transition of services from the incumbent contractor to the successor contractor prior to the expiration of the current task order. The incumbent has the required skilled staff with detailed knowledge of the customer's mission, JTR, DTR, and other travel related policies; established DTS Passenger Name Record (PNR) validation; established centrally billed accounts and reconciliation processes specific to the customer; and customer centric Global Distribution System (GDS) agreements and profiles for both CONUS and OCONUS which require 60 days (CONUS) and 90 days (OCONUS) for implementation. The established profiles afford the incumbent contractor to support each individual customer's needs based on travel preferences and contain business rule requirements unique to DTA 8. The incumbent's unique qualifications and previously established business processes allow for immediate continuity of services and continued mission

Federal Acquisition Service

capability, and avoids a gap in mission critical services that could impact National Security.

The potential loss or disruption of these services and required time for transition to a new contractor can cause significant harm; thereby severely hampering DoD's ability to travel in order to successfully meet its travel requirements which may directly impact National Security. Therefore, in accordance with FAR 8.405.6 (a)(1)(i)(A), an urgent and compelling need exists, and delay may result in unacceptable and consequential delays for DoD travelers.

5. **A determination by the ordering activity Contracting Officer that the order represents the best value consistent with FAR 8.404(d):** While the Government acknowledges CWT has encountered performance issues on this and other related task orders, not having a contractor at all who can provide the required services is a greater risk to DoD's mission. Therefore, the CO has determined that the expected outcome of this acquisition provides the greatest overall benefit in response to the requirement and therefore the best value to the Government consistent with FAR 8.404(d), based on all factors considered above. IAW FAR 8.404(d), GSA has already determined that prices are fair and reasonable.
6. **A description of the market research conducted among schedule holders, and the results of the research, or a statement why market research was not conducted:** CWT is not the only company capable of providing TMC Services under GSA Multiple Award Schedule (MAS), SIN 561510 for Travel Agent Services. However, market research confirms that they are the only source capable of providing the entire scope of highly-specialized services within the condensed time frames in order to ensure mission-critical quality levels are achieved. GSA has also conducted Requests for Information (RFI) for similar services and received very limited feedback from industry. Based upon the market research results, DoD has determined that no other vendor would be able to start-up and perform the services required by the contract transition start date of April 8, 2026, without grossly impacting and hampering the DTA 8 travel services.
7. **Any other facts supporting the limited source justification:** The cost of losing the incumbent contractor to provide the services at the current time would be detrimental to DoD meeting its DTA 8 mission requirements. This short-term task order will provide the necessary continuity of services in order for CW Government Travel to transition over to Omega World Travel, who was awarded the task order that was procured via full and open competition. This is a viable option which will allow DoD to continue its mission while the re-procurement is being finalized.
8. **A statement of the actions, if any, the agency may take to remove or overcome any barriers that led to the restricted consideration before any subsequent acquisition for the supplies or services is made:** On behalf of DTMO, GSA recently procured the U.S. Marine Corps requirements for DTA 8's highly critical TMC services utilizing full and open competition procedures under GSA MAS SIN 561510 for Travel Agent Services.

Federal Acquisition Service

This sole source task order effort is to bridge the gap between the current task order and the new task order.

9. Certifications and Approvals

Requisitioner: (Federal Employee)

I hereby certify and accept the responsibility that any and all supporting data provided above or used to justify the above requested limited source procurement (e.g., verifying the Government’s minimum needs, schedule requirements, and/or other rationale for other than full and open competition) is accurate and complete to the best of my personal knowledge and belief.
