

Amendment 1

The purposes of Amendment 1 are the followings:

- 1) RFI response due date is now extended until Friday, 04/03/2026.
- 2) Correcting the title to Request for Information (RFI): Commercial Off-the-Shelf Task Management Tool (**removing V2**)
- 3) To provide answer to the below question

Question 1: In the FDA+Task+Management++Vendor+Response+Templatev2 attachment, the Cost Estimate-FDA tab has various user volumes you are asking us to provide costs for. On the Cost Estimate-HHS tab there are no user volumes. Can the government provide the user volumes we should use for the HHS estimate tab?

Answer 1: Vendors propose tiered pricing structure that demonstrates scalability for agency like HHS. Provide the following:

- At least three user volume tiers (e.g., small, medium, large) – provide the definition of each tier.
- Clear documentation of your assumptions for each tier (number of users, user types, etc.)
- Pricing for each tier that shows how costs scale

End of Amendment 1
