

Statement of Work

1. Scope:

- The 334th Training Squadron Air Traffic Control (ATC) course requires the software licenses and service capabilities below from an ATC radar simulator. The schoolhouse will retain all appropriate rights and control of course curriculum and material.

2. License:

- Provide Windows OS based ATCoachGE and ATVoice licenses for each appropriate workstation.

3. Contractor shall perform/provide the following:

- Provide shipping, configuration, installation, and troubleshooting of system
- Provide up to eighty (80) hours virtual software training
- Provide one (1) year warranty system configuration and troubleshooting
- Create/provide configuration for Canyon Approach (KCYN) database
- Provide five (5) controller positions, three (3) pseudo pilot positions, one (1) supervisor position, one (1) server
- Equipment provided by Contractor for each Emcor lab configuration, six (6) labs:
 - 1) Ten (10) Standard keyboards with mice.
 - 2) Associated power, display, and networking cables
 - 3) Four (4) 32" widescreen LCD monitors.
 - 4) Eight (8) 15" touchscreen monitors
 - 5) Two (2) 24" widescreen LCD monitors
 - 6) Two (2) 24" touchscreen monitors
 - 7) Five (5) 22" monitors
 - 8) Nine (9) Small form factor workstation w/Windows Operating System
 - 9) One (1) Windows Server
 - 10) Four (4) USB Footswitches
 - 11) Five (5) Headset Interface Units
 - 12) Eleven (11) noise-canceling PTT headsets
 - 13) Five (5) STARS QWERTY Keyboards with associated trackballs
 - 14) One (1) Strip Printer
- Equipment provided by Contractor for each non-Emcor lab configuration, three (3) labs:
 - 1) Ten (10) Standard keyboards with mice.
 - 2) Associated power, display, and networking cables
 - 3) Four (4) 32" widescreen LCD monitors.
 - 4) Eight (8) 15" touchscreen monitors
 - 5) Three (3) 24" widescreen LCD monitors
 - 6) Two (2) 24" touchscreen monitor
 - 7) Two (2) 32" curved widescreen LCD monitors
 - 8) Nine (9) Small form factor workstation w/Windows Operating System
 - 9) One (1) Windows Server
 - 10) Four (4) USB Footswitches
 - 11) Eleven (11) noise-canceling PTT headsets

Statement of Work

- 12) Five (5) Headset Interface Units
- 13) Five (5) STARS QWERTY Keyboards with associated trackballs
- 14) One (1) Strip Printer

- Equipment provided by Contractor for each dorm configuration, two (2) labs:
 - 1) Five (5) Standard keyboards with mice.
 - 2) Associated power, display, and networking cables
 - 3) Four (4) 32" widescreen LCD monitors.
 - 4) Four (4) 15" touchscreen monitors
 - 5) Four (4) Small form factor workstation w/Windows Operating System
 - 6) One (1) Windows Server
 - 7) Four (4) USB Footswitches
 - 8) Four (4) noise-canceling PTT headsets
 - 9) Four (4) STARS QWERTY Keyboards with associated trackballs
- Equipment provided by Contractor for update to current lab:
 - 1) Associated power, display, and networking cables
 - 2) Two (2) 32" widescreen LCD monitors.
 - 3) Two (2) 15" touchscreen monitors
 - 4) One (1) 24" touchscreen monitor
 - 5) Two (2) STARS QWERTY Keyboards with associated trackballs
 - 6) Two (2) Small form factor workstation w/Windows Operating System
 - 7) Two (2) Headset Interface Units
 - 8) Two (2) Noise Cancelling PTT Headsets
 - 9) One (1) Strip Printer

4. The platform must have the following capabilities:

- Must provide radar air traffic control training using ATCoach software like what is used on Standard Terminal Automation Replacement System (STARS).
- Must provide radio simulated voice capabilities.
- Must be compatible with the Windows Operating System.
- Must be compatible with USB/HIU headsets.
- Must be compatible with USB Footswitches.
- Must be compatible with STARS QWERTY Keyboards and with associated trackballs.
- Must support lessons and/or content based on Specialty Training Tasks (STS) items and objectives defined and/or developed by the User.
- Must be compatible with scenarios built to replicate radar user-developed training scenarios.
- Must have administrative editing software to develop content.
- Must operate without internet/WIFI connection, i.e. be stand-alone software.
