Fort Belvoir, VA 22060-6201

Counterintelligence Support Services
March 24, 2026

1 Introduction

1.1 Mission

The Defense Threat Reduction Agency (DTRA) enables Department of War (DoW), the U.S. Government, and International Partners to counter and deter Weapons of Mass Destruction (WMD). DTRA's J3/5/8 Force Protection (FP) Department, Counterintelligence (CI) Division is responsible for counterintelligence support to DTRA. DTRA counterintelligence programs include Counterintelligence Functional Services, Analysis and Production, Collection Management, CI Cyberspace Support, CI support to the Insider Threat Program, and Technical Surveillance Countermeasures (TSCM) Support.

1.2 Background

This is a non-personal services contract to support DTRA's J3/5/8 FP CI Division. The Government shall not exercise any supervision or control over contractor personnel performing services under this contract. Contractor personnel will be accountable solely to the Contractor, who in turn is responsible to the Government. The Contractor shall determine methods and tools to achieve performance outcomes. Work under this effort may be performed at various DTRA locations including Kirtland Air Force Base, Albuquerque (ABQ), New Mexico; Travis Air Force Base, California; Kleber Kaserne, Kaiserslautern, Germany; and primarily, the Defense Threat Reduction Agency facilities in the National Capital Region (NCR) area. Further, contract support may be required at locations not specified in this Performance Work Statement (PWS).

1.3 Scope

The Contractor shall provide personnel to perform non-personal counterintelligence support services to assist Government personnel in executing security and counterintelligence functions within the NCR and other DTRA locations. These services support counterintelligence duties and responsibilities within J3/5/8 FP and its geographically separated locations, including:

- Counterintelligence Support to Insider Threat

- Counterintelligence Functional Services (Briefing/Debriefing, Research, Development, Testing and Evaluation (RDT&E), CI support to Supply Chain Risk Management (SCRM))
- Counterintelligence All Source Intelligence Analysis
- Counterintelligence Cyberspace Support
- Full-Stack Developer Support to Counterintelligence
- Collection Management
- Operations Support
- Onsite Lead (performs CI requirements)
- Technical Surveillance Countermeasures (TSCM) Support
-

Contractor support services are required to achieve the performance objectives in Section 3.0. Ad hoc tasks outside core objectives require a contract modification by the Contracting Officer (KO). All work shall comply with applicable laws, regulations, and directives listed in Section 2.0. Detailed objectives and standards for each functional area are provided in Section 3.0.

2 Applicable Directives

The contractor shall comply with the following directives, publications, and standards to the extent necessary to accomplish the requirements specified in the PWS. The Government will provide all listed publications and forms at the start of the contract period. Publications are current as of February 2026; the Contractor shall monitor updates via official DoD/Intelligence Community (IC) channels and implement changes immediately.

Change Process: The Government will notify the Contractor of additional references or amendments throughout the life of the contract. Supplements issued during the contract period shall be implemented without negotiation. Any changes in cost levied onto the contractor as a result of a supplemental change should be provided to the KO in writing, along with an updated cost proposal, within 10 calendar days following receipt of a supplemental change notification. If needed, negotiations will be held under the FAR 52.243-2 Changes-Cost-Reimbursement clause. Failure to submit a timely notification of supplement driven cost changes entitles the Government to continued performance at no cost increase (waivable by the KO according to paragraph (c) of the *Changes* clause). The Onsite Lead shall track publication compliance and report updates/amendments to both the Contractor and the KO/CS via email.

DoD Instruction 8520.01, DoD Internet Services and Cyber Operations, March 14, 2014

DoD Instruction O-5240.10, CI in the DoD Components, April 27, 2020
DoD Instruction O-5240.24, CI Activities Supporting Research, Development, and Acquisition (RDA), June 8, 2011
DoD Instruction S-5240.17, CI Collection Activities, March 14, 2014
DoD Instruction S-5240.23, “Counterintelligence (CI) Activities in Cyberspace (CICS),” December 13, 2010.
DoD Manual 5240.1-R, Procedures Governing the Activities of DoD Intelligence Components That Affect United States Persons, August 8, 2016
DoD Manual S-5240.05, The Conduct of Technical Surveillance Countermeasures (TSCM), April 23, 2015
DoD Manual 8140.03, Cyberspace Workforce Qualification and Management Program, February 15, 2023
DTRA Instruction 5240.06, CI Awareness and Reporting, March 2, 2026
DTRA Instruction 5240.07, Insider Threat Program, March 10, 2026
Intelligence Community Directive (ICD) 203, Analytic Standards
Intelligence Community Directive (ICD) 206, Sourcing Requirements for Disseminated Analytic Products
Intelligence Community Directive 705-1, Physical and Technical Security Standards for Sensitive Compartmented Information Facilities, September 17, 2010
Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), as amended
National Industrial Security Program Operating Manual (NISPOM), DoD 5220.22-M
NIST SP 800-53, Security and Privacy Controls for Information Systems and Organizations, Revision 5, September 2020 (for Cybersecurity)
The National Security Act of 1947, as amended
Presidential Decision Directive/NSC-12 Security Awareness and Reporting of Foreign Contracts, August 5, 1993

General Compliance Requirements:

All personnel and activities shall adhere to these directives, with particular emphasis on cybersecurity (e.g. NIST SP 800-53, RMF), data protection (e.g. CUI, ICD 704), and intelligence oversight (e.g. DoDD 5148.13). The Contractor shall identify and mitigate risks (e.g., compliance gaps, emerging threats) in monthly status reports. Non-compliance may result in corrective actions, fee reductions, or termination. Training on key directives (e.g. EO 12333, DoDD 5240.02, DoDI O-5240.10) shall be completed within 30 days of hire, as specified in Section 4.1.

3 Performance Requirements and Objectives

The following performance objectives define the required outcomes for each functional area. Contractor personnel shall achieve these objectives to support DTRA’s

counterintelligence mission. Performance will be measured by the quality, timeliness, accuracy, and completeness of deliverables and services, as evaluated using the below listed methods. Unless otherwise stated, positions vacant for more than 60 days, barring coordination and supporting information, will count against their management Contractor Performance Assessment Reporting (CPAR) metric. The Contractor shall provide temporary backfills meeting 80% of qualifications. Backfills must achieve full qualifications within 30 days. All tasks shall meet 95% compliance unless specified; zero tolerance for security violations (defined as any unauthorized disclosure or non-compliance with Section 2.1 directives, verified by audits).

3.1 Counterintelligence Support to Insider Threat

Contractor personnel shall identify, analyze, and mitigate insider threats to DTRA personnel, technology, infrastructure, information, and facilities through proactive monitoring, reporting, and collaboration, achieving comprehensive threat detection and response.

Required Outcomes:

- Identify and report insider threat indicators from network traffic, system logs, User Activity Monitoring (UAM) data, and other artifacts with 100% accuracy ($\geq 95\%$ true positives in quarterly reviews); complete analytical support, referrals, and inquiry documentation within 72 hours of identification ($\geq 95\%$ compliance).
- Deliver briefings on insider threat to personnel and management with $\geq 95\%$ positive feedback on clarity and relevance; respond to internal/external information requests within 24 hours ($\geq 98\%$ compliance).
- Maintain effective information sharing with InTP working groups (CI, Personnel Security, Information Technology (J6), Office of General Counsel, Office of Inspector General, and Human Resources (J1) as needed), participating in weekly interactions; submit weekly status reports documenting accomplishments and events (e.g. unauthorized system use, data exfiltration) with 100% on-time delivery.
- Complete required certifications (Insider Threat Hub Operations Course, Detection Analysis Course, Certified Counter-Insider Threat Professional-Fundamental (CCITP-F) within 12 months of hire; submit certificates to COR within 7 days of milestones; apply security/CI/cyber expertise to resolve threats while ensuring 100% compliance with privacy laws (verified annually).

- Utilize UAM solutions per CNSSD 504 for real time analysis and evidence provision, supporting 100% of authorized inquiries; safeguard information per policies, signing NDAs/SOPs upon hire.

3.2 Counterintelligence Functional Services (Briefing/Debriefing, RDT&E, SCRM)

Contractor personnel shall deliver CI briefings/debriefings, support DTRA operational missions and activities, protect Research, Development, Test, and Evaluation (RDT&E) efforts from foreign threats, and provide CI support to SCRM to safeguard DTRA assets, ensuring comprehensive personnel protection and technology security.

Required Outcomes:

- Operate Briefing and Debriefing Centers (BDC) per DoD/DTRA Instruction 5240.06, providing pre/post-travel briefings/debriefings and applying knowledge of foreign intelligence entities (FIE) operations and terrorist modus operandi in preparing briefings and recommendations to travelers, including senior department officials, with 100% coverage for all DTRA travelers.
- Draft, review, and disseminate operation and intelligence information reports (IIRs) within 5 days ($\geq 95\%$ on-time) contributing to national level production.
- Provide CI support to DTRA operational missions and activities and recommend countermeasures for mitigation and countering foreign influence, RDT&E and protect from FIE via Counterintelligence Support Plans (CISP) per DoD O-5240.24 and Program Protection Plans (PPP) per DoDD 5200.39; provide SCRM support including Critical Program Information (CPI)/Critical Research Technology (CRT) identification, training (≥ 4 sessions/year).
- Conduct Limited Threat Vulnerability Assessments (LTVAs) for test locations/variations (≥ 15 /year), providing recommendations within 72 hours; offer on-site test support (pre/during/post) ensuring 100% protection of personnel/property/information (zero incidents); facilitate interagency liaison (≥ 6 monthly meetings) with zero unresolved issues.
- Complete CI threat assessment of RD contracts/awards, during source selection process, within 10 business days of receipt for support to RTPSO; manage threat assessments reports with 100% tracking accuracy; deliver tailored CI support to Research, Development, and Acquisition (CIRDA) training.

3.3 Counterintelligence All Source Intelligence Analysis

Contractor personnel shall produce timely, accurate CI analytical products to inform DTRA leadership and the IC on FIE threats, supporting force protection and Weapons of Mass Destruction (WMD) related missions.

Required Outcomes:

- Plan, research, and produce all-source CI assessments addressing FIE threats, delivering 24 short (2-10 pages) and 2 long (5-15 pages) reports annually with 100% compliance to ICD 203 and 206 standards (100% adoption rate); respond to associated requests for information (RFIs) within 48 hours of receipt ($\geq 95\%$ on-time per government or customer driven timelines).
- Publish consumer evaluations for cited intelligence within two weeks of product completion ($\geq 95\%$ on-time) to intelligence producers ($\geq 95\%$ completeness per analytical citation) achieving product usability, accuracy, and delivered on-time.
- Populate and maintain all analytical product records (e.g. evaluations, correspondences) per Standard Operating Procedures (SOP), completing records management archival within 10 days of finalization ($\geq 95\%$ compliance).
- Provide monthly, quarterly, and annual production statistics within five (5) business days post-period (95% on-time delivery).

3.4 Counterintelligence Cyberspace Support

Contractor personnel shall conduct defensive CI cyber activities to detect, identify, and deter cyber threats from FIE and Foreign Terrorist Organizations (FTO), supporting digital forensics examinations, proactive cyber threat hunts, and other defensive CI cyber activities.

Required Outcomes:

- Execute defensive CI Cyber activities per DoDD 5240.02, DoDI S-5240.23, and DTRA standards (100% compliance) using government provided tools (e.g. Splunk, Tanium) for cyber threat hunting and daily foreign cyber activity identification and reporting ($\geq 95\%$ reporting, e.g. operational reports and/or intelligence report); research and analyze emerging cyber-related methodologies and tradecraft used by FIE and FTO. At least one comprehensive trend analysis report shall be submitted monthly, including actionable insights and recommendations.
- Extract and analyze digital evidence from systems using forensic tools (e.g. Encase, FTK, AXIOM, Cellebrite) within 72 hours of receipt, preserving chain of custody (100% documentation, with no instance of compromised evidence integrity); examinations and forensics reports must meet DoW and DTRA standards for accuracy and completeness (within 5 business days of receipt; 48 hours of task completion).
- Support CI Cyber team under Lead direction; brief senior leadership on operational reports and intelligence products; compile and disseminate CI Cyber activities metrics via approved DoW systems and formatting standards (daily/monthly; 95% on-time and

accurate).

3.5 Full-Stack Developer Support to Counterintelligence

Contractor personnel shall conduct full-stack development in support of CI systems and databases while maintaining existing applications (e.g. CIMSID, Defense Ready) and developing new features (e.g. Dashboards, Reporting portals, etc.) to meet the evolving DTRA CI mission.

Required Outcomes:

- Execute full-stack development services; perform routine updates, fixes, and optimizations to ensure CI systems and databases remain functional and efficient ($\geq 99\%$ uptime and zero vulnerabilities in monthly scans); develop new features and functionalities based on user requirements to improve the application's capabilities (≥ 1 new feature or functionality upgrade per quarter with approval from DTRA CIO Change Control Board (CCB)).
- Diagnose and resolve technical issues reported by users and provide technical support via DTRA-approved tracking mechanisms (100% reporting compliance; 48 hours resolutions from receipt); comply with DoW cybersecurity standards (e.g. DoDI 8500.01; 8510.01) by collaborating with cybersecurity teams and applying Risk Management Framework (RMF) controls (monthly/quarter security compliance reports; evidence of patch implementations).
- Conduct code review and appropriate testing to ensure application stability and functionality (100% RMF/DoDI 8510.01 compliance; 100% monthly reporting compliance; updated code repositories); maintain and update technical documentation (quarterly), including system architecture diagrams, code repositories, and user manuals (within 48 hours of any approved change).

3.6 Collection Management

Contractor personnel shall manage intelligence reporting to ensure quality timeliness, compliance with IC standards, maintain accurate collection and dissemination processes, and act as primary outreach to counterintelligence functional managers, interagency partners, and counterparts.

Required Outcomes:

- Perform Quality Assurance (QA) and serve as release authority for Intelligence Information Reports (IIRs) and consumer evaluations (≥ 200 /year), ensuring facilitation of review and editing among counterparts to publish products within internal established government timelines ($\geq 95\%$ compliance); enforce internal reporting and evaluation standards to maintain ≤ 2 annual revisions agency wide.
- Deliver weekly IIR production statistics, with formal monthly, quarterly, and annual

statistical reports delivered within 5 days following the end of the reporting period (100% on-time); manage intelligence collection requirements (national, DoW, DTRA) and interface with Defense Intelligence Agency (DIA) personnel, responding to taskers weekly ($\geq 95\%$ compliance), and provide formal CI group training at least semi-annually.

- Maintain database roles and accounts, approve DIA authenticated account requests within 24 hours and update information monthly (100% accuracy); disseminate all analytical reports and products to classified networks within 3 days post-coordination, ensuring archival is completed with $\geq 95\%$ compliance.

3.7 Operations Support Specialist

Contractor personnel shall provide administrative support to ensure efficient briefing/debriefing operations and accurate operational tracking.

Required Outcomes:

- Manage Briefing/Debriefing Center (BDC) inbox/scheduling using current CI briefing/debriefing database (CIBD); print/post daily calendars with 100% accuracy; attend weekly branch/staff meetings.
- Support CI systems and database development; provide training to CI personnel on new features and functionalities.
- Update Learning Management System (LMS)/CIBD for Counterintelligence Annual Awareness and Reporting (CIAR) training attendance and surveys; review/add sign-in sheets weekly and send reports (attendance/stats) to branch chief.
- Provide quarterly/ad hoc stat reports; handle administrative tasks (e.g. printing questionnaires, room scheduling; ≥ 20 tasks/month) with 100% on-time scheduling/reporting.
- Maintain and schedule BDC and other briefing areas with 100% coverage by assigned agents and usage of space.

3.8 Onsite Lead (Performs CI Requirements)

The Onsite Lead shall provide senior-level oversight, coordination, and management of all contractor personnel and activities while performing hands-on CI tasks to support mission execution (duty split: 49% leadership/oversight, 51% direct CI contribution across functional areas).

Required Outcomes:

- Serve as primary point of contact for Contracting Officer's Representative (COR)/ Program

Manager (PM), representing Contractor in daily/weekly meetings (≥ 1 /week; 100% attendance) and resolving escalations (personnel issues, task conflicts); oversee team performance with monthly internal reviews/training to maintain $\geq 95\%$ overall AQL compliance.

- Coordinate resource allocation including surge support (Section 4.2) and ensure no position vacancies exceed 60 days; track/report Full Time Equivalent (FTE) utilization monthly ($\geq 98\%$ billable efficiency); submit quarterly team performance summaries to COR (100% on time).
- Perform direct CI tasks as required (e.g. high-priority Request for Information (RFIs) ≥ 5 /month, briefings ≥ 10 /year, threat assessments, SOP/Policy, tasking application coordinator) achieving outcomes equivalent to specialized roles (100% accuracy); facilitate cross-functional collaboration; maintain currency on new CI requirements and the impact to the Agency's mission.

3.9 Technical Surveillance Countermeasure (TSCM) Support:

The Contractor shall provide Technical Surveillance Countermeasures operational support, reporting, and program sustainment services in support of Government counterintelligence and protective operations requirements. Services include mission execution (CONUS/OCONUS), time-sensitive response support, deliverables production, data entry to Government systems of record, professional development, and limited administrative support, all in accordance with applicable security and safety requirements.

Required Outcomes:

- Execute TSCM mission activities as required that may include pre-mission coordination, on-site/remote operational execution, out brief, required reporting, and required system of record entries. Zero (0) security violations attributable to contractor actions/omissions.
- Time-sensitive responses to suspected technical device/anomaly/indicator requiring rapid notification and adherence to local incident procedures are escalated promptly and handled consistently with Government direction.
- Mission documentation package (e.g. after-action report) $\geq 95\%$ completeness and on time. Provide within 30 business days after completion of mission.
- All deliverables shall be clear, concise, accurate, and conform to Government templates and classification/marketing guidance. Enter required mission/event data into the Government designated USD(I) approved system of record within 5 Business Days of the mission or event, unless otherwise directed $\geq 95\%$ on time entries; $\geq 98\%$ data accuracy.
- TSCM specific Personnel Qualification, Certification, Recurring Training, and Professional Development requirements refer to Section 4.2.

- Deliver technical threat-based products and provide to the Government as required ($\geq 98\%$ accuracy and completeness) achieving product usability, accuracy, and delivered on time.
- Attend Government-approved conferences, meetings, and working groups to maintain technical currency and represent the program when directed. Contractor shall provide an actionable readout with recommendations and impacts on operations delivered within 10 business days after return ($\geq 90\%$ on time) and accepted first pass ($\geq 95\%$).
- The Contractor shall comply with OSHA requirements, installation safety rules, and Government directed safety procedures. When required by installation policy or contract terms, shall submit an Activity Hazard Analysis (AHA) (or equivalent) for applicable tasks. (AHA submitted by the Government required suspense ($\geq 95\%$ on time) and accepted with ≤ 1 revision cycle ($\geq 95\%$)).
 - The Contractor shall use Personal Protective Equipment (PPE) as required by hazard analysis and site requirements. PPE compliance during observed work activities ($\geq 95\%$).
 - The Contractor shall ensure personnel can safely deploy, transport, and operate required TSCM equipment in operational environments, which may include confined spaces, elevated locations, and physically demanding conditions, while maintaining safe work practices and compliance with fall protection requirements where applicable. Zero (0) repeat violations of the same type within a quarter. Incident/near-miss notification: notify Government within 1 hour and provide written summary within 1 business day (100%).
- The Contractor shall perform travel only when authorized in writing by the COR/KO and in accordance with contract terms. 100% of trips have written COR authorization prior to travel and within limits. Refer to Section 4.3 and 4.4 regarding Insurance and Certifications terms.

Acceptable Quality Levels (AQLs):

Functional Area	Key AQL Metrics	Measurement Method
3.1 CI support to Insider Threat Program (InTP)	100% accuracy in assessments	Tracking logs; Quarterly Audits of artifacts
3.2 CI Functional Services	95% reporting quality and timeliness	Operational reports and Intelligence Information Reports (IIRs)
3.3 CI All Source	95% product quality; 100% Request for Information	Product and peer reviews;

Intelligence Analysis	(RFI) timeliness	response trackers
3.4 CI Cyberspace Support	100% Request for Support (RFS) timeliness	Forensic exams; system logs
3.5 Full-Stack Developer Support to CI	95% tool uptime and zero vulnerabilities; 100% reporting compliance	System monitoring and maintenance
3.6 Collection Management	100% timeliness; ≤ 2 revisions annually; 95% reporting quality	Database audits; statistical reports
3.7 Operations Support Specialist	100% on-time scheduling/reporting	Calendar/database checks
3.8 Onsite Lead	95% team performance	Quarterly evaluations
3.9 Technical Surveillance Countermeasures (TSCM) Support	95% reporting completeness and timeliness; 98% accuracy	Product and peer reviews

4 General Requirements

4.1 Security and Special Considerations

All personnel require **TOP SECRET//SCI** clearance per ICD 704 and Contract Security Classification Specification (DD Form 254, Section 2.0). Verify and submit clearances via Defense Information System for Security (DISS) prior to assignment (Visitor Authorization Request (VAR) to GQDD614 for SCI and GQDD612 for collateral clearances). Comply with the 32 CFR Part 117 (previously known as the National Industrial Security Program Operating Manual (NISPOM)), and any revisions to that manual. The term of the VAR shall be for the term of the contract. No unauthorized releases of DTRA infrastructure information. CI Polygraphs may be required for positions with SCI clearance; failure may result in removal. The Onsite Lead shall ensure team-wide compliance, track expiration deadlines and coordinate timely renewals when needed.

Counterintelligence Support to Insider Threat Program

Counterintelligence Functional Specialists

Counterintelligence All Source Intelligence Analysts

Counterintelligence Cyberspace Support

Full-Stack Developer Support to CI
Collection Managers
Operations Support
Onsite Lead
Technical Surveillance Countermeasures (TSCM) Support

4.2 Training Requirements

Prior to in-processing, all contractors shall complete: North Atlantic Treaty Organization (NATO) brief, Personally Identifiable Information (PII)/Cyber Awareness training and provide certificates to the Onsite Lead, COR, and DTRA Personnel Security (PerSec) staff for in-processing.

All contractors shall complete within thirty (30) days of hire (annually thereafter): Antiterrorism Level I (refresher after initial course), Information Security, Ethics, Operations Security (OPSEC), Counterintelligence Awareness and Reporting (CIAR), Intelligence Oversight, and key Sections 2.1 directives (e.g. EO 12333, DoDD 5240.02, DoDI O-5240.10, DoD 8140.03). Submit certificates to COR (via Onsite Lead) within seven (7) calendar days. Additional DTRA training at Government expense, if directed.

4.2.1 TSCM, CI Cyberspace Support, and Developer Qualification and Certification Requirements

Contractors shall ensure all personnel performing functions meet the following requirements prior to performing independently:

- TSCM:
 - Maintain a current Interagency Training Center (ITC) Practitioner certification (or Government approved equivalent) for everyone performing duties.
 - Complete minimum of 40 hours of TSCM-related training annually
 - First Aid/CPR/AED: Maintain current First Aid/CPR/AED certification for personnel as specified by the Government.
 - Additional training includes but is not limited to: radiation safety training (required to operate X-Ray equipment), site specific requirements (wildlife safety, protected species), and/or familiarization/operation/maintenance of any new equipment/training essential to complete the mission.
- TSCM, CI Cyberspace Support, and Developer requirement:
 - DoDM 8140.03 – Meet and maintain all applicable DoDM 8140 baseline and role-based qualification requirements for assigned duties, as designated by the Government.

- CI Cyberspace Support:
 - Complete DoW Cyber Crime Center (DC3) Cyber Training Academy (CTA) Cyber Crime Investigator (CCI) training program
 - CCI training program consists of Introduction to Networks and Computer Hardware (INCH), Cyber Incident Response Course (CIRC), Windows Forensic Examinations (WFE, and Forensics and Intrusions in a Windows Environment (FIWE).
 - All training courses are provided on-site at DC3 CTA training facility in Columbia, Maryland.
 - Attendance and completion of each course shall incur no additional cost to the government. Contractor shall submit completion certificates to COR (via Onsite Lead) within 5 business days.

Report any Questionable Intelligence Activities or Significant/Highly Sensitive Matters per DoDD 5448.13 to CI or Agency Intelligence Oversight (IO) Officer, DTRA Inspector General (IG). Exceptions for skill(s) acquisition within 1 year at no cost to Government.

4.3 Insurance and Certifications

The contractor shall, without additional expenses to the Government, obtain all licenses, insurance, and certifications required to perform the work within or outside the DTRA facilities and shall comply with all applicable federal, state, applicable military installations and local laws. See Clause 52.228-10 for more information regarding vehicle and liability insurance requirements. The contractor shall ensure that all personnel are properly trained and competent to perform the assigned tasks. The contractor personnel operating Government vehicles (GOV) or Government furnished transportation shall have a valid U.S. driver's license and shall comply with all applicable Fort Belvoir and other DTRA locations, installation, federal, state, and local driving laws. The contractor shall ensure a copy of all training certificates and licenses are kept on file and a copy provided to the COR when the assigned contractor personnel report to work. All renewals of certificates and licenses must be kept current, and a copy provided to the COR within five (5) business days after renewal. Unless prohibited by circumstances beyond employee control, motor vehicle incidents or accidents shall be reported to the Government within 1 hour.

4.4 Travel Requirements (CONUS and OCONUS)

Travel is primarily conducted by CI Functional Services Specialists and TSCM. CI Functional Services Specialists and TSCM contractors must maintain a valid United States Passport. Contractor employees may be required to travel up to 50 percent of the time. Contractor employees may be required to travel with less than 48-hours' notice (short notice) in support of DTRA missions worldwide, that may include high-threat areas. Contractor employees may be required to travel to attend national level conferences, meetings or symposiums in support of DTRA missions or to participate in DTRA exercises or missions. Limited travel may be required for work

performed at other DTRA locations and facilities worldwide. Travel will be identified as mission dictates. The contractor is responsible for all medical/immunizations expenses associated with travel to include emergency medical services for and during travel. All travelers must maintain active and up-to-date personal health insurance.

The contractor must obtain approval for all travel outside of local travel area in writing from the COR and track all travel expenses for submission. Unless prohibited, Contractor travel costs incurred outside of the local area, along with associated per diem costs, shall be consistent with the Joint Travel Regulations (JTR). When unable to comply with that threshold, supporting documentation must be provided to the COR/KO for prior approval. . All travel shall be approved by PM/COR in writing (email is acceptable for short notice travel) in advance.

OCONUS Support:

The contractor, in conjunction with the Command or Agency staff, will make necessary arrangements for required visits and mission support activities.

4.5 Government Furnished Equipment (GFE)/Materials/Facilities

Reasonable Accommodations:

The Government shall provide Sensitive Compartmented Information Facility (SCIF) workspaces, office facilities, equipment (desks, computers, phones, printers), and access will be provided for classified networks for the preparation and storage of SCI data and any SCI document annexes associated with the efforts described in this PWS.

Any accommodation not identified above are the responsibility of the contractor for their personnel in the performance of their job (i.e. special needs such as chairs, wheelchairs and keyboards) and must abide by prevailing Government standards, to include, but not limited to Section 889 compliance.

Contractor Purchased Government Material (GFM):

If the contractor is required to purchase any GFM, all purchases of hardware and software shall be in accordance with (IAW) the procedures of FAR Part 45 and the Defense FAR (DFAR) and COR approval shall be obtained prior to any purchase being made shall be approved to purchases being made, by the COR, and shall be considered Government Property. As such, all care, maintenance, and considerations apply the same as it would for GFE hardware of software. The contractor shall be liable for government property in their possession pursuant to FAR 52.245-1, as applicable.

Government Furnished Material for Contractor Use On/Off-site:

DTRA may provide Government equipment to the contractor for use onsite and offsite. The contractor shall comply with the contract clauses for accountability of government property in the possession of contractors. The Master Government Property List (MGPL) shall be updated

at the time any new equipment is issued to the contractor by the government.

The MGPL shall include all equipment/property provided to the contractor, including equipment transferred between projects, broken and obsolete equipment, and items purchased outside the United States.

Ninety (90) days prior to Contract expiration, the contractor shall submit a final MGPL suitable for closeout purposes containing use/disposition recommendations.

The MGPL shall be delivered electronically in a spreadsheet using Microsoft Office Excel. Abbreviations are not allowed. (CDRL A007)

4.6 Personnel Requirements

All personnel must be U.S. citizens. The Onsite Lead shall verify team qualifications upon initial hiring and annually thereafter. Positions shall not remain vacant for more than 60 days. If a temporary backfill is utilized, the individual must meet 80% of the LCAT qualifications. Backfills must achieve full qualifications within 30 days. The Onsite Lead position shall not be vacant >5 consecutive business days; immediate senior-level backfill required. The Operations Support Specialist position shall not be vacant >2 consecutive business days; immediate backfill required.

4.7 Appearance of Contractor Employees

It is essential that a professional image be projected, and the contractor employees' attire shall be clean, pressed, and fitted properly. Contractors shall not wear jeans unless approved in advance by the COR. DTRA on-site contractor staff represent DTRA core values to visitors, dignitaries, and civilian, contractor and military colleagues, host as well as other tenant organizations. With the exception of attire requirements for identified special occasions at the geographically separated unit performance location, communicated by the performance location lead, DTRA on-site contractor staff shall be professional, both in demeanor, and appearance, suitably attired, on most occasions in business casual but with a readily available professional attire, and as necessary, adjustments from business casual to business formal shall be expected and met. Any dispute regarding the professionalism of the contractor's on-site staff shall be referred to the COR and contractor's performance location Onsite Lead for immediate resolution.

4.8 Work Environment and Schedules

Place of Performance: Work under this effort may be performed at DTRA's locations in Kirtland Air Force Base, Albuquerque (ABQ), New Mexico; Travis Air Force Base, California; Kleber Kaserne, Kaiserslautern, Germany; and primarily, DTRA locations in the National Capital Region (NCR) area. Further, contract support may be required at locations not specified in this PWS. Support requirements may create a need for travel within local areas, Continental United States (CONUS) or Outside Continental United States (OCONUS).

For situational reasons to the benefit of the Agency (such as when the DTRC is physically

closed but open virtually), contractor employees, primarily in the NCR, may be permitted to work off-site using Government Furnished Equipment (GFE) with prior PM/COR approval. When working off-site, contractors must use GFE, ensure the GFE is properly working, must use the current messaging application and be reachable via email. Building and workspace access must conform to all security protocols for entry, access & exit/closure. It is the contractor's responsibility to identify work to be completed during the 8 hour workday. The approved work plan identifying work accomplished/performed will be submitted to the Onsite Lead and COR at the end of each offsite workday. Contractors are not permitted to work from offsite locations without an approved work plan.

During administrative Government closures, employees may request permission to work remotely. If the mission or the tasks assigned to the employee don't lend themselves to telework, or if the employee requires an onsite secure system access to perform their assigned mission duties, these employees may work chargeable hours at the assigned duty station, in lieu of telework, with advance written COR coordination & approval. If the employee cannot meet these conditions, the employee shall defer to their company's policies regarding use of annual leave or admin time on these days.

Government building/base closure due to Weather or National Security is safety matter. In these instances, unless an individual is identified as an excepted employee, then the preceding administrative closure caveat for "allowable" onsite work is rescinded. During a Weather or National Security closure, a contracted employee may be permitted to TW with prior written permission from the COR or they shall defer to their Company's policies regarding use of annual leave or admin time for the duration of the closure. Only approved TW hours should be charged to the contract.

Alternate Work Location Policy: Guidelines for alternate work locations or telework for contractors in alignment with the administration and reporting requirements related to Government Property as outlined in FAR 45.000 (b)(5).

- **Authorization:** In coordination with the Onsite Lead and mission requirements, off-site work using Government Furnished Equipment (GFE) may be authorized by the PM/COR if telework schedule differs from current administration guidance.
- **Approval Process for extenuating circumstances:** Approved work plans for an alternate work location will be situational and dependent on the nature of work, requirements, and pre-established capabilities to perform work (e.g., additional telework over 1 day per work week, holiday falls within work week, etc.)
 - a) All authorizations require prior COR/PM approval with email confirmation to ensure an official date is associated with the approval, not exceeding 40-hour weeks.
 - b) Approval may be revoked at any time at the discretion of the COR/PM.
 - c) Contractors must adhere to all terms and conditions outlined in the approved work plan while working from an alternate work location.

- d) The approved work plan identifying work accomplished/performed must be submitted to the Onsite Lead/COR at the end of each offsite workday.
- e) Contractors are not permitted to work from offsite locations without an approved work plan on file with COR/PM.
- f) Additional situational considerations may be applied/removed at the COR/PM's discretion without notice.
- g) Additional holidays may be observed with prior written COR coordination (non-billable).

4.9 Normal Hours of Operation

Support Hours: The Contractor shall support DTRA Force Protection (FP) operations for the totality of the full-time equivalent (FTE) associated with their labor category. Each employee will propose a standard 8-hour duty day for themselves for approval by the Vendor and the COR. Contractor duty hours shall be scheduled between 0630-1800, Monday through Friday, with daily core hours of 1000-1200. Contractors will not start work before 0630, nor work later than 1800, unless given prior written approval by the COR. If the employee chooses to incorporate a 30 - 60 minute lunch break into their schedule the time allotted for a lunch break shall not be attributed to the FTE hours of a position and will extend the employee's daily schedule to 8 ½ - 9hrs for the day. This schedule will be the employee's assigned duty schedule for their performance under this contract unless/until a new schedule is proposed and reapproved by the Vendor and the COR. Contractor employees may temporarily alter the hours of their duty schedule based on work tempo with prior written approval from PM/COR. Contractors in Key Personnel positions may be required to adjust their duty schedule as necessitated by assigned tasks and/or real world events. Standard work hours shall be Monday through Friday during normal duty hours except for the following Federal Holidays:

Government Recognized Holidays:

New Year's Day	Labor Day
Martin Luther King's birthday	Columbus Day
President's Day	Veterans Day
Memorial Day	Thanksgiving
Juneteenth	Christmas
Independence Day	

Note 1: During a surge or an adverse event, contractors work hours may change to ensure mission support is required. Hours during these instances may cover day, night and swing shifts (e.g., 0600 – 1430 or 1800 – 0230)

4.10 Other Direct Costs (ODCs)

ODCs are reimbursable costs for items not provided as GFE, supporting performance (per FAR 31.205 and DFARS 231.205).

Allowable ODC Category	Examples	Annual Cap	Approval Process
Specialized Tools/Software	Commercial forensic tools (e.g. AXIOM); software licenses	≤\$500K	COR (30 days pre-purchase) + KO approval over annual cap
Personal Protective Equipment (PPE) (Reference Section 3.9 TSCM)	E.g. Boots, hard hats, etc.	≤\$10K	COR provisional; KO final for recurring; Contractor shall provide cost estimate prior to purchase
Training and Certification (Reference Section 4.2.1)	Certification exam fees for team	≤\$10K	COR provisional; KO final for recurring; Any additional DoD or required government training/certification associated with successful performance of role, that is not a pre-requisite for employment, will be considered for reimbursement.

ODC Guidance: Submit requests to COR (via Onsite Lead) 30 days pre-purchase with justification, cost estimate, and alternatives. No ODCs for general overhead. Track via monthly ODC reports (Excel with receipts, due on the 10th of following month). Reimbursement: Actual/allowable costs with 5% admin fee cap; audit rights per FAR 52.216-7. The Onsite Lead shall certify ODC requests for necessity and compliance. **(CDRL A008)**

5 Quality

5.1 Quality Assurance Surveillance Plan (QASP)

The Government shall evaluate the contractor's performance under this contract IAW the Government's Quality Assurance Surveillance Plan (QASP). This plan is primarily focused on what the Government must do to ensure that the Contractor has performed IAW the performance standards. The QASP identifies the standards for completeness, reliability, accuracy, timeliness, and quality and how the standards will be assessed. It defines how the performance standards will be applied, the frequency of surveillance, and the minimum acceptable quality level(s). For those tasks listed on the Acceptable Quality Level (AQL) table, the Government COR or evaluators will follow the methods of surveillance specified in the QASP and record all surveillance observations. When an observation indicates defective service performance, and requests corrective action from the contractor, the COR will require the contract manager or

representative at the site to approve the observation. The initialing of the observation does not necessarily constitute concurrence with the observation, only acknowledgment that he or she has been made aware of the defective performance, the contractor shall notify the COR in writing within 24 hours of correction of a discrepancy. If deficiencies are not corrected within the required time frame, COR shall notify the KO for action. Government surveillance of tasks not listed in the AQL or by methods other than those listed in the QASP (such as provided for by the Inspection of Services clause) may occur during the performance period of this contract. Such surveillance will be done according to standard inspection procedures or other contract provisions. Any action taken by the KO as a result of surveillance will be IAW the terms of this contract.

5.2 Monthly Status Meetings

Regularly scheduled meetings shall be held monthly with the PM, COR, KO, Contract Specialist (CS) and all pertinent personnel from the Vendor's staff (i.e. – onsite lead(s), contract management, finance, etc.). These meetings will provide an opportunity for all parties to address performance successes, challenges and any potential upcoming changes in staffing or contract elements. Meetings may be cancelled due to unforeseen conflicts but should resume as regularly scheduled as soon as possible. Written minutes of the monthly meetings will be recorded and included in the contract file. The COR, KO/CS and Vendor will have an opportunity to comment on the meeting minutes before they are finalized and signed by the KO or contract specialist. The COR and the Vendor need not wait for these meetings to correspond directly about performance concerns. The KO and/or CS shall be included in all direct correspondence so they can maintain situational awareness of contract performance.

5.3 Performance Evaluation Meetings

The KO may require the Onsite Lead and/or Site Lead Alternates to meet with the KO, CS, COR, and other Government personnel as deemed necessary. The contractor may request a meeting with the KO when he or she believes an additional meeting is necessary. Written minutes of any such meeting must be recorded in the contract and signed by the contract manager and the KO or CS. If the contractor does not concur with any portion of the minutes, such non-concurrence must be provided in writing to the KO within seven (7) calendar days following receipt of the minutes.

5.4 Transition

Transition Plan (CDRL A005): The Contractor shall develop and execute a comprehensive transition plan (CDRL A005) starting three (3) months prior to contract expiration, covering both onboarding (post award) and outgoing (pre-expiration) transitions. The plan ensures ≤5% downtime in critical functions (e.g. reporting, briefings) and zero security breaches during handoff. The Contractor shall lead transition coordination with the incoming Prime by holding formal weekly meetings starting ninety (90) days prior to contract expiration or upon execution of any follow-on contract, whichever comes later.

Required Transition Elements shall include, but are not limited to:

- a) **Knowledge Transfer:** Document and transfer specific knowledge (e.g. CI processes, tool configurations, ongoing assessments) to successor Contractor or Government; up to 2 weeks overlap shadowing for Key Personnel (e.g. Onsite Lead, TSCM, etc.)
- b) **Service Continuity:** Review, evaluate, and transition current support services (e.g. databases, workflows) ensuring continuity for all functional areas (Section 3.0); $\geq 95\%$ knowledge transfer satisfaction per successor feedback survey.
- c) **Data and Documentation:** Transition of historic data to successor per ICD 704 for classified materials; transfer all business/technical documentation (e.g. SOPs, MGPL, etc.) with ≤ 2 business days for system access handoff.
- d) **Asset Management:** Disposition of Contractor-purchased Government-owned assets; transfer GFE/GFI with inventory assistance per Section 5.0; full asset reconciliation within 15 days post transition.
- e) **Security Handover:** Turn-in all Government keys, ID/access cards, security codes; conduct final SCIF walkthrough with zero discrepancies; secure transfer of classified materials per DD Form 254 and ICD 704 (include chain of custody for digital evidence Section per 3.4).
- f) **Personnel Coordination:** If incumbent personnel transition to successor, coordinate dates to avoid billing overlap; ensure Government billed by only one Contractor; incumbent shall brief/train successor for 30 days pre-expiration on selected functions (e.g. shadowing for mission execution), coordinated to avoid operational interference (as applicable by program).

Success Metrics: $\geq 95\%$ knowledge transfer satisfaction (successor survey); ≤ 2 business days for system access; full asset reconciliation within 15 days; $\leq 5\%$ downtime in critical functions. Any disruptions $\geq 5\%$ trigger corrective actions at Contractor expense.

Transition Support: In accordance with the Government-approved Transition Plan, the Contractor shall assist the Government in planning and implementing a complete transition from the incumbent to the successor. The transition support shall include formal coordination with Government staff as well as successor staff and management. The transition support shall also include seamless transfer of existing policies and procedures, and copies of contract deliverable items.

5.5 Organizational Conflict of Interest (OCI) Mitigation (CDRL A006):

The Government has determined that this contract may give rise to potential organizational conflicts of interest (OCI). The vendor for this requirement will have unique access to DTRA information, beyond that which is typically afforded to commercial and academic entities. The vendor's employees will have access to Government-sensitive and contractor-sensitive / proprietary data as well as to Government employees, equipment, installations and property. Access to this information could potentially provide an unfair competitive advantage to the vendor for future contracts. Moreover, the nature of the work required by this contract could place the vendor in situations where their ability to render impartial advice to the Government could be impaired due to competing interests of the organization at large. Restrictions upon use

of Government information and the requirement to protect proprietary information are permanent.

Mitigation Plan: The OCI Mitigation Plan is a living document. At a minimum, the contractor shall evaluate and, if necessary, revise this plan annually. More frequent evaluations, and revisions, shall be performed and submitted as necessary. The Contractor shall provide a mitigation plan to address conflicts of interest, per the DTRA clause, 252.209-9000. Procedures and safeguards shall be outlined to ensure that any actual, or perceived OCIs, are avoided, neutralized, or alleviated during the performance of the CI Support Services contract. Any known OCIs shall be identified in the plan and immediately added as/if new OCIs are determined.

5.6 Contracting Officer's Representative (COR)

The COR will be nominated by the requiring activity and appointed by the KO by separate letter. A copy of the COR's appointment letter will be sent to the awarded Contractor, identifying the designated duties and limitations of the COR. The COR's designated duties will describe the level of responsibility (inspection only – or inspection and acceptance). The COR's oversight responsibilities are not limited to the QASP since all listed contract requirements or tasks are expected to be satisfactorily met by the contractor. The COR is authorized to conduct oversight on any and all tasks or requirements and report observations to the KO. The COR is not authorized to change any terms or conditions in the contract that pertain to cost, schedule, performance, quality, quantity, or other legal aspects of the resulting order. A modification executed by the KO is required to incorporate these types of changes. Any work done above and beyond the scope of the contract, and supporting PWS, will be completed at the vendor's expense in the absence of such a modification.

5.7 PERFORMANCE REQUIREMENTS SUMMARY:

Performance Objective	Standard	Performance Threshold	Method of Surveillance
PRS#1 - Review and Evaluation of AQLs	Section 3	Section 3	Section 3
PRS#2 – Personnel Recruitment, Replacement, Retention	Staff all positions with qualified personnel and fill personnel losses in accordance with contract requirements.	COR notification within 48 hours of personnel loss. Replace personnel within 60 days of loss.	Monthly COR Staffing Review Status & Roster Report

Performance Objective	Standard	Performance Threshold	Method of Surveillance
PRS#3 – CDRL Delivery	All CDRLs delivered on time, in accordance with contract requirements.	100% completion	Monthly COR Review
PRS#4 - Contract Cost	Contract cost is within budgeted expectations. Variances are annotated on COR reports.	100% completion	Monthly COR Review

6 Key Personnel

The Government considers the following positions to be Key Personnel: One (1) Onsite Lead, and two (2) TSCM positions. Resume and supporting documentation/certifications for Key Personnel must be provided to the COR & KO for review and approval before onboarding can commence. Duties for the Onsite Lead are the responsibility of the vendor regardless of vacancy. The Contractor is responsible for designating a backup that provides uninterrupted services with an employee(s) that possesses equal, or better, qualifications when the Operations Support Specialist is absent for more than two (2) consecutive business days and five (5) consecutive business days for Onsite Lead.

When departure of Key Personnel is anticipated, the Contractor shall submit a resume and any required supporting documents/certifications for the projected replacement to the COR thirty (30) days prior to the Key Personnel's departure. The Contractor is responsible for back-filling the position in a manner that provides uninterrupted services with an employee that possesses equal, or better, qualifications as the departing employee. The COR must approve the Contractor's proposed replacement before a new employee may assume the departed Key Personnel's duties.

When departure of Key Personnel is unexpected, the Contractor is responsible for back-filling the position within 60 days, barring coordination and supporting information, of the Key Personnel's departure with an employee that possesses equal, or better, qualifications as the original employee. The Contractor must submit a resume for the proposed substitute and any required supporting documents/certifications for the projected replacement. The designated COR or KO must approve the Contractor's proposed replacement before a new employee may assume the departed Key Personnel's duties.

All Key Personnel shall always have means of communication, by e-mail and/or text, with the COR. Key Personnel must be able to communicate fluently in English both verbally and in writing.

Specific positions, and their corresponding site locations, designated as Key Personnel, are identified in the Labor Category (LCAT) list associated with this PWS.

7 Contract Deliverables

The contractor shall provide all deliverables per the schedule and IAW the contract Data Requirements Lists (CDRLs) DD Form 1423-1. Late deliverables will negatively affect their CPARs report. The Onsite Lead shall review all submission for quality before delivery to COR. All deliverables in ICD 203-compliant formats (Word/PDF); electronic submission.

The required Contract Data Requirements List (CDRL) items for this effort are summarized below:

CDRL	PWS Para	Title	Final Due
A001	7.1	Monthly Financial Report	7 WDAEOM
A002	7.1	Monthly Status and Performance Report	7 WDAEOM
A003	7.1	Payment History Report	60 DAEO option year/ contract
A004	7.1	Closeout Funds Available for Deobligation Report	90 Days DAEO Base/option years
A005	5.4	Transition Plan	90 Days prior to contract expiration
A006	5.5	Organizational Conflict of Interest (OCI) Mitigation Plan	60 DACA
A007	4.5	Government-Furnished Equipment/Materials/Property (GFE/GFM/GFP) MGPL	7 WDAEOM
A008	4.10	ODC Reports	10 WDAEOM

DACA = Days after Contract Award

DAEO = Days after End Of

DAEOQ = Days after End of Quarter

EOFY = End of Fiscal Year

WDAEOM = Working Days after End of Month

7.1 Monthly and Final Reports

The contractor shall provide a monthly **Financial Report** five (5) working days after the end of each month that provides, by Contract Line-Item Number (CLIN), the following cost information: 1) hours worked for each employee; 2) travel costs incurred per trip; 3) total funds expended during the month; 4) cumulative total costs expended; and 5) total obligated funds remaining. The monthly reports will map directly to Wide Area Workflow (WAWF), invoices submitted for each active CLIN and indicate the calculations for the monthly contract invoice

credit for gaps in contractor performance (if applicable) (**CDRL A001**). As this is a CPFF contract, the contractor shall submit a draft copy of each monthly invoice to the COR/PM, with a courtesy copy to the CS, for review prior to its official submission into WAWF. The COR will have three (3) full business days to review the draft invoice for accuracy and/or comment before submission into WAWF. The draft invoice shall not be construed as a proper invoice in accordance with FAR 32.9. The contractor shall provide all receipts above a certain dollar threshold, to be determined by the COR, in conjunction with their invoice submission.

The contractor shall provide a monthly **Status and Performance Report** seven (7) working days after the end of each month that provides work completion, status of work in progress, problems encountered, and problems resolved (**CDRL A002**).

The contractor shall provide a **Payment History Report** not later than sixty (60) days after the end of each contract base/option year that includes all invoice/voucher numbers, date of invoice/voucher, amount billed by CLIN and ACRN and payment amount and date received by CLIN and ACRN for the contract year and cumulative from date of award to the end of current year (**CDRL A003**).

The contractor shall submit a **Closeout Funds Available for Deobligation Report** with a copy of the final invoice report within ninety (90) calendar days **after** the expiration of the base period of performance and expiration of each exercised option period of performance (if applicable). A bilateral contract/order closeout modification will be forwarded to the contractor by the Contracting Officer and must be signed by the contractor and returned to the Contracting Officer within 30 calendar days of issuance of the modification (**CDRL A004**).
