

STATEMENT OF WORK

Inventory Item Procurement

1.0 BACKGROUND

- 1.1** The Bureau of Engraving and Printing (BEP) develops and produces United States currency notes, trusted worldwide. The Bureau of Engraving and Printing needs to maintain a calculated quantity of spare, repair and supporting parts in our storerooms located in Washington, D.C. These important readily available parts help support the manufacturing process in providing high quality print products of which the primary is United States Currency.

2.0 PURPOSE

2.1 Product, Service or Outcome Needed.

To procure needed inventory spare, repair and supporting parts listed in section 3.1 below.

2.2 Scope of the Product, Service, or Outcome.

The purpose of this procurement action is to provide a time-based replenishment procurement of Inventory Spare, Repair and Supporting parts, used to maintain our currency manufacturing process. This will also minimize instances of over purchase, out of stock items and overall, provide better inventory management control.

3.0 TECHNICAL REQUIREMENTS/TASKS/OUTCOMES

- 3.1** Potential vendors will need to provide a quote for any item(s) they will be able to provide according to the item(s) listed below, to include quantity requested, current list price and available dates for delivery to the appropriate BEP locations.
