

Sources Sought Notice No. 2026029330

**“Landscape Maintenance, Irrigation System Maintenance,
and Irrigation System Minor Repairs”
March 24, 2026**

Background:

The National Laboratory of the Rockies (NLR) is a national laboratory owned by the U.S. Department of Energy (DOE). NLR is the only federal laboratory dedicated to research, development, commercialization, and deployment of renewable energy and energy efficiency technologies. NLR is managed and operated for DOE’s Office of Critical Minerals and Energy Innovation by The Alliance for Energy Innovation (Alliance), the “M&O Contractor”.

Objective:

The objective of this Sources Sought is to identify potential subcontracting companies that are qualified and capable of meeting the project objectives. The project objective, at a high level, is to provide landscape maintenance, irrigation system maintenance, and irrigation system minor repairs.

Project Details:

In the event a solicitation is released, NLR is seeking information from sources that may be capable of providing a solution that meets or exceeds the following minimum capabilities:

- a. The primary objective of landscaping and grounds maintenance at NLR is to preserve and maintain its campus open space areas to minimize the negative impacts on the environment and maximize the efficient use of resources to enhance the native and naturalized vegetation communities and wildlife habitat. The Subcontractor shall assist NLR’s Site Operations Team to provide various landscaping and irrigation services in the cultivation of both established and improvement project landscape areas. Landscaping and grounds maintenance activities shall be performed using environmentally responsible and sustainable practices, including water-efficient irrigation methods, integrated pest management, soil health preservation, and the use of native or climate-adapted plant species where feasible.
- b. The Subcontractor shall actively and continuously monitor all landscape areas to proactively identify emerging or potential issues, including but not limited to increasing weed pressures, turf stress or decline, irrigation system inefficiencies, soil degradation, erosion risks, and accumulation of vegetative fuels that may contribute to fire hazards. The Subcontractor shall not wait for direction from NLR to identify these conditions. Upon identification, the Subcontractor shall promptly develop and submit written recommendations to the NLR Technical Monitor that describe the issue, proposed corrective or preventive actions, recommended timing, anticipated outcomes, and any associated cost impacts. These recommendations shall be provided early enough to allow

corrective actions to be implemented before site conditions deteriorate or result in increased maintenance costs, safety risks, or environmental impacts.

- c. Subcontractor shall comply with all laws, regulations, policies, procedures and guidelines set forth by NLR, the State of Colorado and the Federal Government.
- d. NLR's property extends over 476 acres. There are 164 acres on the South Table Mountain (STM) Campus, 305 acres at the Flatirons Campus, and approximately seven acres at the South Table Energy Park. Of the total acreage, approximately 197 total acres require landscape maintenance as follows: 116 acres on STM Campus, 76 acres on Flatirons Campus, and 5 acres on STEP Campus.
- e. The Subcontractor shall comply with all requirements of Colorado Air Pollution Control Division (APCD) Regulation No. 29. Per this requirement, NLR strongly prefers the use of electric equipment. See the Scope of Work for further details.
- f. At all times there must be one individual that has the ability to transport individuals and equipment around the sites.

Request Details:

The Alliance intends to competitively solicit for landscape maintenance, irrigation system maintenance, and irrigation system minor repairs., dependent upon the volume of qualified responses received.

Step 1 - Sourcing (SSN): Parties that meet the minimum criteria outlined herein are encouraged to submit their capabilities statements. Submitted capabilities statements that meet the Alliance's stated criteria will be considered for inclusion in the source list to receive notice of the planned RFP. The Alliance reserves the right to add additional sources to the source list at its discretion.

Step 2: Qualifying (RFQ): Once the source list is compiled (the Alliance reserves the right to add additional sources to the source list at its discretion), the Alliance will send each qualified source the solicitation document Request for Proposals (RFP). Sources will then be asked to submit in accordance with that formal solicitation document. The Alliance will then evaluate the submitted qualifications against the selection criteria.

Period of Performance: This project is anticipated to have a base period of performance totaling twelve (12) months or 365 days, plus four one-year option periods totaling twelve (12) months of 365 days. The total Period of Performance, if all options are exercised, shall not exceed sixty (60) months.

Anticipated Lead/Delivery Time: The Alliance program anticipates the lead/delivery time to be 08/01/2026.

Location of Work to be Performed: Offerors shall be able to demonstrate their capability to perform in these locations:

National Laboratory of the Rockies (NLR)
South Table Mountain Campus (STM)
15013 Denver West Parkway
Golden, CO 80401

National Laboratory of the Rockies (NLR)
Flatirons Campus (FC)
19001 W. 119th Ave
Arvada, CO 80007

National Laboratory of the Rockies (NLR)
South Table Mountain Energy Park (STEP)
15445 S. Golden Road
Golden, CO 80401

Submission Requirements:

For companies interested in competing for the “Landscape maintenance, irrigation system maintenance, and irrigation system minor repairs” RFP, please submit the following to Deb Dennis at Deb.Dennis@NLR.gov on or before 5:00 p.m. (MST), 04/02/2026. Your submission response is limited to 2-5 pages:

1. Company Name, Address, and Company URL (include bona-fide location as stated above).
2. Point of Contact Information (Email, Direct Phone Number).
3. Completed Notice of Intent to Attend Conference Form.
4. Vendor must demonstrate a local business presence in the Denver Metropolitan area.
5. Company’s Capability Statement that provides a narrative of the Offeror’s expertise with projects of similar scope, size, and complexity as identified below:

Equipment/Services Capability: Alliance is seeking a subcontractor that has demonstrated success with similar projects, has experience with federally funded projects, is knowledgeable with challenging schedules on project delivery, and is well versed and skilled in effectively integrating with all project team stakeholders.

Please complete the following tables.

1	Landscape Maintenance Capabilities	Experience: Yes/No	Years Experience (if applicable)
---	------------------------------------	-----------------------	-------------------------------------

1.1			
1.2			
1.3			
1.4			
1.5			

2	Irrigation System Maintenance Capabilities	Experience: Yes/No	Years Experience (if applicable)
2.1			
2.2			
2.3			

3	Irrigation System Minor Repairs Capabilities	Experience: Yes/No	Years Experience (if applicable)
3.1			
3.2			
3.3			

Disclaimer: Responding to this request identifies your company as an interested candidate only. Your submittal is not in response to a Request for Proposals (RFP). This is an SSN, not a Request for Proposal. Verbal replies will not be accepted. All inquiries must be in writing via email. Project related questions will not be entertained at this point in the procurement process. This document represents a market research effort. Any costs associated with the development of a response to this request will not be reimbursed by NLR and submission does not guarantee or otherwise promise inclusion in any forthcoming RFP. In the event a solicitation results from this SSN, NLR reserves the right to set aside in total or in part any resultant award. Please visit the SAM website at <https://sam.gov/content/entity-registration> for instructions on how to register.
