

Stewards of the Sea (SOTS) Public Outreach Performance Work Statement

1. **Scope:** U.S. Fleet Forces Command (USFF) requires that the project identified in this statement of work be non-severable. This issue requires immediate action in order to provide equipment and materials for Stewards of the Sea (SOTS) public outreach related to at-sea training and testing. The U.S. Navy's SOTS program was initialized in 2013 to help combat misinformation regarding the Navy's environmental impacts during at-sea training and testing. The SOTS branding is utilized to give the general public information on the Navy's environmental messaging concerning at-sea training and testing activities. Providing the public with this valuable information assists in less issues during the permitting process for the training and testing activities.
2. **Stewie Mascot Costume Design Specifications:** Stewie is the Navy's environmental mascot and is a representation of a (green) sea turtle with the globe displayed on his back shell. The design for replacement STEWIE mascot outfits requires development and two new exterior suites need to be purchased. Information on requirements for the development of new STEWIE mascot outfits are:
 - a. All the design features must be owned or capable of being obtained by the U.S. Navy and not under a copyright by another entity.
 - b. Designed to represent the look, established in May 2023, of STEWIE as displayed in the graphic titled Stewie-Full-Final(2023May) .png.
 - c. To match official Navy colors, the front is Navy blue with gold edging, and his name "STEWIE" (prominently displayed on the right breast) in gold.
 - d. The outfit is in multiple pieces for ease of cleaning head, shell, feet, arms, and interior clothing.
 - e. Outfit should fit a wearer between 5 ft 5 in and 6 ft 1 in.
 - f. **Head:**
 - i. Hard shell made of fabric mâché or light plastic, water resistant, covered in fabric material.
 - ii. Head must cover the entirety of the wearer's head.
 - iii. Shape is of Stewie's likeness
 - iv. Covered in cloth matching the Stewie image's colors
 - v. Curved edges and cushioned on the bottom of the head where it meets (rests on) the wearer's shoulders. Comfortable and light weight to wear.
 - vi. Holes at the pupils, covered by a black screen to block viewing into the head from outside (allows air flow)
 - vii. Open area at mouth, covered by a black screen to block viewing into the head from outside (allows air flow)
 - viii. Head needs to provide the wearer with enough visibility so that they can see where they are walking
 - ix. White hat, in the likeness of a Navy Sailor's Dixie cup, attached to the top, to match the image
 1. Stewards of the Sea(R) logo in full color, sewn on as an embroidered patch, centered on the front of the Dixie cup
 2. Size of SoTS logo should match ratio of Stewie's 2023 version design (diameter of logo is approximately 75% of the distance from the bottom to the top of the brim on the Dixie cup), centered top and bottom of the front facing hat's brim, and centered above Stewie's face
 - x. Several small holes, to be unseen, in the head near the top, outside the area covered by the white hat, so as not to reduce the strength of the structure, but to allow for some heat to escape; to be covered by exterior fabric.
 - xi. Small, lightweight, internal mounted fan in the head. Fan should be situated to provide the most efficient air flow through the head-piece.
 1. Need to have easy access to the fan's power switch
 2. Need to have easy access to the fan's battery compartment for replacing batteries
 3. If fan has internal rechargeable batteries, the power port must be easily accessible and compatible with using a 115-volt U.S. standard plug
 4. Fan needs to have safety mechanism to avoid capturing/pulling the wearer's hair (assume long hair/ponytail)
 - xii. **Inside:** a one size fits all, helmet, with cushions for wearers head, securely fastened to the inside
 1. Internal helmet height adjustable up and down for 2 inches.

2. Internal helmet needs to have multiple holes in the sides and top to allow heat to escape from wearer's head.
 - xiii. Straps to hold the head piece on while wearer moves around so it does not slip off the wearer's head. The straps need to be adjustable for different sized individuals, comfortable, and easily used by the wearer.
- g. **Shell:**
- i. Soft material, under fabric, shaped like half of a globe on the back and flat across the front. Back shell connects to the front shell at the shoulders and down left and right sides of the torso. There shall be an opening for the wearer's head, and the bottom shall be open for the wearer's legs. It should be designed so a person can get into the shell from the bottom.
 - ii. **Shell Back:**
 1. Main color blue representing the ocean
 2. Green-color areas representing the land areas of the Americas close to centered left and right
 3. Other land areas to be represented utilizing the same color green, in the general area they are located on the globe, are Greenland, Antarctica, Hawaii and Guam and Marianas Islands. Hawaii, Guam and Marianas should be larger than they would appear at this scale. The edges of Europe, Africa, Philippines, and northeast Asia can be included.
 4. Approximate distance from top neck opening to bottom opening, along the curvature is 58 inches.
 5. Approximate distance from left seam to right seam, at widest part, along the curvature is 62.5 inches.
 - iii. **Shell Front:**
 1. Main color Navy blue
 2. Stitching horizontal, evenly space, to represent ribs on the front plate of a sea turtle
 3. Front left and right edges, top to bottom, have a section in gold (same color as the STEWIE name), to represent the marginal scutes on the outer-most section as seen from the front.
 4. STEWIE capitalized, embroidered onto the front, in Gothic Bold font, ending on the right side of center, evenly proportioned with the front shell, similar as a name found on Navy uniforms, gold lettering, matching the front edges (scutes) or trimming along the front's sides.
- h. **Arms:**
- i. The arms need to look like a sea turtle's flipper, made of comfortable material, that can be removed for washing
 - ii. Color of fabric should match the color of the fabric on the head, legs, and feet.
 - iii. Approximately 9, multi-sized mottling dots, should be on the exterior, bottom section, of the arm to match Stewie's graphic image. The dots are all the same color, a darker green than the main overall green color of the arms.
 - iv. Have a strap, possibly elastic, that extends from the end of the arm sleeve to attach to one of the wearers fingers to help prevent the sleeve from pulling down from the hand (which could expose the wearers skin at the wrist)
- i. **Hands/Gloves:**
- i. Formed in the shape of a sea turtle's flipper
 - ii. Made of soft material, covered by removable fabric, same color as the fabric for the arms
 - iii. Made to fit over the top of the sleeves of the arms
 - iv. Need to have finger straps, preferably elastic, to place the wearer fingers and hand into, near the ends of the flippers to help hold the ends of the gloves to the wearer's hands from the inside
 - v. Completely covers the hands and overlaps onto the wearers wrist area to sit on top of the sleeves when worn
- j. **Legs:**
- i. One-piece covering both legs and the mid-section of the wearer.
 - ii. Color of fabric should match the color of the fabric on the head, arms, and feet.

- iii. Approximately 7, multi-sized mottling dots, should be on the exterior, outer section of the front of the legs from approximately the knee to lower calf area (well above the ankle) of the wearer, to match with Stewie's graphic image. The dots are all the same color as the mottling on the arms, a darker green than the main overall green color of the legs.

k. **Tail:**

- i. Color of fabric should match the color of the fabric on the head, arms, legs, and feet.
- ii. Attached at the bottom, center of the back shell
- iii. Structured to curve slightly backwards rather than hang straight down.

l. **Feet:**

- i. Color of fabric should match the color of the fabric on the head, arms, legs.
- ii. Made to fit over the wearer's own foot apparel, up to a size 12 shoe
- iii. Fits under the bottom of the ends of the legs and holds onto the leg so no gap between the leg material and the foot material can occur during actively wearing the items together.

3. **Graphics Design and Materials Requirements:** The graphics design and purchasing of the equipment and materials will be utilized by USFF N4651 staff for events until those items have reached their end-of-life cycle, are no longer serviceable due to wear and tear, or inventories are depleted.

a. **Task 1. Create graphic layout for and purchase two retractable informational rollout graphics.**

- i. The first task will be for replacing SOTS display portable retractable banners. The final layout and information should be done in accordance with the SOTS branding guide, utilizing the SOTS brand, and look similar to the current versions of these items. The information to be used on the graphics can be viewed on the provided photo titled "SOTS_Retractables(2019v)_PWP_MarineLifeProtect.jpg". Information for elements to be used on the graphic is as follows:
 - 1. Stewards of the Sea Logo
 - 2. Stewards of the Sea brand marking, U.S. Navy Stewards of the Sea, Defending Freedom., Protecting the environment.
 - 3. Blue fractural background
 - 4. Photos to coincide with the various textual writeup showing Navy personnel engaged in activities and equipment that is used
 - 5. No websites or URLs will be displayed

b. **Task 2. Create graphic layout for and purchase one outdoor, hangable, reuseable backdrop with SOTS branding and shipboard plastic waste processing (PWP) information.**

- i. Shipboard PWP is one of the SOTS exhibit's signature talking points. Utilizing a large SOTS branded backdrop in conjunction with a SOTS canopy adds to the visibility of information being provided and allows staff to visually represent their talking points. The final layout and information should be done in accordance with the SOTS branding guide, utilize the SOTS brand, and have the same information as the Shipboard Plastic Processing portable retractable banner developed in Task 1.
- ii. The final layout and information should be done in accordance with the SOTS branding guide, utilize the SOTS brand, and display the plastic waste processor, overview of the steps for processing plastic onboard ships, and general information on the results of utilizing this process. The types of photos for the backdrop will correlate and correspond with the information on the backdrop. The information to be used is on the titled "SOTS_Retractables(2019v)_PWP_MarineLifeProtect.jpg". If possible, it should be developed utilizing the same text and photos used for the Shipboard Plastic Processing portable retractable banner developed in Task 1.
- iii. Information for the graphic is as follows:
 - 1. Made of sturdy material to be useable and for outdoor use
 - 2. Landscape layout with dimensions of approximately 8 foot long by 6 foot high, plus or minus 1 foot on either dimension (7-9ft L x 5-7ft H)
 - 3. Sturdy eyelets in each corner, with multiple additional eyelets on each side, between the corners, to hold the backdrop up vertically and prevent sagging
 - 4. Background graphics need to be edge to edge (bleeding edge)
 - 5. US Navy messaging through text, verbiage, or photos need to be

Commented [SB1]: Are we getting anything printed or just created?

Commented [KP2R1]: The scope is for graphic design and the equipment/materials. Not sure of the question since this is a retractable banner with approved graphic design printed on it.

- a. Between 6 and 12 inches from the top edge
 - b. At least 12 inches from the bottom edge
- 6. Utilize the Stewards of the Sea logo
- iv. Utilize the Stewards of the Sea brand marking- U.S. Navy Stewards of the Sea, Defending Freedom., Protecting the environment.
- v. Utilize the blue fractural background
- vi. Have photos to coincide with the various textual writeup showing Navy personnel engaged in activities and equipment that are used
- vii. No websites or URLs will be displayed

c. Task 3. Purchase Marine Mammal of the U.S. East Coast and Gulf of America handout sheets.

The Marine Mammal of the U.S. East Coast and Gulf of Mexico handout sheets, now referred to as Marine Mammal Identification (MMIDs) guides of the East Coast and Gulf of America, were originally created and purchased through NAVFACLANCANT, and have been utilized to create additional MMIDs specifically tailored for the Pacific Fleet's area of responsibility. Due to the recent name change of the geographical area formally known as the Gulf of Mexico the MMIDs has been updated, changing the title verbiage from Gulf of Mexico to Gulf of America.

These sheets are very popular and need to be purchased in a large quantity for the SOTS inventory to support the FY26 SOTS scheduled events, which are a part of the U.S. Navy and Nation's 250th anniversary celebration events. The requirements for purchasing these items is as follows:

- 1. Utilizing the updated MMIDs graphic for the East Coast and Gulf of America purchase 6,000 copies.
- 2. The type of paper to print on should be the same as NAVFACLANCANT's most recent purchase of this item; thick card stock, tear resistant, and water resistant.

d. Task 4. Purchase SOTS trifold brochures.

The SOTS trifold brochures are informational handouts to provide more information to the public and need to be purchased in a large quantity for the SOTS inventory to support the FY26 SOTS scheduled events, which are a part of the U.S. Navy and Nation's 250th anniversary celebration events. The requirements for purchasing this item are as follows:

- 1. Utilizing the updated SOTS trifold brochure graphic purchase 12,000 copies.
- 2. The paper should be 32lb card stock.
- 3. Each one shall be folded in thirds along the design's features for the trifold.

4. Delivery Address:

1562 Mitscher Ave., Suite 250
