

STATEMENT OF WORK

HPE DL380 Servers to replace existing aging infrastructure and migrate the data to modernized FIPS 140-3 compliant hardware HP DL380 Gen 12.

1. BACKGROUND

The Continuous Data Monitoring (CDM) program is part of the Cyber Security computing environment and is an integral component of IRS strategy for providing an aware and secure environment. Its success has received awards from the Commissioner for continued efforts in securing, supporting and monitoring the Enterprise to remain compliant with FISMA guidelines and other BOD directives. The project management expertise, and its reputation have made it the destination of choice for many of the IRS' leading engineers and data scientists. Early adoption of new insights and discovery through CDM supports IRS strategic interests as well as OMB's vision for supporting the government.

CDM is specifically designed to detect distinctive use patterns and presence of activity dynamically identifying and evaluating network endpoints, DB activity and applications across the Enterprise. It combines multi-structured and distributed data sets over many concentric circles of data for specialized modeling in Splunk. This capability allows users to address new questions and build on knowledge from aggregated data and compliance. It provides flexible, interactive, and responsive dashboards that let users focus on unconstrained real-time data metrics and reporting. It invests in tools and technologies that are tailored to detection, monitoring and discovery and that align to the fast-moving areas of data science, advanced analytics, and reporting.

Investments in CDM's data and technology capabilities have been significant drivers of success in risk discovery, data/network insights, and workload planning. Through partnerships internally and externally, CDM has also accelerated innovation in other areas of database analytics, monitoring, detection and response.

This acquisition involves the purchase of HPE DL380/DL380a servers, storage and switches, described in Section 3, to support a range of patterns and applications in the CDM computing environment. HPE also ensures the Silicon Root of Trust which is a hardware-embedded technology that creates an immutable, unchangeable fingerprint on the HPE Integrated Lights-Out (ILO) chip. Drivers of this investment include new analytical initiatives, operations support, and the need to match specific technology investments with changes in use patterns. This effort will ensure FIPS 140-3 compliance is met and appropriate levels of technology infrastructure for enterprise analytics and mitigate risks to other management and technical controls related to the separation of production, development, test, and prototyping environments. It will ensure that CDM and the IRS CIO are meeting operational responsibilities under Treasury, FISMA, and NIST guidelines in the management of IT assets.

Specifically, the servers are necessary to support the rust hardware refresh initiative.

2. SCOPE AND OBJECTIVES

The goal of this effort is to purchase HPE servers as described in Section 3. Cyber manages and administers its own equipment in the SEC-1 GSS boundary and will integrate this equipment at the IRS Enterprise Computing Center – Martinsburg (ECC-MTB).

3. DESCRIPTION OF TASKS AND DELIVERABLES

Upon award, the vendor shall provide delivery of servers as described below.

Item	Part Number	Quantity	Extended Description
HPE DL380	P73282-B21 - HPE DL380 Gen12 Servers	15	HPE DL380 Gen12 SFF NC CTO Svr, INT Xeon 6767P CPU for HPE, HPE 64GB 2Rx4 PC5-6400B-R Smart Kit, BCM 57504 10/25GbE 4p SFP28 Adptr, HPE MR416i-o Gen11 SPDM Storage Cntrlr, HPE DL380/DL560 G11 2U High Perf Fan Kit
HPE DL380a	P76706-B21 - HPE DL380a Gen12 Servers	3	HPE DL380a Gen12 8DW/16SW CTO Svr, Intel Xeon 6730P CPU for HPE, HPE 64GB 2Rx4 PC5-6400B-R Smart Kit, NVIDIA H200 NVL 141GB PCIe Accelerator, HPE 2400W M-CRPS Ti Ht Plg PS Kit, HPE NS204i-u V2 960GB SED

4. Period of Performance

Delivery 60 days from award.

5. SHIPPING INFORMATION

Items for this acquisition should be delivered to the following address:

Enterprise Computing Center-Martinsburg (ECC-MTB)
250 Murall Dr.
Kearneysville, WV 25430
Attn: Peter Seranko (202)613-5213

IR1052.239-9000 Section 508 Information, Documentation and Support (DEC 2019)

In accordance with 36 CFR, Appendix C to Part 1194, the [information and communication technology \(ICT\) \(ICT\)](#) products and product support services documentation furnished in performance of this contract shall be provided at no additional cost. The contractor shall provide information, documentation, and support relative to the supplies and services described in the statement of work, performance work statement or statement of objectives (select one). The following technical standards and provisions have been determined to be applicable to this contract:

☒ Chapter 6: Support Documentation and Services

☒ 601 General

☒ 601.1

☒ 602 Support Documentation

☒ 602.1 ☒ 602.2 ☒ 602.3 ☒ 602.4

☒ 603 Support Services

☒ 603.1 ☒ 603.2 ☒ 603.3

(End of clause)

IR1052.239-9001 Section 508 Conformance (NOV 2020)

Each [information and communication technology \(ICT\)](#) product and/or product related service delivered under the terms of this contract, at a minimum, shall conform to the applicable accessibility standards at 36 CFR, Appendix C to Part 1194 at the level of conformance as specified in the Attachment entitled, Voluntary Product Accessibility Template (VPAT).

The following technical standards have been determined to be applicable to this contract:

☒ Chapter 4: Hardware

☒ 401 General

IR1052.239.9002 Section 508 Services (JUN 2022)

All contracts, solicitations, purchase orders, delivery orders and interagency agreements that contain a requirement of services which will result in the delivery of a new or updated [information and communication technology\(ICT\)](#) item/product must conform to the applicable

provisions of the appropriate technical standards in 36 CFR, Appendix C to Part 1194, and functional performance criteria in 36 CFR Chapter 3, unless an agency exception to this requirement exists at [FAR 39.204 Exceptions](#).

The following technical standards and provisions have been determined to be applicable to this contract:

☒ **Chapter 4: Hardware**

☒ 401 General

☒ 401.1

☒ 402 Closed Functionality

☒ 402.1 ☒ 402.2(1-6) ☒ 402.3 ☒ 402.4 ☒ 402.5

☒ 403 Biometrics

☒ 403.1
