SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

Block 14 (Description of Amendment/Modification): a. The purpose of this amendment is to answer the following offeror's pre-proposal question.

Question:

Para 3.2.7.1 states "Accomplish magnetic particle (MT) or liquid penetrant (PT) nondestructive testing in accordance with Line 10 or 11." However, it is not clearly specified which items are subject for PT or MT inspection.

Please specify when and where should Magnetic Particle (MT) or Liquid Penetrant (PT) nondestructive testing be performed for the flight deck.

Answer:

Locations requiring weld repair and subsequent Nondestructive Testing (NDT), such as MT or PT, will be identified only after the removal of the existing non-skid coating and subsequent assessment of the deck plate condition. The contractor is responsible for executing the work in the following sequence:

1. Coating removal and surface preparation.
2. Inspection and identification of weld repairs.
3. Execution of repairs and NDT verification.

All work and inspections shall be performed in accordance with applicable NAVSEA Standard Items and JFMM requirements. This sequence is typical for flight deck preservation and structural repairs.

- b. The due time and date for receipt of your offer remains 1000 hours, 26 Mar 2026.
- c. Other terms and conditions remain the same.
