

REQUEST FOR INFORMATION (RFI)
Engineering Services for the
AN/ALR-69A Radar Warning Receiver (RWR)
Indefinite Delivery/Indefinite Quantity (IDIQ) Contract

The Government is conducting market research to identify potential sources that possess the ability to provide Engineering Services required for the AN/ALR-69A RWR in accordance with the attached Performance Work Statement (PWS). The Government is conducting this market research to determine the availability and adequacy of potential business sources prior to determining the acquisition strategy. Potential sources shall possess the expertise, capabilities, and experience to meet qualification requirements to provide engineering services and technical support for the AN/ALR-46/69 RWR

The level of security clearance is SECRET.

There is no foreign participation in this requirement.

The Government does not own or have access to the data for these items.

The Government has determined that this system is a non-commercial item.

Contractor shall furnish all test tools, information systems, support equipment required to provide engineering services support for this effort. The contractor is responsible for producing, providing, maintaining, and calibrating all support equipment required at their facility or a subcontractor's facility.

Contractors/Institutions responding to this market research are placed on notice that participation in this survey may not ensure participation in future solicitations or contract awards. The Government will not reimburse participants for any expenses associated with their participation in this survey.

In accordance with RFO 15.101(c),

- (a) The Government does not intend to award a contract on the basis of this RFI or otherwise pay for the information requested
- (b) Response will be treated as information only and not as a proposal. Although "proposal" and "offeror" are used in this Request for Information, your response will be treated as information only. It shall not be used as a proposal.

This solicitation is issued for the purpose of: Identify potential sources that may possess the expertise, capabilities, and experiences to meet the requirements for Engineering Services in support of the AN/ALR-69A RWR.

INSTRUCTIONS:

1. The document(s) below contains a description of the AN/ALR-69A RWR requirement and a Contractor Capability Survey. The Survey allows Contractors to provide their company's capability.
2. If, after reviewing these documents, you desire to participate in the market research, you should provide documentation that supports your company's capability in meeting these requirements. Failure to provide documentation may result in the government being unable to adequately assess your capabilities.
3. ATTENTION: SMALL BUSINESS RESPONDENTS who are interested in participating in this effort:
 - a. No set aside decision has been made; however, the Government will determine the final strategy after thorough analysis of the small business responses and other market research available, considering the demonstrated interest and capability. Please ensure that you provide a thorough response to each question. If your company does not currently possess the full capability required to fulfill the entire requirement, what teaming/partnership/joint venture/subcontracting arrangement do you have in place to fulfill the government needs? Providing evidence of this arrangement, e.g. emails, letters, etc. that demonstrates a united response to this RFI is highly encouraged but not required. The evidence should state the type of arrangement and the role each member will fulfill. If you are only interested in being a subcontractor to the future awardee, state the portion of the work that your organization has capability of fulfilling.
 - b. Identify any areas of work that your organization believes should be broken out exclusively for Small Business.
4. Both large and small businesses are encouraged to participate in this Market Research. Joint ventures or teaming arrangements are encouraged.
5. Questions related to this market survey should be addressed to the PCO, Desura Gates, desura.gates.1@us.af.mil and the Buyer, Amber Hall, amber.hall.26@us.af.mil.

REQUIREMENTS DESCRIPTION

Engineering Services for AN/ALR-69A Radar Warning Receiver (RWR)

PURPOSE/DESCRIPTION

The Government is conducting market research to identify potential sources that possess the expertise, capabilities, and experience to meet qualification requirements to provide engineering services for the AN/ALR-69A.

The AN/ALR-69A is a digital RWR system with specialized hardware designed to detect, identify, and report Radio Frequency (RF) threats. The system's performance is heavily dependent on its software and firmware, including its Operational Flight Program (OFP), digital signal processing programs, and the Mission Data Files (MDFs) used for threat identification.

This requirement is for sustainment and engineering services necessary to support the complete AN/ALR-69A system. The anticipated scope includes, but is not limited to:

- Software and firmware support to maintain, update, and correct deficiencies and software problem reports.
- Integration and merging of software changes into a single, cohesive AN/ALR-69A software baseline.
- Investigation of system performance anomalies, root cause analysis, and development of corrective actions with regard to the AN/ALR-69A software and hardware.
- Systems engineering, software engineering, testing, and generation of required technical documentation.
- Perform hardware redesigns to resolve deficiencies and/or optimize system effectiveness
- Updating and maintaining the software engineering environment and associated tools.
- Updating and maintaining the system level support equipment.

Reference the attached PWS for specific requirements related to this effort.

Our anticipated contract strategy is a five-year contract (one basic year, plus four - option years) and will continue through FY31.

CONTRACTOR CAPABILITY SURVEY

Part I. Business Information

Please provide the following business information for your company/institution and for any teaming or joint venture partners:

- Company/Institute Name:
 - Address:
 - Point of Contact:
 - CAGE Code:
 - Phone Number:
 - E-mail Address:
 - Web Page URL
- Government Proposed North American Industry Classification System (NAICS) Code:
541330

Based on the above NAICS Code, state whether your company is:

- Small Business (Yes / No)
- Woman Owned Small Business (Yes / No)
- Small Disadvantaged Business (Yes / No)
- 8(a) Certified (Yes / No)
- HUBZone Certified (Yes / No)
- Veteran Owned Small Business (Yes / No)
- Service-Disabled Veteran Small Business (Yes / No)
- System for Award Management (SAM) (Yes / No)
- A statement as to whether your company is domestically or foreign owned (if foreign, please indicate the country of ownership).

Responses to the Capability Survey Part I and Part II must be received no later than close of business 23 April 2026. Please ensure data is in a readable electronic format that can be received through a firewall. Attachments shall not exceed 10 MB per email. Multiple emails are acceptable. Responses must be sent via email to the following:

Program Manager: LA.Forest Glover, laforest.glover.1@us.af.mil
Contracting Officer: Desura Gates, desura.gates.1@us.af.mil
Buyer: Amber Hall, amber.hall.26@us.af.mil

Questions relative to this market research should be addressed to the PCO and Buyer:

Contracting Officer: Desura Gates, desura.gates.1@us.af.mil
Buyer: Amber Hall, amber.hall.26@us.af.mil

Part II. Capability Survey Questions

A. General Capability Questions:

1. Provide a brief description of your company, including its size, primary business focus, and the management and structure that would be responsible for overseeing this contract.
2. Describe the systems and processes your company uses for financial management and project schedule tracking. Include the names of any software used for accounting and project management and describe how you report cost, schedule, and performance data to your government customers.
3. Describe your company's overall capacity to support this requirement. Your response should detail the current number of cleared and technically qualified personnel you have available for this type of engineering work, as well as your documented processes and ability to rapidly increase staffing to meet urgent operational mission requirements. Please include the typical timeframe your company requires to deploy these additional qualified personnel

B. Technical and Engineering Capabilities

1. Describe your company's current level of access to the OEM's or program's proprietary technical data, including software source code, design documentation, and test procedures required to perform the tasks in the PWS.
2. Describe your company's capabilities and relevant past performance in performing the engineering and integration tasks outlined in the attached PWS, Section 1.1, paragraphs A through I. As evidence of your capabilities, provide details for relevant contracts for the same or similar services by providing the following for each:
 - a) Contract Number:
 - b) Procuring Agency & Government Point of Contact: (Include name, email, and phone number)
 - c) Total Contract Value.
 - d) Services Provided. (Describe the specific services you provided and how they directly relate to the tasks in the PWS.)
3. Describe your company's experience supporting the integration of the AN/ALR-69A or similar systems onto US Air Force, US Navy and US Army platforms and how your company supports the customer and sustains the system to include aircraft support equipment.
4. Describe your company's experience with the integration of the AN/ALR-69A, or similar systems, on allied Foreign Military Sales (FMS) platforms and how your company supports the customer and sustains the system to include aircraft support equipment.
5. The PWS requires rapid support with response times as short as 12 hours (Emergency). Describe your company's processes and capabilities and provide

specific examples of how you have met similar emergency/urgent support requirements on previous contracts.

6. Describe your experience in developing or supporting Test Program Sets (TPS) and providing engineering support for depot-level activities for DoW avionics systems.
7. Describe your company's existing facilities, test equipment, support equipment and Software Engineering Environment that could be utilized to support the AN/ALR-69A OFP, firmware, MDF development and testing as required by the PWS.
8. Describe your experience applying the following standards in the context of avionics development and sustainment: MIL-STD-1553, MIL-STD-461, MIL-STD-810.
9. Describe your company's engineering capabilities and experience in performing hardware redesigns for military avionics systems. Include your experience with identifying and resolving parts obsolescence, conducting form-fit-function replacements, performing required hardware and software integration, and testing the redesigned components to meet environmental and airworthiness qualification standards (e.g., MIL-STD-810, MIL-STD-461).
10. Describe your company's experience with flight test data reduction and analysis for airborne Electronic Warfare (EW) or radar systems. Detail your capabilities in processing and analyzing raw data from MIL-STD-1553 data buses and other sources to validate system performance, identify deficiencies, and support troubleshooting efforts against system specifications and test plans
11. Describe your company's capabilities and hands-on experience in the development, modification, troubleshooting, and validation of MDFs for the AN/ALR-69A or similar airborne RWR systems. Include your experience with the specific tools, processes, and lab environments required to support the full MDF lifecycle.

C. Facilities and Security

Describe your company's security infrastructure for handling classified work up to the SECRET level. In your response: a) State your company's current Facility Clearance level and provide the corresponding CAGE code. b) Describe your processes for managing classified material and ensuring personnel possess the appropriate clearances. c) Detail your experience applying system-specific Security Classification Guides to properly mark and handle technical data and hardware.

D. Technical Data and Engineering

Describe your company's engineering and data management experience by addressing the following distinct areas: a) Technical Data Packages (TDPs): Describe your experience generating, modifying, and managing TDPs for avionics systems. b) Software Maintenance: Detail your experience providing software maintenance and support for operational flight

programs. c) Failure Investigations: Describe your process or past experience for conducting root cause failure investigations and engineering analysis for complex RF electronic systems. d) CDRLs: Provide a list of the Contract Data Requirements Lists (CDRLs) types your company has previously generated and delivered on DoD contracts, as required by PWS Appendix A (e.g., Software Requirements Specification, Test Reports)

E. Quality Assurance

Describe your company's Quality Management System as it applies to providing engineering services. In your response identify any relevant quality certifications your company holds (e.g., ISO 9001, AS9100, CMMI appraisal level and date).

F. Teaming/Subcontracting

Describe your anticipated teaming strategy to meet the full scope of the PWS.

- a) Identify which, if any, specific PWS tasks or capability areas you intend to fulfill through subcontracting.
- b) If known, identify your intended major subcontractor(s). *(Note: The Government understands that teaming arrangements may be preliminary at this stage.)*
